# PHYSIOGRAPHY

**G**EOGRAPHICALLY the mass of land today called India consists of the territories contained in the Union of India and the Portuguese possessions of Goa, Daman and Diu.

The State of Pondicherry, Karikal, Mahe and Yanam (formerly French) is a de facto but not de jure part of India, though a treaty for a de jure transfer has been signed. It may be added here that this treaty awaits ratification by the Governments of India and France.

The country is divided into 14 States and six Territories. The latter are under Central administration.

The fourteen States (with the capital towns in brackets) are:

Andhra Pradesh (Hyderabad), Assam (Shillong), Bihar (Patna), Kerala (Trivandrum), Madhya Pradesh (Bhopal), Madras (Madras), Bombay (Bombay), Mysore (Bangalore), Orissa (Cuttack), Punjab (Chandigarh), Rajasthan (Jaipur), Uttar Pradesh (Lucknow), West Bengal (Calcutta), Jammu and Kashmir (Srinagar).

The six Territories (with capital towns in brackets) are:

Delhi (Delhi), Himachal Pradesh (Simla), Manipur (Imphal), Tripura (Agartala), the Andaman and Nicobar Islands (Port Blair), the Laccadive, Minicoy and Amindivi Islands.

These States and Territories came into being on 1st November, 1956.

India is about 1,700 miles from east to west, and about 2,000 miles from north to south. Its land frontier is about 8,200 miles long and the sea frontier about 3,000 miles. The total land area is 1,269,640 sq. miles. The total population is 350,871,394† (1951 census) a little less than one-sixth of the population of the whole world.

The land frontier with Pakistan is about 1,000 miles long (east and west together).

In shape India is like a triangle with its base resting on the Himalaya Mountains in the north and its apex running far into the ocean in the south. At the southern extremity the triangle tapers with a pear-shaped curve to a point called Cape Comorin.

India lies entirely to the north of the equator. From south to north including Kashmir, it stretches from 8° north latitude to 37° north latitude, with the Tropic of Cancer cutting it roughly into two halves. West to east it stretches from about 66° 20' east longitude to 97° east longitude.

Broadly speaking, India is shut off from the mainland of Asia by the Himalaya Mountains, the highest mountain range in the world. Going from west to east along the country's land frontier are Pakistan, Chinese Turkestan, Tibet, China, Burma and Pakistan. In the south, the country is surrounded on all sides by water—the Arabian Sea in the west, the Indian Ocean in the south and the Bay of Bengal in the east.

India is so vast and diversified that expressions like 'average rainfall', 'average temperature' have no meaning. The average annual rainfall in the Thar desert is 4 inches, while that in Cherrapunji is 425. Similarly places in Kashmir have a minimum temperature of 49° F. while places in Rajasthan have recorded a maximum temperature of 120° F. So one can only speak of local averages rather than of national averages.

Compared with the size of the country, the coast-line is short, as there are few bays or inlets. Hence there are also very few harbours. The fact is the west coast is rocky and the sea is deep near the coast, while in the east the sea is extremely shallow so that big ocean-going ships have to weigh anchor at some distance from the shore. The only so-called

natural harbours are Bombay and Goa, while Madras, Vishakapatnam and Port Okha are examples of purely artificial harbours built by human enterprise.

The principal ports in India are (going from west to east along the coast), Bedi Bunder, Port Okha, Forbandar, Surat, Bombay, Marmugao, Mangalore, Kozhikode (Calicut), Cochin, Alleppey, Quilon, Tuticorin, Dhanushkodi, Nagapatnam, Karikal, Cuddalore, Pondicherry, Madras, Masulipatnam, Kakinada, Vishakapatnam and Calcutta. Of these, Marmugao belongs to Portugal, while the rest are in the Republic of India. It may also be mentioned that the new harbour at Kandla in Kutch is now in use.

## MOUNTAIN WALL

India can be divided into three natural regions—1. the mountain wall, 2. the Plain of Hindustan, and 3. the Indian Plateau.

Let us take the mountain wall first. From the Pamir Knot in the far north two mountain ranges radiate one in the south-east and easterly direction called the Himalayas, and the other in a south-western direction reaching almost down to the sea, called the Sulaiman Range in the north and the Kirthar Range in the south. In the east the mountain wall between India and Burma is called by different names in different places. In the north, for instance, it is known as the Patkoi Hills, further south as the Naga Hills. In Assam it is called Jaintia, Khasi and Garo. Southward are the Lushai Hills, then lastly there are the Arakan Yoma which finally reach the sea at Cape Negrais and continue in the Andaman and Nicobar Islands.

Of the various ranges which constitute the mountain wall of India the Himalayas are the most note-worthy. Extending like a scimitar for a distance of 1,500 miles along the northern frontiers of the country they form the loftiest mountain range in the whole world, and contain many of the highest mountain peaks, Mount Everest 29,141 ft., Mount Godwin Austen 28,250 ft. and Kanchenjunga 28,146 ft.

There are no easy ways in and out through the mountain wall which shuts off India from the rest of Asia, but there are a few difficult passes. In the very north are the Zaskar Pass and the Shipki Pass which lead out of Kashmir and Punjab respectively. Then from Shipki right down to Darjeeling there is no route across the mountain wall. Across the Burma frontier again there are a few routes but they are of little use for purposes of communication.

The following is a more detailed description of the mountain region.

In the east on the border of Burma the mountain wall is much lower. Here it can more accurately be described as a range of hills rather than of mountains. This region is wet, forested and very thinly populated. The region round about Cherrapunji in Assam has the highest rainfall in the world.

Then from Darjeeling to Kashmir are the Himalayas proper, over 1,500 miles in length and 150 to 300 miles in breadth. The Himalayas are thus not a mountain chain in the proper sense of the word. They can be described as a series of parallel but converging ranges intersected by valleys and big plateaus. On the whole, the slopes of the mountains facing India are very steep, while those facing north are much more gentle. We say, on the whole, because though the eastern Himalayas (in West Bengal and Bihar) rise abruptly from the plains, in the west (western Uttar Pradesh and the Punjab) the rise from the plains is a little more gradual. Hence the Himalayas themselves can be further sub-divided into three parallel zones, the Great Himalayas with an average elevation of 20,000 ft., always covered with snow; the Lesser Himalayas,

the middle range, with an average elevation of 15,000 feet; and finally the Outer Himalayas lying between the Lesser Himalayas and the plains with an average elevation of about 3,500 feet. The last are a sort of foot-hills to the Great Himalayas, and are usually described as forming the sub-Himalayan region, a region which extends from eastern Bihar to the Punjab all along the Plain of Hindustan.

In the north the altitude of the range is much lower: there are few peaks which exceed a height of 20,000 feet. The Punjab Himalayas are comparatively dry, and the snow-line is much higher than elsewhere. The northern slopes are bare while the southern slopes are forested.

Two of the longitudinal valleys which separate the mountain ranges are worth a note. They are the Vale of Kashmir and the valley of Katmandu in Nepal. Both the valleys are fertile, extensive and from a tourist's point of view a dream of beauty.

Thus it is clear the whole region possesses great variety in climate and a range of vegetation stretching from the tropics to the poles.

The north mountain wall has a tremendous influence on the physiography of the country. On the one hand it keeps out the bitterly cold winds which blow from Central Asia and Tibet during the winter, and on the other it intercepts the moisture laden winds which blow from the sea in the south so that the northern plains of the country have rain during the monsoon. Second, the melting snow and rain falling on the mountains go to form the chief source for the water of the rivers which flow from the Himalayas. Hence the rivers of Hindustan never go completely dry in the summer.

## PLAIN OF HINDUSTAN

Geologically, the Ganges plain can be considered as the fore-deep of the mountains to the north of it. This fore-deep extends thousands of feet below the sea-level, though since its formation it has been filled in by deposit. In the east this deposit consists of alluvial material from the mountains, in the west it consists of material blown by the wind. All through the deposit is fine grained made up chiefly of muds and sands.

The Plain of Hindustan extends from the Bay of Bengal in the east to the Pakistan frontier in the west, that is to say, it is about 1,500 miles long and from 150 to 200 miles broad. Throughout this vast tract of land not a hill can be seen. The slope from the mountains to the sea is so gradual that about 100 miles from the mouth of the River Ganges the surface is no more than 500 feet above sea-level.

The Plain of Hindustan is probably the most important part of the country. For one thing, it contains some of the richest soil in the world. Second, it is on the Plain of Hindustan that the whole drama of race conflict and race assimilation was played out, a drama which finally shaped the political and cultural destiny of both India and its neighbour Pakistan.

Going into more detail the Plain of Hindustan is formed by the basins of three distinct river systems. In the far west are the Beas and Sutlej, tributaries of the Indus draining into the Arabian Sea. Further east is the River Ganges with its tributaries the Yamuna, Gogra, Rapti and Gandak which flows south-eastwards into the Bay of Bengal. The capital of the Indian Republic Delhi stands on the water-shed between the Indus and the Ganges river basins. The third of the three river systems, the Brahmaputra rises beyond the Himalayas, turns east and enters India at its eastern extremity and joins the Ganges before reaching the Bay of Bengal. The Brahmaputra has no important tributaries.

† Excluding Kashmir, the population of which was estimated at 4.41 millions.

On the Himalayas these rivers are rushing, roaring torrents, cutting their way through steep and rocky gorges. But when they reach the vast plains they broaden out and wander slowly till they get to the sea. The land is so flat that the rivers sometimes leave their old beds and cut out new channels flooding the surrounding area.

The rivers of Hindustan are notable in three respects: 1. They give a constant supply of water. 2. The land through which they flow is broad, flat and fertile and eminently suitable for irrigation. 3. Because water flows perennially they are navigable through the greater part of the year.

As we go from west to east in the plain rainfall increases and so do the fertility of the soil and the density of population.

The whole plain can be sub-divided according to climate into a number of natural regions. There are first the plains of the north-west, comprising Punjab State, a dry area depending on the irrigation canals of the rivers Beas and Sutlej for its water. Second, there is the valley of the Upper Ganges covering the major part of Uttar Pradesh a comparatively dry region which depends for its cultivation on the irrigation canals of the Ganges and the Jamuna. Third, we have the valley of the middle Ganges embracing the State of Bihar, which is an intermediate zone, with both wet and dry cultivation. As we go further east we have the lower valley of the Ganges, which includes the whole of West Bengal, a wet region with considerable rainfall growing rice and jute.

### INDIAN PLATEAU

The third of the natural regions into which the country is divided is called the Indian Plateau because it comprises a three-sided table-land covering the whole of the country in the south except for two narrow coastal strips in the east and the west. The Indian Plateau is marked off from the Plain of Hindustan by a confused mass of hill ranges running with a general direction of east to west. Three of these ranges have been distinguished by the names of Vindhya, Satpura and Ajanta respectively. They stand from 1,500 feet to over 4,000 feet high and though pierced by road and railway at the present time were not easy to cross in the old days and thus formed a barrier of hill and jungle between the northern and the southern portions of the country.

The Indian Plateau is higher in the west and the south than in the east and north. Along the western and eastern edge of the plateau run the Western and Eastern Ghats. They start southward, from the extremities of the Vindhya mountain system and run along the western and eastern coasts of the country and unite to form a sort of upheaved angle towards their southern extremity. The Western Ghats run through the States of Bombay and Mysore and ascend to an average height of about 3,000 feet while some of the peaks are anything between 5,000 feet and 9,000 feet high. The Eastern Ghats stretch down the States of Andhra Pradesh and Madras and have an average elevation of 1,500 feet. The inner triangular plateau which the Western and Eastern Ghats form in the south is seamed with little ranges of hills exceeding 4,000 feet in height the best known among which are the Nilgiris. It is on the Nilgiris that Ootacamund the famous summer capital of Madras State stands.

**Drainage Systems.**—There are three systems of drainage in the Indian Plateau—one towards the north, the second towards the west and the third towards the east. The drainage from the northern or Vindhya edge of the plateau falls into the Ganges. Two rivers Narmada and Tapi carry the rainfall of the southern slopes of the Vindhya and Satpura mountains respectively in almost parallel lines into the Arabian Sea. Further south, as we have already stated, the plateau is much higher in the west than the east. So the drainage has to make its way across the whole breadth of the plateau eastwards until it falls into the Bay of Bengal. The most important rivers are the Mahanadi, the Godavari, the Krishna and the

Cavery. These rivers differ from the rivers of the Plain of Hindustan in three ways: 1. They are fed only by the monsoon rains and therefore do not yield a constant supply of water. 2. Their valleys are less suitable for irrigation. 3. And finally, they are not navigable for certain seasons in the year when parts of the river dry up.

From a geological point of view the Indian Plateau consists mainly of very old crystalline rocks much older than the Himalayan fold mountains. On some of the edges of the plateau in the north-east for instance, are areas of sedimentary rocks from which the country obtains most of its coal. About nine-tenths of the coal resources of India lie in Jharia in Bihar and Raniganj in West Bengal, though coal-bearing beds are also found in the valley of the Godavari and the northern slopes of the Vindhya. The north-west of the plateau is covered by vast stretches of lava called the Deccan lavas. This region is one of the largest areas of lava in the world, covering as it does an area of 250,000 square miles with a total thickness of several thousand feet. In spite of the great extent of the lavas there are few or no signs of volcano. In the rest of the Plateau valuable minerals occur here and there among old crystalline rocks. Gold is obtained in Mysore, manganese in Andhra, Mysore and Madhya Pradesh, copper and iron in Bihar and Orissa, mica in Andhra and the south-east. The point about diamonds is of some interest. They occur in sand-stones or conglomerate in Panna in Madhya Pradesh or Kurnool in Andhra, though no diamond bearing igneous rocks are found.

**Natural Regions.**—From the point of view of climate and vegetation the Indian Plateau can be divided into ten natural regions. There are first of all the coastal regions round the plateau. In the north covering whole of the State of Bombay is the Gujarat region, moderately dry and hilly in places. Further south is the west coast region covering part of Mysore and part of Kerala, narrow and wet. In the east is the Carnatic or Tamil region comprising part of Madras, moderately wet but wider than in the west. In the north is what is called the Northern Circars region covering part of Andhra and part of Orissa, also moderately wet. Then there are the dry regions lying to the north of the Vindhya mountains sloping downwards to the plains of the Ganges. There are the Thar or Great Indian Desert, the Rajasthan uplands dry and hilly, and the Central Indian Plateau comprising part of Madhya Pradesh. Finally there is a third group of regions which can be distinguished, all lying in the Indian Peninsula proper. These are first the southern part of the plateau covering the whole of Mysore and parts of Madras and Andhra, dry, somewhat barren and thinly populated; second, the Deccan lavas region in the north-west, containing parts of Bombay and Andhra Pradesh dry but with fertile black soil suitable for cotton and moderately thickly populated; and lastly, the north-eastern Plateau covering parts of Bihar, Madhya Pradesh and Orissa. This last mentioned region has moderate rainfall, is thinly populated, but thickly forested. The inhabitants are mainly concentrated in two river valleys.

Ceylon is the only important island lying off the coast of India to which it is joined by a line of sand flats collectively called Adam's Bridge. But Ceylon is politically separate from the sub-continent. Two groups of very small islands in the Bay of Bengal, the Andamans and the Nicobars, and one group in the Arabian Sea the Laccadives are part of the Republic of India. So is the small island of Kutch off the Kathiawar Peninsula in western India. Kutch is a dry, rocky, treeless country.

### VEGETATION

India is thickly populated and so over a greater part of the country the natural vegetation has been removed. The country has no distinctive botanical features peculiar to itself.

Where the rainfall is more than 80 inches a year there are evergreen forests on the hills. The wood from these forests is hard but the

forests have not yet been commercially exploited. These evergreen forests are chiefly found on the slopes of the Western Ghats, the wetter eastern parts of the Himalayas up to a level of 5,000 feet, and in Assam.

Where the rainfall is less than 80 inches but more than 40 we have what are called the monsoon forests, so-called because the trees in these forests lose their leaves in the dry season. The monsoon forests are very valuable, because they contain two of the most useful kinds of tree, the teak and the sal. The teak is found chiefly in the western parts of the country while the sal is obtained in the lower slopes of the Himalayas and the north-east of the Plateau.

Where the rainfall is less than 40 inches, in the drier parts of the country we find small thorny trees, sometimes so small that they are more like bushes than like trees.

In the driest parts where the land is desert or semi-desert even bushes cannot grow. There we find plants with thick fleshy stems and long roots.

As we go up the mountains too the vegetation changes. In the higher reaches of the mountains, above 5,000 feet in the south, and 3,000 feet in the north the forests are similar to those found in temperate lands. Some of the trees have broad leaves and are like the oak while others are tall and have needle-shaped leaves like the pine.

On the highest parts of the mountains it is too cold and too dry for trees to grow and so we find only small bushes and short grass.

Along the sea-coasts and in the great river deltas where the land is flat and muddy grows a kind of tree called mangrove. These trees are most frequent in the deltas of the River Ganges where they are called Sundarbans.

There is not much grass land in India though in the hills in the monsoon grass patches can be seen.

The main cultivated plants include rice, wheat, pulses and grains. Among the important seeds grown are castor, sesamum and ground-nut. The chief fruit trees include mango, coconut, arcanut and certain citrus fruit. Apples, peaches, pears, apricots and walnuts are confined chiefly to the Himalaya valleys. There are tea plantations over large areas on the mountains in the north-east and south, while coffee, cardamom, pepper and rubber are extensively grown in the south. In some of the damper regions the cinchona is successfully cultivated.

### ANIMALS

Just as natural vegetation has disappeared over the greater part of the land so have a great many wild animals. The lion, for instance, was not uncommon within historical times in the north. Today it is confined wholly, to the Gir forest in Junagadh in Bombay State.

The most famous among the wild animals which survive are the tiger and the elephant. The leopard or panther is more common than the tiger and equally destructive of life and property. The cheetah or the hunting leopard is found only in the Deccan and is generally trained for hunting the antelope. Other wild Indian animals of the cat family are the marbled cat and the jungle cat.

In the open country-side wolves are plentiful and usually prey on sheep. The Indian fox is comparatively scarce but the jackal is very common. The wild dog is found in the denser jungles and generally hunts in packs. Among other dogs are the pariah common in the south, and the greyhound used for hunting.

The black bear is common wherever rocky hills and forests occur. It lives on ants, honey and fruit and may often prove dangerous. The Himalayan bear which is found only in the north, stays in the mountains during the summer but comes lower down during the winter.

The rhinoceros found in the country are of three different types, two have a single horn and one has double. The rhinoceros are commonest in the Brahmaputra valley and in the Sundarbans. With the rhinoceros might be mentioned the crocodile which can be very dangerous specially in the rivers of the north. The wild hog is also well-known in certain parts of the country and is very destructive of crops.

In the remote parts of the deserts of Kutch is found the wild ass but its contacts with man are few. Many wild varieties of sheep and goat are met with in the mountain ranges of the north.

The antelope proper is more widely distributed. On the coasts of Gujarat and Orissa, for instance, a herd of does accompanied by a single buck is a common sight. The gazelle can also be found almost everywhere. The sambar is confined to hill forests, while the spotted deer is considered to be the most beautiful animal of the Indian jungle.

In the Western Ghats, and in the hill jungles of Assam, Bombay and Madhya Pradesh is found the bison. It is a fierce animal and almost as dangerous to hunt as the tiger. Akin to the bison is the wild buffalo very common in Assam.

The rat and the mouse are a perpetual nuisance. The bandicoots some of which can be as long as 2 feet burrow under stores and godowns and are often deadly to plants, fruit or grain.

The reptiles abound in garden and jungle and even intrude into dwelling places specially during the rains. Thousands of people die every year in the country-side of snake-bite. The most dreaded of the reptiles is the cobra. There is another variety called Russell's viper whose bite is equally fatal. Generally speaking the salt-water snakes are dangerous while the fresh-water ones are harmless. The bigger variety

scorpion which abounds in parts of Madras and Andhra is a domestic terror.

Of all the wild animals in the country the elephant is the most interesting as well as the most useful. It generally lives in the wilder parts of the monsoon forests and being an intelligent animal can be trained to do heavy work such as dragging great logs of wood, or arranging them in neat piles. The elephant is also excellent as a transport animal as it can push its way through the thickest jungle where roads cannot be built.

**Domestic Animals.**—So much for the wild animals. Among the domestic animals the most useful are the oxen. It is estimated that there are about 159 million cattle in India. Milk is not a staple article of food and the oxen are chiefly used for ploughing or drawing carts. The bullocks are more valuable than the cows though in certain parts like Uttar Pradesh dairy-farming is an important industry. One handicap is that in most areas fodder has to be specially grown for the cattle.

There are 45 million buffaloes in the country. The buffalo is stronger than the bullock and is chiefly used for ploughing. The she-buffalo is the typical dairy animal.

There are 39 million sheep in the country. But they are a very poor specimen and do not give good wool or meat. Sheep are most numerous in Madras and live chiefly on waste land which is not good enough for cattle. Goats (57 million) are found everywhere because it does not take much to keep them alive. They can feed on the poorest grass or shrub and so find enough to eat even in the driest parts of the country.

There are 1.5 million horses and ponies and about 60 000 mules and 1.2 million donkeys,

most of which are used as draught animals. Mules, donkeys and camels are also used for purposes of transport mules and donkeys on the hilly parts, and camels in the sandy desert. The total number of live-stock in the country is 397 million.

There are also about 91 million fowls and about 6 million ducks.

The birds of India though not as gorgeous as those of some other tropical lands deserve mention. The parrot is easily the most beautiful of the Indian birds. The peacock is another beautiful bird, while the maina like the parrot lives happily in a cage and talks well. Of the vulture there are four varieties which include the common scavenger. There are many types of eagle too and some of the falcons can be trained for hawking. A bird much sought after for its plumage is the kingfisher and among the birds which are hunted for their flesh are pigeons, ducks, partridges, plover, quail and snipe. The jungle fowl, however, is not considered good for eating.

There are many beautiful butterflies in India, while among the more useful insects are the bee, the silk-worm, the *coccus lac*, that is, the insect which gives lac. Certain varieties of Indian moth and ant are very destructive. Locust invasions are not frequent but when they appear they leave complete destruction behind them. Mosquitoes abound everywhere.

In India fish is eaten fresh as methods of fish preservation are either primitive or not practised. Among the edible Indian fishes are the carp family and the cat fishes. But the most delicious is the hilsa which is also a rich food. A fish which is found in all hill streams is the mahseer.

Note 1:—In the calculation of excesses and deficits and their percentages, rainfall figures are taken correct to 0.01".

\* Data not available.

**MONSOON RAINFALL SUMMARY—1956**

The monsoon this year was characterised by an abnormally prolonged activity. It arrived much earlier and withdrew much later than usual. It also maintained a nearly steady activity throughout the period, which commenced at the end of May and extended well into the second week of October. There was thus abundant rainfall, the season's total till the end of September being in excess over the

major part of the country and normal or nearly normal over the rest. This was followed again by a general excess of rainfall during the first half of October. The abnormal monsoon rainfall gave rise to severe floods in parts of Assam, West Bengal, Bihar, Uttar Pradesh and the Punjab (I) and minor floods in several other parts, the severest floods in the Punjab and West Uttar Pradesh occurring in October.

Except for a slight deficit of precipitation in the Bay Islands, Madhya Bharat, Mysore,

Malabar-South Kanara and Travancore-Cochin, the rainfall for the period 1st June to 30th September 1956 was either normal or in excess over the country (Data in respect of Jammu and Kashmir are incomplete). It was in large excess over Saurashtra-Kutch and coastal Andhradesa.

Averaged over the plains of India, the rainfall for the monsoon—June to September 1956—was in excess by 14 per cent.

## POPULATION\*

Note:—The last census took place before the States were reorganized on Nov. 1, 1956.

THE more important figures are as follows: Total population (excluding Kashmir and the Part B tribal areas of Assam): 356,879,394; Males: 183,333,874; Females: 173,545,520.

Population of Jammu and Kashmir: 4.41 millions (estimate for March 1, 1951); Population of Part B Tribal Areas of Assam: 0.56 millions (unverified local estimate).

Increase over 1941: 42,113,014 or a mean decennial growth rate of 12.5 or percentage increase of 13.4 per cent.

Highest population: Uttar Pradesh (63,215,742); Lowest population Andamans and Nicobars (30,971); Average density: 312 per square mile. Highest density: Delhi (over 3,017); Lowest density: Andaman and Nicobar (10).

Only two States registered a decline in the mean decennial rate. Punjab (0.5), Andaman and Nicobar Islands (8.6).

The lowest rate of increase was for PEPSU (2.6).

The highest rates of increase were: Delhi (62.1), Coorg (30.5).

In the following States the rate of increase was below 10: Bihar, Orissa, Madhya Pradesh, Bhopal, Vindhya Pradesh, Himachal Pradesh and PEPSU.

Registered birth-rate (1941-50): 27.2; Probable birth rate (1941-50): 40; Registered death-rate (1941-50): 19.4; Probable death-rate (1941-50): 27; Natural increase rate (1941-50): 13; Infant mortality rate (1941-50): 127.1; Life expectancy: 32 years and 5 months; Life expectancy at the age 10 years: 39.

The birth-rates for 1953 and 1954 are 24.8 and 25.4. (The birth-rate for 1954 is for the former Part A States and Delhi and Coorg.)

The death-rates for 1953 and 1954 are 14.4 and 12.9. (The death-rate for 1954 is for the former Part A States and Delhi and Coorg.)

The infant mortality rates for 1953 and 1954 are 118 and 113. (The rate for 1954 is for the former Part A States and Delhi and Coorg.)

Literacy for India for 1951, 16.8.

Number of females to every 1,000 males: 947.

The number of females exceeds the number of males in the following States: Kutch (1,079), Madras (1,006), Manipur (1,036), Orissa (1,022), Travancore-Cochin (1,008).

In the following States the number of females is less than 900 for every 1,000 males: Assam, Coorg, PEPSU, Punjab, West Bengal.

In the following States they are the smallest: Andaman and Nicobars (625), Delhi (768).

Total urban population: 62 millions (17.3 per cent); Total rural: 295 millions (82.7 per cent). Increase in urban population over 1941: 3.5 per cent. Highest urbanization: Delhi (83 per cent).

The total number of towns is 3,018 and of villages 558,089.

Number of cities with a population of one lakh and over: 75.

Percentage of population dependent on agriculture: 70.

States in which non-agricultural population exceeds agricultural: Ajmer, Andaman and Nicobars, Delhi, Kutch, Saurashtra.

If the population is divided into classes according to livelihood the percentage of each class would be as follows:—

Peasant proprietors, 47; Tenants, 9; Landless labourers, 13; Landlord or rentier, one; Industry or other non-agricultural production, 10; Commerce, 6; Transport, 2; Services and miscellaneous professions, 12.

The last census were taken at the beginning of 1951 (Feb. 9 to Mar. 1, 1951).

For the first time the census embraced the whole of India including the former Indian

States, but excluding Jammu and Kashmir and the tribal areas of Assam. Jammu and Kashmir was omitted because of special conditions and the tribal areas of Assam because they had never been enumerated before.

Two main and two subsidiary questions in the census questionnaire related to "economic status" and "means of livelihood". These questions were: Are you a self-supporting person or a non-earning dependent or an earning dependent? If you are a self-supporting person, are you an employer or an employee or an independent worker or none of these? What is the occupation or source of income which forms your principal means of livelihood? Have you a secondary means of livelihood? If so, what is it?

All useful data collected during the census operations will be recorded in a national register. Relevant parts of this register will be kept in every tahsil or sub-division or ward as a permanent and confidential record of the inhabitants. It is also proposed to bring out a census handbook for every district which the State Governments have been requested to publish. The State Governments have also been requested to include abstracts from these in school textbooks so that students could learn more about their region than they do at present.

### GROWTH OF POPULATION

Year	Population (in millions)	Increase (in millions)	Percentage Increase.
1951 ..	356.88	42.11	+ 13.4
1941 ..	314.77	39.25	+ 14.3
1931 ..	275.52	27.34	+ 11.0
1921 ..	248.13	— 0.87	— 0.3
1911 ..	249.05	13.55	+ 5.8
1901 ..	235.50	— 0.4	— 0.17
1891 ..	235.90	—	—

During the twenty years (1931-51), the number added to the population was three times as many as during the ten years (1921-31) and twice as many as during the thirty years (1901-31).

### POPULATION OF POST-REORGANIZATION STATES

The total population and the population of Scheduled Castes and Tribes in the new State formations after Nov. 1, 1956 are given below. The figures for the rest of the States are the same as before:

State	Area (in sq miles)	Population (in millions)	Scheduled Castes (in lakhs)	Scheduled Tribes (in lakhs)
Andhra Pradesh .. .. .	110,250	32.2	44.16	11.50
Bihar .. .. .	67,830†	38.93†	49.14	38.80
Bombay .. .. .	188,240	47.8	52.02	37.43
Kerala .. .. .	14,980	13.6	12.07	1.35
Madhya Pradesh .. .. .	171,200	26.1	39.12	48.44
Madras .. .. .	50,170	30.0	53.82	1.36
Mysore .. .. .	72,730	19.0	25.83	0.80
Punjab .. .. .	48,616	16.0	34.01	0.03
Rajasthan .. .. .	132,300	16.0	25.02	17.74
West Bengal .. .. .	33,270†	26.16†	47.44	15.67

\* There have been no census since the reorganization of States on 1st November, 1956.

In general out of the 28 States that existed before the reorganization nine States are not affected by the reorganization. These nine are: Assam, Orissa, Uttar Pradesh, Kashmir, Delhi, Himachal Pradesh, Manipur, Tripura and Andamans.

The present Punjab is formed by a simple amalgamation of the former Punjab and PEPSU. Hence some figures for the present Punjab can be obtained by the addition of the figures for the former Punjab and PEPSU.

The State of Rajasthan is affected by the reorganization only to a very small extent.

In the tables the States that went out of existence on 1st Nov. 1956 or were drastically reorganized as from that day are indicated with a star or dagger.

The figures are the 1951 census figures.

In the India totals the figures for Chandernagore have been added as follows: total, 49,900; males, 28,220; females, 21,689.

Unless otherwise stated, Madras as given here should be taken as including Andhra as when the census were taken Andhra was not separated from Madras. Some estimates for the pre-reorganization Andhra based on the census are also given.

Figures for Himachal Pradesh and Bilaspur are given separately, though from 1st July, 1954 they formed a single administrative unit.

From October 1953 the seven talukas of Bellary District have been part of Mysore State, and have formed a District called Bellary in that State; the population of the District is 773,712. Before October 1953, that is when the census were taken, they were part of Madras.

For figures for Madras, Andhra and Mysore as they existed between October 1953 and November 1956 i.e. the time of the re-organization see under the individual States.

District figures are given under each State.

The mean decennial growth rate is based on the mean population of the two census.

† Approximate.

## POPULATION BY NATURAL REGIONS

Natural Region	Total Population	Males	Females	1941	Females per 1,000 males (1951)	Mean Decennial Growth Rate (1941-51)
INDIA	356,879,394	183,333,874	173,545,520	314,766,380	947	+12.5
1. Himalayan Region	17,042,697	8,982,675	8,060,022	14,827,606	807	+13.9
2. Northern Plains Region	139,398,043	73,022,392	66,375,651	125,072,878	909	+10.8
3. Peninsular Hills and Plateau Region	108,598,645	55,111,536	53,487,109	96,220,094	971	+12.1
4. Western Ghats and Coastal Region	39,926,793	20,371,388	19,555,405	32,518,913	960	+20.5
5. Eastern Ghats and Coastal Region	51,832,336	25,798,808	26,033,728	46,093,121	1,009	+11.7
Andaman and Nicobar Islands	30,971	19,055	11,916	33,768	625	-8.6

## POPULATION BY ZONES AND STATES

Zone and State	Land area in square miles	Total Population	Males	Females	1941	Females per 1,000 males (1951)	Mean Decennial Growth Rate (1941-51)**	Density per square mile
INDIA	1,269,640	356,879,394	183,333,874	173,545,520	314,766,380	947	+12.5	303
I—North India	113,409	63,215,742	33,098,866	30,116,876	56,531,848	910	+11.2	558

4. Jammu and Kashmir	92,780	...	...	...	...	...	-8.6	10
5. Ajmer*	2,417	693,372	360,236	333,136	583,693	925	+17.2	287
6. Delhi	578	1,744,072	986,538	757,534	917,939	768	+62.1	3,017
7. Hissarpur††	453	126,099	64,738	61,361	110,336	948	+13.3	278
8. Himachal Pradesh	10,451	983,367	514,765	468,602	947,375	910	+3.7	94
Andaman and Nicobar Islands	3,215	80,971	19,055	11,916	33,768	625	-8.6	10

\* State has either gone out of existence or drastically reorganized as from 1st Nov. 1956.

\*\* The mean decennial rate is based on the mean population of the two censuses, and not like the 'percentage variation' on the population according to the earlier census.

† Add Chandernagore: Total: 49,909; Males: 23,220; Females: 21,689.

†† Figures for Part B Tribal areas are not included.

††† Merged into Himachal Pradesh after 1st July, 1954.

For populations of districts see under each State.

## FUTURE GROWTH

Some calculations have been made about this from 1951 to 1981.

The estimate based on the assumption that the mean decennial rate of growth will be the same as that of the average of 1921-50 will be the lower limit, and the estimate based on the assumption that the mean decennial rate of growth will be the same as during the last decade will be the upper limit.

The figures given below are in millions:

	lower limit	upper limit
1951 .. .. .	361.3	361.3
1961 .. .. .	407.7	411.9
1971 .. .. .	458.5	469.7
1981 .. .. .	527.6	535.5

Making allowance for mortality and maternity rates the trends may be estimated as follows: The figures are in crores: 1951—36; 1961—41; 1971—46; 1981—52.

## DISPLACED PERSONS

Position at the end of 1955: Total 83.90 lakhs. From W. Pakistan 47.20 lakhs. From E. Pakistan 36.70 lakhs.

The following particulars from the Census Report on Displaced Persons will be of interest (the census were taken in 1951):—

Total: 7,295,870; Males: 3,900,034; Females: 3,395,836.

From West Pakistan: 4,699,492; From East Pakistan: 2,549,390; Unspecified: 46,988.

The figures for individual States in West Pakistan are as follows: N.W.F.P.: 195,059; Sind: 778,229; Baluchistan: 24,045; West Punjab: 3,407,695; Pakistan States: 252,956; Origin unspecified: 42,608.

The figures for distinct areas in East Pakistan are as follows: East Bengal: 2,406,183; Sylhet (Assam): 137,414; Origin unspecified: 5,793.

The sex ratio among displaced persons is 871 females for every 1,000 males. The figure for displaced persons from West Pakistan is 872 females, from East Pakistan 871.

For the country as a whole, the displaced persons number 21 per 1,000. The principal concentrations are (the figures are for 1,000 of local population): Delhi 397; Punjab 231; Tripura 188; Chandernagore 115; Ajmer 115; PEPSU 113; West Bengal 92; Andaman: 51.

The distribution of displaced persons by age-groups is as follows:—

0-	47,931
1-4	412,193
5-14	1,935,781
15-24	1,512,466
25-35	1,196,663
35-44	841,987
45-55	602,548
55-64	366,653
65-74	176,689
75 and over	82,118
Age not stated	10,305

The distribution of displaced persons by livelihood classes is as follows. The first figure shows the number of males and the second the number of females :—

Cultivators of land wholly or mainly owned and their dependants: 212,591; 191,545.  
Cultivators of land wholly or mainly un-owned and their dependants: 686,705; 605,814.  
Cultivating labourers and their dependants: 167,804; 138,057.  
Non-cultivating owners of land, agricultural rent receivers and their dependants: 32,250; 30,225.  
Production other than cultivation: 461,626; 387,725.

Commerce: 922,939; 802,763.

Transport: 168,189; 140,877.

Other services and miscellaneous sources: 1,174,318; 1,061,408.

Distribution by civil condition is as follows :—  
Unmarried: 1,923,908 (males); 1,315,963 (females).

Married: 1,719,149 (males); 1,650,193 (females).

Widowed or Divorced: 182,860 (males); 302,261 (females).

The literacy is indicated by the following figures :—

Literates: 1,768,022 (males); 912,567 (females).

Illiterates: 2,057,895 (males); 2,445,850 (females).

The urban-rural distribution in lakhs is 33 lakhs in villages and 39 lakhs in towns.

The movement of persons from West Pakistan by period is as follows. The number is for every 1,000 displaced persons :—

1947 August: 292; 1947 September: 214; 1947 October: 133; 1947 November: 83; Rest of 1947: 51; 1948 January-June: 88; Rest of 1948: 27; Rest upto February 1951: 18.

The movement from East Pakistan for 1,000 displaced persons :

1946: 23; 1947: 182; 1948: 193; 1949: 128; 1950: 459; Rest upto February 1951: 51.

## FOREIGNERS

The number of foreigners in India on December 31, 1952 was 77,865 excluding U.K. and Commonwealth citizens. They were distributed according to nationality as follows: Chinese, 23,481; Afghans, 7,592; U.S. nationals, 5,995; Iranians, 4,464; Tibetans, 19,549; Germans, 1,536; French, 1,351; Swiss, 768; Dutch, 816; Russians, 424; Belgians, 595; Japanese, 632.

The total number of foreigners in India on Dec. 1, 1956 was 44,567. Bombay had the largest number 15,581; next, W. Bengal 13,023; third, Bihar 2,757.

## RELIGIOUS GROUPS

The ratio of each religious group to the total population in the country is as follows (percentage): Hindus, 84.99; Muslims, 9.93; Christians, 2.30; Sikhs, 1.74; Jains, 0.45; Buddhists, 0.08; Zoroastrians, 0.03; Other tribal religions, 0.47; other non-tribal religions, 0.03.

The following table shows the position of religious groups in India State-wise:

State	Hindus	Sikhs	Jains	Buddhists	Zoroastrians	Muslims	Christians	Jews	Other Tribals	Other Non-Tribals

\* The State has either ceased to exist or has been drastically reorganized as from 1st Nov. 1956.

† The population of Chandernagore (49,909) is not classified.

†† Persons whose enumeration records were destroyed by fire—268,602.

††† The Census booklets available at the time of preparing the article did not give the all-India totals. The figures given here are the ones worked out by adding the figures for individual States.

## SCHEDULED CASTES AND TRIBES

Statistics about three Special Groups are given below. The Special Groups which are four in number are the Scheduled Castes, the Scheduled Tribes, the Backward Classes and the Anglo-Indians.

The main results for the Scheduled Castes and Tribes for the country as a whole are shown in the table below:

Groups	Number (in Lakhs)			Number per 1,000 persons		
	Population	Scheduled Castes	Scheduled Tribes	Population	Scheduled Castes	Scheduled Tribes
INDIA .. .. .	3,567*	513	191	1,000	144	54
Rural .. .. .	2,948	462	186	1,000	157	63
Urban .. .. .	618	51	5	1,000	83	8
All Agricultural Classes .. .. .	2,491	381	173	1,000	153	70
All Non-Agricultural Classes .. .. .	1,076	132	18	1,000	123	17
<b>Agricultural Classes:</b>						
I. Cultivators of land, wholly or mainly owned and their dependants .. .. .	1,674	174	125	1,000	104	75
II. Cultivators of land, wholly or mainly unowned and their dependants .. .. .	316	56	19	1,000	176	59
III. Cultivating labourers, and their dependants .. .. .	448	143	28	1,000	330	63
IV. Non-cultivating owners of land, agricultural rent receivers and their dependants .. .. .	53	8	1	1,000	61	12
<b>Non-Agricultural Classes:</b>						
Persons (including dependants) who derive their principal means of livelihood from :—						
V. Production other than cultivation .. .. .	377	53	7	1,000	142	20
VI. Commerce .. .. .	213	9	1	1,000	44	6
VII. Transport .. .. .	56	6	1	1,000	110	11
VIII. Other Services and miscellaneous sources .. .. .	430	64	9	1,000	147	30

\* This does not include 1.35 lakhs for whom enumeration records were destroyed by fire in the Census Tabulation Office at Jullundur. Classification details for these persons are not available. Also it does not cover Chandernagore or Sikkim, for which the figures are given below.

## POPULATION

9

The figures for Scheduled Castes and Tribes for Chandernagore and Sikkim are as follows (absolute numbers) :

State		Castes		Tribes	
		Males	Females	Males	Females
Chandernagore .. .. .	Total	3,889	1,568	77	62
	Rural				
	Urban	3,889	1,568	77	62
Sikkim .. .. .	Total	99	13	14,739	14,890
	Rural	40	11	14,140	14,244
	Urban	59	2	599	446

The State-wise break-up is shown in the following table :

State	Scheduled Castes			Scheduled Tribes		
	Total	Agricultural Classes	Non-Agricultural Classes	Total	Agricultural Classes	Non-Agricultural Classes

5,000—10,000	3,101	10,540,836	10,212,900
10,000—20,000	856	6,016,525	5,664,243
20,000—50,000	401	6,240,152	5,563,895
50,000—100,000	111	4,020,609	3,534,716

There can be a four-fold classification of towns — cities (population of one lakh and over), major towns (population 20,000 to one lakh), minor towns (population 5,000 to 20,000), townships (under 5,000).

The average number of villagers per village is 529.

The percentage of rural population living in small villages (under 500) is 26.5; in medium-sized villages (500-2,000) is 48.8; in large villages (2,000-5,000) is 19.4; in very large villages (over 5,000) is 5.3.

A house is a building in which people live. A household is a group of people who live together and take their food from a common kitchen.

There are 112 households in every 100 houses of a typical Indian village, and 124 households in every 100 houses of a typical Indian town.

In every 100 households in a village there are 491 persons, in every hundred households in the town the number is 471.

In every 100 houses in a village 550 people live, in every 100 houses of a town 584.

Out of 491 people in every 100 rural households 252 are males and 239 are females. Out of 471 people in every 100 urban households 248 are males and 223 are females.

We can have a four-fold classification of households—small household (3 persons or less), medium (4, 5 or 6), large (7, 8 or 9), very large (10 or more).

The number of different types in 100 households in a typical village and a typical town will be as follows:

	Village	Town
Small .. .. .	33	38
Medium .. .. .	44	41
Large .. .. .	17	16
Very large .. .. .	6	5

The pattern of household relationship in a 100 households with 487 persons in them will be as follows:

	Number
Heads of households .. .. .	100
Wives of heads .. .. .	71
Sons of heads .. .. .	108
Daughters of heads .. .. .	81
Male relatives other than sons .. .. .	48
Female relatives other than daughters .. .. .	72
Persons unrelated to heads .. .. .	7
Total .. .. .	487

## POPULATION OF CITIES

Note: The location of towns here is based on the set-up existing after the reorganization of States on Nov. 1, 1956.

State and City.	1951.	1941.	Mean Decennial Growth Rate (1941-51).	State and City.	1951.	1941.	Mean Decennial Growth Rate (1941-51).

## LIVELIHOOD PATTERNS\*

Out of a total population of 3,566 lakhs, 1,044 lakhs (29.3 per cent) are self-supporting; 2,143 lakhs (60.1 per cent) are non-earning dependents; and 379 lakhs (10.6 per cent) earning dependents.

Out of a total agricultural population of 2,490 lakhs, 710 lakhs are self-supporting; 1,470 lakhs are non-earning dependents; and 310 lakhs earning dependents.

Out of a total non-agricultural population of 1,076 lakhs, 334 lakhs are self-supporting; 673 lakhs are non-earning dependents; and 69 lakhs earning dependents.

The table below gives a comprehensive picture of self-supporting and dependent people and the percentage.

Under Agriculture Class I is owner-cultivator, Class II tenant-cultivator, Class III cultivating labourer, Class IV agricultural rentier.

Class V are persons engaged in non-agricultural production together with their dependents, Class VI persons in commerce and their dependents, Class VII in transport and their dependents, Class VIII in miscellaneous income recipients (non-agricultural rentiers, pensioners etc.).

The second column shows self-supporting persons, the third non-earning dependents; the fourth earning dependents; the fifth total; the sixth percentage to general population including dependents.

The figures are in lakhs.

Category	2	3	4	5	6
Class I .. ..	457	1,001	215	1,673	46.9
Class II .. ..	88	189	39	316	8.8
Class III .. ..	149	247	52	448	12.6
Class IV .. ..	16	33	4	53	1.5
<b>Total Agricultural classes..</b>	<b>710</b>	<b>1,470</b>	<b>310</b>	<b>2,490</b>	<b>69.8</b>
Class V .. ..	122	223	32	377	10.5
Class VI .. ..	59	145	9	213	6.0
Class VII .. ..	17	37	2	56	1.6
Class VIII .. ..	136	208	26	430	12.1
<b>Total non-agricultural classes .. ..</b>	<b>334</b>	<b>673</b>	<b>69</b>	<b>1,076</b>	<b>30.2</b>
<b>General Population ..</b>	<b>1,044</b>	<b>2,143</b>	<b>379</b>	<b>3,566</b>	<b>100.0</b>

The following figures show the number of dependents supported by 100 persons in each of the eight categories. The first figure in brackets shows the number of non-earning dependents and the second figure the number of earning dependents:

Class I—266 (210.47); Class II—259 (215.44); Class III—201 (166.35); Class IV—231 (206.26); All Agricultural classes—251 (207.44).

Class V—211 (185.26); Class VI—261 (246.15); Class VII—230 (218.12); Class VIII—216 (197.19); All non-agricultural classes—222 (201.21).

General Population—242 (205.37).

## BROAD CONCLUSIONS

The broad conclusion of this survey is that the average self-supporting person uses his income to support himself and at least two others.

Roughly one among three self-supporting persons also provides, in addition, partial support for one earning dependent.

During the twenty years following 1931 population grew faster than cultivation. But the relative weight of dependence on agriculture for gainful employment has not declined in the country as a whole. It is probable that it has

increased slightly. Such increase is observable in Uttar Pradesh, Bihar, Orissa, Assam, Madras, Hyderabad, Rajasthan, Punjab. It has probably diminished in Bombay, West Bengal and Mysore. In Madhya Pradesh dependence on agriculture has not changed.

Thus on the whole, there has been a general increase of non-earning dependency. The increase in absolute numbers of non-earning dependents has exceeded the entire increase of rural population in India as well as in each of the five zones out of six.

The percentage of non-earning dependents to the general population has also increased in every State except Bombay, West Bengal and the Punjab. It has decreased slightly in Bombay and West Bengal and is practically unchanged in the Punjab.

The increases in the percentages are not accompanied by any material change in sex ratio or age structure. They must, therefore, be regarded as a rough index of the growth of unemployment in different parts of the country.

There has been a general increase throughout the country in the number of cultivators and cultivating labourers working on the same area (say 100 acres) of cultivated land.

The increases are relatively small in the following States:

Assam (46 to 48), Bihar (50 to 52), U.P. (49 to 51), Madras (34 to 36), Orissa (29 to 32).

Larger increases are observable in the following States:

Punjab (23 to 26), Bombay (17 to 23), Madhya Pradesh (26 to 33), Travancore-Cochin (41 to 57).

Among the major States for which figures are available Mysore alone shows a fall (32 to 26).

Material changes have occurred in the percentage of cultivating labourers to all workers in land (i.e. cultivating labourers and cultivators including their unpaid family helpers).

There is only one major State where this percentage has increased—Travancore-Cochin (34 to 47). The percentage has remained practically unchanged in Bihar (27-26), Mysore (18-14), Hyderabad (31) and Punjab (11-12).

In other States the percentage has fallen : U.P. (18 to 9), Orissa (30 to 19), West Bengal (40 to 28), Madras (38 to 35), Bombay (43 to 18), Madhya Pradesh (43 to 32), Rajasthan (11 to 4).

The fall is the natural result of increase in the number of cultivators and members of their families occupying the same area of cultivated land. The cultivators' need for employing labourers diminishes, as also their capacity to pay for their services.

Other reasons for the fall may be that labourers were unwilling to acknowledge as labourers to guard against the accrual of occupancy rights in land.

There were also many people who partook of the characteristics of both cultivator and cultivating labourer and whose classification was open to doubt.

It is also possible that because of legislation and the general social climate a conversion has taken place of many persons from the status of

cultivating labourer to that of cultivator. Such conversions probably account for an important part of the fall observed in Bombay, Madhya Pradesh, Uttar Pradesh Rajasthan and possibly elsewhere.

Among cultivators the relative proportion of cultivator owners has increased to some extent.

Agricultural rentiers formed only a small proportion of the people in 1931, and this proportion has become still smaller in 1951.

\* The State has either ceased to exist or has been drastically reorganized as from 1st November, 1956.

**SELF-SUPPORTING PERSONS**

There are 1,044 lakhs of self-supporting persons in the country or 29.3 per cent of the population.

The table below shows the rural-urban and sex-wise break-up.

Rural-Urban	Number (in lakhs)	Percentage
Rural males ..	706	47.1
Urban males ..	166	49.8
Rural females ..	151	10.4
Urban females ..	21	7.4
<b>Total ..</b>	<b>1,044</b>	<b>29.3</b>

Out of 1,044 lakhs of self-supporting persons 710 lakhs or 68.1 per cent are agriculturists, and 334 lakhs or 31.9 per cent are non-agriculturists.

The rural-urban and the sex-wise break-up of agricultural and non-agricultural self-supporting classes is as follows (the number is in lakhs):

Rural-Urban break-up		Agriculturists		Non-agriculturists	
		Number	Percentage	Number	Percentage
Rural males ..	..	566	80.2	140	19.8
Urban males ..	..	19	11.4	147	88.6
Rural females ..	..	121	80.2	30	19.8
Urban females ..	..	4	19.7	17	80.8
Total ..		710	68.1	334	31.9

The self-supporting agriculturists can be divided into four classes. The number in the second column in the table below is in lakhs. The number in the third column is the percentage of all agriculturists, the number in the last is percentage of all self-supporting persons.

Category	Number (lakhs)	Percentage of agriculturists	Percentage of all self-supporting persons
Cultivators of land wholly or mainly owned ..	457	64.4	43.8
Cultivators of land wholly or mainly un-owned ..	88	12.8	8.4
Cultivating labourers ..	149	21.0	14.8
Non-cultivating owners of land and other agricultural rent receivers ..	16	2.8	1.6
<b>Total ..</b>	<b>710</b>	<b>100.0</b>	<b>68.1</b>

Another way of describing Classes I and II is as owner-cultivators and tenant-cultivators. Thus the number of owner-cultivators is 457 lakhs and the number of tenant-cultivators is 88 lakhs. The total number of cultivators can thus be put down as 545 lakhs.

The 334 lakhs self-supporting non-agriculturists can also be divided into four sections. The number in the second column is in lakhs, the number in the third shows the percentage of all self-supporting non-agriculturists, the fourth the percentage of all self-supporting persons.

Categories	Number (lakhs)	Percentage of self-supporting non-agriculturists	Percentage of all self-supporting persons
Employers ..	11	3.3	1.1
Self-employed other than employers ..	165	49.4	15.7
Employees ..	148	44.3	14.2
Non-agricultural rentiers, pensioners and miscellaneous income-receivers ..	10	3.0	0.9
<b>Total ..</b>	<b>334</b>	<b>100.0</b>	<b>31.9</b>

The employees are a clear minority. Self-employed persons are more numerous than employers and employees combined.

If we deduct rentiers from both agriculturists and non-agriculturists we get the following classification of income-earners. The number in the following table is in lakhs.

Nature of income	Cultivation	Industries and Services	Total
Net profits ..	545	176	721
Wages and salaries ..	149	148	297
<b>Total ..</b>	<b>694</b>	<b>324</b>	<b>1,018</b>

Earners of profits are much more than twice as numerous as earners of wages and salaries.

**In Industry**

The 324 lakhs self-supporting persons engaged in industries and services other than cultivation may be divided as follows:

Categories	Number (in lakhs)	Percentage
Primary industries other than mining and quarrying (0) ..	24.0	7.4
Mining and quarrying (1) ..	5.7	1.8
Processing and manufacture (foodstuffs, textiles, leather) (2) ..	55.1	17.0
Processing and manufacture (metals, chemicals) (3) ..	12.4	3.8
Processing and manufacture not elsewhere specified (4) ..	24.8	7.6
Construction and utilities (5) ..	15.9	4.9
Commerce (6) ..	59.0	18.2
Transport, storage and communications (7) ..	19.0	5.9
Health, education and public administration (8) ..	32.9	10.2
Services not elsewhere specified (9) ..	75.4	23.3

The number engaged in some of the sub-divisions of the above main divisions are as follows (the figure is in lakhs):

Plantations—10.6; Stock-raising—6.3; Fishing—4.2; Forestry (wood cutting, collection of forest produce not elsewhere specified)—2.5; Rearing of small animals and insects—27 (in thousands); hunting—9 (in thousands).

Figures for men engaged in mining (shown below) are given in thousands except for coal-mining, and mining of stone, clay and sand which are in lakhs:

Coal-mining—3.1; Mining of stone, clay, sand—1.2.

Iron ore—9; metals other than iron—5.7; petroleum—3; mica—3.8; salt, saltpetre and saline substances—2.2; non-metallic minerals—1.1. Total for this group—13.5.

The figures for persons engaged in various industries given below are in lakhs:

#### Divisions 2, 3, 4

Milling of cereals, pulses, hand pounding of rice, dehussing, grinding of food grains—4.0; Vegetable oil and dairy products—2.7; Sugar—1.4; Beverages (breweries, distilleries, toddy drawers, aerated waters)—1.6; Tobacco (preparation of raw leaf, makers of bidds, cigarettes, etc., snuff)—3.6; Other food industries—1.8; All food industries (except cultivators, housewives, hotel workers)—1.5.

Cotton textiles—20.6; wearing apparel (except footwear)—6.5; Other textiles (lute, wool, silk, hemp, flax, rayon, rope, twine, etc.)—7.1; Leather (leather products, footwear)—5.8.

Manufacture of transport equipment—2.2; Machinery (other than electrical) including engineering workshops—1.2; Basic manufacture of iron and steel—1.1; Manufacture of metal products otherwise unclassified—0.2.

Manufacture of wood and wood products (carpenters, turners, etc.)—10.4; Manufacture of non-metallic mineral products (potters, makers of earthenware porcelain, crockery, glass bangles, etc.)—4.5.

#### Division 5

Total for construction and utilities (15.9).

#### Division 6

The total number engaged in commerce is 59 lakhs.

They fall into three groups: Retail trade (51.1); Wholesale trade (4.6); Money-lending, banking, insurance, real estate (3.3).

Among men in retail trade: Selling food stuffs (22.5); Selling fuel (1.9); Selling textiles and leather goods (5.6).

#### Division 7

Total for Transport, Storage and Communications (19.0); Transport by road (8.9); By railway (5.7); By water (2.2); By air (13 thousand).

#### Division 8

Total for Health, Education and Public Administration (32.9).

Medical and health services (3.8).

Total for educational services and research (7.4); of these stationed in towns (3.7); in villages (3.7).

These were divided as follows: Professors, lecturers, teachers, research workers, employed in universities, colleges, research institutions (99,256); other professors, lecturers, teachers (549,544).

Total for public administration (21.6). These may be divided as follows:

Employees of Central Government (5.03); Total employees of State Governments (14.26); Employees of District Boards, Municipalities and other local bodies (2.24).

These may be sub-divided as General administration (8.09); Police (other than village watchmen) (3.80); Village establishments including village watchmen (2.37); Employees of local bodies (2.24).

#### Division 9

Services not elsewhere specified (75.4). Of these nothing is known of 37.3 except that they are self-supporting.

The following para gives the details about the rest of the 38.1 lakh persons (the number is in thousands):

Domestic service (1,424); Laundries and laundry services (565); Barbers and beauty shops (511); Religious, charitable and welfare services (369); Legal and business services (230); Recreation services (214); Hotels, restaurants and eating houses (458); Arts, letters and journalism (39).

The following table shows the position in industries and services in States in a sample of 10,000 self-supporting persons:

State.	0-Primary Industries not elsewhere specified.	1-Mining and Quarrying.	2-Processing and Manufacture of Foodstuffs, Textiles, Leather and products thereof.	3-Processing and Manufacture of Metals, Chemicals and products thereof.	4-Processing and Manufacture of products not elsewhere specified.	5-Construction and utilities.	6-Commerce.	7-Transport, Storage and Communications.	8-Health, Education and Public Administration.	9-Service not elsewhere specified.

\* The State has either ceased to exist or has been drastically reorganised as from 1st November, 1956.

† Exclusive of five districts in Bihar: Monghyr, Bhagalpur, Saharsa, Furruckabad, Santhal Parganas.

## DEPENDENTS

Out of 3,566 lakhs 2,143 or 60.1 per cent have been classified as non-earning dependents.

The table below shows the rural-urban and the sex-wise break-up of non-earning dependents:

Rural-Urban	Number (In lakhs)	Percentage
Rural males ..	674	45.0
Urban males ..	152	4.6
Rural females ..	1,065	73.5
Urban females ..	252	88.1
	2,143	60.1

There are 379 lakhs or 10.6 per cent earning dependents in the country. They are dependents in the sense that left to themselves they cannot support themselves.

The table below shows the rural-urban and sex-wise break-up of earning dependents.

Rural-Urban	Number (in lakhs)	Percentage
Rural males .. .. .	119	7.9
Urban males .. .. .	15	4.6
Rural females .. .. .	232	16.0
Urban females .. .. .	13	4.5
	379	10.6

## LITERACY AND EDUCATIONAL STANDARD

The test of literacy is ability to read and write a simple letter in some language.

All India percentage of literacy: 10·6; West India zone: 23·8; South India: 22·8; East India: 10·8; North-West India: 13·3; Central India: 10·9; North India: 10·8.

In absolute numbers, out of 36 crores about 6 crores are literate. Out of 30 crores who are illiterate about 6 lakhs can read but not write. About 90 lakhs have reached the middle school standard, and 38 lakhs (women 5 lakhs) Higher Secondary School Standard.

The total no. of those who have reached the intermediate standard in Arts and Science: 407,000 (men), 59,000 (women).

The total no. of the holders of degrees and diplomas: 991,000 (men), 183,000 (women).

The above figures (degree and diploma) are broken up as follows. The first figure relates to men, the second to women:

Graduates in Arts and Science: 284,000; 37,000. Post-graduates in Arts and Science: 58,000; 7,000. Teaching: 151,000; 38,000. Law: 64,000; 1,000. Health and Medicine: 64,000; 8,000. Engineering: 35,000; 1,000. Commerce: 31,000; 1,000. Agriculture and Veterinary: 12,000; 1,000.

All India percentage of male literacy 24·9, of female 7·9.

Percentage of literacy among agricultural classes: 12·1 (males 19·6, females 4·6). Among non-agricultural classes: 29·0 (males 39·7, females 17·0). In commerce in latter group: 37·9 (males 51·6, females 22·6). In Transport: 32·7 (males 41·7, females 21·7).

Percentage of literacy for those above the age of ten: urban: men 55, women 27; rural: men 24, women 6.

Analysed age-group-wise, the literacy figures for the ten per cent sample population are:—

Ages 0—4: All 4,726,869 persons are illiterate. Ages 5—9: Total 4,426,768; literates 411,079. Ages 10—14: Total 4,233,507; literates 971,443.

Ages 15—24: Total 6,065,277; literates 1,437,056. Ages 25—34: Total 5,445,111; literates 1,104,744.

Ages 35—44: Total 4,152,522; literates 739,434.

Ages 45—54: Total 2,959,170; literates 476,635.

Ages 55—64: Total 1,766,878; literates 247,630.

Ages 65—74: Total 783,033; literates 101,492. Ages 75 and over: Total 337,957; literates 38,228.

Age not stated: Total 22,787; literates 1,724.

## LITERACY AND EDUCATIONAL STANDARD BY STATE

## LANGUAGES

We give below some facts and figures relating to language :

Total number of speakers of languages specified in the constitution : 323,972,607 ; Number speaking Hindi, Urdu, Hindustani, Punjabi : 149,944,311 ; Telugu : 32,999,916 ; Marathi : 27,049,522 ; Tamil : 26,546,764 ; Bengali : 25,121,674 ; Gujarati : 16,310,771 ; Kannada : 14,471,764 ; Malayalam : 13,380,109 ; Oriya : 13,153,909 ; Assamese : 4,988,226 ; Kashmiri : 5,086 ; Sanskrit : 655.

Tribal languages (with speakers numbering one lakh and over for each language) : 11,531,848 ; Other Indian languages (with speakers numbering one lakh and over) : 17,698,041 ; Other Indian languages (with speakers numbering less than a lakh) : 2,860,974 ; Non-Indian languages : 226,251 ; Unclassified population : 589,673.

Number of Hindi speakers in North India : 50,454,217 ; East India : 34,036,450 ; South India : 149,287 ; West India : 492,906 ; Central India : 20,506,477.

Number of Urdu speakers in North India : 4,300,425 ; East India : 3,360,352 ; South India : 869,858 ; West India : 1,977,607 ; Central India : 2,904,632.

Number of Hindustani speakers in North India : 6,742,937 ; South India : 1,345,662 ; West India : 8,006 ; Central India : 59,939.

Number of Punjabi speakers in North India : 323,456 ; East India : 90,443 ; South India : 8,639 ; West India : 68,978 ; Central India : 78,354.

Hindi, Urdu, Hindustani, Punjabi in North-West India : 22,159,456.

Andaman and Nicobar : Hindi : 975 ; Urdu : 862 ; Hindustani : 4,139 ; Punjabi : 224.

U.P. : Hindi, Urdu, Hindustani : 99 per cent ; Punjabi : 324,000.

Bihar\* : Hindi (as including Bihari, Urdu) : 34.8 millions ; Bengali : 17.6 lakhs ; Oriya : 3.1 lakhs, Santhal Parganas Dt. (Hindi 48 per cent, Santhal 42 per cent) ; Dhanbad Dt. (Hindi 65 per cent, Bengali 25 per cent) ; Singhbhum Dt. (Ho 28 per cent, Oriya 20, Bengali 18, Hindi 14, Santhal 10) ; Manbhum Dt., (Purulia Dt.) (Bengali 62 per cent, Hindi 32, Santhal 14) ; Purnea Dt. (Hindi 92 per cent).

Oriya : Oriya : 12,065,272 ; Tribal : 1,837,732 ; Ganjam Dt. (Oriya 72 per cent ; Telugu 15) ; Phulbani (Oriya 54 per cent ; Kni 37) ; Mayurbhanj (Oriya 58 per cent ; Santhal 24 ; Ho 11) ;

Koraput Dt. (Oriya 55 per cent, Kondh 13, Paraja 12) ; Keonjhar Dt. (Oriya 71 per cent.) ; Sundergarh (Oriya 72 per cent).

W. Bengal\* : Bengali : 20,994,374 ; Hindi : 1,574,786 ; Midnapur Dt. (Bengali 90 per cent) ; Malda Dt. (Bengali 88 per cent) ; West Dinajpur Dt. (Bengali 78 per cent) ; Jalpaiguri Dt. (Bengali 57 per cent, Hindi 14 per cent) ; Darjeeling Dt. (Nepali 20 per cent, Rai 15, Bengali 14, Tamang 11).

Assam : Assamese : 4,972,493 ; Bengali : 1,447,075 ; Goalpara Dt. (Assamese 62 per cent, Bengali 17).

Tripura : Bengali : 273,441 ; Tripuri : 129,379.

Madras\* : Hindi : 109,269 ; Bellary Dt. (Kannada 55 per cent ; Telugu 30) ; Coimbatore (Tamil 66 per cent ; Telugu 20 ; Kannada 11) ; Madras (Tamil 68 per cent ; Telugu 16) ; Nilgiris Dt. (Tamil 38 per cent ; Badaga 21 ; Malayalam 13 ; Kannada 13) ; South Kanara Dt. (Tulu 40 per cent ; Malayalam 24 ; Kannada 17 ; Konkani 14) ; Srikakulam Dt. (Telugu 89 per cent).

Travancore-Cochin\* : Malayalam : 86 per cent ; Tamil : 12.

\* The State has been reorganized as from 1st Nov. 1956.

Trivandrum Dt. (Malayalam : 61 per cent ; Tamil : 39).

**Bombay\*** : See under Bombay State.

**M.P.\*** : Number of speakers per 1,000 of the population : Hindi 590, Marathi 293, Gondli 59, Oriya 18, Nagpur Dt. (Marathi 75 per cent, Hindi 12), Betul Dt. (Hindi 43 per cent, Gondli 27, Marathi 19), Nimar Dt. (Hindi 34 per cent, Nimadi 21, Marathi 15, Korku 11), Bastar Dt. (Halbi 29 per cent, Gondli 27, Marathi 12, Chhattisgarhi 10), Raipur Dt. (Hindi 57 per cent,

Chhattisgarhi 26, Oriya 13); Bilaspur Dt. (Hindi 98 per cent).

**M.B.†** : Hindi : 5,842,114.

**Hyderabad†** : Telugu : 8,921,524 (47.8 per cent), Marathi : 4,541,982 (24.3 per cent), Urdu : 2,159,214 (11.6 per cent), Kannada : 1,961,901 (10.5 per cent), Hindi : 133,733 (0.7 per cent), Nanded Dt. (Marathi 65 per cent, Urdu 11); Bidar Dt. (Marathi 39 per cent, Kannada 28, Urdu 16, Telugu 15); Hyderabad (Telugu 53 per cent, Urdu 35); Gulburga Dt.

(Kannada 55 per cent, Telugu 21, Urdu 16); Adilabad Dt. (Telugu 56 per cent, Marathi 21, Gondli 10); Raichur Dt. (Kannada 63 per cent, Urdu 10, Telugu 24).

**Mysore\*** : Kannada : 5,900,297; Telugu : 1,375,732; Tamil : 651,260. Bangalore Corporation (Kannada : 184,977; Telugu : 138,611; Tamil : 246,881); Bangalore (Kannada : 864,442; Telugu : 239,708; Tamil : 107,224); K. G. F. City (Kannada : 8,538; Telugu : 31,514; Tamil : 97,304); Kolar (Kannada : 230,066; Telugu : 579,460; Tamil : 54,157).

\* The State has been reorganised as from 1st Nov. 1956.

† The State has ceased to exist as from 1st Nov. 1956.

## AGE GROUPS

Age Groups	Total		Unmarried		Married		Widowed or divorced	
	Males	Females	Males	Females	Males	Females	Males	Females

\* The State has either ceased to exist or has been drastically reorganised as from 1st Nov. 1956.

## SEX RATIO

In India as a whole the total number of males is 183 millions, and of females 174 millions.

The sex ratio has varied as follows : 1921—950; 1931—951; 1941—946; 1951—947.

It may be mentioned here that in the world as a whole the sex ratio is probably 992.

The sex ratio in percentage of males to females is 51·4 per cent—practically no change from 1941.

In the country as a whole the sex ratio as mentioned above is female to male 947 to 1,000. The lowest is 883 in the north-west, the highest is 999 in south India where practical equality of the sexes exists.

In general the sex ratio is smaller in towns than in villages. For the country as a whole the sex ratio in villages is 966, while that in towns is 860.

The sex ratio in villages is lowest in north-west India (895). In the villages of south India females outnumber males (1,004).

The urban sex ratio is lowest in east India (719). It is highest in south India (977).

The difference between the rural sex ratio and the urban sex ratio is very large in east India (258). It is smallest in south India (27).

In the country as a whole there are 235 lakhs of people living in cities. Of these 132 lakhs are males and 103 are females.

The sex ratio for all cities is 787. It is lowest for east India (841) and highest for the south (940).

The sex ratio for the ten largest cities (town groups) is as follows :

Greater Calcutta, 602; Greater Bombay, 596; Madras, 921; Delhi, 750; Hyderabad, 989;

Ahmedabad, 764; Bangalore, 883; Kanpur, 699; Poona, 833; Lucknow, 783.

Males and females are not born in equal numbers. They do not die in equal numbers. Hence the difference in the numbers of males and females.

For example, the average sex ratio at birth during the decade 1941-50 was as follows in the following States :

Madras, 948; M.P., 939; Bombay, 935; U.P., 857.

The sex ratio of infants who died within one year of birth during 1941-50 was as follows :

Madras, 870; M.P., 844; Bombay, 866; U.P., 790.

The sex ratio among infants at the 1951 census was as follows :

Madras, 1006; M.P., 946; Bombay, 980; U.P., 941.

## MARITAL STATUS\*

	Total			Unmarried		Married		Widowed or divorced

## MATERNITY PATTERN

Out of every 10,000 persons in India 5,133 are males and 4,867 are females.

Among them 2,521 males (49.1 per cent) and 1,886 females (38.8 per cent) are unmarried. Together the unmarried people are about 44.1 per cent of the population.

To put it the other way round, among men 45.8 per cent are married and 5.0 per cent are widowers, and among women 48.4 per cent are married and 12.8 per cent widows.

The number of divorced persons in India is 144,786 or 0.4 per cent.

The proportion of unmarried persons is highest in south India (48.2 per cent) and lowest in central India (41.1 per cent).

The 1951 census counted 2,833,000 married males and 6,118,000 married females, 66,000 widowers, 134,000 widows all between the ages of 5 and 14.

The approximate number of marriages contracted in contravention of the law would be 91,50,000.

But there is evidence that the child marriage rate is diminishing. The percentage of married females under 15 of all married females was 9.6. This dropped to 7.4 in 1951.

The percentage of unmarried women above 15 is 6.4.

Facts concerning marital status in villages and towns separately is as follows :

In the villages, out of 10,000 persons 2,336 are married males and 2,407 are married females.

In the towns the corresponding figures are 2,429 and 2,105.

There is a fall in the proportion of widowers and also of widows. The former fell from 5.6 per cent in 1931 to 5.0 per cent in 1951. The latter fell from 16.1 per cent in 1931 to 12.8 per cent in 1951.

For maternity only married women in the age-group 15 to 44 are to be taken into account.

We have to base our findings on investigations carried out in Travancore-Cochin State during the 1951 census.

On an average a mother in Travancore-Cochin who lives to complete her child-bearing period gives birth to more than 6 children but not more than 7.

Out of this the number actually alive on census day was 4.6. Among the children born alive 2 had died predeceasing their mothers.

Thus in Travancore-Cochin the child birth index is 6.6, child survival index 4.6, child loss index 2.0.

Age group	Child birth index	Child survival index	Child loss index
Under 20 .. .. .	1.2	1.0	0.2
20—24 .. .. .	1.8	1.4	0.4
25—29 .. .. .	2.9	2.3	0.6
30—34 .. .. .	4.2	3.2	1.0
35—39 .. .. .	5.3	4.0	1.3
40—44 .. .. .	6.2	4.6	1.6
45 and over .. .. .	6.6	4.6	2.0
Average .. .. .	4.3	3.2	1.1

The child birth indices of mothers divided into groups was as follows :

Agricultural landholders' and tenants' families .. .. .	4.5
Agricultural labourers' families .. .. .	4.1
Non-agricultural families .. .. .	4.2
Rural .. .. .	4.3
Urban .. .. .	4.2

Mothers can be divided into two groups : those who commenced child-bearing during the ages 15 to 19 (Maternity Type A), and those who commenced child-bearing during the ages 20 to 24 (Type B).

Their child birth indices are as follows :

	Type A	Type B
Under 20 .. .. .	1.2	—
20—24 .. .. .	2.0	1.3
25—29 .. .. .	3.6	2.3
30—34 .. .. .	4.8	3.7
35—39 .. .. .	6.0	4.9
40—44 .. .. .	6.8	5.8
Over 45 .. .. .	7.3	6.4

Investigations of a different sort have given the following results :

The total number of births which occur in the course of one year among about 1,000 persons is 40. Among these 40 births, 8 births are first births, 16 births are either first births or second births; 23 births are either first, second or third births; and 17 out of 40 are either fourth births or births of a higher order.

The following table shows the child-birth indices for different age-groups of mothers and child survival and loss indices by State from a sample census :

State	Age Group of Mothers					Average for all ages	All ages	
	Incomplete Maternity experience				Complete maternity experience 45 and over		Survival index	Loss index

\* Number of mothers less than 10.

† The State has either ceased to exist or has been drastically reorganized as from 1st Nov. 1956.

.. Himachal Pradesh and Bilaspur were merged on 1st July, 1954.

### VITAL STATISTICS

The following table shows the number of births and deaths registered in each of the three decades. The figures in the first two columns are in lakhs. The figures in the last two columns give the mean decennial registered rates.

Year	Registered births	Registered deaths	Birth-rate	Death-rate
1921-30 .. .. .	669	502	33.7	25.3
1931-40 .. .. .	753	512	33.8	25.0
1941-50 .. .. .	680	486	27.2	19.4

Many births and deaths go unregistered. Making allowance for this it is calculated that the birth-rate should be around 40, and the death-rate around 27.

This would give a natural increase rate of 13 per thousand per annum during the last decade.

On the same basis the birth-rates for the various zones will be as follows :

Central India (44) ; west India (42) ; north-west India (41 or 42) ; north India (38 or 39) ; east India (38 or 39) ; south India (36 or 37).

The death-rates would be as follows :

Central India (34) ; north India (27 or 28) ; east India (26, 27 or 28) ; west India (26) ; north-west India (24, 25 or 26) ; south India (21 or 22).

The following table shows the birth, death, and infant mortality rates for the sub-continent from 1921 to 1946 and for India alone from 1947 onwards where available.

Year	Birth-rate	Death-rate	Infant mortality
1921 .. .. .	32	31	198
1922 .. .. .	32	24	175
1923 .. .. .	34	25	176

1954* .. .. .	25.4	12.9	118

N. A. — Not available.

\* For the pre-reorganization Part A States and Coorg and Delhi.

The expectation of life for males is 32.45 and for females 31.66. In the decade 1931-40 the respective figures were 26.91 for males and 26.80 for females.

The percentage of Indian males surviving to the age 20 is now 58 as against 45 at the beginning of this century. The same idea may be expressed differently by saying that 50 per cent of Indian males survive to age 32 as against 14 previously.

The figures given below show the expectation of life at various ages as revealed by the 1951 census for the decade 1941-50 :

For males : Age 0—32.45 ; 5—40.86 ; 10—38.97 ; 15—36.24 ; 20—33.03 ; 25—29.78 ; 30—26.58 ; 35—23.50 ; 40—20.53 ; 45—17.63 ; 50—14.89 ; 55—12.39 ; 60—10.13 ; 65—8.18 ;

70—6.51 ; 75—5.13 ; 80—3.99 ; 85—3.06 ; 90—2.30 ; 95—1.52.

For females : Age 0—31.66 ; 5—40.91 ; 10—39.45 ; 15—36.58 ; 20—32.90 ; 25—29.30 ; 30—26.18 ; 35—23.62 ; 40—21.08 ; 45—18.61 ; 50—16.15 ; 55—13.69 ; 60—11.33 ; 65—9.29 ; 70—7.53 ; 75—6.03 ; 80—4.77 ; 85—3.69 ; 90—2.72 ; 95—1.59.

The figures for births and deaths are based on a sample census carried out in 20 States. In 10 of the States the scheme covered all the Districts, while in the remaining it covered about one-fifth of the Districts. The exceptions were Rajasthan and PEPSU where only one District was covered. In Uttar Pradesh the scheme covered only the rural areas. Elsewhere both urban and rural areas came under survey.

The size of the sample differs from State to State. It exceeded one per cent or was nearly that in Manipur, Tripura, Kutch, Madhya Bharat and Vindhya Pradesh. It was under 0.2 per cent in Rajasthan, Punjab and PEPSU. In the rest it was between 0.2 per cent and 1.0 per cent.

The number of unregistered births per 100 registered births were also recorded to estimate the true birth-rate by correcting the registered birth-rate, with the exception of Madras, Bombay, Madhya Pradesh, Punjab and Bilaspur where the existing registration is of a high order. This method does not yield satisfactory results. The published registration figures in most States suffer from serious errors and cannot form the basis of any scientific estimation.

The birth-rates as calculated from the same surveys are in a majority of States between 30 and 40 but are less (except for Travancore-Cochin and PEPSU) than those estimated by the Actuary of 1951 for the decade 1941-50. The trend of fall in the birth-rate may be real or it may be affected by under-enumeration of births.

The average maternal age for all orders is between 27 and 28 in a large majority of the States. The average maternal age is higher in Japan and England and lower in the U.S.A., where maternity starts almost as early as in India.

The average age for first order births is between 21 and 22 ; the average for second order is between 23 and 25.

The Indian child birth index may be placed at between 6 and 7. The size of the sample was very small in every case and is not altogether dependable. U.P., Assam and Madras show an index between 6 and 7, Bihar between 5 and 6, Bombay and Madhya Pradesh over 7.

Child survival and loss indices indicate a very high loss of human resources. For mothers of completed fertility the child loss varies in a majority of States between 20 per cent and 33 per cent. Some percentage losses are Travancore-Cochin 38.1, Madhya Pradesh 35.4, PEPSU 35.3, Punjab 33.3, Madhya Bharat (1953) 28.9, Kutch 28.0, Uttar Pradesh (rural) 27.6, Assam 22.9, Bombay 22.1, Bihar 21.0, Saurashtra 20.0, Rajasthan and Himachal Pradesh 16.7.

The proportion of births is almost equally balanced for the age-groups 15-24, 25-34 in all the larger States except Assam where it is higher for the age-group 15-24. In the smaller States like Manipur, Tripura, Bilaspur, Himachal Pradesh the proportion of births in the 15-24 age-group is much higher than in 25-34, and the reverse is true for Coorg, Kutch and Ajmer.

A better study would have been possible if we had had quinquennial age-groups as in U.P. instead of decennial age-groups.

The proportion of first order births is the highest in all the States in the age-group 15-24, about 80 per cent of the first births occurring during this period. The different order births also occur earlier in India than elsewhere. The family here grows earlier and faster.

In a majority of the States in India between 40 and 50 per cent of the births are of the first and second order. In the remaining States they are between 30 and 40 per cent. In the latter category are Bombay, Saurashtra, Kutch, Madhya Bharat, Punjab, PEPSU and Coorg. Taking the total of the births of the first three orders the percentage works out to between 60 and 70 in half the States and 50 and 60 in the remaining half. The proportion of the first three orders do not show much difference from one

another. The decline starts after the third birth and even then it is not as steep as it is in U.S.A. or England. A considerable proportion of births in India is recorded under the fourth and higher orders.

The Census Commissioner has a theory about improvident maternity. All births after the third will lead to an unwanted increase in the size of the family in an under-developed country like India. The proportion of births of 4th and higher order is therefore the incidence of Improvident Maternity. This incidence is 40 to 50 in half the States and 30 to 40 in the remaining States. In the latter category are Bihar, Assam, Manipur, Tripura, Madras, Coorg, Vindhya Pradesh, Rajasthan, Bilaspur and Himachal Pradesh. The incidence is also higher in the urban than in the rural areas.

In India the first and second births occupy a relatively unimportant place in the later age-groups after 34. Births of higher order assume prominence with increase in maternal age.

About births, per 1,000 females (all women, married as well as others) in the same age-group a majority of the States show fertility for all ages between 100 and 125 or 125 and over. Among the States of high fertility of over 125 are Assam, Manipur, Travancore-Cochin, Madhya Pradesh, Rajasthan and PEPSU. Had it not been for a certain amount of under-enumeration the figures of fertility would have been still higher.

Fertility is the highest in the age-group 25-34 in nearly all the States. In U.P. where quinquennial age-groups were used fertility is low in the age-group 15-19 but rises sharply in the next age-group 20-24 and further rises slightly in the age-group 25-29, then a decline starts. In the age-group 30-34 the decline is gradual and continues to be gradual upto 39 after which it is steep. In the age-groups 40-44 and 45-49 it is preponderately high in comparison with figures for England, U.S.A. or Japan showing the high proportion of births in these ages.

\* These trends are common to all the States in India.

Rural fertility is higher than urban fertility except in Vindhya Pradesh and Himachal Pradesh.

The total birth-rates for all orders is above 100 in a majority of the States in India. In Japan it is 76, in U.S.A. 80, in England 50.

The fertility of married women for ages 15 to 44 is for all major States except Madras, between 150 and 200 or 200 and over. This indicates the figure for India as about 200. Fertility falls abruptly in the group 35-44. It is at its peak in the age-group 25 to 29.

In a majority of the States the death-rate as calculated for the sample census is between 10 and 20. This is much below the rate calculated by the 1951 Census Actuary. It is possible there is an under-enumeration of deaths in the sample census.

The proportion of deaths at younger ages is high. In 10 States the specific death-rate for age under one is well over 60; in 12 States for the age-group 1 to 4 over 25; in 12 States for the age-group 5 to 9 over 6.

About 50 per cent of the deaths occur among children under 10 years. The rates for the other age-groups in a majority of the States are as follows:

Age-group 10 to 14 it is over 3; 15-19 over 3; 20-24 over 5; 25-29 over 6; 30-34 over 7; 35-39 over 8; 40-44 over 10; 45-49 over 13; 50-54 over 15; 55-59 over 20; 60-64 over 40; 65-69 over 45; 70-74 over 65.

The mortality rates are higher for females than for males in the reproductive ages 15-44.

The rate for infant mortality (number of deaths under one per 1,000 live births per year) is over 50 for a majority of the States. If it was not for under enumeration the rate would be higher still. The rate for the period 1941-50 as estimated by the 1951 Census Actuary was between 160 and 250 for males and 145 and 225 for females.

The following table shows birth-rates and death-rates and other particulars by State :-

State	Birth-rate registered		No. of unregistered births per 100 registered as verified at the sample census	Birth-rate (registered) corrected for omissions	Birth-rate (Census Actuary), 1941-50	Death-rate registered		No. of unregistered deaths per 100 registered as verified at the sample census	Death-rate (registered) corrected for omissions	Death-rate (Census Actuary), 1941-50

(a) Number of Indians and Pakistanis registered as citizens upto March 15, 1953 in the Indian Missions was 18,500.

\* Indian nationals only.

### EMIGRATION LAWS

Emigration out of India is governed by the Indian Emigration Act (VII of 1922) and the Rules made thereunder, as amended from time to time.

"Emigration" means departure by sea out of India of a person under an agreement or with the intention to work for hire. Emigration is not lawful except from Ports which have been notified as "Emigration" Ports. Emigration for unskilled work is not lawful to any country at present, and the very departure for engaging in unskilled work to Ceylon, Burma, Malaya

and Singapore is prohibited, unless exemption is granted by general or special orders of the Central Government.

Emigration for skilled work is permissible on compliance with prescribed formalities.

The functions under the Act are performed by the Central Government through the Controller-General of Emigration and Joint Secretary to the Government of India in the Ministry of External Affairs, New Delhi, with the assistance of the Protectors of Emigrants at the Emigration Ports and the Controller of Emigration, Madras,

who supervises the activities of the Protectors of Emigrants in the Madras State.

Following Ports are at present Emigration Ports under the Act. Each Port has a Protector of Emigrants.

1. Bombay (Protector of Emigrants: Army and Navy Building, 148 Mahatma Gandhi Road, Bombay 1).
2. Okha (Port Officer).
3. Porbander (Port Officer).
4. Bedi (Port Officer).

5. Madras (Protector of Emigrants: 41, Mukkur Nallamuthu Chetty Street, George Town, Madras).
6. Nagapattinam (Protector of Emigrants).
7. Dhanushkodi (Protector of Emigrants: Mandapam Camp).
8. Tuticorin (Protector of Emigrants).
9. Gopalpur (The District Officer, Ganjam).
10. Calcutta (Protector of Emigrants: 4, Brabourne Road, Calcutta).

#### QUOTA BASIS

The following countries admit Indians on quota basis: Canada, U.S.A., Philippines, Thailand and Indonesia.

**Canada.** Under an Agreement entered in 1951 between the Government of India and the Government of Canada, the latter agreed to receive 150 Indian nationals every year for permanent residence. Selection is entirely by the Government of Canada. The main criteria is that the immigrant should be likely to assimilate in the local population. Educational qualifications, property qualifications, etc. are considered. Priority is also given according to the nearness of relationship between the intending immigrant and his sponsors in Canada, also the capacity of the sponsors to support him financially. Chronological order of applications is also taken into consideration.

**U.S.A.** The United States of America has fixed an annual quota of 100 for India of which 25 per cent is reserved for Indians born or residing outside India. The selection of immigrants is made by the U.S. Government. The main considerations on which selection is made are: (a) the immigrant must be a genuine East Indian, (b) must be free from contagious diseases or moral turpitude, (c) must not subscribe to anarchist or subversive theories, (d) must not be a practising polygamist, (e) must be literate in some foreign language, and (f) must be in possession of sufficient funds to avoid likelihood of becoming public liability.

**Philippines.** With effect from September 1953, 50 Indian nationals are admitted per annum for permanent settlement under the Philippines Immigration Act. Selection is made by the Philippines Government through their Legation in India.

**Thailand.** The quota fixed by Thailand is 200 per annum. The selection is made by the Thai Government.

**Indonesia.** Indonesia fixed a quota of 1,000 immigrants in 1952 to a group of four countries, viz., India, Pakistan, Ceylon and Burma. It is, however, entirely at the discretion of the Indonesian Government to permit Indians to settle in Indonesia.

#### FREER MIGRATION

In some of the countries, though Indians are not admitted for the specific purpose of settlement, they may be permitted to enter and reside on completion of formalities and conditions prescribed under the respective immigration and other laws of those countries. Mauritius, British East African territories of Kenya, Uganda, Tanganyika, Zanzibar, Belgian Congo, Ruanda-Urundi, Nigeria, Ethiopia, Aden, Bahrain, Iraq, Muscat, Kuwait, Saudi Arabia, Seychelles, Malaya, Indo-China, Fiji, Japan, the United Kingdom, British West Indies, British Guiana, and British North Borneo are among such countries.

The main requirements of some of the countries are indicated below:

**Mauritius.** An intending immigrant should be able to deposit Rs. 1,000 on entry into the Colony.

**British East Africa.** A person intending to engage on his own account in trade, business, agriculture, mining, and manufacture in these territories must have at his disposition prescribed capital and must obtain a certificate from the prescribed authority in the territory concerned permitting him or her to engage in a particular profession, trade or calling in that territory. Professionals like doctors, dentists, lawyers, are not required to have any prescribed capital, but

should possess sufficient capital or assured income to enable them to give effect to their intention.

The Government of Kenya have announced that their future immigration policy will be largely based on economic considerations and that Great Britain will be the primary source of immigrants of the kind the Colony needs. The scope of Indian immigration into Kenya has been further curtailed.

**Fiji.** Generally, permits to enter and to settle are granted to the following categories of persons:

- (i) Farmers and planters if they have already acquired property in the Colony not less than 100 acres, three quarters of which must be productive land.
- (ii) Professional men and women with recognised qualification intending to practise their professions.
- (iii) Ministers of religion and teachers.

**Malaya.** Under the New Immigration Ordinance which came into force on August 1, 1953, entry permits for permanent residence will not normally be granted to fresh immigrants wishing to enter Malaya for employment or for pursuing a profession unless the applicant is a skilled artisan or his entry is considered to be in the economic interest of Malaya or Singapore, or he holds a contract of employment with a well-established business concern on terms and conditions of service of a prescribed standard, or unless he holds special qualifications to be able to pursue his profession without prejudice to the interests of persons already resident in Malaya.

**British West Indies.** Indians are admitted in exceptional cases, where they possess special skills that are in short supply there or who may bring capital for investment.

**Belgian Congo.** Entry Permits may be granted to those who can deposit a certain sum and satisfy the authorities regarding good conduct, etc.

**Ethiopia.** There is no particular restrictions for immigration into Ethiopia, but the Ethiopian Government's permission is required in every case.

**United Kingdom.** Indians are free to settle in the United Kingdom.

**Switzerland.** Indian nationals can go to and reside in Switzerland, subject to the laws and rules in force in that country.

#### ENTRY BANNED

Fresh Indian immigration is either banned or is not permitted as a matter of policy into the following countries:—South Africa, Southern Rhodesia, Northern Rhodesia, Nyasaland, Australia, New Zealand, Burma, Ceylon, most of the European and South American countries.

**South Africa.** Immigration of Indians into the Union of South Africa is banned.

**British Central Africa.** The three territories of Southern Rhodesia, Northern Rhodesia and Nyasaland were brought into a federation known as the Federation of Rhodesia and Nyasaland. Immigration is a federal subject, and it is the declared policy of the Federal Government not to admit fresh Indian immigrants excepting teachers, ministers of religion and wives and minor children of persons already settled there.

**New Zealand.** There is a ban on the entry of fresh Indians, but as a special case the New Zealand Government permits the entry of the children of permanent residents into New Zealand for permanent residence provided they fulfil certain conditions.

**Australia.** Asians, including Indians, are not allowed to immigrate into Australia for permanent settlement. However, Indians who are *bona fide* merchants and are in a position to engage in wholesale import-export business may be admitted and allowed to remain there so long as they continue in the trade, but without any citizenship or other rights. Indians already settled there can, however, take their wives and minor children and also shop assistants from India subject to certain conditions.

#### BURMA

Burma was a province of India till 1937 April when it was given a separate constitution. In 1931 the Indian population was reported to be over one million. Consequent upon the Japanese occupation of Burma in 1942, about 4 lakhs of Indians left Burma for India. After the liberation of Burma many did not return to that country in view of the changed conditions in Burma and the difficulty of obtaining employment there. The present population of Indians in Burma is estimated to be about 7 lakhs.

Indians are mainly agricultural, dock and casual labourers and small-scale business men. Some Indians are engaged in wholesale importing business.

With the introduction of the Burmanisation policy, no foreigner is now allowed to buy any property, nor can any property be transferred to any foreigner. Non-nationals in Government service are being replaced by nationals.

A large number of Indian land-owners in Burma have been adversely affected by the 'Land Nationalization' Scheme.

Under the Union of Burma Citizenship Act, 1948, an alien can become a Burma citizen by naturalisation, if he had resided continuously in the Union for not less than five years before the application and also fulfils other prescribed conditions.

As foreigners in the country, Indians as such have no franchise. Those Indians who have become Burmese citizens are entitled to all privileges including franchise that other Burmese are entitled to.

Rupees thirty a month can be remitted to dependents in India by Money Order. (Source of information: Burmese Embassy). All applications for remittances of moneys should be passed by the Burmese Exchange Control Authorities who allow remittances for maintenance of families and other specific purposes on the strength of certificates from the District Magistrate concerned in India that the payees are solely dependent on the remittances. On leaving Burma for good, assets can be transferred to India if approved by the Exchange Control Authorities in Burma.

#### MALAYA

Malaya is divided into two administrative units, the Federation of Malaya and the Colony of Singapore.

Of the total Indian population of over 7 lakhs, about 70 per cent are labourers in rubber and tin estates, and the rest are either clerks or employed in business, trade and other professions like law and medicine.

Indians do not suffer from any special disabilities.

Indians are eligible for citizenship of the Federation of Malaya, if they fulfil the prescribed conditions. Under the new citizenship code for the Federation, which came into force on September 15, 1952, Federal citizenship is automatic for citizens of the U.K. and Colonies. Most of the Indians in Malaya are qualified or entitled to become citizens of the U.K. and Colonies under the British Nationality Act, 1948.

In Singapore there is no citizenship law and the British Nationality Act applies.

Elections in Malaya were held in 1955. The Legislative Council is composed of 98 members of whom 52 are elected and the remaining either nominated or ex-officio. The Legislative Council has seven Indian members. There are 16 Ministers in the Federal Executive Council of whom one is Indian.

The Colony of Singapore is under a Governor; strength of Council of Ministers 13 (two of these are Indian). The strength of the Legislative Assembly is 32 (four of these are Indian).

There are no restrictions on Indians in the matter of remittances to India.

## CANADA

Indian residents of Canada are largely comprised of labourers employed in lumbering and trucking. There are a few lumber mill owners, and some are working as clerks in various establishments. The majority of Indians are in British Columbia. The Indian community is called the "East Indian Community".

There are no disabilities on Indians in the matter of owning property, engaging in trade or profession, entering Government service or residence in any locality. The period for qualification for citizenship is 5 years. In 1952, one Indian was elected to a Municipal Council.

Indians can remit to India any amount earned in Canada.

## BRITISH GUIANA, WEST INDIES

Indians form the bulk of sugar plantation labour in British Guiana and Trinidad. A good number of them work also on cocoa plantations. They are the backbone of the countries' agriculture, and grow rice and vegetables. There are also a number of prominent Indian merchants, doctors and teachers.

In British Guiana, Indians constitute the largest single racial group. (46 per cent of the total population.) In Trinidad Indians are about 36 per cent of the total population.

Very few Indians have been employed in Government service. A vast majority of Indians are illiterate. In Jamaica, a large number of dairies are owned by Indians.

There is no discrimination against Indians in British Guiana or Trinidad, and they enjoy the same citizenship rights as other nationals of these territories.

Indians have been elected to the Executive and Legislative Councils of British Guiana. The Constitution of British Guiana was suspended in 1953 and all the members of the Legislative Council were nominated.

In Trinidad the first general election under the revised constitution was held on Sept. 24, 1956 in which the Peoples' National Movement won 13 of 24 Legislative Council seats. Of the 24 seats nine are held by Indians. The new Executive Council consists of 10 members, two of whom are Indian.

In Jamaica where Indians form only 1.7 per cent of the total population there is one Indian member in the Lower House comprising 32 elected members.

Money can be freely sent to India from the British West Indies.

## MAURITIUS

Indians in Mauritius form about 67 per cent of the total population of the Colony. The Indian population is mainly composed of descendants of "indentured" labourers from Madras, U.P. and Bihar, but there is a sprinkling of traders from Bombay. Indians have settled there for generations and are now termed "Indo-Mauritians". A large proportion of them are farm-labourers on sugar plantations. The rest are engaged in commerce and trade or are doctors, lawyers, government servants.

Indians are mostly illiterate, and on the whole their economic and social conditions are not as satisfactory as in some other Colonies.

There is no colour bar against Indians, nor do they suffer from any political disability.

The Legislative Council of the Colony as at present constituted consists of 35 members including the Governor as President, three ex-officio, 12 nominated and 19 elected members. Of these 35 members 14 are Indian.

Fresh proposals for constitutional advance were made in 1956. Some of these were implemented later in the year. The strength of the Executive Council was raised from 9 to 12 and the title of Minister conferred on its members. The rest of the proposals are to be implemented in 1958, when fresh elections will be held and the number of elected members of the Legislative Council increased from 19 to 25.

There are no restrictions on remittances to India.

## EAST AFRICA

British East Africa consists of the four territories of Kenya, Uganda, Tanganyika and Zanzibar.

The majority of the Indians in these territories are engaged in commercial undertakings. Artisans, technicians, Government servants, doctors, lawyers, make up most of the balance.

Indians in East Africa—numbering about 2 lakhs—are mostly concentrated in urban centres. In Kenya and Tanganyika they constitute about 59 per cent of the total non-native population of each territory; in Uganda they form the single largest community among the non-Africans, being about 82 per cent of the non-African population. Their general economic condition is on the whole very satisfactory. Many of them are quite well-to-do.

In Uganda some Indians have big factories, e.g., sugar, sisal and ginning. About 90 per cent of the total trade of Uganda passes through Indian hands.

Indians (and also other non-Europeans) are not allowed to own or lease land in the Kenya Highlands for agricultural and industrial purposes. Anti-Asiatic regulations prevent the purchase or occupation of certain residential sites in Nairobi and Mombasa (in Kenya) by Indians.

Indians are, in practice, discriminated against in the matter of appointments under the Government; they are generally excluded from appointments to higher posts. An Indian (or other non-European) gets less pay than a European for the same work. But this position is being remedied.

In Kenya, grants for social services, e.g., education, are more favourable to Europeans than to Indians.

Indian residents in these territories are entitled to acquire the citizenship of the U.K. and Colonies under the British Nationality Act. Normally one year's continuous stay or birth in the territory is necessary.

In Tanganyika, Uganda and Zanzibar there is no elective system for filling up seats in the Legislative Councils. In Kenya, the population is divided into race electorates for the election of members to the Legislative Council; the Indian electoral roll is further subdivided as between Indian Muslims and other Indians. Out of six seats two are for Indian Muslims and four for other Indians.

Indians also enjoy municipal franchise in these territories.

The representation of Indians on the Legislative and Executive Councils is shown below:

Country	*Executive Council		Legislative Council	
	Total	Indians	Total	Indians
Kenya .. ..	15	2	54 (28 non-officials).	6 (6 elected non-official— 2 Muslims and 4 other Indians) There are also a few Indians nominated official members. 6 (Nominated non-officials). There are also a few Indians nominated official members. 10 Asians (Nominated non-officials). The strength of the Legislative Council was increased in 1955 under proposals announced in 1954. It now consists of a Speaker (a non- official member), 31 ex-officio and nomi- nated official members and 30 non-official members (10 Africans, 10 Asians and 10 Europeans).
Uganda .. ..	15	1	60 (28 non-officials).	2 (Nominated non-officials).
Tanganyika .. ..	14	1	62 (30 non-officials).	2 (Nominated non-officials).
Zanzibar .. ..	9	-	16 (8 non-officials).	2 (Nominated non-officials).

\* In Kenya and Uganda there are now Councils of Ministers.

Since 1st January 1948, Kenya, Uganda and Tanganyika have been included in a sort of loose union designated East African High Commission with a common legislature and a common administrative service for certain specific purposes. The legislature of the East African High Commission consists of 7 ex-officio members, 3 nominated official members (1 from each territory) and 13 non-official members. The 13 non-official members consist of: one elected by the non-official members of the Legislative Council of each territory, one European, one Indian and one African member appointed by the Governor of each territory (in Kenya the European and Indian members are elected by the European and Indian members respectively of the Kenya Legislative Council) and one Arab member (appointed by the High Commission).

There are no restrictions on remittances to India.

## SOUTH AFRICA

Persons of Indian origin in South Africa numbering a little less than 4 lakhs are mostly labourers, traders, small farmers, factory workers, and in small numbers professionals.

Racial discrimination against Indians exists in South Africa in every walk of life and in the worst possible form. Persons of Indian origin are practically excluded from parliamentary, provincial and municipal franchise as well as from public services except in menial and subordinate posts.

"Apartheid" or racial segregation is the declared policy of the South African Government. In accordance with this policy Indians are

subject to a number of restrictions as regards immigration, inter-provincial migration, residence, trade, industry, professional and other occupations. Racial segregation is also enforced in schools, post offices, railways, public transport, hotels, and public utility undertakings.

The outstanding piece of anti-Asiatic legislation is the Group Areas Act, 1950. By this Act, the entire population of the Union has been divided into three main groups, White, Native and Coloured. Persons of Indian origin are included in the Coloured group. The Government will establish by proclamation "group areas" for exclusive occupation or ownership or both, of any of the groups. The various racial communities will have to live and occupy premises for trade and professions only in areas allotted to them. Indians and other non-Europeans will thus not be able to continue to hold properties in an area declared for the European group. The Union Government has already started taking active steps for the proclamation of group areas in a number of important cities in the Union. When the Act is fully implemented, persons of Indian origin will have to move into the areas exclusively reserved for them and this will disrupt their trade and business and involve immense losses running to millions of pounds.

The Group Areas Act was further amended in 1955 (Act No. 6 of 1955) to invest increased powers to the Land Tenure Advisory Board.

In August 1956 the South African Government issued a proclamation under which more than 9,000 Indians were served with a notice to vacate the western areas of Johannesburg within two years. Of these 9,000 Indians, 750 are traders who face economic ruin. Ultimately, according to an unofficial estimate more than 22,000 Indians with property in Johannesburg worth about £10,000,000 will be uprooted. The Indians are asked to move to Lenasia, an underdeveloped suburb 22 miles from Johannesburg.

Asians have been declared prohibited immigrants since 1913, but the right of entry into the Union of wives and children of Indians domiciled in South Africa was provided for in the Reciprocity Resolution passed at the Imperial Conference of 1918 and later in the Cape Town Agreement of 1927. Under an Act passed in 1953, the Union Government banned the entry into South Africa of the wives and children of persons of Indian origin domiciled in the Union. But certain specified categories of wives and children of persons of Indian origin were allowed to enter South Africa till 10th February 1956.

The aim of the present South African Government in regard to Indians is their ultimate repatriation to India.

Practically all Indians domiciled in South Africa are South African citizens by law, but they are denied some of the most important rights of citizenship.

No Indian, who is not already a South African citizen, is allowed to acquire South African citizenship.

Indians have no franchise rights in the Provinces of Natal and Transvaal. In the Cape Province they enjoy limited franchise rights as for Cape Coloureds.

Indians are not eligible to a place in the Executive Council or Legislature, whether provincial or central.

There is no special limit to remittances by Indians to India.

The question of the treatment of the people of Indian origin in South Africa was placed before the General Assembly of the United Nations in 1946. In that year the U. N. General Assembly passed a resolution expressing the opinion that "the treatment of Indians should be in conformity with the international obligations under the agreements concluded between the two governments and the relevant provisions of the Charter." Resolutions have been passed in subsequent sessions of the U. N. General Assembly in this respect, but the Union Government have paid little attention to these resolutions. In the Resolutions adopted in 1950 and

afterwards the Union Government was also called upon to suspend the implementation of the Group Areas Act pending the conclusion of negotiations between the Governments of India, Pakistan and South Africa. But the Government of South Africa has proceeded with the implementation of this Act despite these Resolutions.

The General Assembly, in 1952 set up a Good Offices Commission to assist the three Governments concerned in their negotiations on this question. But the South African Government refused to recognise the Commission.

The Commission was again appointed by the 8th Session of the United Nations General Assembly in 1953 to make further efforts to arrange and assist in negotiations between the Governments of India, Pakistan and Union of South Africa. But the Commission's efforts were rendered infructuous because of the total non-co-operation of the Government of the Union of South Africa.

The 9th Session of the U. N. General Assembly passed a resolution suggesting that the three Governments concerned negotiate directly among themselves to reach a decision on the problem.

The U. N. Secretary-General nominated in June 1955 Sr. Luis de Faro, formerly Brazilian Ambassador to the Federal Republic of Germany to bring the parties together. Sr. Luis de Faro has reported failure to the U. N. Secretary-General who in his turn has reported the matter to the U. N. General Assembly.

The 10th Session of the U. N. General Assembly (1955) passed a resolution urging the Governments of India, Pakistan and the Union of South Africa to pursue negotiations with a view to bringing about the settlement of the question of the treatment of the people of Indian origin and report the developments to the General Assembly at its next Session.

In pursuance of this resolution, the Government of India wrote to the Government of South Africa offering to start negotiations. But the latter refused the offer.

The matter was then reported to the 11th session of the U. N. General Assembly which again passed (Jan 30, 1957) a resolution urging South Africa, India and Pakistan to start negotiations aimed at settling the dispute. The resolution made a special appeal to the Union Government to co-operate. It also invited the parties to report jointly or severally back to the Assembly.

#### SOUTHERN RHODESIA

Indians in Southern Rhodesia are mostly traders. Immigration of Indians into Southern Rhodesia has been prohibited since 1924, and only wives and children under 16 of domiciled Indian residents are admitted.

Although there are no discriminatory laws as such against Indians, in practice and in the interpretation of laws discrimination against them exists, particularly in the social sphere. Indians are not eligible for appointments to the Fixed Establishment of the Civil Services, and are not admitted into the Armed Forces. Indians are required to obtain special permits in order to purchase, possess or sell arms and ammunition whereas Europeans can do so on ordinary permits.

There is a common roll for all races with common qualifications. Of about 50,000 voters in the territory, between 400 and 500 are Indians.

Southern Rhodesia is a quasi-Dominion and has a cabinet of seven Ministers headed by a Prime Minister. There are no Indians in the cabinet. The country has an elected Legislative Council consisting of 30 members, all of whom are Europeans. Because of the small number of Indian voters, no Indian has been elected to the Legislative Council so far.

Southern Rhodesia is now federated with the other two British Central African territories of Northern Rhodesia and Nyasaland. There is no Indian member in the Federal Legislative Assembly also which consists of 35 members.

There is no limit to remittances to sterling area countries.

#### CEYLON

Out of a total of about 10 lakh persons of Indian origin in Ceylon, about 781,000 (labourers, subordinate staff, etc.) are in the tea, rubber and coconut estates. The balance is made up of merchants, shop assistants, land proprietors, and professional men such as doctors, accountants, lawyers and their families.

There is no restriction on Indians' acquiring property in Ceylon, but non-Ceylonese are not allotted Crown Land. Trade in certain commodities and with certain countries like Japan and Germany is exclusively reserved for Ceylonese enterprise. Certain rights like fishing rights and the ownership of industries like public transport (omnibuses) are restricted to Ceylonese. Government service is restricted to Ceylonese except that foreigners are appointed on a contract basis when no qualified or suitable Ceylonese is available. Consequently Indians who have not acquired Ceylon citizenship have severe handicaps. Indians are also denied certain privileges such as National Insurance and un-employment relief.

The rights of Indians to citizenship are governed by two Acts enacted in 1948 after a discussion between the Indian and Ceylonese Prime Ministers. These Acts are the Ceylon Citizenship Act and the Indian and Pakistani Residents (Citizenship) Act, which provide that the Indian residents in Ceylon would be entitled to obtain the citizenship of Ceylon by registration subject to the following conditions: (a) an applicant must be resident in Ceylon when the laws came into force and must have been residing in Ceylon since January 1, 1930 if a bachelor and since January 1, 1939 if a married man, (b) he must have adequate means of livelihood, (c) he should be in a position to comply with the laws and customs of Ceylon, and (d) the application for registration was filed and submitted to the Controller of Registration before August 5, 1951.

Consequent on an adverse Privy Council judgment, an amendment to the Indian and Pakistani Residents (Citizenship) Act was made by the Government in November 1952, providing that the wife and each minor child of an applicant for citizenship should have been continuously resident in Ceylon from January 1, 1939, or the first anniversary of the marriage, or birth, as the case may be, whichever was later, subject to certain exemptions. This has proved a hardship to many persons.

Great difficulty was encountered by applicants in proving ordinary residence in Ceylon during 1936-47 mainly due to lapse of time, lack of documents and the ill-treatment of the majority of applicants and consequent inability to provide legal proof of the required residential qualifications.

An Agreement was entered into in January 1954 between the Government of India and the Government of Ceylon regarding the citizenship rights of persons of Indian origin in Ceylon. Under this Agreement the Government of Ceylon agreed to expedite the registration of citizens under the Indian and Pakistani (Citizenship) Act and to make every endeavour to complete the disposal of pending applications within two years.

At a conference held in October 1954 at New Delhi between the Representatives of Ceylon and India, it was agreed that applications for Indian citizenship by persons of Indian origin will not be refused on the ground that an applicant had earlier applied to the authorities in Ceylon for registration as a Ceylonese citizen, and that pending registration of such persons either as Ceylonese or as Indian, they will be issued Identity Certificates for travel to India by the authorities (Indian or Ceylonese as the case may be) with whom their applications for citizenship are pending. The Ceylon Government have also agreed that all those who heretofore become Indian citizens will be allowed to continue in their employment in Ceylon till the age of 55. They have further agreed to facilitate the registration of persons of Indian origin as Ceylonese citizens.

The total number of applicants for Ceylon citizenship is estimated to be about 850,000.

Out of these, the applications of over three lakh persons were still reported as pending disposal in November 1956.

Pursuant to January 1954 Agreement, the Ceylon Government enacted the Indian and Pakistani (Parliamentary Representation) Act of 1954. Under it, for the purpose of voting the entire island of Ceylon is made into a single Constituency, from which registered citizens of Indian origin shall elect four members to the House of Representatives. The voting will be separate till 1966, after which registered citizens of Indian origin will also be brought on the general electoral register.

The Parliament of Ceylon consists of the House of Representatives (Lower House) and the Senate (Upper House). The strength of the House of Representatives was 101, 95 elected and 6 nominated members. Under the Constitution Amendment Act, 1954 the number of members of the House of Representatives has been increased from 101 to 105 to provide for the representation of 4 members to be elected from the Indian and Pakistani Residents Constituency.

In the elections that were held in April 1956 the People's United Front swept the polls, defeating the United National Party headed by Sir John Kotelawala.

An agreement on the Ceylonization of Indian business undertakings was reached on Nov. 22, 1954. It was agreed that Indian firms could retain essential (technical, involving trust and confidence) personnel, but only Ceylonese should be employed in lower and middle ranks and that they should be trained for executive posts.

An agreement to avoid double taxation was concluded in 1956.

Remittances from Ceylon are governed by the Exchange Control Regulations in force which are altered from time to time in accordance with the financial situation in Ceylon. Under the

existing Exchange Control Regulations remittances upto a maximum of one-third of proved income in Ceylon may be sent to India. All non-Ceylonese holding valid residence permits can obtain Exchange Control Cards from the Post Offices for a monthly remittance of Rs. 30 for purposes of maintenance.

The Government of Ceylon launched their scheme of repatriating Indians at the end of 1954. Indians whose temporary residence permits had expired were served with quit notices.

In April 1955 the Government of Ceylon amended their Immigrants and Emigrants Act of 1948 whereby they have shifted the onus of proof in a prosecution under the Immigrants and Emigrants Amendment Act on the accused. The employment of persons who are unable to prove their nationality, has been made illegal and the employers rendered liable to prosecution.

### Fiji

Indians have played an important part in the development of the economic resources of the Fiji Islands. Indian residents are the descendants of the indentured immigrants from India who started coming into the Colony in 1879. The Indian population is about 48.2 per cent of the whole population of the island. The majority of the Indians are independent farmers, agricultural labourers, skilled and semi-skilled workers; the rest being teachers, clerks, storekeepers, doctors, lawyers. Sugar-cane production and road transport are Indian monopolies.

There is no colour bar in Fiji and Indians suffer from no 'political disabilities'. There is also no racial discrimination against Indians with regard to appointment to the civil services. However, under the present Government regulations, Indians cannot own land which is marked as 'Native Land Reserve' or Crown Land, without the approval of Government; but there are no restrictions on their acquiring freehold land.

Indians in Fiji have franchise both in respect of Legislature and Local Town Council but the franchise is on a communal basis.

The Legislative Council consists of 31 members—16 officials and 15 non-officials. In the non-official group Europeans, Indians and Fijians have equal representation with 5 members for each group. Of the 5 Indian members 3 are elected on a communal franchise and 2 are nominated. The Executive Council consists of 4 officials (excluding the Governor) and 3 non-official members. One of the non-official members is an Indian elected from among the Indian members of the Legislative Council.

There are no restrictions on the remittance of money outside Fiji.

### AUSTRALIA, NEW ZEALAND

The majority of persons of Indian origin settled in Australia are engaged in retail trade or agricultural operations.

Indians domiciled in Australia do not suffer from any disability and have all citizenship rights. In accordance with the White Australia policy, fresh Indians are, however, not admitted for permanent settlement.

The Commonwealth franchise was granted to Indians domiciled in Australia in 1925.

The great bulk of Indians in New Zealand are engaged in the sale of fruits and groceries. Domiciled Indians are not generally subject to any disability or discrimination.

Indians have always enjoyed the right to vote both in Municipal and Parliamentary elections.

Indians can remit a limited amount to India for maintenance of wives and children. Up to April 1952, the limit was £65 for wife and £5 for each child (subject to maximum of 4 children) per quarter, but since then a 50 per cent cut has been imposed.

## A TOURIST'S GUIDE\*

**T**HE following hints meant for foreign tourists may be useful :

1. Every foreign tourist entering India should be in possession of a valid passport issued by his Government.

He should also obtain before leaving his country a tourist visa from the Indian representative abroad (or the British representative in countries where there are no Indian representatives). Commonwealth citizens are exempt from the visa requirement, provided their passports are valid for travel to India. Persons of non-Indian origin domiciled in South Africa are, however, required to obtain entry permits.

Holders of Ceylonese and Pakistani passports are also required to obtain visas.

Transit visas are not required for through air/ship passengers in direct transit by the same flight or by the next regularly scheduled flight irrespective of whether the flight is of the same or a different Airline. One can however leave the airport or ship by obtaining a landing permit for 72 hours and on depositing his passport.

This is subject to the proviso that the passenger leaves Indian soil within 72 hours and the mode of travel is not changed.

The maximum period of stay on a tourist visa is 3 months, and on a transit visa 15 days.

This is subject to the period mentioned in the visa.

For short visits not exceeding 2 weeks to Pakistan and Ceylon tourists may obtain return visas from the State Governments, paying the required fees. For longer periods, "no objection to return to India" endorsements will be given for such periods as will not extend beyond the date of the authorised stay of the tourist in India. A visa will then have to be obtained from the Indian Embassy or High Commission abroad. For tourists visiting Burma and Nepal only "No objection to return to India" endorsements on the passport may be obtained irrespective of the length of stay outside the country.

Visas for India are, unless otherwise specified, valid for a single journey only.

2. All non-Commonwealth tourists arriving in India are required to get themselves registered at the port of arrival and obtain certificates of registration. They will be registered as "tourists" if in possession of a tourist visa, and will not be required to report their movements to the police or registration authorities during their stay in India.

3. The Government of India have placed no health restrictions on persons entering India by sea or air, except in regard to yellow fever.

However, all persons are advised, in their own interest, to be protected against small-pox and cholera according to international requirements.

4. All baggage is open to customs examination. The duty payable on most articles varies from 25 per cent to 100 per cent according to the article.

Certain personal effects upto specified values are allowed to enter free. Also alcoholic liquor up to one quart, provided the tourist can procure a permit on arrival by producing his Tourist Introduction Card. Liquor permits are issued to tourists at the Santa Cruz Airport, Bombay, on application immediately on landing.

Detailed notice regarding full baggage allowances can be seen by tourists on request to customs.

5. Tourists are allowed to bring into India any amount of Indian or foreign currency notes or coins except in the cases specified below :

Bank of England notes up to £10 per head ; Indian coins from Afghanistan and Pakistan up to Rs. 5 in value. Import of Indian notes from Burma other than those bearing "Ashoka"

Motifs are prohibited. Government of India one rupee notes other than those of "Ashoka". Motifs are prohibited on import from Afghanistan and Pakistan. There is no limit on the amount of Travellers' Cheques.

The official rates of exchange are as follows : £1 equal to Rs. 13.33 ; U.S. \$1 equal to Rs. 4.76. The actual buying and selling rates, however, differ slightly from these rates.

All foreign currency must be declared to the customs on arrival, and can be exchanged at any authorized dealer or money changer.

6. Tourists are advised to arrange for clearing their baggage by one of the recognized travel agencies.

### TRAVEL AGENCIES

Here is a list of recognized agencies :

#### New Delhi

American Express Co. Inc., 60, Queensway (Branch) ; Cox & Kings (Agents) Ltd., Hotel Imperial, Queensway (Branch) ; Iyer & Son Ltd., United India Building, F-Block, Connaught Place (Head Qtrs.) ; Orient Express Co. Ltd., Marina Hotel (Head Qtrs.) ; Mercury Travels (India) Ltd., Imperial Hotel (Branch) ; Escorts (Agents) Ltd., P.O. Box 187, Pratap Building, Connaught Circus (Head Qtrs.) ; Saha & Rai Travel Ltd., Hotel Ambassador, Sujan Singh Park (Head Qtrs.) ; Globe Travels, 11-H, Connaught Circus (Head Qtrs.).

#### Bombay

American Express Co. Inc., Orient Building, Hornby Road (Head Qtrs.) ; Palmer Lawrie & Co., Ltd., 5, Graham Road, Ballard Estate (Branch) ; Thos. Cook & Son Ltd., P.O. Box 46, Cooks Building, D. Naorji Road (Head Qtrs.) ; Cox & Kings (Agents) Ltd., Lloyds Bank Buildings, Hornby Road, Post Box No. 398 (Head Qtrs.) ; Grindlays Bank Ltd., Post Box 93, Mint Road (Head Qtrs.) ; Jeena & Co., Post Box No. 849, 10, Veer Nariman Road, Fort (Head Qtrs.) ; Lee & Muirhead (India) Ltd., 12, Ramraj Row (Head Qtrs.) ; Trade Wings Ltd., 30, Ramraj Row (Head Qtrs.) ; Messrs. Jamnals Sons Ltd. (Hind Musafir Agency), Jelaugir Walla Building, 51, Mahatma Gandhi Road (Head Qtrs.) ; Mercury Travels (India) Ltd., Sangli Bank Buildings, Behind Reserve Bank (Branch) ; Asiatic Travel Service, P. O. Box No. 1568, 12, Murzban Road, Fort (Head Qtrs.) ; N. Jamnadas & Co., Travel Agents, 16, Bank Street, Fort (Head Qtrs.) ; Airfreight Ltd., 'Adelphi' 3, Queen's Road (Head Qtrs.) ; Vensimal Bassarnal & Bros., 521, Kalbadevi Road, P. O. Box No. 2112, Bombay.

#### Madras

Thos. Cook & Son Ltd., 45, First Line Beach, George Town (Branch) ; Ram Mohan & Co. Ltd., National Insurance Buildings, 362, Netaji Subhas Road (Head Qtrs.) ; Bharat Travel Service Ltd., Tourist Agents, "Caithness Hall", 310, 311, Janghi Chetty Street (Head Qtrs.).

#### Calcutta

American Express Co. Inc., Pollack House (Branch) ; Palmer Lawrie & Co. Ltd., 21, Netaji Subhas Road (Head Qtrs.) ; Cox & Kings (Agents) Ltd., Post Box No. 537 (Branch) ; Grindlays Bank Ltd., Church Lane (Branch) ; Jeena & Co., Great Eastern Hotel, 29, Waterloo Street (Branch) ; Orient Express Co. Ltd., Norton Buildings, 1 & 2, Court House Corner (Branch) ; Travel Wings (Calcutta) Ltd., 15, Old Court House Street (Head Qtrs.) ; Mercury Travels (India) Ltd., P. O. Box No. 925, Grand Hotel, 15, Chowring Road (Head Qtrs.) ; National Travel Agency, Mercantile Buildings, 9 & 10, Lal Bazar (Head Qtrs.).

#### Bangalore

Thos. Cook & Son Ltd., 20-C, Mahatma Gandhi Road (Branch) ; Bharat Travel Service Ltd., D-9, Fifth Main Road, Gandhinagar (Branch).

#### Banaras

The Indian Travel Corporation Ltd., Pans Phatak & Panaras (ant. (Head Qtrs.).

#### Lucknow

The Indian Travel Corporation Ltd., 53-C, Clay Square (Kabir Marg) (Branch).

#### Hyderabad (Deccan)

G. Raghunathmull Bank Ltd. (Head Qtrs.).

#### Ahmedabad

Messrs. Jamnals Sons Ltd. (Hind Musafir Agency), Vishnu Bhawan, Relief Road (Branch).

#### Simla

Thos. Cook & Son Ltd., The Mall (Branch).

Below is given a list of Shikhar Agents recognised by the Ministry of Transport, Government of India :

Messrs. Indian Shikhar & Tours Ltd., F. Connaught Place, New Delhi ; Shri M. Yusuf Ali, Porla, Distt. (Fanda (Bombay)) ; Messrs. Allwyn Cooper Ltd., Big Game Professional Shikhar, Wardha Road, Nagpur (Bombay) ; Lt.-Col. S. A. Granville, "The Vicarage", Pachmarhi (Madhya Pradesh) ; Shri Vivek Singh Majithia, Durni, P. O. Sardarnagar, Distt. Gorakhpur (U. P.).

### TOURIST OFFICES

The following is a list of Government of India tourist offices :

1. Ministry of Transport (Tourist Traffic Branch), New Delhi.
2. Regional Tourist Officer, 123, Queen's Road, Churchgate, Bombay.
3. Regional Tourist Officer, Old Court House Street, Calcutta 1.
4. Regional Tourist Officer, 88, Janpath, New Delhi.
5. Regional Tourist Officer, 35, Mount Road, Madras.
6. The Tourist Information Officer, 15-B, The Mall, Panaras.
7. The Tourist Information Officer, 16-A, Mahatma Gandhi Road, Bangalore.
8. The Tourist Information Officer, The Mall, Agra.
9. The Tourist Information Officer, 'Krishna Vilas', Station Road, Aurangabad.
10. The Tourist Information Officer, Municipal Building, Ootacamund.
11. The Tourist Information Officer, Chaurashtra, Darjeeling.
12. The Tourist Information Officer, The Ridge, Simla.
13. Tourist Information Officer, Rajasthan Hotel, Jaipur.

### TOURIST CENTRES

**Mount Abu** (hill station) : Pop. 4,316 (1941) in Rajasthan, about 4,000 feet above sea-level. There are two seasons in the year, the first lasting about two and a half months from the middle of March to the beginning of June, and the second lasting about one and a half months from the middle of September to the end of October. *Places worth a visit* : 1. The Dilwara Jain temples (11th-13th century, A.D.) containing the finest marble carvings in India, 2. Achalgarh temples (15th-16th Century, A.D.) and Mandakini Kund, 3. Ruins of an ancient town called Chandravati, 4. Nakki Talao (lake), 5. Arbuda Devi, a shrine cut in rock, 6. Guru Shikhar (5,646 ft.), highest point in Abu, 7. Sunset point, 8. Palanpur point, 9. Gaumukh Temple and Agni Kund, 10. The Municipal Park. Mount Abu is electrified and has waterworks with public utility taps. The chief means of conveyance are rickshaws, taxis and buses. There are hotels, dak bungalows and inspection houses at Mount Abu. Permission is required to use the dak bungalows and inspection houses. **Mount**

\* Note : When the population of a town is not given it may be generally assumed that it is less than 20,000.

No. of foreign tourists in 1954 : 39,000 ; in 1951 : 21,000. Foreign exchange earnings through tourist traffic were Rs. 10.1 crores in 1956. In the first half of 1957 the earnings amounted to Rs. 7.4 crores.

**Abu** is reached by railway and road. The nearest railway station is Abu Road on the metre-gauge section of the Western Railway from Ahmedabad to Delhi. From the station Abu Road is about 17½ miles by road, and there is regular motor service between the town and the station. Taxis can be hired from Mount Abu Motor Service, Abu Road.

**Agra:** Pop. 875,665 (1951), a town in U.P., stands on the banks of the River Jumna. It was the capital of the Moghul Empire during the reigns of Babar, Akbar, Jehangir and Shah Jehan. *Places worth a visit:* 1. the Taj Mahal, regarded by many as the most beautiful building in the world, 2. the Fort, 3. the Juma Masjid, 4. Moti Masjid, 5. the tomb of Itmad-ud-Daula, 6. Akbar's tomb at Sikandra, about five miles from Agra, 7. Dayal Bagh, 8. Twenty-three miles from Agra is the deserted city of Fatehpur Sikri founded by Akbar.

Agra, which has many railway stations, is on the main Bombay-Delhi and Calcutta-Delhi lines and is accessible by the Central or the Western or the Northern Railway.

**Ahmedabad:** In Bombay State, is an important textile centre. It contains numerous monuments of the fifteenth and sixteenth centuries. Pop. 788,333 (1951).

**Aiholi:** near Bagalkot in Mysore State contains about fifty temples important in the development of Hindu architecture and sculpture.

**Ajanta Caves:** are 66 miles north of Aurangabad in Bombay State. The rock-cut caves are 20 in number (5 chaityas or shrines and 24 viharas or monasteries, all Buddhist) and present a record of a unique combination of painting, sculpture and architecture of a period extending over nine centuries from about the 2nd Century B.C. to about 7th Century A.D. Three miles from the caves are a rest-house and a travellers' bungalow under the charge of the Director of Archaeology of the State. There is a curator's office next to the rest-house from which help and information can always be obtained. The caves can be reached from Aurangabad on the railway line between Dronachellam and Manmad by the State Transport buses which regularly ply between Aurangabad Station and the Ajanta caves.

**Ajmer:** city of considerable antiquity, Hindu and Muslim religious centre, contains Western Railway workshop. Pop. 196,033 (1951). *Places worth a visit:* 1. the Durgah of Khwaja Sahib (tomb of Muslim saint), 2. the Magazine (Akbar's old palace now museum), 3. Ana Nagar Lake (the marble pavilions round the lake were built by Shah Jehan), 4. Adhai-din-ka-jhopra (Hut of two and a half days), 5. Taragarh Fort (built by Akbar), 6. Mayo College, 7. Pushkar, the most sacred lake in India, is about seven miles away. The chief means of conveyance are buses, tongas and pao gharris. Ajmer lies on the metre-gauge section of the Western Railway line between Delhi and Ahmedabad. A line from Ajmer goes south to connect it with Khandwa on the Central Railway line between Delhi and Bombay. (Rajasthan).

**Allahabad:** city in U.P., situated at the confluence of the Ganga and the Jumna. It has an old fort and also an Asoka pillar. Sixty-five miles from Allahabad is Kosambi where the ruins of an ancient capital are being excavated. Pop. 332,295 (1951).

**Alwar, Bikaner, Jodhpur, Kotah:** famous for Rajput historical monuments.

**Amritsar:** town in the Punjab, sacred to the Sikhs. Pop. 325,747 (1951). Amritsar is the very centre of the Sikh religion and has a big trade in grain and textiles. *Places worth a visit:* 1. the Golden Temple standing in the Pool of Immortality, 2. Baba Atal Tower, 3. Akal Takht, 4. Ram Bagh Gardens, and 5. Fort Govind Garh. The chief means of conveyance in the city are hackney carriages. Fares are fixed. Amritsar is the Indian terminus of the frontier line from Delhi. It is on the Northern Railway.

**Aurangabad:** in Bombay, is note-worthy because of its proximity to Ellora and Ajanta caves and for handloom textiles. *Places worth*

*a visit are:* 1. Bibi-ka-Mughbara—the tomb of Aurangzeb's wife which is a replica of the famous Taj, 2. Panchakki (old water-mill). The shrine of Shah Muzaffar, a Muslim saint, lies near by. Pop. 66,636 (1951).

**Badami:** in Mysore State, is famous for sculptured caves of the 6th century and for a group of Hindu temples. Fifteen miles from Badami is Pattadakal with another group of early Hindu temples (7th or 8th century) examples of pure Dravidian architecture.

**Bangalore:** largest city in Mysore and a health resort is about 3,000 feet above sea-level. It is well laid-out and up-to-date with every urban facility. *Places worth a visit:* 1. Cubbon Park, 2. Lal Bagh, 3. Band-stand, 4. Race Course, 5. Maharaja's Palace, 6. Tipu's Palace, 7. Venkataramanaswamy Temple. The chief means of conveyance are rickshaws, juktas, buses and taxis. Pop. 778,977 (1951).

**Baroda:** Capital town of the former Baroda State, now part of Bombay State, is about 250 miles to the north of Bombay, modern, pop. 211,407 (1951). *Places worth a visit:* 1. Laxmi Vilas Palace (the residence of the Maharaja, one of the most beautiful palaces in India), 2. Old Nazim Bagh Palace, 3. Museum and Public Park, 4. Jubilee Garden, 5. L. E. Battery, and 6. the city walls. The chief means of conveyance are tongas, buses, taxis. Baroda lies on the main lines of the Western Railway between Bombay and Delhi and Bombay and Ahmedabad.

**Belur:** in Mysore State, noted for its elaborately sculptured temples of the Hoysala period.

**Benares:** town in U.P. on the banks of the Ganges, very sacred to the Hindus. It is in fact the religious capital of Hindu India and contains about 1,600 comparatively large temples besides countless minor shrines. It is also reputed to be the oldest city in the country. Pop. 355,777 (1951). *Places worth a visit:* 1. Vishwanath Temple, 2. Bharat Mata Temple, 3. Manmandir, with Jalsinghi's Observatory, 4. Aurangzeb's Mosque, 5. Gyan Wapi Mosque, 6. Nandeswar Kotli, 7. Ramnagar Fort, 8. Malda Jin Garden, 9. Victoria Gardens, 10. Benares Hindu University, and 11. Sarnath, a great Buddhist centre with many architectural remains, is about six miles from Benares. The chief means of conveyance are taxis and tongas.

There are also about 30 dharma-shalas for Hindu pilgrims. Benares is on the branch line from Moghul Sarai to Saharanpur. It is also connected with the major towns of India by railway.

**Bharatpur:** town in Rajasthan is famous for its historic fort. Pop. 37,321 (1951).

**Bhubaneswar:** which is to be the new capital of Orissa, is a city of temples once said to number 7,000. *Places worth a visit:* 1. Lingaraj Temple, visitors are not allowed inside the compound but have to see it from a platform, 2. Mukteswar Temple, 3. Parasurameswar Temple, 4. Raj Rani Temple. Nearby are the Jain and Buddhist rock-cut caves of Khandagiri and Udayagiri and Asoka's Rock Edict at Dhauhi. There is a Dak Bungalow where visitors can stay with the District Board's permission. Bhubaneswar is on the main S-E. R. line between Waltair and Howrah, about 20 miles from Cuttack and 38 miles from Puri.

**Bijapur:** town in Mysore State, capital of the old Muslim kingdom of Bijapur is rich with the remains of palaces, mosques, and tombs of the Adil Shahi kings. *Places worth a visit:* 1. Jamli Masjid (the greatest mosque in South India), 2. Gol Gumbaz (the tomb of Muhammad Adil Shah and the second largest dome in the world), also called the Whispering Gallery, 3. Methar Mahal, 4. Ashar Mahal, 5. Gagan Mahal, 6. Chini Mahal, 7. Mecca Masjid, 8. Taj-Baury (water-tank), 9. Malik-i-Maldan, (Great Gun), 10. Landi-Kaash Gun, 11. Haldar Burj (tower), 12. Ibrahim Raza (the tomb and mosque of Ibrahim II), 13. Jala Mandir (reservoir), 14. Chand Bauri (old tank), 15. Granary, 16. Jod Gombaz (double tombs), 17. Bara Kaman Masjid, and 18. Begum Tank. The chief means of conveyance are taxis, lorries, tongas and bullock-carts. Bijapur is a railway station on the

Gadag-Sholapur section of the Southern Railway. There are a dharmashala and a travellers' bungalow about one and a half miles from the station. Pop. 65,731 (1951).

**Bombay:** second city and port in India generally called the gateway to India, is western and modern. Pop.: over 3 million; Area (Greater Bombay) 174 sq. miles. It is the principal centre of the textile industry, and the second biggest financial centre. The foreign trade of Bombay is about 46 per cent of the total trade of India. The city returns 30 per cent of the country's total income-tax, and 20 per cent of the corporation tax. It is an important communications centre, served by several air-lines and two big railways of both of which it is a terminus. May and October are the hottest months, but from November to March it is pleasant. *Places worth a visit:* 1. the Gateway of India, 2. Apollo Bunder, 3. Prince of Wales Museum, 4. the Town Hall, 5. Bombay Castle, 6. Rajabai Tower and University Building, 7. Victoria Terminus of the Central Railway, 8. the General Post Office, 9. Crawford Market, 10. Brabourne Stadium, 11. Chowpatty sands, 12. Malabar Hill, Hanging Gardens and Kamla Nehru Park, 13. Central Station, Terminus of the Western Railway, 14. Race Course, 15. Bhandarwada Reservoir and Gardens, 16. Victoria Gardens. Places near about Bombay which are worth a visit are: 1. Juhu (sea-side resort), 2. Versova (sea-side resort), 3. Vihar Lake (from which the city gets its water-supply), 4. Kanheri Caves (rock-cut caves of Buddhist origin), 5. Jogeshwar Caves, 6. Vajreshwari (temple and hot springs of medieval property), 7. Mandapeshwar (cave temple), 8. Nirmal (temple and lake), 9. Ambarnath (temple), 10. Uran (port, with private garden and zoo), 11. Pall (hot springs and small game shooting), 12. Elephanta Caves (Brahmanical Caves). The chief means of conveyance in Bombay are trams, buses, electric railway, taxis and gharris.

**Brindavan:** holy place of Hindus, about six miles from Mathura in U.P. It is sacred because of its association with the birth and early life of the Hindu God Shri Krishna. *Places worth a visit:* 1. Govind Dev Temple, 2. Gopinath Temple, 3. Ranganath Mandir.

There are travellers' bungalows. Brindavan is accessible by railway or road from Mathura.

**Buddh Gaya:** in Bihar, a Buddhist centre of pilgrimage. It contains the famous medieval Buddhist temple near the Bodhi Tree under which Gautam did penance and attained Enlightenment. Pop. 133,700 (1951).

**Bundi:** in Rajasthan is well-known for its buildings. Jungles nearby provide plenty of tiger shooting. Pop. 22,697 (1951).

**Calcutta:** until March, 1912, the headquarters of the Indian Government, and now, as then, the commercial capital of India. It is the terminus of three great railways, and the port of an immense river traffic. Though it lies 84 miles from the Bay of Bengal on the River Hooghly, it has a larger foreign trade than any other Indian port, and its enterprising Port Trust has the largest revenue among Indian port authorities. It is the centre of five great industries—jute, tea, hides and skins, coal and lac. Its exports include gunny bags, raw jute, tea, shellac, coal, hides and skins, rice and linseed, while it is the chief distributing centre for Lancashire piece-goods, metals and machinery, and the vast and varied requirements of the States of West Bengal, East Bengal (Pakistan), Bihar and Orissa and the tea districts. Population of West Bengal is 26.16 millions and of Greater Calcutta 4,578,071. *Places worth a visit:* 1. Victoria Memorial (contains a picture-gallery and museum), 2. the Indian Museum, 3. the Zoological Gardens, 4. the Jain Temple, 5. the Kalighat Temple, 6. Belvedere House (where the British Viceroy stayed when on visit to Calcutta), now being converted into a museum, 7. Raj Bhavan (residence of the Governor of West Bengal), 8. Marble Palace (containing art treasures property of the Mullick family), 9. Fort William, 10. the Eden Gardens, 11. the Town Hall, 12. the National Library.

\* The official name is Vanarasi.

13. Dalhousie Square, 14. the Race Course, 15. Mahakula Lake, 16. the Hindu bathing ghats, 17. Dakshineswar Temple. Places near about Calcutta which are worth a visit are: 1. Bally (holy place), 2. Belur (home of the Ramakrishna Mission), 3. the Botanical Gardens (contains the biggest banyan tree in existence), 4. Diamond Harbour (fort and customs house), 5. Dum Dum (airport of Calcutta).

**Cape Comorin**: also called Kanya Kumari in Madras State, is the southern-most tip of India.

**Conjeevaram (Kanchipuram)**: the city of temples, the Banaras of the South, is about 45 miles to the south-west of Madras. It is one of the seven holy cities of India and the only one in the South. The place is divided into three parts, Shiva Conjeevaram (containing Shiva temples), Vishnu Conjeevaram (containing a smaller number of Vishnu temples) and Paillyam Pallyam, a testimony to the part played by all the main Hindu religious sects in the history of the city. There are over a thousand temples in all. *Places worth a visit*: 1. Kailash Temple (over 1,000 years old), 2. Vaikunth Perumal Temple (over 1,000 years old), 3. Ekambareswar Temple (400 years old), 4. Vedaraja Perumal Temple. Pop. 81,810 (1951).

Conjeevaram is on the Koulgutta-Chinglepet section of the Southern Railway and is easily accessible from Madras via Chinglepet.

**Cooch-Bihar**: in north-east India, is known for the facilities and opportunities which it offers to sportsmen in search of big game hunting. Pop. 33,242 (1951).

**Coochoor**: hill station on the Nilgiri Hills in Madras State, is about 6,000 feet above sea-level. The climate is mild and genial neither too hot in the summer nor too cold in the winter. The mean day temperature is 64 degrees. The north-east monsoon breaks in October and lasts about two months. The town has good water-supply and natural drainage facilities and is reputed to be one of the cleanest towns in South India. *Places worth a visit*: 1. Sim's Park (contains collection of plants), 2. Low's Waterfall, 3. Tiger Rock (hill fort). There are innumerable places for excursion and picnic purposes, e.g. the Droog, the Dolphin Nose, the Lamb's Rock, Laz Falls, Lady Canning Seat, the Kallih Dam and Catherine Falls. The chief means of conveyance are cars which can be hired.

Coochoor lies on the Mettupalayam-Ootacamund line of the Southern Railway. It is also connected by road with Ootacamund and Kolagiri, another hill station. Pop. 23,902 (1951).

**Darjeeling**: hill station and summer capital of the West Bengal Government lies on the lower slopes of the Himalayas about 370 miles to the north of Calcutta. It is 7,110 feet above sea-level. The maximum temperature in the summer is about 70 degrees and the minimum in the winter is about 35. The town commands picturesque views including that of Mount Kanchenjunga and on a clear day of Mount Everest. Various sports are available during the season such as fishing, shooting, horse-riding and a number of other indoor and outdoor sports. Darjeeling has also a first-class sanatorium known as Eden Sanatorium. *Places worth a visit*: 1. Government House, 2. Town Hall, 3. Museum, 4. Observatory Hill (from where a magnificent view of Kanchenjunga can be obtained), 5. the Mall, 6. Natural History Botanical Gardens, 7. Birch Hill Park, 8. Senchal Lakes, 9. Ghoom Monastery, 10. Tiger Hill (from where the sunrise over Everest is generally viewed).

The chief means of conveyance are rikshaws, ponies and dandies. Darjeeling is the terminus of the Darjeeling-Himalayan section of the N. E. Railway and is about 27 hours' journey from Calcutta. From Siliguri where the visitor has to change, Darjeeling can also be reached by car which is quicker than travelling by the mountain railway. Pop. 33,605 (1951).

**Daulatabad**: in Bombay State, contains the famous rock-hewn 12th century fortresses at one time so prosperous that it led Bin Tuglak to shift his capital to it from Delhi (1308). Close by is the tomb of the Moghul Emperor Aurangzeb.

**Delhi (New)**: the capital of India and the seat of the Government. It was planned in accordance with modern ideas by the architects Sir Edwin Lutyens and Sir Herbert Baker and was formally opened in 1931. Now Delhi houses the President's House (now called Rashtrapati Bhavan), the Parliament, and the Secretariat. All the buildings in New Delhi are white except the ones mentioned above. These latter are built of red sandstone. Pop. 276,314 (1951).

**Delhi (Old)**: also called Shahjahanabad, the ancient capital of India stands on the river Jumna, and is enclosed by a stone wall with seven gates. It has a history going back to 3,000 years and within an area of 50 square miles eight Delhi rose and fell. The ten predecessors of present-day Delhi are Kutub, Siri, Tuglakabad, Jahanabad, Firozabad, Purana Qilla and Shahjahanabad. No city in India contains as many historical remains as Old Delhi. One can trace here the growth and decay of almost every dynasty which held sway over the ancient land of Hindustan. There are a number of factories, jewellery, gold and silver embroidery and ivory carvings works for which Delhi is well-known. Pop. 914,790 (1951). Delhi is a great distributing centre for cotton, wool and silk. Industries include hardware, utensils and stoneware. Delhi is also a large market for grain. Lately tourist traffic has grown into a regular new trade. *Places worth a visit*: Red Fort, Jama Masjid, Chandni Chowk, Raghat Samadhi, Ashoka's Pillars, Feroze Shah Kotla, Purana Qilla, Humayun's Tomb, Isa Khan's Tomb, Lodhi Park and Lodhi Tombs, Saladar Jung's Tomb, Hauz Khas, Kutab Minar, Tughlaqabad, India Gate or War Memorial Arch, Rashtrapati Bhavan, Parliament House, National Museum, Siri Lakhmi Narayan Temple, Jantar Mantar or the Observatory, Museums.

The means of conveyance are tongas, buses, taxis, and trams (last in old Delhi only).

Delhi is directly connected by rail and air with Bombay, Calcutta and Madras. The Central and Western Railways connect it with Bombay, the Northern and Eastern Railways with Calcutta, and the Southern and Central Railways together with Madras.

Delhi also lies on the direct East-West trans-world air routes linking India with all the major cities of the world.

**Ellora Caves**: are situated about 15 miles to the north-west of Aurangabad in Bombay State. The caves which are excavated in the face of a hill are 34 in number and run north to south for a distance of a mile and a quarter. The hill has the shape of a crescent the southern, the centre, and the northern being occupied respectively by Buddhist, Hindu and Jain temples. There are 12 Buddhist caves, 17 Hindu caves and 5 Jain caves. The Hindu caves are more lavishly decorated than others and Kallash Temple which is the most famous of the caves is also the biggest cave temple in India. It stands in a court averaging 154 feet wide, 276 feet long with a steep 107 feet high at the back. Among other notable caves are caves X, XII, XIV, XV, XXIX, XXXIII, XXXIV. It is believed that the Ellora Caves are about a thousand years old. They are reached from Aurangabad by bus or car.

**Ernakulam**: in Kerala State, is famous for its backwaters fringed by Hindu, Muslim, Christian and Jewish settlements. Pop. 62,283 (1951).

**Fatehpur Sikri**: City founded by Akbar in 1569 but abandoned soon after is situated 23 miles from Agra. Akbar wished to make it his capital but it had to be abandoned because of lack of water. Here Akbar's son Salim who later became the Emperor Jehangir was born. The place contains a number of palaces, shrines, mosques built of marble and red sandstone. *The more notable among the monuments are*: 1. Buland Darwaja, the Gateway of Victory, built to commemorate the conquest of Kandahar. It is 176 feet high and is the highest gateway in India. It forms the southern gateway to the most imposing structure in Fatehpur Sikri, 2. the Jama Masjid,

said to be a copy of the mosque at Mecca or Medina. Then there are 3. Panch Mahal, 4. Iwan-i-Khas (Hall of Private Audience), 5. Miram's House, 6. Palace of Jodh Bai, 7. House of Birbal, 8. Elephant Tower and 9. Khas Mahal. Fatehpur Sikri has a railway station, and the city can be easily reached by car. There is a dak bungalow where visitors can get meals by previous arrangement.

**Golconda**: 5 miles from Hyderabad is an ancient spectacular fort (Andhra).

**Gopalpur-on-Sea**: in Orissa is a sea-side resort for a quiet holiday.

**Gulmarg**: an ideal hill station about twenty-nine miles from Srinagar, is a little less than 9,000 feet above sea-level. The place boasts of all modern facilities and is particularly noted as a winter play ground affording scope for skating, ski-ing, tobogganing, and golf. Round about are ideal places for walks, rides and excursions.

**Gwalior**: best known for its fort (which is reputed to be the most interesting and remarkable example of a Hindu palace of an early age) lies about 200 miles to the south of Delhi. *Places worth visiting*: 1. Gwalior fort (includes Man Singh's Palace and a number of temples and shrines), 2. Tansen's Tomb, 3. Rani Laxmi Bai's Chhatra, 4. the Chhatras of other Mahadatta rulers, 5. Tomb of Mahomed Ghaus, 6. Jaml Masjid, 7. State Museum, 8. King George Park and Zoo, 9. Gwalior Pottery Works. Seventy-two miles from Gwalior is Shivpuri or Sipri famous for its lake and scenery. Surva which is twelve miles again from Shivpuri contains the remains of a fortress of the early mediæval period. The chief means of conveyance are tongas and buses. There are two diaminassalas open only to Hindus but at Dufferin Sarai opposite the station rooms are available for rent. Gwalior is on the main Central Railway line between Bombay and Delhi. Pop. 241,577 (1951) (Madhya Pradesh).

**Halebid**: in Mysore, is well known for its elaborately sculptured temples of the Hoysala period.

**Hampi**: in Mysore State, is the ruined capital of the Vijayanagar Empire. It is 8 miles from the Hospet Railway Station on the Southern Railway. The ruins are about 600 years old and are described as "virtually a vast open air museum of Hindu monuments in the Dravidian style of architecture".

**Hardwar**: in U.P. on the Inner Himalayas, is a great Hindu pilgrim centre.

**Imphal**: north-east frontier town and capital of Manipur. It is celebrated for the Manipur dances and handloom products.

**Jabalpur**: in Madhya Pradesh; fourteen miles from Jabalpur are the marble rocks. Pop. 256,998 (1951).

**Jaipur**: provisional capital of Rajasthan Union, is a well laid-out modern city. It is famous all over India for the beauty of its art and the skill of its artisans. Jaipur pottery, brass ware, stone carving, ivory and sandalwood work and jewellery have enjoyed a great reputation from ancient times. Pop. 201,130 (1951). *Places worth a visit*: 1. Maharaja's Palace, 2. Jai Singh's Observatory, 3. the ruins of Amber (ancient capital), 4. the Hawa Mahal, 5. the Palace Armoury, 6. Cenotaphs of the Queens, 7. Gaita (place of pilgrimage) and Ghat, 8. School of Arts, 9. Public Library, 10. Transport Gardens, 11. Museum. The chief means of transport are tongas, ekkas, phaetons, taxis, buses and palgharis.

Jaipur is on the metro-gauge line of the Western Railway between Ahmedabad and Delhi.

**Jamshedpur**: in Bihar, famous as India's 'steel town'. Pop. 218,162 (1951).

**Jog Falls**: in Mysore State, are one of the highest waterfalls in the world.

**Junagadh**: in Bombay, is situated below the celebrated Girnar Hill and is one of the most ancient cities in India. The temples on the hill are noted for their architecture and delicate painting. On the way to Girnar is a rock with an Asoka edict. Pop. 62,730 (1951).

In Junagadh is the famous Gir Forest—the only place in Asia where lions are found.

**Kangra Valley:** famous for its magnificent landscapes and historic temples, lies in the Punjab. Scenic-urban hill stations are Kangra and Dharamsala. *Places worth a visit in Dharamsala are:* 1. Bhagsunath Water Springs, 2. State Quarries, 3. Himalayan Snow View. The chief means of conveyance are cars and buses. There is also a dak bungalow at Dharamsala where visitors can stay. To get to the Kangra Valley a visitor has to change at Pathankot into the narrow-gauge railway which runs to Nagrota. Dharamsala can also be reached from Pathankot by car.

**Kanheri:** near Bombay, is famous for its Buddhist caves dating back to the 1st century A. D. It is about twenty miles from Bombay.

**Kashmir:** unsurpassed for the beauty of its mountains, lakes and valleys is a province of the State of Jammu and Kashmir, situated in the far north of India, 5,000 ft. above sea-level. Srinagar, the capital of the State is famous for its shawls and carpets and the exquisite beauty of its wood-work and papier-mache articles. Its fruit and vegetables are equally well-known. Well-furnished, luxurious house-boats moored along the river Jhelum or in the Dal Lake provide all necessary comforts amidst gorgeous natural surroundings. The normal recreations include Shikara rides on the lakes and canals, mountain-climbing, big and small game hunting, golf, fishing and swimming. Gulmarg, Sonamarg and Pahalgam are favourite holiday resorts in the neighbouring mountains and can be reached by motorable road. The way to Srinagar is via Pathankot, which is a railway terminus. From Pathankot one goes to Srinagar by road passing Jammu on the way. There is a regular air service from Delhi to Srinagar, and a shuttle non-scheduled air service from Pathankot to Srinagar during the tourist season. The chief means of conveyance are boats, tongas, cabs or buses. *Places worth a visit:* 1. The Moghul Gardens, like a. Shalimar, b. Chashama, c. Achabal, d. Shalimar, e. Nishat, 2. The lakes like a. Dal Lake, b. Wular Lake, c. Anchar Lake, d. Manasbal Lake and so on, 3. Places of historical and religious interest like a. Mirtad temple, b. Panditthan temple, c. Bhamuzan caves, d. Ayanti Pura and e. Puri Mahal.

**Khajuraho:** in Chhattarpur in Madhya Pradesh, is famous for its group of highly ornate medieval temples (Madhya Pradesh).

**Kodaikanal:** famous hill station on the Palni Hills in South India. It is about 7,000 feet above sea-level and has a temperate climate. The average annual rainfall is 60 inches. The major part of the rain falling in October, November and December. The months of April, May and June constitute the 'season'. The town enjoys excellent water-supply and is also well-equipped with all the ordinary amenities of life. The place affords plenty of scope for such recreations as walking, hiking, boating, fishing, hill climbing and golf. Going on an excursion or picnic is yet another way of diverting oneself. For the more adventurous there is big game hunting. Kodaikanal is the delight of the gardener and flowers are in bloom all the year round. *Places worth a visit:* 1. The lake skirted by a three-mile road, 2. the waterfalls like a. Fairy Falls, b. Silver Cascade, c. Near Shola Falls, d. Glen Falls, e. Pambur Falls, 3. There are view points like a. Coaker's Walk, b. Pillar Rocks, c. Prospect Point, d. Vembadi Shola Peak, e. Dolphin's Nose. Then 4. the Solar Observatory.

There are a number of boarding houses, and fully furnished flats can also be rented. Kodaikanal is reached from Kodaikanal Road railway junction on the Southern Railway via Tiruchirappalli. Kodaikanal town is 50 miles from the railway station and the journey can be done by car, taxi or bus on a very good motor road.

**Konark or Konark:** place in Orissa, famous as the site of the Temple of the Sun God otherwise called the Black Pagoda. It is remarkable both as an example of ancient Indian architecture and sculpture and of engineering skill. A great part of the temple is destroyed but on

the porch stand the huge figures of warriors and life-sized pieces of horses and elephants and the famous carved wheels at the basement. The image of the sun in the yard of the Puri Temple is generally supposed to have come from Konarak. Konarak is about 50 miles from Puri by bus or taxi, 40 miles from Bhubaneswar by bus or taxi. The road is open from November to May.

**Kolar:** in Mysore, is the site of the famous gold fields. Pop 159,081 (1951).

**Kotagiri:** A hill station on the Nilgiris, higher than Coonoor, but lower than Ootacamund, is smaller and quieter than either. It is about 6,500 feet above sea-level and has a mean day temperature of 62 degrees. The town has electricity, a number of shops and boarding houses, a local board hospital and golf course. Kotagiri is reached from Coonoor or Ootacamund by car or bus. The roads are excellent and there is a regular bus service. Between Kotagiri and Ootacamund the road goes over Doddabetta the highest peak in the Nilgiri Hills.

**Kulu Valley:** well-known for the variety of its scenery and places of historical interest is situated in the Punjab, north of Simla. It is ideal for hiking and front fishing. The important part of the valley from the tourist's point of view is the road which runs from Pathankot or Nagrota the rail-heads into the valley. A few miles beyond Pathankot the road passes through the rich cultivation of the Kangra Valley and the extensive tea gardens surrounding Palampur and Baijnath. The traveller has a view of the majestic snow-capped mountains of the Dhaul Dhar range standing out in bold relief against the sky-line. He also comes across the ancient temples of Baijnath. Beyond Aut after Mandi the valley opens out and the final stretch through the lovely Kulu Valley mainly along the left bank of the river Beas offers an entirely different type of scenic effect. The Kulu Valley is also called the 'Valley of the Gods' as in addition to several important deities like Raghunathji at Sultampur and Janlu of Malana every village has its own particular God. The best season is from March to May and September to November. The summer is never uncomfortably hot. The main centres of the Kulu Valley are: 1. Kulu or Sultampur, the principal town, about 4,000 feet above sea-level. It is the main shopping centre and has a dak bungalow, and a number of rest-houses. 2. Raikot, 8 miles from Sultampur and 4,700 feet above sea-level. The available sports are golf, tennis and swimming. Mayflower and the Shacks are two hotels. 3. Katrauli, is in the widest part of the Valley, 12 miles from Sultampur and 4,800 feet above sea-level. 4. Naggar, summer headquarters, is 5,800 feet above sea-level. There is a departmental rest-house and a serial. 5. Manali, the head of the valley and terminus of the motor road, is 23 miles from Sultampur and is situated amid typical Alpine scenery. Accommodation for visitors is available at Sunshine Orchards, Departmental rest houses and Mission Hospital. Except Manali, the road to which may be occasionally closed owing to snow-fall the rest of the valley is open throughout the year. Pathankot is the rail-head for Kulu. From Pathankot Kulu is reached by bus or car, or from Pathankot to Nagrota by metro-gauge railway and from there by bus to Kulu.

**Kumaon Hills:** in U.P. form part of the Himalayas and are known as the sportsman's paradise. Two important summer resorts are Nainital and Ranikhet. Most mountaineering parties establish their base at Raikhet for ascent to the Pindari Glacier.

Tiger shooting is available in the Terai and Bhabhar Forests in the Kumaon region.

**Lansdowne:** in U.P. in Garhwal about half way between Mussoorie and Nainital.

**Lonavla:** in Bombay State, lies in the heart of the Western Ghats and is known for the Karla Caves. 6 miles from Lonavla by car.

**Lucknow:** the city of gardens is the capital of U.P. It is full of places of historical interest and of architectural beauty and is generally regarded as the cultural capital of Moghul India. It is well-known for its pottery, copper and brass ware, wood and ivory carvings and gold and silver embroidery on cloth. It connects the

founding of the city of Rama, the mythic Laxmana, the brother and is sometimes called 'of the Hindus, 490,861 (1951). The chief means of transport are tongas, ekkas, phantoms and taxis—*places worth a visit:* 1. Great Imambara, 2. Shree Imambara, 3. tombs of Wajid Ali Shah and his Begum, 4. Kaiser Bagh Palace, 5. Chattri Mausoleum, 6. Dilkhusha Palace, 7. Moti Mahal, 8. Mashi Bhawan Palace, 9. Juma Masjid, 10. Charbagh, 11. Alam Bagh, 12. Sikander Bagh, 13. Musammar Bagh, 14. Wingfield Park, 15. Residency, 16. Havelock's Tomb, 17. Clock Tower, 18. Museum, 19. Observatory, 20. Iron Bridge. Lucknow is a big junction on the Northern Railway.

**Madras:** the third largest city in the sub-continent and the capital of Madras State. It is the place where the English first settled to trade. Pop 1,410,050 (1951 census). The chief means of conveyance are rickshaws, jittas, horse carriages, taxis and buses. *Places worth a visit:* 1. Fort St. George (contains the oldest Protestant church in the country where Clive was married), 2. High Court, 3. Light House, from the top of which one can get a panoramic view of the city, 4. Marina. The Marina is one of the most beautiful promenades in the world; sea-bathing is possible at certain points. 5. The Museum, 6. Connemara Library, 7. The Zoo, 8. The Observatory, 9. Moore Market, 10. Parthasarathy Temple, 11. St. George's Tank and Kapaleswar Temple, 12. St. George's Cathedral, 13. St. Thomas Mount, 14. Race Course, 15. Buckingham and Carnatic Mills, 16. Madras Pencil Factory and 17. Adyar where the headquarters of the Theosophical Society are located. There are two places round about Madras which are also worth a visit: 1. The ruins of the Gingee Fort famous in the days of the Vijayanagar Empire are about 95 miles from Madras and can be reached by rail and road. 2. The seven Pagodas of Mahabalipuram are 53 miles by road from Madras and can also be reached by road from Chinglepet Railway Junction. Kalakshetra is a well-known institution for music, dance and drama at Adyar.

**Madurai:** the second biggest city in Madras State is a great religious centre, containing as it does a number of famous temples. In the old days it was the capital of the Pandya Kingdom and has always been a seat of Hindu culture particularly Hindu architecture. The silk-weaving and textile industries of Madurai are also noteworthy. *Places worth a visit:* 1. The Great Temple, actually made up of two temples one of Meenakshi and the other of Shiva. Adjoining the temple are a Nandi Hall, a temple of the Saints, c. the Jewel House, d. the Stable Houses. Then there is 2. Tirumal Nayak's Palace. Pop 361,781 (1951).

**Mahabaleshwar:** a hill station in Bombay State, the season being April and May. It is 4,500 feet above sea-level and is noted for its bracing climate. It is also well-known for its fruit and vegetables, orchards and hills which bloom in April and May. The chief recreations are hiking and driving in a car. Among the sports which are available are tennis, golf and polo. *Places worth a visit:* 1. The two Government Houses old and new. 2. Reay Garden and 3. the two temples Krishna and Mahabaleshwar. Then there are a number of points from which magnificent views can be obtained, like Arthur Seat Point, Baghdad Point, Castle Rock, Carnac Point, Connaught Point, Falkland Point, Elphinstone Point, Marney and Lardwick Point and Bombay Point. Then there are the waterfalls like Chinaman's Waterfall, Dhobi Waterfall, Lingmal Waterfall and a lake called Yenna Lake. The places of historical interest are all connected with the name of the Maratha leader Shivaji such as Kainagarh Fort, Makrandgarh Fort, Pandavgarh Fort, Pratapgargh Fort and Raigargh Fort. Near Pratapgargh are the Bhavani Temple and the tomb of Afzulkan. All these places are accessible by road from Mahabaleshwar.

Mahabaleshwar can be reached from Poona both by road and railway. By railway one can go as far as Wathar Station from where Mahabaleshwar is only about half-an-hour's journey by road.

**Mandu**: In Madhya Pradesh is one of the greatest mediaeval city fortifications and palaces, remains eight miles west of Mandu by road via Sewa Bagh which has a large number of caves adorned with fine old frescoes.

**Matheran**: the nearest hill station to Bombay is 2,650 feet above sea-level, and is famous for the magnificent views which it yields. The town looks on to the sea, and the coastal plain rises imperceptibly until it reaches the steep ascent of the Ghats. In his walk round the eighteen-mile circumference of the hill the visitor can reach no fewer than thirty-three points of which the following deserve mention: 1. Garbut Point, 2. Panorama Point, 3. Porcupine Point, 4. Louisa Point, 5. Chowk Point, 6. Alexandra Point, 7. Belvedere Point, 8. Echo Point, 9. Monkey Point. At every one of these points the visitor will find comfortable seats, shady trees and fine views. Among other places which are worth a visit are: 1. Charlotte Lake, 2. Paymaster Park, 3. Band-stand, 4. Castle Hill Tower, 5. Race Course. The chief recreations are walking and riding. Rickshaws, murchills and horses are the chief means of conveyance.

Matheran is reached from Neral Station on the main line between Bombay and Poona. From Neral there is a light railway to Matheran which is about one-and-a-half-hour's journey. Alternatively one can do the journey by rickshaw or pony by previous engagement at Matheran.

**Mathura**: In U.P. is an important place of pilgrimage for Hindus, because of its associations with Shri Krishna. It has also an archaeological museum. Six miles from Mathura is Brindavan. Pop. 98,552 (1951).

**Mussoorie**: A hill station in U.P. lies 18 miles to the north of Dehra Dun. It is 6,880 feet above sea-level. The town has excellent water-supply, electric lighting system, hospitals, nursing homes and some of the best schools in India both for boys and girls. There are also plenty of sports and amusements. And like every Himalayan hill station one can obtain magnificent views of mountain tops and green river valleys. Hiking and going on excursion or picnic are among the main recreations. The means of conveyance are rickshaws, ponies, dandies, buses and cars. *Places worth a visit*: 1. The fall like a. Bhatia Falls, b. Kamptee Falls, c. Hearsey Falls, d. Mossy Falls, 2. Wimpy's Tank, 3. Band-stand. Mussoorie is reached from Dehra Dun by car or bus and is about two hours' journey.

**Mysore (State)**: commemorates the destruction of Mahishasur, the demon by Chamundi who is the tutelary goddess of the royal family of Mysore. Mysore is a picturesque land of forest and mountain presenting the most diversified and beautiful scenery. In the southern forests are found wild elephants for the capture of which khedda operations are undertaken from time to time. Tigers, leopards, bears and bison are also numerous. *Places worth a visit in Mysore State*: 1. The Chenna Kesava Temple at Belur, 24 miles from Hasan, 2. Sivasamudram Falls on the Caverry River, 3. Hoysaleswara Temple at Halebidu, 4. Gersoppa Falls also called the Jog Falls on the Shiravati River, the most famous beauty spot in Mysore. The falls are higher than Niagara, 5. Kolar Gold Fields, the biggest in India worked by electric power, 6. Nandidurg, a hill station near Bangalore, and the summer residence of Tipu Sultan, 7. Srirangapatnam of historical and religious interest as the capital of Tipu and as the city of many temples, 8. Shravanabelagola, the great Jain religious centre with the huge statue of Gomateshwara and of course the city of Bangalore and the town of Mysore.

**Mysore (City)**: second city in the State, is built in accordance with modern standards, and contains a number of beautiful public buildings. It attracts great crowds twice a year when the city wears a gala appearance. These two occasions are the Maharaja's birthday and the Dasarah. *Places worth a visit*: 1. The various palaces (and also stables) like the Maharaja's Palace, Jagannathan Palace and so on, 2. Chamundi Hill, with the Bull and the Temple, 3.

Zoological Gardens, 4. Silk Factory, 5. Sandalwood Factory, 6. Krishnarajasagar Dam and the Brindavan Gardens, among the most beautiful in the world, about 12 miles from Mysore. The chief means of conveyance are juktas, coaches, and taxis. Mysore is one of the termini of the Southern Railway. Pop. 244,323 (1951).

**Naini Tal**: hill station and summer capital of the U.P. Government, is about 6,350 feet above sea-level. Among the principal recreations are hiking, boating and yatching on the lake around which the town stands, and fishing and riding. One can also enjoy the Himalayan mountain scenery. *Places worth a visit*: 1. Cheena Peak, 2. Land's End, 3. Larlya Kanta Peak, 4. Sher-ka-Danda Peak, 5. Tiffin Top or Dorothy Seat, 6. Camel's Peak or Deopatta Peak. Naini Tal is reached from Kathgodam railway station which is connected with Bareilly and Mathura. From Kathgodam one goes by bus or car to Naini Tal which is 22 miles away.

**Nalanda**: in Bihar contains a group of ruined Buddhist temples and monasteries and a small local museum. It was the seat of an ancient Buddhist university.

**Nasik**: in Bombay State, is a place of pilgrimage for Hindus and is famous for Buddhist rock-cut temples of the first century B.C. and later. Pop. 97,042 (1951).

**Ootacamund**: hill station and summer capital of Madras State, stands 7,500 feet above sea-level on the Nilgiris. It is sometimes called 'the Queen of the hill stations.' One of the main features which distinguishes it from other hill stations is the number and length of motorable roads which go winding in and out of spacious parks or long stretches of turf studded with ornamental trees. The mean temperature for the year is 67.33°; during the winter the thermometer touches freezing point. Ootacamund is called the sportsman's paradise: plenty of fishing and big game shooting being available. There is also golf and tennis and during the season races and tournaments are held. *Places worth a visit*: 1. Botanical Gardens, 2. Race Course, 3. Assembly Room, 4. Dodda Betta, the highest peak in the Nilgiris, and 5. Pykara Hydro-Electric Dam which is about 18 miles from Ootacamund. The chief means of conveyance are juktas, rickshaws and taxis. Ootacamund is the terminus of the Nilgiri mountain railway. Pop. 41,370 (1951).

**Pachmarhi**: hill station and summer capital of Madhya Pradesh lies on the Mahadeo hills of the Satpura Range and is about 3,500 feet above sea-level. There are about 20 golf links in the town and plenty of game is also available in the Pipariya forest. *Places worth a visit*: 1. Bee Dam, 2. Mahadeo Caves, 3. Diupgarh, highest point in the Satpuras, 4. Dorothy Deep Falls, 5. Duchess Falls, 6. Lansdowne Hill, 7. Nilphur springs, 8. Waters Meet, 9. Big Falls, 10. Pansy Pool, 11. Twilpram Pool, 12. Saundery's Pool, 13. Pandava Caves. Pachmarhi is reached from Pipariya Station on the main Central Railway line from Bombay to Jabalpur. From Pipariya, Pachmarhi is 32 miles and the journey can be done by bus or car.

There are facilities for swimming, trekking and riding.

**Padmanabhapuram**: in Kerala, is the ancient capital of the former Travancore State. *Place worth a visit*: Palace.

**Pahalgam**: in Kashmir in the lap of the Lidder Valley is situated 60 miles from Srinagar and is famous for its camping sites, and as a base for the Amar Nath Cave and Kolahol glacier.

**Palitana**: in Bombay, is famous for its holy hill Shatrunjaya (see separate note) and its Jain temples. Pop. 24,097.

**Patna**: capital of Bihar, stands on the site of the ancient city of Patliputra. Pop. 283,479 (1951).

**Poona**: in Bombay State has many old palaces and parks and one of the best race courses in India. *Places worth a visit* are: the National Chemical Laboratory, the Defence Academy and the Central Water and Power Research Station at Khadakvasla. Pop. 480,982 (1951).

**Porbandar**: in Bombay, is the birth-place of Mahatma Gandhi and an attractive summer resort. Pop. 58,824 (1951).

**Prabhas Patan**: in Bombay, is the site of the famous Somnath Temple, whose idol was reinstated in May 1951.

**Puri**: famous for the Jagannath Temple, is a coastal town in the State of Orissa and is the State's summer capital. The car festival when an image of Jagannath is taken in procession in a huge rath is an event of India-wide importance. The temple has a black marble pillar in front and a 24-feet high stone wall all round. There are four entrances. The presiding deities are Krishna, Balaram and their sister Subhadra. Besides the Jagannath Temple other places worth a visit are the monastic establishments (maths). Fifty miles from Puri is Konarak, famous for the Sun Temple. Pop. 49,057 (1951).

**Rameshwaram**: This holy town in South India is built on an island in the Palk Straits. It contains one of India's most venerated temples, perhaps the finest example of South Indian architecture. It is in the form of a quadrangular enclosure 650 ft. by 1,000 ft. The temple is renowned for its vast pillared corridors nearly 4,000 ft. long.

**Ranchi**: hill station and summer capital of Bihar, noted for its picturesque scenery and fine roads. Pop. 100,849 (1951).

**Ranikhet**: is a hill station in U.P. on the Kumaon Hills. Most mountaineering parties establish their bases at Ranikhet.

**Sanchi**: small village in Madhya Pradesh, famous for the Buddhist stupa which is the largest and the best preserved in India. The stupa is built with sand stone and is about 103 feet in diameter and 42 feet high. The sculpture is remarkable in that there is no anthropomorphic figure of Buddha. The most striking features of the Stupa are the four gates which are profusely carved with scenes from the Jataka stories. Sanchi is on the main Central Rly. line between Bombay and Delhi. There is a State-owned dak bungalow at the place where lodging and boarding are available by previous arrangement.

**Santiniketan**: in West Bengal, is the home of the famous Visva Bharati, the International university founded by Tagore. *Places worth a visit* are: Rabindra Bhavan (the poet's residence) where his personal belongings, manuscripts, etc. are on display and the poet's mud hut where he wrote many of his famous books.

The place is 91 miles from Calcutta on the Eastern Railway and 2 miles from Bolpur Station.

**Sasaram**: in Bihar is famous for the magnificent tomb of Sher Shah, Emperor of Delhi. Pop. 29,265 (1951).

**Seringapatam**: or Srirangapatna in Mysore State, 9 miles by road from Mysore city is the ancient capital of Tipu Sultan. It has the Sultan's fort, mosque and palaces.

**Sevagram**: in Bombay State, is the village where Mahatma Gandhi founded his ashram.

**Shatrunjaya Hills**:—Shatrunjaya, near Palitana in Bombay, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones. It is the most sacred place (tirtha) of Shvetambara Jains. There are a great number of temples in groups on *loks* or summits. The most important one is the *loka* of Adishwara Bhagavan. The ancient image, consecrated by the prophet's son, Istabul, has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints are said to have attained *Nirvana*. A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

**Shillong**: is the headquarters of the Assam Government. Thirty-six miles from here is Cherrapunji, the wettest place in the world. Pop. 53,756 (1951).

**Shivpuri**: also known as Sipri is in Madhya Pradesh, 72 miles from Gwalior. It is an interesting tourist resort with good hunting and boating possibilities. Pop. 21,887 (1951).

**Simla**: the former summer capital of the Government of India and the Government of the Punjab, it is situated on a spur of the Himalayas at a height of 7,200 feet. Among the recreations of the place are hiking, riding and shooting. The roads are excellent. *Places worth a visit*: 1. President's House, 2. Race Course, 3. Jakko Hill, 4. Observatory Hill, 5. Prospect Hill, and 6. Mashobra-Mahasu, seven miles away. There is a very good road into the interior and hikers to Narkanda, Kotgarh, Rampur and Bushahr can lodge in rest-houses that line the road. There is also a motor bus service on this road and holiday-makers who leave in the morning can be back in Simla by evening. The trek route to Kulu commences at Narkanda. Simla is also well provided with a number of excellent schools. The chief means of conveyance are rickshaws and horses.

Simla is now the capital of Himachal Pradesh. Simla is reached from Delhi via Kalka on the Delhi-Ambala line. From Kalka there is a mountain railway upto Simla. At Kalka motor cars are available for those who prefer to travel by road, the journey taking 3½ hours. For cheaper travel there are buses which regularly run between Kalka and Simla. All through the scenery is superb, with mountain peaks or luxuriant foliage. Pop. 46,150 (1951).

**Somnath**: see under Prabhas Patan.

**Sravanabelagola**: in Mysore State, is noted for its Jain temples and the colossal statue of Gomatesvara which is 60 ft. high, the tallest known monolithic statue in the world erected in 983 A.D.

**Srirangam**: an island on the Cavery, two miles north of Tiruchirappalli (Trichinopoly), contains the largest temple in South India. The temple is consecrated to Ranganath (Vishnu) and contains a hall of 1,000 columns. Changes were made from the 9th to the 16th centuries and inscriptions of Chola, Pandya, Hoysala and Vijayanagar are all found on it. The north gopuram is 152 feet high. Pop. 36,702 (1951).

**Tanjore**: in the delta of the Cavery river in Madras State is noted for its temples and palaces. It was the capital of the Cholas under whom it grew in name and fame as a great centre of culture. *Places worth a visit*: 1. the temple of Brihadishwara built by Raja-Raja the great, 2. Nalk's Court, 3. Mahalitha Court (the two together are often called the Palace in Tanjore), 4. Nandi, the Bull. The chief means of conveyance are jutkas and taxis. There are also good dak bungalows. Tanjore is reached from Madras by the Southern Railway. Pop. 100,680.

**Tiruchirappalli (Trichinopoly)**: the third largest city in Madras State is situated on the Cavery. It is a very ancient city and was the strategic capital of the Chola and Nalk kings. Tiruchirappalli is also known as the Kashi of the South. It is now a great educational centre. *Places worth a visit*: 1. the Rock and the temple on the Rock, 2. the two huge masses of granite known as the Golden Rock and Fakir Rock, 3. the Jambukeshwar Temple, two miles north of Trichinopoly dedicated to Appullanga or Siva. Pop. 218,921 (1951).

**Travancore**: (now constituent part of Kerala State): the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domains. It has scenery ranging from a countryside of lakes, creeks and canals, to low hills, undulating land, rice fields and forests of coconut and areca palms, with a heavy undergrowth of pepper vines and tapioca.

It has also a wonderful highland zone with mountains touching heights of from 5,000 feet to over 8,000 feet, and hills covered with the densest of virgin forest, the home of great herds of wild elephants and bison, tiger, bear, black panther and wild boar, and where lies the lovely Periyar Lake over which one may cruise in comfort and see wild life in its natural habitat.

Trivandrum; the capital, is accessible by well-kept roads and railway, and is also now connected by air with Bombay, Madras and Colombo. Pop. 186,931 (1951).

*Places worth a visit*: 1. the Palaces, 2. Museum, 3. Picture Gallery, 4. Zoo, 5. Aquarium.

About seven miles south of Trivandrum is Kovalam, a pleasant seaside resort with good facilities for bathing.

Cape Comorin (Kanya Kumari), the Lands End of India, is the southernmost point of the Union where the sunrise and sunset are magnificent sights. It is a sacred spot to Hindus and a place of pilgrimage as the reputed abode of Kanyakumari, the virgin Goddess to whom the temple there is dedicated.

North of Trivandrum is the ancient town of Quilon and to the north of this again, a pleasant trip by boat along delightful backwaters or by car along a good motor road, is the busy seaport of Alleppey.

**Trivandrum**: See under Travancore.

**Udaipur**: in Rajasthan, is a city of lakes with island palaces. Seventy miles from Udalpur is Chittorgarh, the abandoned capital of Mewar, famous for its Tower of Victory. Pop. 89,621 (1951).

**Ujjain**: in Madhya Pradesh, is one of the seven cities sacred to the Hindus. Pop. 129,817 (1951).

## HOTELS

Here is a list of first-class Western style hotels:

### AGRA

**HOTEL IMPERIAL**: 12, Mahatma Gandhi Road; **LAURIE'S HOTEL**: Mahatma Gandhi Road.

### AHMEDABAD

**RITZ HOTEL**: Kanpur Road. Also Circuit House.

### ALLAHABAD

**BARNETT'S HOTEL**: 14, Canning Road, Civil Lines; **ROYAL HOTEL**: 24, South Road, Civil Lines.

### ALWAR

**CIRCUIT HOUSE**.

### AMBALA CANTT.

**CECIL HOTEL**: Staff Road; **PARRY'S HOTEL**: Staff Road.

### AMRITSAR

**AMRITSAR HOTEL**: Albert Road; **IMPERIAL HOTEL**: Queen's Road.

### AURANGABAD

**AURANGABAD HOTEL**: Aurangabad.

### BANARAS CANTT.

**CLARK'S HOTEL**: Mall Road; **HOTEL DE PARIS**: 15, The Mall.

### BANGALORE

**CENTRAL HOTEL**; **HOTEL EMBASSY**: 40C, Infantry Road; **LOBO'S HOTEL**: Cubbon Road and Infantry Road; **SHILTON HOTEL**: St Mark's Road; **WEST END HOTEL**: Opp. Race Course.

### BARODA

**BARODA HOTEL**: Race Course Road.

### BIKANER

**CIRCUIT HOUSE**: Outside Public Park.

### BOMBAY

**AIR LINES HOTEL**: Churchgate Reclamation; **AMBASSADOR HOTEL**: Churchgate Extension; **GRAND HOTEL (BOMBAY) LTD**: Ballard Estate; **GREEN'S HOTEL AND RESTAURANT**: Lansdowne Road, Apollo Bunder; **MIRABELLE HOTEL**: Lotus House, Marine Lines, Fort; **SEA GREEN HOTEL**: Marine Drive, TAJ MARAL HOTEL: Strand Road, Apollo Bunder; **ASTORIA HOTEL**: Churchgate Reclamation; **RITZ HOTEL**: Churchgate Reclamation, Fort; **WEST END HOTEL**: 45, Marine Lines; **WALDROP HOTEL**: 16, Arthur Bunder Road.

### BUNDI

**CIRCUIT HOUSE**.

### CALCUTTA

**GRAND HOTEL**: 15/16, Chowringhee Road. **GREAT EASTERN HOTEL**: 1-3, Old Court House Street.

**SPENCES HOTEL, LTD.**: 4, Wellesley Place.

### CAPE COMORIN

**HOTEL CAPE**.

### CHANDIGARH

**MOUNT VIEW HOTEL**: Section No. 19.

### CHATTARPUR

**CIRCUIT HOUSE**: For tourists going to Khajuraho. For reservation the Deputy Commissioner is to be contacted.

**COCHIN HARBOUR** (Willington Island).

**MALABAR HOTEL**: Willingdon Island.

**COONOR** (Nilgiri Hills).

**HAMPTON HOTEL**; **HILL GROVE HOTEL**: Figure of Eight Road.

### DALHOUSIE

**DALHOUSIE CLUB CHAMBERS**: Near the motor terminus; **GRAND VIEW HOTEL**: Near the bus stand; **HOTEL METRO**: Charing Cross.

### DARJEELING

**BELLEVEUE HOTEL**: Chourasta; **HOTEL MOUNT EVEREST**: Gandhi Road; **WINDAMERE HOTEL**: Observatory Hill.

### DEHRA DUN

**HOTEL WHITE HOUSE**: 15-A, Lytton Road, Civil Lines.

### DELHI

**CLARIDGE'S HOTEL**: 12, Amangzeb Road.

**GRAND HOTEL**: 2, Underhill Road, Civil Lines; **HOTEL AMBASSADOR**: Suraj Singh Park, New Delhi; **HOTEL CECIL**: Civil Lines; **AIR LINES HOTEL**: Opposite New Delhi Railway Station.

**HOTEL IMPERIAL**: Queensway, New Delhi.

**HOTEL MARINA**: Connaught Circus, New Delhi.

**MAIDEN'S HOTEL**: Civil Lines, Alipore Road. **SWISS HOTEL**: 2, Alipore Road.

### DEOLALI

**CORONATION HOTEL**: Lam Road; **RUGBY HOTEL**: Rest Camp Road.

**GOPALPUR-ON-SEA P.O.** Gopalpur (Ganjam).

### PALM BEACH HOTEL

**GULMARG** (Kashmir).

**GOLF VIEW HOTEL**: Upper Golf Course; **NEEDU'S HOTEL**.

### GWALIOR

**GWALIOR HOTEL & STATE GUEST HOUSE**: Opposite Railway Station.

### HYDERABAD

**RITZ HOTEL**: Hill Fort Palace, Hyderabad 1.

**ROCK CASTLE HOTEL**: Jubilee Hills.

### INDORE

**HOTEL INDORE**: South Tukoganj; **LANTERN HOTEL**: North Tukoganj.

### JAIPUR

**N.W. HOTEL**: Ajmer Road, Civil Lines; **CIRCUIT HOUSE**: Station Road.

**TAJ MAHAL PALACE**: Civil Lines; Khatri House.

### JODHPUR

**CIRCUIT HOUSE**.

### JABALPUR

**JACKSON'S HOTEL**: Civil Lines.

### KANPUR

**BERKELEY HOUSE**: 16/11, Civil Lines.

**KATRIN** (Kulu-Punjab).

**RIVERVIEW GUEST HOUSE**.

**KH AJURAHU** (Nalhya Pradesh) **CIRCUIT HOUSE**.

### KHANDALA

**KHANDALA HOTEL**: Near the Railway Station.

### KODAIKANAL

**CARLTON HOTEL**: Lake Road; **HOLIDAY HOME**: Near the Golf Club.

**KOTAH**

Circuit House: Civil Lines.

**KRISHNARAJ SAGAR**

HOTEL KRISHNARAJ SAGAR: Krishnaraj Sagar P.O.

**LUCKNOW**

CARLTON HOTEL, LTD.: Shahnajaf Road.

**LUDHIANA**

WINDSOR HOTEL &amp; RESTAURANT: Near Clock Tower

**MADRAS**

AMBASSADOR HOTEL: 151, Mount Road; CONNEMARA HOTEL: Mount Road; HOTEL OCEANIC: 93, San Thome High Road; HOTEL DASAPRAKASH: Poonamallee High Road.

**MAHABALESHWAR**

FREDRICK HOTEL: Poona-Mewar Road, Race View, Cussum Sajjan Hill

**MANALI (Kulu-Punjab)**

SUNSHINE ORCHARDS GUEST HOUSE.

**MATHERAN**

LORD'S HOTEL: Mahatma Gandhi Road; RUGBY HOTEL: Vithalrao Kotwal Road.

**MOUNT ABU**

MOUNT HOTEL: Near Telephone Exchange

**MUSSOORIE**

CHARLEVILLE HOTEL, HAKMAN'S GRAND HOTEL, SAVOY HOTEL.

**MYSORE**

CARLTON HOTEL: Dee's Road, HOTEL METROPOLE: Viceroy Road

**NAGPUR**

MOUNT HOTEL: Commercial Road, Civil Lines.

**MUSEUMS, ART GALLERIES**

India is rich in museums and art galleries, a list of which is given below:

National Archives of India, New Delhi; Delhi Fort Museum of Archaeology, Delhi; Central Asian Antiquities Museum, New Delhi; Archaeological Museum, Nalanda; Archaeological Museum, Sarnath; Archaeological Museum, Nagarkurnool, Fort St. George Museum, Madras, Rajputana Museum, Ajmer; Indian Museum, Calcutta; Victoria Memorial Hall, Calcutta, State Museum, Bhuvneshwar (Orissa), State Museum, Lucknow, Government Museum, Madras; Curzon Museum of Archaeology, Mathura; Central Museum, Nagpur, Patna Museum,

Patna; State Museum, Gauhati (Assam); Palace collection, Aundh; Mysore Government Museum, Bangalore; Baripada Museum, Mayurbhanj (Orissa); Khiching Museum, Mayurbhanj; Baroda State Museum and Picture Gallery, Baroda; Barton Museum, Bhavnagar; Bhuri Singh Museum, Chamba (Himachal Pradesh); Archaeological Museum, Himmattnagar (Idar); Archaeological Museum, Gwalior; Hyderabad Museum, Hyderabad; Indore Museum, Indore; Albert Museum, Jaipur; Sardar Museum, Jodhpur; Jardine Museum, Khajuraho, Chhatrapur, Pudukottai Museum, Pudukottai (Madras); Watson Museum of Antiquities, Rajkot; Museum of Archaeology, Sanchi, State Museum,

Trichur (Cochin), Government (Napier's) Museum, Trivandrum; Victoria Hall Museum, Udaipur (Rajasthan); Junagadh Museum, Junagadh; Nawanganar Museum, Nawanganar; Prince of Wales Museum of Western India, Bombay; Lord Reay Maharashtra Industrial Museum, Poona; Bharat Kala Bhavan, Banaras (U.P.); St. Xavier's College Museum, Bombay; Museum of Bangiya Sahitya Parishad, Calcutta; Asutosh Museum, Calcutta University, Calcutta; Bharat Itihasa Sansodhak Mandal, Poona; Allahabad Municipal Museum, Allahabad; Victoria Jubilee Museum, Vijayawada; Archaeological Museum, Bijapur, Victoria and Albert Museum, Bombay; Raipur Museum, Raipur (Madhya Pradesh).

# GOVERNMENT OF INDIA

**INDIA, that is Bharat, is a sovereign democratic Republic.**

On 1st Nov. 1956, the States in India were reorganized in accordance with the provisions of The States Reorganization Act, 1956.

There are now in all 20 States. Of these 13 are Part A States, one Part B State, and 6 Part C Territories.

The 13 Part A States with their capitals given in brackets are :

Andhra Pradesh (Hyderabad); Assam (Shillong); Bihar (Patna); Bombay (Bombay); Kerala (Trivandrum); Madhya Pradesh (Bhopal); Madras (Madras); Mysore (Bangalore); Orissa (Cuttack); Punjab (Chandigarh); Rajasthan (Jaipur); Uttar Pradesh (Lucknow); West Bengal (Calcutta).

The one Part B State with its capital in brackets is :

Jammu and Kashmir (Srinagar)

The 6 part C Territories with their capitals in brackets are :

Delhi (Delhi); Himachal Pradesh\* (Shimla); Manipur (Imphal); Tripura (Agartala); Laccadive, Minicoy, and Amindivi Islands (Kozhikode provincial); Andaman and Nicobar Islands (Port Blair)

The States are administered by State Governments, the Territories by the Central Government

The one Part B State, Kashmir, is in a unique position. It enjoys rather more power than a Part A State (See under Jammu and Kashmir). It has a flag of its own

The constitution of India is quasi-federal in nature

The distribution of power between the Centre and the local administrations follows the accepted principle that subjects which for convenience and efficiency ought to be administered on an all-India basis are vested in the Union Government, while others (of the nation-building sort) which can be conveniently administered on a local basis are vested in the State Governments.

Thus, defence, foreign affairs, transport and communications, currency and coinage, banking, customs and export duties, and the administration of justice at the higher level are all central subjects, while State powers include those over police, public health, education, agriculture, forests and so on.

There is a third group of subjects that fall betwixt and between such as economic and social planning, social security and insurance, labour welfare, price control and vital statistics. On these subjects both the Centre and the State can freely legislate, it being understood that whenever there is conflict between Union and State legislation the Union laws shall prevail.

Three detailed lists of subjects are drawn up, the Union List, the State List and the Concurrent List, and the residuary power rests with the Union. That is to say, if at any time, a subject which does not figure in any of the three lists, comes up for consideration the power of dealing with it lies with the Union Government.

Thus the constitution of India is a quasi-federation in which the Centre is the dominating partner. The Union Government controls the State governments in certain matters. The Union has also the power to confer additional powers on the States.

Provision is made for removing differences between the various States by empowering the President to establish an Inter-State Council.

## FUNDAMENTAL RIGHTS

In the Indian Union the rights of Indian citizenship are given to 1. One who is born in India, 2. Either of whose parents were born in India, and 3. Who has been a resident of India for five years. Provision is also made for persons who are affected by the partition of the sub-continent.

Certain fundamental rights are guaranteed to every citizen for the first time. All citizens are equal before the law and no discrimination is made on grounds of religion, sex, caste, etc. All citizens have equal opportunities.

Freedom of speech and expression is guaranteed, and the right to hold meetings (without arms), to form unions and associations, to move freely in India and to reside in any part, to acquire property and to practise any profession are also assured under the Constitution.

Life and personal liberty are protected under the law, and there will not be punishment for the same offence more than once. Preventive detention is also forbidden except in certain cases.

Children under the age of 14 will not be allowed to be employed in factories and forced labour like *begar* is prohibited.

India is a secular State and as such there is freedom of conscience. Citizens are allowed to profess practise and propagate any religion, and the State will not ordinarily interfere in religious questions. The minorities are assured of cultural and educational rights.

The State can acquire compulsorily property for public purposes, but compensation may be paid to the owner of the property concerned. But property may also be acquired without compensation in certain cases.

All titles, except military or academic, are also abolished, though honours for meritorious service may be conferred.

Untouchability is abolished.

These fundamental rights can be enforced by the Supreme Court which has the authority to issue prerogative writs such as *habeas corpus*, *certiorari*, *prohibition*, etc.

In respect to the Defence Forces, however, Parliament has power to legislate on these fundamental rights.

It must also be pointed out that some of these fundamental rights can be suspended in case of emergency, and the remedies available for their enforcement may also be suspended by an order of the President.

There are also certain Directive Principles in accordance with which the State has to direct its policy. These principles are of a recommendatory character and cannot be enforced in a court of law. However the State is expected to look upon them as a kind of touch-stone for its policy and action.

These principles include organization of village panchayats, provision for just and humane conditions of work, maternity relief, a uniform civil code for the citizens, provision for compulsory and free education of children and separation of judiciary from executive.

## UNION EXECUTIVE

The executive head of the Indian Union is the President. He is elected by the elected members of the Houses of Parliament and the Legislative Assemblies of all the States. His term of office is five years, and he is eligible for re-election. Only a person who is a citizen of India and has completed the age of thirty-five years is qualified to contest the election.

He is the Supreme Commander of the Armed Forces.

He has the power to grant pardons or remission of punishment.

The President is entitled to the use of an official residence without payment of rent, and a salary of Rs. 10,000 per month and allowances. Provision has also been made by an Act of Parliament for a pension of Rs. 15,000 per annum.

The President has the power of summoning, proroguing and dissolving Parliament. At the commencement of each session he addresses both Houses of Parliament assembled together. He has the right of sending messages to Parliament and sending back a Bill presented to him for his consent. This power however can be used by him only once.

The President has legislative powers under certain circumstances. When neither of the Houses of Parliament is in session and the President is satisfied that circumstances exist which make immediate action necessary he may promulgate an ordinance.

Such ordinance must be put before both the Houses of Parliament and will cease to operate at the expiration of six weeks from the re-assembly of Parliament.

The President can also declare emergency if he is satisfied that the security of India or any part thereof is threatened either by war or internal disturbances when the legislature is in session. Such a proclamation would give additional powers to the Union executive and the Legislature.

The Judges of the Supreme Court and the High Courts, the Attorney-General of India and the Comptroller and Auditor-General of India are all appointed by the President. The heads of the Part A States, the Governors are also appointed by the President.

The President has the power of appointing ambassadors abroad and receiving diplomatic representatives of foreign States.

The President places a number of annual reports before Parliament: the Annual Financial Statement, the report of the Auditor-General of India relating to the accounts of the Government of India, the annual report of the Union Public Services Commission and the report of the Special Officer for Minorities.

All executive action of the Government of India is taken in the name of the President and it is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers.

Provision is made for the impeachment of the President, by Parliament, for violation of the Constitution. If such a resolution is passed by a majority of not less than two-thirds of the total membership, such a resolution has the effect of removing the President from office.

In the exercise of his functions, the President has the aid and advice of a Council of Ministers, with the Prime Minister at the head of it. The President appoints the Prime Minister and other Ministers are appointed on the advice of the Prime Minister.

The Council of Ministers is collectively responsible to the Lok Sabha (the Lower House). Every Minister must be a member of either House of Parliament and he is required to take an oath of office and secrecy.

The salaries and allowances of Ministers are determined by Parliament.

There is a Vice-President of India, who is ex-officio Chairman of the Rajya Sabha (the Upper House). The Vice-President acts as President during a casual vacancy in the office of the President. He is elected by the members of both Houses of Parliament and his term of office is five years.

\* Bilsapur which was a separate State till June 30, 1954 was merged into Himachal Pradesh with effect from July 1, 1954.

† Questions relating to compensation are now non-justiciable.

## UNION PARLIAMENT

The Parliament consists of the President and two Houses known as, as already mentioned, the Lok Sabha and the Rajya Sabha. It must meet at least twice a year. The maximum strength of the two Houses has to be 250 and 500\* respectively.

The Rajya Sabha is elected by the elected members of the Legislative Assemblies of the States, while the Lok Sabha is elected directly by the voters in the country.

In the case of the Part C Union Territories of Himachal Pradesh, Tripura, and Manipur, the Territorial Councils form the electoral colleges for the election of members to the Rajya Sabha from these Territories. The electoral college for the Territory of Delhi will consist of persons who were members of the Delhi Legislative Assembly immediately before the 1st Nov., 1956.

The elections to the Lok Sabha are based on adult suffrage and joint electorates. There is no reservation of seats for any group except Scheduled Castes and Scheduled Tribes.

The Rajya Sabha is a permanent body with one-third of its members retiring every second year. The Vice-President of the Union is also the Chairman of the Rajya Sabha.

The Lok Sabha has a duration of five years, ordinarily. There is a Speaker and a Deputy Speaker of the House both of whom are elected by its members.

All these posts carry a salary and allowances.

Under certain circumstances, the members can be disqualified and their seats declared vacant.

Money Bills can be introduced only in the Lok Sabha. The Rajya Sabha can only return a bill with its recommendations to the Lok Sabha within a period of fourteen days of its receipt. Bills passed by Parliament are submitted to the President for his assent. Only on such assent being given does the bill become law.

The language used in Parliament is either Hindi or English.

The distribution of seats in the Rajya Sabha is as follows:

Andhra Pradesh 18; Assam 7; Bihar 22; Bombay 27; Kerala 9; Madhya Pradesh 16; Madras 17; Mysore 12; Orissa 10; Punjab 11; Rajasthan 10; Uttar Pradesh 34; West Bengal 16; Jammu and Kashmir 4; Delhi 3; Himachal Pradesh 2; Manipur 1; Tripura 1; Total—220.

The allocation of seats in the Lok Sabha is as follows:

Andhra Pradesh 43; Assam 12; Bihar 53; Bombay 60; Kerala 18; Madhya Pradesh 36; Madras 41; Mysore 26; Orissa 20; Punjab 22; Rajasthan 22; Uttar Pradesh 86; West Bengal 36; Jammu and Kashmir 6; Delhi 5; Himachal Pradesh 4; Manipur 2; Tripura 2.

## SUPREME COURT

The Supreme Court of India consists of a Chief Justice of India and not more than ten other Judges. The appointments are made by the President. The salary of the Chief Justice is Rs. 5,000 per month and of the other Judges Rs. 4,000 per month.

For purposes of constitutional law the Supreme Court has exclusive original jurisdiction in any dispute (a) between the Government of India and one or more States, (b) between the Government of India and one or more States on one side and one or more other States on the other, (c) between two or more States only in so far as the dispute involves any question on which the existence of a legal right depends.

The Supreme Court has also jurisdiction both appellate and original in matters which involve a substantial question of law as to the interpretation of the constitution.

An Attorney-General for legal advice and a Comptroller and Auditor-General of India for audit and accounts are appointed by the President. The Attorney-General has the right to appear in all courts in India.

## STATES

The 13 Part A States have Governors at their heads, the 6 Part C Union Territories have Chief Commissioners at their head, and the Part B State of Kashmir has a Sadar-i-Riyasat (President).

The States and Union Territories are grouped into geographical zones, and for each zone there is a Zonal Council, which is an advisory body.

There are five zones: Northern zone (Punjab, Rajasthan, Kashmir, Delhi and Himachal Pradesh); Central zone (Uttar Pradesh and Madhya Pradesh); Eastern zone (Bihar, West Bengal, Orissa, Assam, Manipur and Tripura); Western zone (Bombay and Mysore); Southern zone (Andhra Pradesh, Madras, and Kerala).

The Councils consist in the main of Ministerial representatives from the Centre and the States composing the Zonal Council. The Zonal Councils will also have advisers drawn from the Planning Commission and the Chief Secretaries and Development Commissioners of the States in the Zone.

The Councils may discuss matters of common interest—and more especially problems arising out of the reorganization of States such as border disputes, linguistic minorities, inter-State transport and also economic or social planning—and advise the Central or State Governments on the action to be taken in such matters.

All questions at meetings will be decided by a majority of the members present.

The proceedings of every meeting of a Zonal Council have to be forwarded to the Central Government and the States Governments concerned.

The Governor of a State is appointed by the President. Executive power is vested in the Governor who is appointed for a term of five years, ordinarily. Only a citizen of India and one who has completed 35 years of age, is eligible for such an appointment.

The Governor, like the President has power to grant pardon, etc. He will have a Council of Ministers to aid and advise him. The Governor also appoints an Advocate-General for the State.

Nine States (Bihar, Bombay, Kashmir, Madhya Pradesh, Madras, Mysore, Punjab, Uttar Pradesh, West Bengal) have two Houses of Legislature; the others, only one. The two Houses are called the Legislative Assembly (sometimes Vidhan Sabha) and the Legislative Council. The former has a duration of five years, while the latter is a permanent body with one-third of the members retiring every second year. The minimum strength of the Council is 40, and the maximum one-third of the State Assembly.

The Legislature must meet at least twice a year. While the Assembly consists of members who are directly elected from territorial constituencies, the Council consists of members nominated by the Governor, elected by the Assembly and of representatives of local bodies and special interests.

The number of seats in the Legislative Assembly and the Legislative Council is as follows (the first figure shows the number of seats in the Assembly, and the second in the Council):

Andhra Pradesh: 301, —; Assam: 108, —; Bihar: 318, 72; Bombay: 396, 72; Kashmir: 100, 36; Kerala: 126, —; Madhya Pradesh: 288, 72; Madras: 205, 50; Mysore: 208, 52; Orissa: 140, —; Punjab: 154, 40; Rajasthan: 176, —; Uttar Pradesh: 430, 72; West Bengal: 252, 51.

The right of summoning, proroguing and dissolving the legislature is vested in the Governor, who addresses the legislature at the commencement of each session.

Like the Parliament there is a Speaker, a Deputy Speaker, a Chairman and a Deputy Chairman for the Legislative Assembly and the Legislative Council respectively. These officers of the legislatures are entitled to salary and allowances.

The language in the legislature can be either Hindi or English or any other language allowed by the Speaker.

The State Legislatures cannot discuss the conduct of any judge of the Supreme Court or of a High Court in the discharge of his duties.

As the Governor is a part of the legislature, he has certain legislative powers. He can promulgate ordinances during the recess of the legislature; such ordinances must be placed before the legislature and cease to operate at the expiration of six weeks from the re-assembly of the legislature.

The salary of the Governor is Rs. 5,500 per month and he is also entitled to certain allowances.

If the Government of the State cannot be carried on in accordance with the provisions of the Constitution, and the Governor makes a report to that effect to the President, the President may by proclamation assume to himself all or any of the functions of the Government of the State. He may also declare that the powers of the State legislatures shall be exercised by Parliament, and suspend any provision of the constitution relating to the State.

However, he cannot assume to himself, or suspend any of the provisions of the Constitution relating to High Courts.

There is a High Court for each State and a Judicial Commissioners' Court each for the Union Territories of Himachal Pradesh, Manipur and Tripura.

The highest court for Delhi is the District Court. Appeals from here go to the Punjab High Court, a circuit bench of which sits in Delhi. For Andaman, the highest court is the Chief Commissioner's Court. Appeals go to the Calcutta High Court.

As regards Andaman and Nicobar Islands (Part C Territory), the President makes rules and regulations for the peace and good government of the State, and appoints a Chief Commissioner for administration. The President has the power of making regulations which have the effect of amending or repealing an Act of Parliament.

## FINANCE

The financial relations between the Union and the States are as follows:—There is a Consolidated Fund of India and a Consolidated Fund of each State, and all money received is credited to the public account of India or the public account of the State as the case may be. Provision is also made for the establishment of a 'Contingency Fund of India' and a 'Contingency Fund of the State'.

Certain duties and taxes are levied and collected by the Government of India, such as duties in respect of succession to property, terminal taxes, taxes on railway fares and freights, etc. But the net proceeds are assigned to the States, in accordance with such principles of distribution as formulated by Parliament. Certain other taxes, like income-tax are levied and collected by the Government of India, but are distributed between the Union and the States.

These matters are fixed in accordance with the recommendations of a Finance Commission appointed for the purpose.

No moneys can be appropriated out of the Consolidated Fund of India or of a State except in accordance with an Appropriation Act by the appropriate legislature.

The property of the Union is exempt from the taxes imposed by a State, and the property and income of State are exempt from Union taxation.

The privy purse sums of the Rulers are a charge on the Consolidated Fund of India, and these sums are to be exempt from taxes on income.

There is a Public Service Commission for the Union and also for the States. Two or more States may agree to have only one Commission for the group. Actually, every Part A State

\* According to the final orders passed on the recommendations of the Delimitation Commission the strength was to be 502. This change came about because of the findings of the recent census.

has a Public Service Commission at present while the Union Public Service Commission operates for the Part C Union Territories as well. Appointment of members of the Commission are made by the President or the Governor as the case may be. The Commissions conduct examinations for appointments to the services of the Union or the States. The Union Commission submits an annual report to the President.

### ELECTIONS

All elections are directed and controlled by an Election Commission. Elections to the Lok Sabha and the Legislative Assemblies of the States are on the basis of adult suffrage. Seats are reserved in the Lok Sabha for the Scheduled Castes and the Scheduled Tribes.

The President may nominate not more than two members of the Anglo-Indian community to the Lok Sabha if he thinks that the Community is not adequately represented. Similar power is given to the Governor of a State.

The claims of the Scheduled Castes and the Scheduled Tribes are to be considered in making appointments to services, and for two years after the commencement of the Constitution the Anglo-Indians were to have the same proportion in the services as they had immediately before 15th August 1947. This reservation is to be progressively reduced by 10 per cent every two years in such a way that it is to cease completely ten years after the commencement of the Constitution.

In fact all reservation including reservation of seats for Scheduled and Tribal classes are to cease ten years after the commencement of the Constitution.

A special officer for the Scheduled Castes and the Scheduled Tribes has been appointed.

### OFFICIAL LANGUAGE

Hindi in the Devanagari script is the official language of the Union and the form of numerals is the international form of the Indian numerals. The English language, however, will continue to be the official language for a period of not more than fifteen years from the commencement of the Constitution.

The official language of the Union, i.e., English will be used for communication between the Union and a State or between one State and another. However, if two States agree Hindi may be used instead of English between them.

All proceedings in the Supreme Court and High Courts, the texts of Bills and Acts passed by the legislatures and ordinances promulgated by the appropriate authorities are to be in the English language, until Parliament by law provides otherwise.

By previous consent of the President proceedings in a High Court may be conducted in Hindi or any recognised State language but judgments, decrees or orders passed by the court must be in English.

It is the duty of the Union Government to promote and spread the Hindi language. The vocabulary for the development of the language is to be drawn primarily from Sanskrit.

The States have been given the liberty of adopting any one or more languages used in their territory or Hindi as the official language of the State.

The following languages are recognised by the Constitution: (1) Assamese, (2) Bengali, (3) Gujarati, (4) Hindi, (5) Kannada, (6) Kashmiri, (7) Malayalam, (8) Marathi, (9) Oriya, (10) Punjabi, (11) Sanskrit, (12) Tamil, (13) Telugu, (14) Urdu.

A commission was to be appointed by the President, at the expiration of five years from the commencement of the Constitution, to make recommendations to him, as regards the progressive use of the Hindi language for official purposes of the Union, and other allied matters.

The Commission so appointed has concluded its work but has not published its report (April, 1957).

### EMERGENCY PROVISIONS

If the President is satisfied that a grave emergency exists, and the security of India or any part thereof is threatened either by war or internal disturbance, he may make a declaration to that effect. Such proclamation must be approved by both the Houses of Parliament, before the expiration of two months, otherwise it ceases to operate at the end of that period. As a result of this proclamation Parliament will be authorised to legislate on items included in the State list and the President, to issue directions to the Governor. Parliament can validate such a proclamation for a period of three years which is the maximum.

A request for a declaration of emergency may also come from a State authority.

This, however, would not be applicable to the functions of the High Courts. Somewhat similar provision is also made for financial emergency.

### AMENDMENT OF THE CONSTITUTION

For purposes of amendment the items are divided into three classes with a different procedure for each class.

For amendment of the provision with respect to the Supreme Court and the High Courts, the distribution of legislative powers between the Centre and the States, the representation of the States in Parliament, etc., the amendment must be passed by both the Houses of Parliament by a majority of the total membership of the House and by a majority of two-thirds of the members present and voting, and must further be ratified by the legislatures of not less than one-half of the States.

In other cases no reference to the State legislatures is necessary. Parliament by itself can amend the Constitution in the manner mentioned above. In some cases amendments can be effected even by a bare majority such as is required for the passing of any ordinary law.

### UNION TERRITORIES

According to a Bill introduced in the Lok Sabha on 14th Dec., 1956 three Part C Union Territories namely, Himachal Pradesh, Manipur and Tripura are to have Territorial Councils.

The Councils will be elected directly from territorial constituencies on the basis of adult suffrage. They will deal with local affairs such as education, public health, roads and bridges and transport generally, panchayats, local works, animal husbandry.

A Council will meet at least once in two months. The Administrator of the Territory may attend and address a meeting of the Council. When he attends any such meeting he will preside over it.

For every Territorial Council there will be a chief executive officer appointed by the Administrator. There may also be other staff.

The Council can levy taxes on professions, trades, callings and employments and tolls on bridges and school fees. The taxes have to be approved by the Central Government before they become effective.

The Council has the power to borrow money with the approval of the Central Government.

The budget estimates of the Territory will be presented by a Finance Committee of the Council. The budget estimates finally adopted by the Council in the light of the suggestions made by the Administrator shall be the budget of the Territorial Council.

The Central Government may pay to a Territorial Council the net proceeds of the following taxes attributable to the area under the Council's jurisdiction:

Entertainment tax; a certain percentage of the land revenue not exceeding 10; tax on motor vehicles; taxes on passengers, goods, terminal tax.

The Central Government may also make such grants as it thinks fit.

The Administrator will have the right to give directions to the Council in regard to matters connected with education.

The Administrator can also suspend the execution of a resolution or order of the Council or prohibit any action on grounds that it is likely to lead to a breach of the peace or cause annoyance or injury to the public or to any class or body of persons. But in such cases he has to send a report to the Central Government together with explanations offered by the Council. The Central Government may then confirm, modify or rescind the Administrator's order.

The Central Government may on the report of the Administrator supersede a Territorial Council for incompetence, negligence of duty or abuse of power. In such cases a new Council will have to be elected within a period of one year.

The Central Government has the power to make rules for the purpose of carrying out the provisions of the Act, to regulate the conduct of business of the Council, regulate the employment, payment suspension of officers and servants of the Council; the keeping of accounts.

Such rules framed by the Central Government have to be laid before Parliament for not less than thirty days, and have to be approved by it.

Any bye-laws made by the Council in regard to matters over which it has jurisdiction have to be confirmed by the Central Government. These laws are liable to alteration by the latter authority.

On the day the Territorial Council is established all Zilla Panchayats in Himachal Pradesh will stand abolished, and the liabilities and assets will accrue to the Council.

The strength of the Territorial Council of Himachal Pradesh will be 40, of Manipur 30, and of Tripura 30. Of the 40 seats in the Himachal Council 12 will be reserved for the Scheduled Castes.

For the Part C Union Territory of Delhi there will be for the time being an Advisory Committee which will be associated with the Minister of Home Affairs who is responsible for the administration of Union Territories. This Committee is to consist of all members of Parliament representing Delhi, the Chief Commissioner of Delhi, The Vice-Chancellor of the University of Delhi, the President of the Delhi Municipal Committee and the Senior Vice President of the New Delhi Municipal Committee.

Eventually there will be a Municipal Corporation for Delhi like the Territorial Councils for some other Territories. For this legislation was being prepared at the time of writing (April, 1957).

## PUBLIC SERVICES

**T**HE Constitution provides for the setting up of a Public Service Commission for the Union and for each State. Two or more States may join together to have a Common Public Service Commission.

The chairman and members of the Union Public Service Commission and of Joint Commissions are appointed by the President of the Union, while the chairman and members of a State Commission are appointed by the Governor.

A member of the Union Commission holds office for six years or till he is 65 years. A member of a State Commission also holds office for six years but retires earlier on attaining the age of 60. Broadly speaking, a member of a Commission is eligible for appointment only on the same Commission or some other Commission subject to certain conditions. He is not eligible for appointment to any other Government post. The Chairman of the Union Public Service Commission is not eligible for any Government appointment whatever. A member of a Commission can be removed only by the President on the advice of the Supreme Court.

The Union and State Commissions conduct examinations for recruitment to Government service. The Commissions also advise the Governments on the service conditions of the employees. There is a statutory obligation for a Government to consult the Commission on such questions, and if there are any rules which specifically exempt Government from such consultation these rules should be approved by the legislature.

An annual report of the Commission which also includes a list of cases in which Government did not accept the advice of the Commission has to be placed before the appropriate legislature.

With independence two problems faced the country about Public Services. A large number of British officials left and Muslim officials opted for Pakistan. The gap thus created had to be filled by some sort of emergency recruitment. Out of about 1,000 Civil Servants about 600 are estimated to have left. The second was to replace the I.C.S. by a new service, an I.A.S. The first problem was met by setting up an Emergency Recruitment Board in the middle of 1948 which selected the required number of men from both inside and outside the ranks of the permanent services. The I.A.S. was to serve the same purpose as the old I.C.S. except that it would not provide officials for the judiciary.

The I.A.S. probationers are trained at the Indian Administrative Service Training School at Delhi. This school was started in 1947.

The conditions of recruitment, service, etc. of the two All-India Services are fixed by the All-India Services Act, 1951.

It was announced in April 1956 that an Emergency Commission would recruit 386 I.A.S. officers to fill up gaps. Till then the I.A.S. strength in 18 major States (the reorganisation) was fixed at 1,539.

Between Aug. 1955 and Aug. 1956, 108 I.A.S. and 50 I.P.S. officers were appointed. Of the 108 I.A.S. officers, 50 were recruited through open competition, 52 by promotion from State Civil Service, 6 under the Extension to States Scheme. Of the 50 I.P.S. officers, 32 were recruited through open competition, 16 by promotion from State service, 2 under the Extension to States Scheme.

### ALL INDIA SERVICES

The following is a list of All India and Central Services which now exist.

#### ALL INDIA SERVICES

- (i) Indian Administrative Service,
- (ii) Indian Police Service

#### CENTRAL SERVICES

- (i) Indian Foreign Service,
- (ii) Indian Audit and Accounts Service,

- (iii) Indian Defence Accounts Service;
- (iv) Indian Railway Accounts Service;
- (v) Indian Customs and Excise Service;
- (vi) Indian Income-tax Service (Class I);
- (vii) Transportation (Traffic) and Commercial Departments of Superior Revenue Establishment of Indian Railways;
- (viii) Indian Postal Service (Class I);
- (ix) Military Lands and Cantonments Service (Class I and II);
- (x) Central Engineering Service (Class I and II);
- (xi) Central Electrical Engineering Service (Class I and II);
- (xii) Indian Railway Service of Engineers;
- (xiii) Signal Engineering Department of the Superior Revenue Establishment of Indian Railways;
- (xiv) Electrical Engineering Department of the Superior Revenue Establishment of Indian Railways;
- (xv) Mechanical Engineering and Transportation (Power) Department of the Superior Revenue Establishment of Indian Railways;
- (xvi) Telegraph Engineering Service (Class I);
- (xvii) Telegraph Traffic Service (Class II);
- (xviii) Military Engineer Services (Class I);
- (xix) Indian Ordnance Service (Class I);
- (xx) Survey of India (Class I and II) Services;
- (xxi) Central Secretariat Stenographers Service, and
- (xxii) Central Secretariat Clerical Service.

There is also a Central Secretariat Service which includes all posts in the Central Secretariat from an Assistant up to an Under-Secretary.

There are some services to which recruitment is made by selection. These services include:

Zoological Survey (Class I), Archaeological Survey (Class I), Apprentices for Training in Ordnance Factories, District Medical Officers for State Railways.

Proposals for the creation of more All-India Services are (1956 April) under consideration. All-India Parliamentary Service, Indian Service of Engineers, Indian Forest Service, Indian Medical and Health Service, a service to man the industries in the public sector and a scientific service.

The pay scales of some of the more important All-India and Central services are given below:

*Indian Administrative Service and Indian Foreign Service*

Junior Scale: 350-400-450-500-550-600-E B-30-870-40-950 (10 years).

Senior Scale: 800 (6th year or under)-50-1,000-60-1,300-50-1,800 (25 years).

*Indian Police Service.*

Junior Scale: 350-350-380-380-30-590-E B-30-770-40-850 (10 years).

Senior Scale: 600 (6th year or under)-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150 (22nd year).

Selection grade: 1,250.

*Indian Audit and Accounts Service.*

Junior Scale: Rs. 350-350-380-380-30-590-E B-30-770-40-850.

Senior Scale: Rs. 600 (6th year or under)-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150.

Junior Administrative grades: Rs. 1,300-60-1,600-1,600-100-1,800.

Senior Administrative grades: Rs. 1,800-100-2,000-2,000-125-2,250.

*Indian Postal Service (Class I).*

Junior Time Scale: Rs. 350-350-380-380-30-590-E B-30-770-40-850.

(Officers under training will draw pay in this time scale).

Senior Time Scale: Rs. 600-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150.

Directors of Postal Services: Rs. 1,300-60-1,600.

Postmaster-General: Rs. 1,800-100-2,000.

*Indian Income-tax Service (Class I).*

*Grade II:*

Time Scale: Rs. 350-350-380-380-30-590-E B-30-770-40-850.

*Grade I:*

Time Scale: Rs. 600-40-1,000-1,000-1,050-1,050-1,100-1,100-1,150.

Assistant Commissioners of Income-tax: Rs. 1,000-50-1,400.

Commissioners of Income-tax, Grade II: Rs. 1,300-60-1,600.

Commissioners of Income-tax, Grade I: Rs. 1,800-100-2,000.

A revised All India Services (Conduct) Rules was drawn up in September 1954.

About 25 sets of rules and regulations in respect of the two All India Services have been promulgated concerning recruitment, cadre, etc. Others concerning death-cum-retirement benefits, study leave, etc. have yet to be framed.

Citizens of Kashmir are now eligible for appointment to the I.A.S. and the I.P.S.

About the recruitment of Scheduled Castes and Tribes to the All India and Central Services, certain further concessions have been made. The age concession has been raised from three to five years. Minimum qualifications can now be lowered if necessary. And unutilized reserve quota can be carried forward for two years instead of one.

The Central Civil Services (Conduct) Rules were drawn up in March 1955.

The revised rules while embodying several provisions existing in the original rules have added a few more relating to investments, lending and borrowing by Government servants, acquiring or disposing of movable, immovable and valuable property, vindication of acts and character of members of the services, and bigamous marriages.

Government servants are forbidden to contract bigamous marriages without the prior permission of the Government.

An ordinance was promulgated by the Ministry of Home Affairs to place Section 5 of the Prevention of Corruption Act, 1947 on the Statute Book permanently.

The Section created a new offence of "criminal misconduct in the discharge of official duty" and also laid down a rule of evidence requiring the court to draw a presumption against a public servant found in possession of assets which are disproportionate to his income and which he cannot satisfactorily account for.

The Civil Service (Classification, Control and Appeal) Rules have now been finalized.

The rules relating to appointment and discipline of subordinate services which used to form a separate set have been amalgamated with the main rules.

There is an Anti-Corruption Department at work to detect cases of corruption.

The Prevention of Corruption Amendment Act makes certain acts of corruption cognizable.

There is now a law allowing the Public Prosecutor to initiate proceedings against editors or journalists who publish attacks on public servants.

In the Ministry of Home Affairs an Administrative Vigilance Division has been set up under a Director of the status of a Joint Secretary. And in each Ministry and Department a Vigilance Officer has been appointed. He personally deals with all cases for disciplinary action.

The work of the Organizations and Methods Division of the Government of India created in March 1954 has had considerable success in promoting speed and efficiency in the disposal of work. Experience revealed that it was not so much the system that was at fault but the way it was worked. Studies were made in selected sections by marking files and tracing their progress. A number of devices have been adopted to increase speed and efficiency. There is, for instance, a check on the outturn of work and a record of the cases pending for more than a month. More authority is delegated to the Section Officer than before. In the disposal of important matters either within a Ministry or between two Ministries recourse is had to personal discussion rather than to the routing of files. There is now far less delay in any correspondence with the U.P.S.C. A 'Standing Guard-file' is now maintained for locating and putting up precedents. Dak is accepted upto the closing hour (previously it was accepted only

upto 3 P.M.), and the Section officer sends only such files up to the Under Secretary as he cannot deal with himself.

Reports on the working of the Ministry of Works, Housing and Supply and of nine offices under it and the Ministry of Commerce and Industry have been issued by a reorganization unit appointed specially for the purpose.

#### PUBLIC SERVICE COMMISSIONS

The following is a list of Public Service Commissions in India:

1. Andhra Pradesh Public Service Commission (Hyderabad).
2. Assam Public Service Commission (Shillong).
3. Bihar Public Service Commission (15, Bayley Road, Patna).
4. Bombay Public Service Commission (Bank of India Building, Mahatma Gandhi Road, Bombay).

5. Public Service Commission (Madras).
  6. Madhya Pradesh Public Service Commission (Indore).
  7. Mysore Public Service Commission (Ballabrooke, Palace Road, High Grounds, Bangalore).
  8. Orissa Public Service Commission (Cuttack).
  9. Punjab Public Service Commission (Simla).
  10. Kerala Public Service Commission (Trivandrum).
  11. Uttar Pradesh Public Service Commission (Allahabad).
  12. Public Service Commission, Rajasthan (43, Station Road, Jaipur).
  13. West Bengal Public Service Commission (Anderson House, Alipore, Calcutta).
- The Union Public Service Commission also operates for Part C Territories.

## ADMINISTRATION OF JUSTICE

THE writs which for generations ran over the length and breadth of the country in the name of the British Sovereign, now run in the name of the President of the Republic of India. Nevertheless, all the laws which existed before independence continue to operate in India as before subject to adaptation and modification made therein. Article 372 of the Constitution provides *inter alia* that, subject to the other provisions of the constitution, all the laws in force in the territory of India immediately before the commencement of the Constitution shall continue in force therein until altered, repealed or amended by a competent Legislature or other competent authority.

Article 13 of the Constitution provides that all laws in force in the territory of India immediately before the commencement of the Constitution, in so far as they are inconsistent with the provisions of the Constitution relating to Fundamental Rights (Part III) shall to the extent of such inconsistency be void.

The State is also debarred from making any law which takes away or abridges the Fundamental Rights conferred by this Part, and any law made in contravention shall be void to the extent of such contravention (Art. 13 (2)).

Article 14 ensures to all persons equality before the law by providing that the State shall not deny to any person equality before the law or the equal protection of the laws within the territory of India.

The continuity of the existing laws and legal procedure is further ensured by Article 375 under which all courts of civil, criminal and revenue jurisdiction and all authorities and officers continue to exercise their respective functions subject to the provisions of the Constitution.

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Muslim. Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom. The rules of the Shastras and the Koran have, however, been in some cases altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1829, the Indian Slavery Act, 1843, the Caste Disabilities Removal Act of 1850, the Hindu Widows' Remarriage Act, 1856, and some other Acts and Codes like those which remove the civil disabilities of Harijans.

During recent years indeed there has been a determined demand on the part of social reformers, and various women's organisations

in India for an amendment of the Hindu Law so as to bring it into line with progressive social opinion, in consonance with the spirit of the times.

The Draft Hindu Code that was before the provisional Parliament aimed at abolishing the archaic principles of the ancient system of law, the removal of sex and caste disabilities, and generally simplifying, secularising, and modernising the law governing all Hindus, including Lingayats, Buddhists, Jains and Sikhs. But the Code lapsed on account of the dissolution of the provisional Parliament.

The Government of India has however decided to introduce piece-meal legislation regarding reforms in Hindu Law.

The following Acts have already been passed: The Hindu Marriage Act 1955, the Hindu Succession Act 1956, The Minority and Guardianship Act 1955, The Hindu Adaptation and Inheritance Act 1956. The new Hindu code is thus part of the statute book.

In the meanwhile, an opposite tendency has been observable among the Muslims, who by recent legislation have sought to revert to the law of the Shariat, discountenancing the application of Hindu Law and custom to the sections of the Muslim community who as converts from Hinduism had retained Hindu Law in matters of inheritance and succession.

Apart from this, the entire legal system which has hitherto prevailed in the country is in course of time bound to undergo a profound transformation by reason of the withdrawal of British rule and the partition of India. A Law Commission has been appointed by the Government of India for this purpose, and it has already submitted to the Government interim reports on certain laws.

A demand has been made for the simplification of the procedure and law for the administration of justice.

Accordingly a bill for amending the code of Criminal Procedure was passed. The amendment gives the accused certain new rights. He can now take an oath and give evidence if he so desires.

The Indian Penal Code has from time to time been amended. The rules of Civil Procedure have been embodied in the Code of Civil Procedure. The Code of Civil Procedure was remodelled in 1908 and the Code of Criminal Procedure in 1898. These Codes as amended from time to time are now in force.

The years between 1870 and 1885 saw a great deal of legislative activity in British India, and important branches of the law, like Evidence,

Contract, Transfer of Property, Trusts, Negotiable Instruments, etc., were codified in the form of Acts of the Indian Legislature applicable to the whole of British India. These, amended from time to time and supplemented by rules derived from English decisions, constitute the bulk of the law administered in India today.

#### SUPREME COURT

Art. 124 of the Constitution provides for the establishment of a Supreme Court of India consisting of a Chief Justice of India and nine other judges. There is provision in law for the appointment in all of 10 other judges. Every judge of the Supreme Court shall be appointed by the President and shall hold office until he attains the age of sixty-five years. In the course of appointment of a Judge the Chief Justice shall always be consulted. Only a citizen of India who has been for at least 5 years a Judge of a High Court, or for 10 years an advocate of a High Court, or in the opinion of the President a distinguished jurist, is qualified to be appointed Judge of the Supreme Court.

A Judge of the Supreme Court is not liable to be removed from his office except by an order of the President passed after an address by each House of Parliament, supported by a majority of the total membership of that House, and by a majority of not less than two-thirds of the members of that House present and voting, has been presented to the President in the same session for such removal, on the ground of proved misbehaviour or incapacity. No person who has held office as a Judge of the Supreme Court shall plead or act in any court or before any authority within the territory of India.

The Supreme Court is a court of record with all the powers of such a court including the power to punish for contempt. The seat of the Court is to be in Delhi or such other place as the Chief Justice with the approval of the President may from time to time appoint.

The Supreme Court has exclusive original jurisdiction in any dispute (a) between the Government of India and one or more States, (b) between Government of India and one or more States on the one side and one or more other States, on the other; (c) between two or more States, if and in so far as the dispute involves any question (whether of law or fact) on which the existence or extent of a legal right depends (Article 131).

The Appellate jurisdiction of the Supreme Court extends over all appeals from any judgment, decree or final order of a High Court, in civil, criminal or other proceedings, if the High Court certifies that the case involves a substantial question of law as to the interpretation of the

Constitution. If the High Court refuses such a certificate the Supreme Court may grant special leave to appeal in a proper case (Art. 132). An appeal shall also lie to the Supreme Court from a High Court in civil matters, when the amount or value of the subject matter in dispute is not less than Rs. 20,000 or the High Court certifies the case to be a fit one for appeal to the Supreme Court (Art. 133).

In criminal matters under Art. 134 an appeal lies to the Supreme Court from any judgment, final order or sentence of a High Court, if the High Court has (a) on appeal reversed an order of acquittal of an accused person and sentenced him to death; or (b) has withdrawn for trial before itself any case from a subordinate court and has in such trial convicted the accused person and sentenced him to death; or (c) the High Court has certified that the case is a fit one for appeal.

For purposes of appeals to the Supreme Court, the Judicial Commissioners' Courts are to be considered as High Courts.

Under Art. 136 discretion is given to the Supreme Court to grant special leave to appeal from any judgment, decree, sentence or order, in any matter passed by any Court or Tribunal in the territory of India.

The Supreme Court has also power to review its own judgment (Art. 137).

The jurisdiction and powers of the Federal Court under the existing law are also exercisable by the Supreme Court (Art. 135) including the advisory power to give its opinion on questions of law or fact referred to it by the President (Art. 143).

The law declared by the Supreme Court shall be binding on all courts in the territory of India excepting the Supreme Court itself.

The dual system in the Supreme Court was abolished with effect from Jan 26, 1955.

Parliament has the power to legislate on the constitution, organisation, jurisdiction and powers of the Supreme Court.

Article 32 of the Constitution guarantees the right to move the Supreme Court by appropriate proceedings for the enforcement of Fundamental Rights; and for the enforcement of such rights the Supreme Court has power to issue directions or orders or writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warrant* and *Certiorari* whichever may be appropriate.

Power is given to Parliament to enlarge the jurisdiction of the Supreme Court by appropriate legislation (Art. 138).

The jurisdiction of the Judicial Committee of Her Majesty's Privy Council over appeals from India in all matters is now abolished.

The royal prerogative to grant pardons, respite, respites or remissions of punishments now resides in the President (Art. 72).

Under Art. 348, all proceedings in the Supreme Court and in every High Court in India and the authoritative text of all Bills and Acts of Parliament and the State Legislatures and of all Ordinances promulgated by the President or Governors and of all orders, rules and regulations issued under the Constitution or any law shall be in the English language. If this language is to be replaced by any other language, Parliament must legislate to that effect.

### HIGH COURTS

Every High Court is a court of record and has all powers of such court including the power to commit for contempt of itself.

Every judge of a High Court is appointed by the President after consultation with the Chief Justice of India, the Governor of the State and the Chief Justice of the particular High Court; and he holds office until he attains the age of sixty years.

A person is not qualified to be appointed a judge of a High Court unless he is a citizen of India and has either held judicial office or practised as an advocate for 10 years in any of the States.

A High Court judge is not liable to be removed from his office except in the manner provided in Art. 124 (4) for the removal of a judge of the Supreme Court of India.

No person who after the commencement of the constitution has held office as a permanent judge of a High Court could plead or act in any court or before any authority in the territory of India except the Supreme Court or High Courts.

There is provision in the Constitution for the appointment of additional or acting judges.

Power is given to the President in consultation with the Chief Justice of India to transfer a judge from one High Court to any other High Court in India. (Art. 222.)

Article 225 preserves the jurisdiction and powers of the High Courts as they existed immediately before the commencement of the Constitution. Restrictions on the exercise of the original jurisdiction in revenue matters are removed.

Art. 226 gives to every High Court in India power throughout its jurisdiction to issue to any person or authority including Government departments, orders, writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warrant* and *Certiorari* for the enforcement of Fundamental Rights and for any other purpose. (Art. 226).

The High Courts have powers of superintendence over all subordinate Courts within their respective jurisdiction.

Legislation affecting constitution and organisation of the High Courts can be passed by Parliament alone.

The Law Commission has recommended to the Government of India that a High Court should not have Benches.

### LOWER COURTS

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled courts of session and courts of magistrates.

Every State, outside the towns of Madras, Bombay and Calcutta, is divided into sessions divisions consisting of one or more districts, and every sessions division has a court of session and a sessions judge, with assistants if need be. These stationary sessions courts are like the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the State.

The jury system has been abolished in Bombay State except in the Greater Bombay area.

Magistrates' courts are of three classes with descending powers. Provision is made and largely utilised in the towns, for the appointment of honorary magistrates. In the towns of Madras, Bombay and Calcutta Presidency Magistrates deal with magisterial cases and benches of Justices of the Peace or Honorary Magistrates dispose of the less important cases.

In Bombay Honorary Magistrates or Justices of the Peace do not try cases.

Article 50 of the Constitution lays down that the States shall take steps to separate the judiciary from the executive in the public service of the States.

The State of Bombay was the first State to introduce the separation of the judiciary from the executive in public services, by a statute. The Act came into force on July 1, 1953.

There is partial separation in the following States: Andhra, Madras, Punjab, Bihar, U. P., and Kerala. It is not effected by any statute but by rules made by the Government in that behalf.

The Government of West Bengal has announced that it has decided to make the judiciary independent of the executive at all levels.

The constitution and jurisdiction of the inferior civil courts varies. Broadly speaking one district and sessions judge is appointed for

each district. As District Judge he presides in its principal civil court of original jurisdiction. His functions as Sessions Judge have already been described.

For these posts members of the Indian Civil Service were mainly selected in the past though some appointments were made from the Provincial Service.

In the State of Bombay recruitment is also made from the bar; leading practitioners are appointed as District Judges.

Next come the Subordinate Judges and Munsifs, the extent of whose original jurisdiction varies in different parts of the country.

There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs. 500. In the towns of Madras, Bombay and Calcutta where the Chartered High Courts have original jurisdiction, Small Causes Courts dispose of money suits up to Rs. 2,000.

In Bombay and Madras there are also City Civil Courts. The City Civil Court in Bombay has a pecuniary jurisdiction of upto Rs. 25,000.

As Insolvency Courts the Chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers were conferred on the District Courts by the Provincial Insolvency Act of 1920.

There are Coroners only for the Presidency Towns of Calcutta and Bombay. Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by jurors.

### SPECIAL COURTS

Labour Courts and Industrial Courts now exist in most States.

A Labour Court consists of a single judge.

These Courts decide upon disputes regarding (a) propriety or legality of an order passed by an employer, (b) the application and interpretation of standing orders, (c) they also decide disputes referred to them by Government for arbitration. Legality or otherwise of strikes or lock-outs or closure, etc. is also decided by them.

An appeal against the judgment of the Labour Courts lies to the Industrial Court. This court has also original jurisdiction regarding matters referred to it by the Government or by representative Unions. It decides upon questions of law referred to it by Wage Boards and references regarding interpretation of the Act and the Rules. It has power of superintendence over Labour Courts.

The Industrial Disputes Act was passed by the Central Legislature in 1947 for the investigation and settlement of industrial disputes.

Industrial Tribunals were established under this Act. If the conciliation bodies set up under this Act fail to bring about a settlement, the matter is referred to the Industrial Tribunals.

Neither party to a dispute is entitled to be represented by a legal practitioner except with the consent of the other party and by leave of the Tribunal.

Industrial Tribunals are not permanent Courts. Whenever a matter is referred to the Government regarding an industrial dispute the Government appoints one or more persons as Industrial Tribunal to adjudicate upon the dispute.

The Industrial Disputes (Appellate Tribunal) Act was passed in 1950. It constituted a new Court, the Labour Appellate Tribunal of India. It is an appellate Court over the Industrial Tribunals and Industrial Courts. The judgments given by the Appellate Tribunal have helped to establish uniformity in labour matters.

The Industrial Disputes (Appellate Tribunal) Act was amended in 1955 by Act 29 of 1955. This Act empowered the Chairman of the Labour Appellate Tribunal to transfer applications to the Industrial tribunals constituted under the Industrial Disputes Act 1947.

The Labour Appellate Tribunals are in effect abolished by the Industrial Disputes (Amendment and Miscellaneous Provisions) Act No. 36 1956 which repealed the Industrial Disputes Appellate Tribunal Act of 1950.

It makes provision for the constitution of the following courts and tribunals:

1. Labour Courts to be constituted by the appropriate Government. A court is to consist of one judge only.

2. Industrial Tribunals. A Tribunal is to consist of one judge only. A person is not qualified to be a member of a Tribunal unless he has been judge of a High Court. The Tribunals will be constituted by the appropriate Government.

3. National Tribunals. These Tribunals will be constituted by the Central Government. Here also a tribunal is to consist of one judge only.

This Act came into force on 1st Sept., 1956 from which date the Tribunal was not to entertain fresh appeals, but pending appeals were to be disposed of.

Juvenile offenders are tried by the Juvenile Courts. In places where there are no juvenile courts the offenders are tried either by the High Court, or the Court of Session or a salaried Presidency Magistrate or a salaried Magistrate of the First Class.

Legal practitioners are not entitled to appear in any case or proceeding before a Juvenile Court. However the Court may grant permission in exceptional cases.

Probation officers are appointed by the State Government for helping the Court in the discharge of its functions. The powers and duties of such officers are laid down in the rules. Their main duty is to investigate the history of the juvenile offender and offer help to the Court. An appeal against the judgment of a Juvenile Court lies to the Chief Presidency Magistrate in Greater Bombay, and in other places to the Court of Session. If a case is decided by a Presidency Magistrate or a Court of Session the appeal lies to the High Court.

Panchayat Courts (called Nyaya Panchayat) are in existence in many States. The members of the Panchayat Court are elected by the Village Panchayat. Sections 30-44 of the Act lay down rules about the suits that may be tried and the suits that may not be tried by the Court. A Nyaya Panchayat cannot alter or revise its decision. An appeal against a decision of the Nyaya Panchayat lies to the District Judge.

#### LEGAL OFFICIALS

The Government of India have their own law colleague in the Law Minister of the Union Cabinet. There is also now an additional Minister designated Minister for Legal Affairs. All Government measures are drafted in his department after their substance is decided upon by the administrative departments concerned.

Outside the Cabinet the principal law officers of the Government of India are the Attorney-General and Solicitor-General appointed by the President. At Bombay and Calcutta the Government of India have their own solicitors.

Each of the State Governments has its own Advocate-General.

Article 76 of the Constitution of India says that for the post of Attorney-General the President shall appoint a person qualified to be appointed a Judge of the Supreme Court. It shall be the duty of the Attorney-General to advise the Government of India on such legal matters and to perform such other duties of a legal character as may be referred or assigned to him by the President, and to discharge the functions conferred upon him by the Constitution. In the performance of his duties the Attorney-General shall have right of audience in all Courts in the territory of India. The Attorney-General has a right to take part in the proceedings of Parliament and address it.

Under Article 165 the Governor of each State is authorised to appoint a person qualified to be appointed a Judge of a High Court to be Advocate-General for the State.

The Advocate-General is appointed by the Governor. He has to give advice to the Government of the State upon such legal matters and to perform such other duties of a legal character as may be referred to or assigned to him. He holds office during the pleasure of the Governor. He appears in the Court on behalf of the Government. He is the leader of the Bar and the President of the Bar Council. He is also authorised to take part in the proceedings of the State legislature, if his advice is sought.

In addition to the Advocate-General there is also a Government Pleader in many States. He usually belongs to the Appellate Side of the High Court while the Advocate-General belongs to the Original Side. The Government Pleader is assisted by an Assistant Government Pleader and they look after criminal work.

The State Governments have their own law officers, in addition to the Advocate-General and the Government Pleader. The law officer is designated Remembrancer of Legal Affairs. He also works as Secretary to the Legal Department. He is never a practising lawyer, but a Government servant. Usually one of the District Judges is appointed Remembrancer of Legal Affairs.

The Legal Remembrancer drafts Government Bills and gives advice to Government Departments on all legal matters.

Sheriffs are attached to the High Courts of Bombay, Calcutta and Madras.

They are entrusted with the work of preparing jury lists, serving summons and other legal processes. The Sheriff in Bombay is the ex-officio Chairman of the Bombay State Permanent Famine Relief Committee. He can also convene public meetings on behalf of the citizens.

The detailed work of the office is entrusted to the Deputy Sheriff who is an officer of the High Court.

There are Official Assignees in three States—Bombay, W. Bengal and Madras. The appointment is made by the Chief Justice of the High Court concerned.

The duties of the Official Assignee are two-fold, viz. realisation and distribution of the insolvent's estate, and the control of the property of the insolvent and his conduct generally.

A party aggrieved by the decision of the Official Assignee may appeal to the Insolvency Judge of the High Court.

In addition to the Official Assignee, a Deputy Official Assignee may also be appointed. Another officer of the court is the Insolvency Registrar who may be vested with the powers mentioned in section 6 of the Presidency Towns Insolvency Act.

There are two classes of legal practitioners, practising in the Supreme Court. They are Senior Advocates, and other Advocates (popularly known as Junior Advocates).

All Advocates of the Supreme Court are entitled to practise in High Courts. In Bombay and Calcutta an Advocate can appear on the original side only when instructed by an Attorney. An Advocate of a High Court is entitled to practise in the High Court concerned and in all the courts subordinate to it. An Attorney-at-Law if enrolled as an Advocate can also practise in the High Court, except on the original side. He, however, can plead in insolvency and chamber matters.

Pleaders are entitled to practise in the District for which they hold sanads.

In addition to these classes, there are Mukhtars in the States of Assam, Bihar, Orissa, Uttar Pradesh, West Bengal and Rajasthan. In Assam there is one more class of legal practitioners known as Revenue Agents.

The Government of India appointed a Committee called The All-India Bar Committee, under the chairmanship of Mr. S. R. Das, now Chief Justice of India. It recommended the unification of the Indian Bar. To achieve this it proposed that there should be no further recruitment of non-graduate pleaders or Mukhtars or Revenue Agents.

As regards the dual system in Bombay and Calcutta, the Committee favoured its retention. It however recommended the abolition of the dual system in the Supreme Court of India.

Accordingly the dual system was abolished in the Supreme Court on 26th Jan. 1955.

Formerly official Law Reports were published only in six series—Bombay, Allahabad, Calcutta, Madras and Nagpur. Three more series, Cuttack, Mysore and Rajasthan, have now been added.

These reports contain cases decided by the High Courts and the Supreme Court of India.

In addition to these series a "Supreme Court Reporter" is also published. It contains important decisions of the Supreme Court of India.

Besides these official reports there are a number of private agencies that also bring out reports of the decisions of the Supreme Court and the High Courts. Reports are also published of important cases determined by Labour Courts, Industrial Courts and Labour Appellate Tribunals.

## HINDU LAW REFORM

(Also see under 'Laws of 1955')

A short note on Hindu Law reform is in order as it concerns the welfare of the women of this country.

As a result of increasing consciousness on the part of Indian women of their social and political status, there has in recent years been a move to revise and codify the somewhat vague and contradictory law governing the Hindu home, especially as it affects marriage, divorce, succession to property, etc.

In 1937 the Indian Legislature enacted the Hindu Women's Rights to Property Act. This Act, for the first time, gave to Hindu widows a right to claim a share in the husband's property and demand partition.

Four years later the Government of India set up a Committee to overhaul and codify the Hindu Law. This Committee, which is known as the Rau Committee, drafted two bills dealing with Hindu intestate succession and Hindu marriage.

When the measures came up for consideration by the two Houses of the Central Legislature, a joint committee of the Houses recommended the revival of the Rau Committee with a view to the codification of the entire Hindu Law. Consequently the Rau Committee was revived early in 1944. During 1944-45, the Committee made a tour of the country and elicited public opinion on the proposals embodied in the two measures and on the codification of the Hindu Law as a

whole. They gathered evidence from leading lawyers and representative organisations of various shades of Hindu opinion on a draft Hindu Code prepared by them.

During the last five years, the Central and the Provincial Legislatures passed various Acts, which aimed at improving the condition of Hindu women.

The Hindu Marriage Disabilities Removal Act of 1946, legalises marriages between Hindus belonging to the same Gotra or Pravara.

The Hindu Married Women's Right to Separate Residence and Maintenance Act of 1946 enables a married Hindu woman to claim from her husband separate residence and maintenance on certain grounds.

The Hindu Marriage Validating Act, 1949 removes the caste-barriers from the sphere of marriages and validates even the Pratiloma marriages.

The Child Marriage Restraint (Amendment) Act of 1949 raises the marriage age of girls from 14 to 15 years.

In the state of Bombay, monogamy is made a rule by the Prevention of Hindu Bigamous Marriage Act of 1946, and dissolution of marriages by divorce is allowed under certain conditions by the Bombay Hindu Divorce Act of 1947.

In the state of Madras, there is an Act preventing bigamous marriages and providing for divorce. The Act is called the Madras Hindu (Bigamy Prevention and Divorce) Act.

The Madras Legislature passed the Madras Devadais (Prevention of Dedication) Act in 1947. This Act puts an end to the unhealthy practice of dedicating Hindu women as 'devadais' to Hindu deities.

Bombay Hindu Women's Right to Property Act (Extension to Agricultural Land) extends the application of the Hindu Women's Right to Property Act, 1933 to agricultural land also. A similar law has been passed in Madras.

Though the Hindu Code Bill has been dropped, the Government of India have passed several Acts as already mentioned affecting Hindu Law.

The Special Marriage Act of 1954 repeals the Special Marriage Act of 1872. Though the Act of 1954 is not a part of Hindu Code, it affects Hindus in so far as it provides for civil marriages both for Hindus and non-Hindus.

The Hindu Marriage Act of 1955 came into force on 18th May, 1955. The Act has repealed the following laws :-

1. The Hindu Marriage Disabilities Removal Act of 1946; 2. The Hindu Marriage Validity Act of 1949; 3. The Hindu Divorce Act of 1947 (Bombay Act); 4. The Prevention of Hindu Bigamous Marriage Act of 1946; 5. The Madras Hindu (Bigamy Prevention and Divorce) Act; 6. The Saurashtra Prevention of Hindu Bigamous Marriage Act; 7. The Saurashtra Hindu Divorce Act.

Under the Hindu Marriage Act monogamy has become a rule in Hindu Society. Divorce is allowed on certain grounds. Inter-caste marriages are valid.

The Hindu Minority and Guardianship Act seeks to regularise the law regarding guardianship.

The Hindu Succession Act aims at simplifying the Hindu Law of succession. It does away with the distinction between the Mitakshara and Dayabhaga law of succession. However, special provision is made for regulating succession to the property of intestates governed by Marumakkattayam, Aliyasantana or Nambudri laws of inheritance. The Act creates two classes of heirs, preferential heirs are included in Class I. The Act confers a right to a share on a daughter, a provision unknown to the previous Hindu Law.

The Hindu Succession Act has also made the following changes, which are revolutionary, in the old Hindu Law :

All property held by a Hindu woman is now her absolute property and there are no restrictions on her rights.

The heirs of a deceased Hindu are entitled to get a share even in the undivided interest in the coparcenary property. A Hindu can make a will even of his undivided interest in the coparcenary property.

The Hindu Adoption and Maintenance Act was passed in December 1956. Under the Act the adoption of a son or a daughter is permitted. The consent of the wife is necessary for adoption, which is now purely secular in character.

Besides these laws, Parliament has passed two important Acts relating to social reform. The Suppression of Immoral Traffic in Women and Girls' Act (No. 104 of 1956) was passed in December 1956. This Act provides in pursuance of the International Convention signed at New York on 9th May 1950 for the suppression of immoral traffic in women and girls. The Women's and Children's Institutions (Licensing) Act (No. 105 of 1956) was passed in December 1956. This Act provides for the licensing of such institutions and of matters relating to them.

The following Bills are before Parliament (April, 1957) :

1. A Bill to amend the Child Marriage Restraint Act. This Bill aims at making a marriage in contravention of the Act voidable at the option of the female.

2. A Bill to provide for the restraint on Sanyas diksha of a child.

3. A Bill to provide for the better control and supervision of orphanages and widows' homes in India.

4. A Bill for the licensing of sadhus and sanyasis in India.

5. A Bill to provide for the protection and maintenance of old and infirm persons.

A private member of Parliament has introduced in the House a bill aiming at the abolition of the dowry system.

The Bombay Legislature has passed an Act for the registration of marriages.

## DEFENCE SERVICES

*Chief of the Army Staff, General K. S. Thimayya.*

*Chief of the Naval Staff, Vice-Admiral S. H. Carlill.*

*Chief of the Air Staff, Air Marshal S. Mukerjee.*

THE supreme command of all the Armed Forces of the Indian Republic is vested in the President. Since the attainment of independence, the Ministry of Defence has become the central agency for formulating and obtaining policy decisions of the Government of India on defence matters and for transmitting them to, and seeing to their implementation by the three Defence Services Headquarters. The Army, Naval and Air HQs. exercise day-to-day administrative control over the three Services respectively under the overall supervision of the Defence Ministry.

The present-day Army of India traces its origin to the guards enrolled for the protection of the East India Company in the latter half of the 18th Century.

The partition of India in 1947 was an important landmark in the history of the Armed Forces of India. They were divided between the two countries on a communal-cum-optional basis, which worked out to an approximate proportion of one-third to Pakistan and two-thirds to the Union of India. British troops, including the Royal Air Force, were completely withdrawn from India on February 28, 1948.

The nationalisation of the Armed Forces started soon after the partition. In the three Defence Services today only a handful of British technicians are employed on a contract basis.

The order of precedence of the Defence Services has been re-arranged as Army, Navy and Air Force. With the inauguration of the

new Constitution on January 26, 1950, the use of the prefix 'Royal', wherever it occurred, in the designation of Service, regiment, corps or unit of the Armed Forces was discontinued. Similarly, the expression 'His Majesty's Indian Ship' (H.M.I.S.) before the names of ships was dropped.

### DEFENCE ORGANISATION

During the British regime, the Commander-in-Chief was not only the Supreme Commander, i.e. head of the three Services, but also the Defence or War Member of the Executive Council, and, as such, occupied a specially privileged position—second only to that of the Viceroy and Governor-General. Since August 15, 1947, each Service has been placed under a separate and independent head, their present designations being Chief of the Army Staff, Chief of the Naval Staff and Chief of the Air Staff.

At the top is the Defence Committee of the Cabinet, which is for all practical purposes the Government so far as the Defence Services are concerned. The Prime Minister is the Chairman of this Committee which decides matters of policy.

Then there is the Defence Minister's Committee, consisting among others, of the Defence Minister, the Defence Secretary, the three Chiefs of Staff, and the Financial Adviser. It deals with the more important inter-Services problems. The decisions of this Committee are final and binding on all.

The Defence Minister is responsible to Parliament for all matters relating to the Defence Services including appropriation and allotment of funds, correlation of all civil and ministerial activities for purposes of defence and control and direction of research policy.

### DEFENCE SCIENCE

A Defence Science Organisation was set up in August 1948 under Dr. D. S. Kothari, Scientific Adviser to the Ministry of Defence. At the same time, the Government constituted a Policy Board and an Advisory Committee to deal with matters of scientific policy and organisation of research in relation to defence requirements. The Advisory Committee has also set up a Personnel Research Panel and an Advisory Panel for Ballistics.

A Defence Science Service has been instituted which includes all civilian scientists engaged in research, development, inspection or teaching in any of the three Services or in the Ministry of Defence. There is an Institute of Armament Studies at Kirkee to train technical staff officers and to undertake a comprehensive scientific study of the principles of armament and performance of weapons and equipment.

The Defence Science Organisation has a laboratory situated in the National Physical Laboratory (Delhi), where research in defence science is carried on. A well-equipped technical library is attached to it. For conducting

research in problems connected with the Navy, suitable laboratories have been opened in Bombay and Cochin.

A Psychological Research Organisation was formed in July 1949 under Dr. Sohan Lal, Chief Psychologist, the main function of which is to conduct research in the assessment of human personality so that the right type of officers may be selected for the Armed Forces.

In order to evolve a co-ordinated policy in regard to the demand for stores and equipment for the Army, Navy and Air Force, a Defence Production Board has been constituted under the Ministry. Apart from being responsible for the efficient running of ordnance factories, the Board pays special attention to maximum utilisation of the existing capacity for defence production. Besides a number of ordnance factories meeting the country's defence requirements, the other important defence industries are the Hindustan Aircraft, Ltd., the Bharat Electronics, Ltd., and the Machine Tool Prototype Factory.

### NATIONAL CADET CORPS

The National Cadet Corps came into being in 1949. The aim of the Corps is (1) to develop character, comradeship, ideal of service and capacity for leadership in young men and women, (2) to stimulate interest in the defence of the country, and (3) to build up a reserve of potential officers to enable the Armed Forces to expand rapidly in a national emergency. The organisation is, thus, mainly of an educational and nation-building character. Officers and cadets have no liability whatsoever for active military service. In this way it is different from the Territorial Army, which is designed to serve as a second line of defence. However, a close link is maintained between the Territorial Army and the NCC, since the latter may be called upon to provide man-power for the former in an emergency.

The NCC consists of three divisions: (1) Junior, (2) Senior and (3) Girls'.

The strength of the Corps as on March 31, 1956 was as follows:—

	Officers	Cadets	Total
Junior Division ..	1,061	64,556	65,617
Senior Division ..	1,145	48,274	49,419
Girls' Division ..	270	8,100	8,370

Student cadets of all the three divisions are given 60 to 80 periods of training in Service subjects every year with 10 to 15 days in camps under the supervision of regular Service personnel. The training year corresponds to the academic year of Universities and schools.

To cope with the demand for military training for boys and girls in schools who cannot get admission into the N.C.C., the Auxiliary (Adet Corps) has been started. This corps has made rapid progress, and its present strength is estimated at 750,000.

The A.C.C. trains the youth of the country in team spirit, discipline and patriotism. It functions under the overall supervision of the Director, National Cadet Corps, Ministry of Defence. Instructors for this organisation are selected from schools and are trained by regular Army staff of the various NCC units.

Social service work forms an important part of the curriculum of all cadets. Each unit of a Senior Division of the NCC is affiliated to a regular Army, Navy and Air Force unit which provides the required personnel and helps to train NCC personnel by organising training cadres.

### TRAINING INSTITUTIONS

The important training institutions common to the three Services are given below:

**National Defence Academy:** The Joint Services Wing of the National Defence Academy was located in Clement Town, Dehra Dun, where it started functioning as an experimental measure on January 4, 1949. The present location of the Academy is at Khadakvasala

near Poona where it started functioning in January 1955. The Joint Services Wing, on its move to Khadakvasala, came to be known as the National Defence Academy. At this Academy, Army, Navy and Air Force cadets receive three years' combined basic training. This three years' course for cadets of all the three Services was introduced at Khadakvasala in July 1955. The first two years are devoted to common preliminary training and the third to specialized training in the three respective Services. Thereafter, Naval and Air Force cadets proceed to their respective Services Establishments for advanced training, while the Army cadets join the Military College, Dehra Dun for a further one-year course.

Commandant, Maj.-Gen. E. Habibullah.

**Defence Services Staff College:** This is located in Wellington in the Nilgiri Hills in south India. One hundred officers drawn from all the three Services, including six officers from the U.S.A. and Commonwealth countries are, trained every year. The aim of the course is to prepare officers to hold second-grade or equivalent staff appointments or higher staff or command appointments.

**School of Foreign Languages:** This is located in New Delhi and was started on February 1, 1949. The object is to impart instruction in certain foreign languages to officers of the Armed Forces. Other Ministries also take advantage of this School, and a large number of civilian officers and non-gazetted staff attend courses.

**College of Military Engineering:** This is located at Kirkee, near Poona. Here, officers of the Corps of Engineers, the Corps of Signals and the Corps of Electrical and Mechanical Engineers are trained to a degree standard in Civil, Telecommunication and Electrical and Mechanical Engineering respectively.

**Armed Forces Medical College:** It is an inter-services post-graduate institution designed to meet the requirements of the integrated medical services of the Army, Navy and Air Force, and is located in Poona. The College has departments of medicine, surgery, pathology, hygiene, radiology, blood transfusion and dentistry. It runs the following types of courses for medical officers of the Armed Forces:

- Junior officers' course for new entrants, to give them a full training in the special medical requirements of the Armed Forces.
- Senior officers' course for regular officers having 3/7 years of service to make them fit for senior appointments at a later date, and also to give them refresher training in all subjects with special emphasis on preventive and social medicine.
- Advanced courses in medicine, surgery, pathology, radiology, hygiene and psychology for preparing officers as specialists in the respective subjects. Clinical training is carried out at the Military Hospital, Poona.

In addition to its role as a post-graduate institution for medical officers of the Armed Forces, it gives training to other ranks, ratings and airmen in different technical trades, such as radiographers, laboratory assistants, dental technicians, X-ray assistants, laboratory assistants, blood transfusion assistants and dental hygienists.

This institution also supplies biological and chemical reagents and blood-transfusion material and equipment to all the Service hospitals and laboratories.

One of the most important functions of the College is to undertake fundamental and applied research for the solution of practical health problems of the Armed Forces.

### SOLDIERS', SAILORS' AND AIRMEN'S BOARD

The Indian Soldiers', Sailors' and Airmen's Board is probably the most important and valuable non-official institution connected with the Armed Forces. The nucleus of its funds

was the residue of the Imperial Indian War Relief Fund which was handed in at the end of 1922. The face value of the securities constituting the fund amount to about Rs. 13½ lakhs, bearing an annual interest of over Rs. 70,000.

The Board has its seat at New Delhi and co-ordinates the activities of State boards which exist in each State. Under the control of these State boards, there exists throughout the country a network of district boards, reinforced in some cases by taluk committees and other kindred bodies. These boards are established in all districts from which recruits have been obtained in sufficient numbers. The President of the District Board is the Collector or the Deputy Commissioner. Each Board has a paid Secretary, usually an ex-I.C.O. or ex-J.C.O. There are 189 District Boards.

The following are the objects and duties of the District Soldiers', Sailors' and Airmen's Boards:

- to endeavour to promote and maintain a feeling of good-will between the civilian and military classes,
- to give all possible assistance to the President of the Board in his capacity as head of the district in all administrative matters connected with the ex-Serviceman or his family,
- to demonstrate the benefit of and so promote the desire for mutual co-operation between ex-Servicemen and civilian officials,
- to represent and explain to the civil authorities all matters of particular moment to ex-Servicemen that require the attention of the local administration and
- to keep a watch over the welfare of ex-Servicemen and their families and the interests of serving personnel absent from home.

The Indian Soldiers', Sailors' and Airmen's Board Fund is now used primarily for payment of special pensions to blinded ex-Servicemen and to meet the expenditure on miscellaneous items, such as bank charges and audit fees in connection with the administration of the fund.

The other Central funds which are not under the control of the Indian Soldiers', Sailors' and Airmen's Board are:

Armed Forces Benevolent Fund, Flag Day Fund, Armed Forces Reconstruction Fund, Army Central Welfare Fund, Navy Benevolent Association Fund, Navy Amenities Fund, Air Force Benevolent Association Fund, Air Force Central Welfare Fund, Indian Gorkha ex-Servicemen's Welfare Fund and St. Dunstan's India Fund.

### GALLANTRY AWARDS

Three new gallantry awards were instituted by the President after independence for gallantry in combat with the enemy. They are designated the Param Vir Chakra, the Maha Vir Chakra and the Vir Chakra. They came into force with effect from August 15, 1947.

The Param Vir Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice, in the presence of the enemy, whether on land, at sea or in the air. It ranks first among all awards.

The Maha Vir Chakra is awarded for conspicuous acts of gallantry in the presence of the enemy whether on land, at sea or in the air.

The Vir Chakra is awarded for acts of gallantry in the presence of the enemy, whether on land, at sea or in the air.

All members of the Armed Forces, including members of the Nursing Services and civilians working with the Armed Forces, are eligible for the above three gallantry awards.

A fourth gallantry decoration, named the Ashoka Chakra, in three grades, viz. Class I, Class II and Class III, was instituted

for acts of gallantry other than in the face of the enemy. This also came into force with effect from August 15, 1947.

Class I of the Chakra is awarded for most conspicuous bravery, or some daring or pre-eminent act of valour or self-sacrifice. Class II of the Chakra is awarded for conspicuous gallantry and class III for gallantry.

Members of the Armed Forces and civilians alike are eligible for this award.

If a recipient of any of these Chakras again performs such an act of bravery as would have made him or her eligible to receive the same decoration, such further act of bravery is recognised by the award of a Bar attached to the ribbon by which the Chakra is suspended, and for every such additional act of bravery, an additional Bar is added, and any such Bar or Bars is/are also awarded posthumously. For every Bar awarded a replica in miniature of the Chakra concerned and in the case of the Param Vir Chakra of the "Jindra's Vajra" is added to the ribbon when worn alone.

Every recipient of any of these decorations who is junior in rank to a 2nd Lieutenant in the Army, a Sub-Lieutenant in the Navy, or a Pilot Officer in the Air Force, is entitled, from the date of the act by which the decoration has been gained, to a special pension, and each additional Bar conferred carries with it additional pension for life.

A system of Mention-in-Despatches was also instituted to recognise distinguished and meritorious service in operational areas and acts of gallantry which are not of a sufficiently high order to warrant the grant of gallantry awards. The terms of eligibility for Mention-in-Despatches are the same as for gallantry awards. Names may be included posthumously and there is no objection to a person's name being mentioned in more than one despatch. A 'lotus leaf' emblem is worn by the awardees on the ribbon of the campaign/war medal concerned.

The *inter-se* order of priority of the new gallantry decorations is Param Vir Chakra, Ashoka Chakra Class I, Maha Vir Chakra, Ashoka Chakra Class II, Vir Chakra, Ashoka Chakra Class III, followed by Campaign Medals, e.g. General Service Medal, 1947, and Commemorative Medals, e.g. Independence Medal. State Medals and Commonwealth awards come last. The latter include all the old British awards granted prior to August 1947.

The rates of monetary allowance admissible are as follows:—

- (a) (i) Param Vir Chakra.—Rs. 50 p.m. (Rs. 70 p.m. in the case of J.C.Os. who have previously been given an award of the second order of gallantry, such as the I.O.M.).
- (ii) Each Bar to PVC.—Rs. 20 p.m.
- (b) (i) Maha Vir Chakra.—Rs. 30 p.m. (Rs. 50 p.m. in the case of J.C.Os. who have been previously given a gallantry award of the third order, such as the M.C.).
- (ii) Each Bar to M.V.C.—Rs. 10 p.m.
- (c) (i) Vir Chakra.—Rs. 20 p.m.
- (ii) Each Bar to V.C.—Rs. 8 p.m.

On the death of such a recipient of the Chakra, the pension is continued to his widow until her death or remarriage. In addition to the above allowances admissible from the Central exchequer, all the States of the Union have framed their own schemes of rewarding the gallantry award winners by cash or land grants.

The following are the details of Republican India's awards won by members of the Armed Forces:—

#### INDIAN ARMY

Param Vir Chakra—5 (3 posthumous).  
Ashoka Chakra Class I—3 (1 posthumous).  
Maha Vir Chakra—52 (20 posthumous).  
Ashoka Chakra Class II—10 (1 posthumous).

Vir Chakra—290 (58 posthumous), the number including 4 bars.

Ashoka Chakra Class III—34.

Mention-in-Despatches—1,128 (35 posthumous).

#### INDIAN NAVY

Ashoka Chakra Class III—1.

#### INDIAN AIR FORCE

Ashoka Chakra Class I—1.

Maha Vir Chakra—4.

Ashoka Chakra Class II—5.

Vir Chakra—30 (2 posthumous).

### INDIAN ARMY

The Army HQ., which, like the other two Service HQs, is located in Delhi, functions directly under the Chief of the Army Staff. It is divided into the following main branches: (a) General Staff Branch, (b) Adjutant-General's Branch, (c) Quartermaster-General's Branch, (d) Master-General of Ordnance Branch, (e) Engineer-in-Chief's Branch and (f) Military Secretary's Branch. These branches are further sub-divided into directorates.

Under the Army HQ., the Indian Army is organised into Commands—Eastern, Western and Southern, each being under a General Officer Commanding-in-Chief of the rank of Lieutenant-General. The Commands are divided into Areas, each under the command of a G.O.C. of the rank of Major-General, and the Areas, in their turn, are sub-divided into Sub-Areas under the command of a Brigadier.

The Army consists of a number of arms and services. They are the Infantry, Armoured Corps, Regiment of Artillery, Corps of Engineers, Corps of Signals, Army Service Corps, Army Medical Corps, Army Dental Corps, Corps of Electrical and Mechanical Engineers, Army Education Corps, Remounts Veterinary and Farms Corps, Corps of Military Police, and the Ministry of Defence Security Corps.

### TERRITORIAL ARMY

The Territorial Army Act, 1948, was passed by Parliament in September 1948 and the Army was inaugurated in October 1949 when recruitment was thrown open.

The Territorial Army consists of various arms of service, i.e., the Corps of Artillery, including anti-aircraft and coastal defence units, the Corps of Engineers, including port and railway units, the Corps of Signals including P. and T. units, Infantry, the Service Corps, the Medical Corps and the Corps of Electrical and Mechanical Engineers. The units raised are of two types, i.e., provincial units recruited from rural areas who undergo annual training of two to three months' duration at a stretch, and urban units recruited from large towns where Territorial Army units have been raised. They undergo training on the weekly drill system, i.e. in the evenings, Sundays and holidays with a short-camp of not less than four consecutive days.

All able-bodied persons, from the unskilled labourer to highly qualified technicians, provided they are citizens of India, are eligible for recruitment. The age limits are 18 and 35 years relaxable in the case of ex-service (Army, Navy and Air Force) personnel and civilians possessing technical qualifications. Government servants and employees of private concerns are also eligible to join the Territorial Army.

The country has been divided into eight zones for purposes of recruitment which is done on a zonal basis, i.e. only residents of the zone are recruited in the units which are raised from that zone.

The role of the Territorial Army is to:—

- (i) relieve the Regular Army of static duties and support the civil power if required.
- (ii) provide coastal defence and anti-aircraft units.
- (iii) provide units for the Regular Army if and when required.

When embodied, called out or under training, Territorial Army personnel receive the same pay and allowances as are admissible to the corresponding ranks of the Regular Army. It is obligatory for every civilian employer to reinstate a member of the Territorial Army in his civilian post on termination of his military training.

In order to provide an incentive to Territorial Army personnel for hard and meritorious work, 2½ per cent of the actual vacancies available at the Military College are reserved for such personnel. On successful completion of the course at the College they will be granted regular commissions in the Army.

No officer or enrolled person is required to perform military service beyond the limits of India, save under a general or special order of the Central Government.

### LOK SAHAYAK SENA

The Lok Sahayak Sena, formerly known as Auxiliary Territorial Army and later called National Volunteer Force, was inaugurated on May 1, 1955, with a view to training five lakhs of men in a period of five years or less. All able-bodied male citizens between 18 and 40 years of age except, ex-servicemen and N.C.C. cadets, are eligible to join this force.

The object of this was not to raise a force for the defence of the country but to get people interested in national service and to inculcate in them a sense of discipline and self-reliance.

Training in this force is imparted at camps organised throughout the country. The duration of a training camp is 30 days at which a maximum of 500 trainees are recruited. Training in this force includes drill, rifle training, elementary field engineering, first aid, hygiene and education.

For the duration of the camp, trainees are allowed free rations, accommodation, medical facilities and uniform. At the conclusion of 30 days' training, each trainee is paid Rs. 15 as an out-of-pocket allowance.

### TRAINING SCHOOLS

Every year, a soldier has to pass certain compulsory qualification tests. The training varies from unit to unit but includes military instruction and knowledge of the arms he has to handle. Several Army schools exist for giving basic as well as advanced training in the different arms and trades and for training instructors sent by different units from all over the country. These not only train other ranks but also officers and JCOs.

The Armoured Corps Centre and School at Ahmednagar trains recruits as well as regimental instructors. The School of Artillery at Deolali provides training in the field, anti-tank, anti-aircraft and coastal artillery branches. The Army Ordnance School at Jabalpur imparts specialised training to all officers and OAs in the identification, handling and storage of various types of items, including ammunition and explosives.

The Madras, Bombay and Bengal Engineer Group Centres at Bangalore, Poona and Borkhee respectively provide basic technical and specialised Corps training to officers and OAs of the Corps of Engineers as also civilian officers of the Military Engineering Service. The Corps of Electrical and Mechanical Engineers has its training centre at Secunderabad, while the School of Signals, which gives technical training in tele-communication engineering to personnel of the Corps of Signals, is situated at Mhow. The Army Signals School, which trains officers and OAs of all arms as instructors in regimental signals, is located at Jabalpur.

The Infantry School at Mhow is the home of infantry doctrines and a centre for developing infantry weapons. The School also conducts courses for senior officers and junior commanders of all corps in the Army. The Army Service Corps has two schools, one at Meerut and the

other at Bangalore, giving training in organisation and administration, animal transport, mechanical transport and supplies. The Army Medical Corps has its training centres at Lucknow and Poona.

The other training institutions in the Army are the Remounts, Veterinary and Farms Centre and School at Meerut, the Education Corps School at Pachmarhi, and the Intelligence Corps School and the Physical Training School both at Poona.

The various commissioned ranks in the Army from the top downwards are: General, Lieutenant-General, Major-General, Brigadier, Colonel, Lieutenant Colonel, Major, Captain, Lieutenant and Second Lieutenant. The ranks of the Junior Commissioned Officers and other ranks respectively are Subedar-Major/Risaldar-Major, Subedar/Risaldar, Jemadar/Dafadar, Havildar, Naik, Lance-Naik and Sepoy/Sowar.

## INDIAN NAVY

The Naval HQ, under the Chief of the Naval Staff, exercises control over the Indian Navy through the following four operational and administrative commands:

1. Flag Officer (Flotilla), Indian Fleet.
2. Commodore-in-Charge, Bombay.
3. Commodore-in-Charge, Cochin.
4. Naval Officer-in-Charge, Vishakapatnam.

Today, the Indian Fleet consists of:

Cruiser (Flagship): DELHI.

11th Destroyer Squadron: RAJPUT, RANJIT and RANA.

22nd Destroyer Squadron: GODAVARI, GOMATI and GANGA.

12th Frigate Squadron: CAUVERY and KISTNA.

Junior Officers' Training Ship: TIR.

31st Minesweeping Squadron: BOMBAY, KONKAN, MADRAS, RAJPUTANA, BENGAL and KOHILKHAND.

Inshore Minesweepers: BASSEIN and BIMLIPATAM.

Survey ships: INVESTIGATOR and SUTLEJ.

There are also some seaward defence motor-launches and landing craft.

It is now proposed to acquire an aircraft-carrier, I.N.S. 'Mysore'. A Colony-class cruiser (formerly known as H.M.S. 'Nigeria') has recently been acquired and is expected to join the Fleet in 1957. When commissioned, it will be the Flagship of the Flag Officer (Flotilla).

The I.N.S. 'Brahmaputra', a new anti-aircraft frigate acquired by the Indian Navy early in 1956 was launched on 15th March, 1957. It is the first frigate of its kind acquired by the Navy. Though designed primarily for the protection of convoys against aircraft and submarines, it can serve as a smaller type of destroyer during operations. This is the second frigate launched for the Indian Navy in the U.K. The first was the I.N.S. 'Khukri'.

The ship is 340 ft. in extreme length and has a beam of 40 ft. It will be armed with four 4.5" guns and two other additional guns and one anti-submarine mortar.

India has also bought an aircraft carrier 'Hercules' of 15,700-ton displacement from the U.K. It is expected to join the Indian Navy in three or four years.

Among the important events in free India's naval history are:

The white ensign was replaced by the Indian Naval Ensign on January 26, 1950. The Indian Navy dropped its title "Royal" from its

name from January 26, 1950, when India became a Republic. Since that date establishments and ships are referred to as I.N.S. (Indian Naval Ship). The President's Colour was presented to the Navy by the President, Dr. Rajendra Prasad, in May 1951. The Navy's Air Station I.N.S. GARUDA was commissioned at Cochin, May 1953. The President of the Republic, as Supreme Commander, reviewed the Indian Fleet at Bombay in October 1953.

India's first Admiral Rear-Admiral R. D. Katari took over command of the Fleet in October 1956.

Since the Fleet was formed, IN ships have visited, among others, Burma, Malaya, Siam, Indonesia, the Philippines, Borneo, Australia, New Zealand, Iran, Iraq, Arabia, Egypt, Turkey, Greece, East Africa, Italy and France. I.N.S. DELHI, RANJIT and TIR participated in the Coronation Naval Review in June 1953. Routine combined training exercises have also been carried out by IN ships with those of the Commonwealth Navies from time to time.

For the production and printing of charts for marine survey, a Hydrographic Office has been established by Naval HQ at Dehra Dun (U.P.).

The Survey Unit of the Navy, which now comprises I.N.S. INVESTIGATOR, JUMNA and SUTLEJ, carries out the necessary survey of India's coast and approaches to harbours.

Extensive surveys of major ports, like Bombay and Madras, have already been completed. With the help of the data provided by such surveys, charts are being prepared by the Hydrographic Office.

The training of personnel in the Indian Navy is now carried on in the following shore establishments:

I.N.S. VENDURUTHY, Cochin; I.N.S. CIRCARS, Vishakapatnam; I.N.S. ANGRE, Bombay; I.N.S. SHIVAJI, Lonavla, Bombay State; I.N.S. VALSURA, Jamnagar; I.N.S. HANLA, Bombay.

Training of personnel of the Naval Aviation Wing is carried out by the Fleet Unit of I.N.S. GARUDA at Cochin. At present, this unit comprises a squadron of amphibious sealand aircraft and some Firefly target-towing planes.

In addition to carrying out exercises with ships of the Indian Fleet, they also participate in the combined training exercises carried out yearly by some of the Commonwealth navies.

Facilities for advanced naval aviation training are also being provided at the GARUDA.

I.N.S. ASVINI at Bombay is the first Naval Hospital to be set up.

The Naval Dockyard at Bombay is being expanded. Work on this began early in 1953.

For the production and printing of charts for Marine Survey, a Hydrographic Office has been established by Naval HQ at Dehra Dun (U.P.).

The various ranks in the Navy from the top downwards are: Admiral, Vice-Admiral, Rear-Admiral, Commodore, Captain, Commander, Lieutenant-Commander, Lieutenant, Sub-Lieutenant, Branch List Officer, Midshipman, Chief Petty Officer, Petty Officer, Leading Rate, Able Rate and Ordinary Rate.

## INDIAN AIR FORCE

The Indian Air Force is, in the main, divided into three major formations, namely Operational, Training and Maintenance Commands under the control of the Air HQ.

The Operational Command controls all flying units—fighter, bomber, reconnaissance and air-transport squadrons. The Training Command has under its control training schools and

colleges for both officers and airmen for technical and non-technical ground training and for aircrew flying training. The Maintenance Command controls all technical and equipment units in the I.A.F.

The three Commands exercise control through their Wings and Stations located in various parts of the country. Under each Wing and Station come various flying, training, technical or other static units.

The Air HQ is divided into three main branches—Air Branch, which deals with operations, training, policy and plans, signals and intelligence, Personnel and Organisation Branch and Technical and Equipment Services Branch. Each is under a Branch P.S.O. who, in turn, has several Directorates under him.

The different types of aircraft used by the IAF:

**Training:** Tiger-Moth, Percival Prentice, HT 2, Harvard, Spitfire and Vampire.

**Fighter:** Vampire and Toofani (Ouragan).

**Transport:** Dakota, Devon, C-119 (Boxcar), Viscount and Helicopter.

**Bomber:** Liberator.

**Reconnaissance:** Spitfire, Auster and Harvard.

The following are the major training institutions:—

No. 1 Air Force College, Begumpet (Hyderabad), trains pilots.

No. 2 Air Force College, Jodhpur, is the nursery of pilots, navigators and air-signallers of the IAF.

No. 3 Air Force College Coimbatore, trains officers of ground duty branches.

Technical Training College, Jalahalli (near Bangalore), imparts training to engineering officers of the Service.

No. 1 Ground Training School, Jalahalli, trains non-technical airmen.

No. 2 Ground Training School, Tambaram (Madras) trains technical tradesmen (airmen).

No. 3 Ground Training School, Jalahalli, is intended for airmen trainees of higher signals trades.

The newly introduced Ouragan-class jet-fighter is a single-seater monoplane capable of attaining a speed of 600 miles an hour at sea-level and reaching a height of 8,000 feet a minute. This Fighter aircraft has been described as a well-designed military aircraft for defence and air-strikes and for ground-attack-cum interception because of its innumerable operational characteristics.

Some of the features of the monoplane are: manoeuvrability, fast rate of ascent, fire-power endurance, operating ceiling and speed. Equipped with cannon and carrying rockets and bombs under its wings, the Ouragan has a pressurised cabin, permitting the pilot to operate at high altitudes. Its bullet-proof fixed screen and the armour fore-and-aft provide additional protection to the pilot when engaged in air battle. The aircraft has ejector seats and a sliding jettisonable canopy which form life-saving devices in an emergency.

Vampire jet fighters are being assembled at the Hindustan Aircraft Ltd., Bangalore. Folland Grut jet fighters are also to be constructed under licence by the HAL for the I.A.F. in the near future.

In pursuance of the Reserve and Auxiliary Air Forces Act of 1952, three Auxiliary Air Force Squadrons have so far been raised at Delhi, Bombay and Madras. Similar auxiliary squadrons will be formed at Calcutta and other principal cities of India.

## EDUCATION

**SINCE** August 15, 1947 Education at the Centre has been constituted into a separate Ministry of Education. The State Governments are fully autonomous in regard to educational matters except in respect of educational development programme for which they receive grants-in-aid from the Central Government. Such programme has to be approved by the Central Government who have to examine whether it is in accord with the All-India approved educational policy.

The Ministry has offices in London, Washington, Nairobi and Bonn.

It is responsible for the four Central Universities of Aligarh, Banaras, Delhi and Visva Bharati, and some institutions of higher learning. Other departments that come within the purview of the Ministry are : Anthropological Survey of India, Archaeological Survey of India, National Archives, National Library, Calcutta. The Ministry is also responsible for cultural relations with foreign countries and UNESCO.

The work of the Ministry is distributed among eight Divisions : Basic and Social Education, Secondary Education, Administration and University Education, Technical and Scientific Education, Hindi, Cultural Relations, Scholarships, and Information, UNESCO, Publications, Statistics.

In the States the Secretary, Department of Education, is the permanent head of the Department and the Director of Education acts as an expert Adviser to the Minister in charge of Education. The Director controls the inspecting staff and the teaching staff of the Government institutions. In some States the functions of Director are discharged by the Educational Officer, in others by the Education Secretary.

The authority of Government in controlling the system of public instruction is in part shared with and in part delegated to Universities, and Boards of Secondary and Intermediate Education as regards secondary education, and to local bodies as regards elementary education in some States.

Certain forms of Technical Education are under the technical departments concerned and come within the purview of the Minister in charge of those Departments.

Institutions under private management are controlled by Government and by local bodies by "recognition" and by the payment of grants-in-aid with the assistance of the inspecting staff employed by Government and by local bodies.

The following States have Boards of Intermediate Education and Secondary Education : Uttar Pradesh, Madhya Pradesh.

The following States have Boards of Secondary Education : Andhra, Bihar, Bombay, Madhya Pradesh, Madras, Uttar Pradesh, West Bengal, Delhi.

### UNIVERSITIES

The Central Universities are four : Aligarh, Banaras, Visva Bharati and Delhi.

There were in all 34 universities in India in April, 1957. The names of the universities with the names of the Vice-Chancellors are given below :—

1. *Agra University*.—Lt.-Col. K. P. Bhatnagar, M.A., LL.B.
2. *Aligarh University*.—Col. B. H. Zaidi, B.A. (Cantab.), Bar-at-Law.
3. *Allahabad University*.—R. N. Jha, B.Ed. (Edin.).
4. *Andhra University* (Waltair).—Dr. V. S. Krishna, B.A. (Oxon.), Ph.D. (Vienna).

5. *Annamalai University* (Annamalainagar).—T. M. Narayanaswamy Pillai, M.A., B.L.
6. *Banaras Hindu University*.—Dr. Voni Shanker Jha, Ph. D. (London).
7. *Baroda University*.—Mrs. Hansa Ben Mehta, B.A. (Hons.).
8. *Bihar University* (Patna).—vacant.
9. *Bombay University*.—T. M. Advani, M.A.
10. *Calcutta University*.—N. K. Sidhanta, M.A. (Cantab.).
11. *Delhi University*.—Dr. G. S. Mahajan, M.A., Ph.D.
12. *Gauhati University*.—K. K. Handiqui, M.A. (Calcutta & Oxon.).
13. *Gujarat University* (Ahmedabad).—H. V. Divatia, M.A., LL.B.
14. *Jammu & Kashmir University* (Srinagar).—Janki Nath Wazir, B.A., LL.B. (Lond.), Bar-at-Law.
15. *Karnatak University* (Dharwar).—D. C. Pavate, M.A. (Cantab.).
16. *Lucknow University*.—Dr. Radha Kamal Mukerjee, M.A., Ph.D., F.R.S.
17. *Madras University*.—Lt.-Col. Diwan Bahadur Sir A. Lakshmanaswami Mudaliar, B.A., M.D., LL.D., D.Sc., F.R.C.O.G., F.A.C.S.
18. *Mysore University*.—K. V. Puttappa, M.A., D.Litt.
19. *Nagpur University*.—Lt.-Col. Justice K. T. Mangalmurti, I.C.S.
20. *Osmania University* (Hyderabad).—S. Govindarajulu Naidu, M.A., LL.B. (Cantab.), B.L., Bar-at-Law.
21. *Patna University*.—Dr. Basudeva Narayana, M.Sc., M.B. (Cal.), Ph.D. (Edin.), F.R.S. (Edin.), F.N.I.
22. *Poona University*.—Dr. R. P. Paranjpye, M.A. (Cantab.), D.Litt. (Poona).
23. *Punjab University* (Solani).—Dewan Anand Kumar, M.Sc., M.A. (Cantab.), Bar-at-Law.
24. *Rajputana University* (Jaipur).—G. C. Chatterjee, M.A. (Punjab), B.A. (Cantab.).
25. *Roorkee University*.—A. N. Khosla, I.S.S. (Retd.).
26. *Sardar Vallabhbhai Vidyapeeth* (Vallabh Vidyanager, Anand Dist., Bombay).—B.D. Patel, L.C.E. (Banaras).
27. *Saugor University*.—Dr. Dwaraka Prasad Mishra.
28. *S. N. D. T. Indian Women's University* (Bombay).—K. M. Jhaveri, M.A., LL.B., J.P.
29. *Sri Venkateswara University* (Tirupati, Andhra).—D. S. Reddy, M.A. (Madras), M.A. (Hons.) (Oxon.).
30. *Travancore University* (Trivandrum).—Sir A. Rameswamy Mudaliar, B.A., B.L., D.C.L.
31. *Utkal University* (Cuttack).—Dr. P. K. Parila, M.A. (Cantab.), I.E.S. (Retd.).
32. *Jadavpur University* (Calcutta).—Dr. T. Sen, Eng. (Munich), (Rector).
33. *Vikram University* (Ujjain).—Dr. Mata Prasad, D.Sc., F.R.I.C., F.N.I.
34. *Visva Bharati University* (Santiniketan).—Prof. Satyendranath Bose.

### UNIVERSITY GRANTS COMMISSION (C.S.I.R. Building, New Delhi)

The members and staff of the Commission are given below.

*Members :* C. D. Deshmukh (Chairman), Pandit H. N. Kunzru, Dr. M. S. Thacker, G. C. Chatterji, Dr. A. Lakshmanaswami Mudaliar, Prof. N. K. Sidhanta, K. G. Salyidin, S. Ratnam.

*Secretary,* Samuel Mathai; *Asst. Secretary,* H. S. Verma.

The statement given below shows the grants paid to the universities during 1956-58 :

CENTRAL UNIVERSITIES.	Ra.		a.	p.
Aligarh Muslim University.	37,14,358	12	0	
Banaras Hindu University.	57,27,500	0	0	
Delhi University	35,21,726	11	0	
Visva Bharati University.	9,54,423	0	0	
Total .. ..	1,39,18,007	7	0	
Constituent Colleges of Delhi University ..

Total for Central Universities, Constituent Colleges of Delhi University and State Universities	1,06,53,646	6	0	
Grant paid to CARE as Import duty on Scientific equipment received under Wheat Loan Education Exchange Programme ..	40,000	0	0	
Grand Total :—	2,66,15,329	15	0	

### BASIC FACTS

General policy may be summarized as follows :

Provision of universal, compulsory education for all children aged 6-11 within a period of 10 years : the estimated expenditure during the first half of the period is Rs. 220 crores.

The system of primary education is what is called the Basic Education system, centred on the teaching of a craft.

About 40 per cent of the age group 6-11 and 20 per cent of the age group 12-14 is estimated to be at school.

As many primary schools as possible are to be converted into Basic schools as quickly as possible.

In the secondary schools the curriculum is being greatly improved by the introduction of such subjects as civics, music, crafts, agriculture, and types of educative and recreative activities like Junior Cadet Corps and Voluntary Social Service. New types of high schools devoted to agricultural, technical and vocational education are being established.

\* As we go to press it is reported that Mr. A. A. A. Fyze might be appointed to this post (April 1957).

Secondary education has to be self-sufficient. The two intermediate classes in the colleges will be abolished, the first year will be attached to the high school and the second to the college. The degree course will thus be of three years' duration.

The key reports and resolutions on which primary and secondary education systems are planned are:

Resolution of the Central Advisory Board of Education 1935 Dec.; Wood-Abbot Report; Zakir Hussain Committee Report (Wardha Scheme or Basic Education Scheme); Reports of the Central Advisory Board (14): (1) Kher Committee Reports on Basic Education; (2) Adult Education; (3) The Physical Welfare of School-children; (4) School Buildings; (5) Social Service; (6) The Recruitment, Training and Conditions of Service of Teachers in Primary, Middle and High Schools; (7) The Recruitment of Education Officers; (8) Technical (Including Commercial and Art) Education; (9) Text-books; (10) Examinations; (11) Educational Administration; (12) Agricultural Education; (13) Religious Education; (14) Selection of Pupils for Higher Education; (15) Report on Post-war Educational Development in India (Sargent Report); (16) Secondary Education Commission Report (Lakshmanaswami Mudaliar Commission); (17) Sakseena Report on Adult Education.

University education has had a report published on it (Radhakrishnan Commission).

There is now a University Grants Commission.

#### FIRST FIVE-YEAR PLAN

The total revised provision for States was Rs. 119.5 crores.

The total revised provision for the Centre was Rs. 41.51 crores.

Total expenditure upto March 1954 was Rs. 68.3 crores.

The pattern of expenditure at the Centre is given by the following table:

	Rs. Crores.	
	1951-54	1951-56.
Total.		
Pre-University Education	2.28	19.46
University Education ..	0.02	3.43
Technical and Vocational	0.44	16.94
Labour and Social Service by Students ..	—	1.00
Other schemes ..	—	0.68
Total ..	8.74	41.51

#### THE STATES

	Rs. Crores.	
	1951-54	1951-56.
Total.		
Administration ..	0.3	1.0
Primary Education ..	40.8	73.0
Basic Education ..	0.7	1.9
Secondary Education ..	3.2	8.7
University Education ..	5.6	10.6
Technical and Vocational	5.3	10.9
Social ..	1.8	6.4
Other schemes ..	2.2	7.0
Total ..	59.8	119.5

The progress of expenditure about technical education is given below:

	Rs. Crores.	
	1951-54	1951-56.
Total.		
Indian Institute of Technology, Kharagpur ..	2.60	4.78

	Rs. Crores.	
	1951-54	1951-56.
Total.		
Indian Institute of Science, Bangalore ..	0.68	0.89
Fourteen Engineering Institutions ..	1.54	1.55
Practical Training Stipend Schemes ..	0.14	0.37
Research Training Scholarship Schemes ..	0.14	0.37
Development of Scientific and Technical Education and Research ..	1.34	9.03
Total ..	6.44	16.94

The schemes envisaged in the Central Government programme were as follows:—

1. Complete units of Basic Education (pre-Basic to post-Graduate Basic Training College), at least one unit in each State.
2. Janata colleges for social education, at least one in each State.
3. At least one school-cum-community centre in each State.
4. At least one multi-lateral secondary school in each State.
5. Occupational schools for young people between the ages 14-18.
6. Research Bureau for study of problems of secondary education.
7. Merit scholarships to poor students for public schools.
8. Production of audio-visual aids to be encouraged by establishment of unit at Central Institute for Education, and by assistance to firms and publishers.
9. Production of model literature for children, Basic Education, Social Education.
10. Development of Indian and Federal languages. Production of original work and translation. Production of reference books, dictionaries, and encyclopaedias.
11. Pilot centres for juvenile delinquents and defectives.
12. Provision of vocational guidance and organising selective tests.
13. Development of the Indian Institute of Science, Bangalore and of 14 engineering institutions; facilities for study of special subjects (printing technology, silk technology, wool technology, architecture, town planning).
14. Help for libraries in universities (Rs. 20 lakhs), and research training scholarship scheme (Rs. 45 lakhs).

Schemes envisaged in the States programmes were as follows:—

1. Primary Education: opening of new primary schools; improvement of existing ones; conversion of primary into basic schools; opening of new basic schools.
2. Secondary Education: opening new secondary schools; improving existing ones; new subjects in the curriculum (physical education, military training, gardening and agriculture, music, crafts); maintenance of model schools.
3. University Education: new universities and colleges; improvement of present ones.
4. Social Education: libraries; physical education; youth activities; audio-visual education; literacy and adult education centres.
5. Technical and Vocational Education: new craft schools; converting craft schools into junior Technical High Schools; Junior Polytechnics; conversion of secondary schools into Technical High Schools; diploma courses; industrial schools; agricultural bias schools; upgrading of commercial and technical schools into colleges; stipends for studies abroad.
6. Further education of ex-service personnel; development of regional languages and literature; education of handicapped; National Cadet Corps in colleges; improvement of special fields, such as oriental education, statistics.

As against the targets 16,276 new primary schools attended by 9 lakh pupils had been opened by the end of 1953. As regards Basic schools, the achievement by the end of 1953 was 2,179. No reliable figures about pupils was available. (See tables at end of article.)

The Central Government gives assistance to the States in the field of Basic under the following heads: conversion of existing primary schools into Basic schools; establishment of new schools; training of craft teachers and introduction of crafts in schools; preparation of teaching material for Basic schools.

About secondary education, by the end of 1953, 967 new secondary schools of one type or another had been opened. Central help is given for diversification of courses, for more effective teaching of general science, social studies, crafts.

500 high schools are to be converted into multi-purpose schools—one for each district. About 1,000 to 1,500 schools are to be upgraded.

#### SECOND FIVE-YEAR PLAN

The total provision for education is Rs. 307 crores—for elementary education Rs. 89 crores, secondary education Rs. 51 crores, university education Rs. 57 crores, technical and vocational education Rs. 48 crores, social education Rs. 5 crores, administration and miscellaneous Rs. 57 crores.

(For details see under 'Second Five-Year Plan').

#### ASSOCIATED BODIES AND INSTITUTIONS

A number of non-official bodies working under the auspices of the Ministry of Education may be given:

Central Social Welfare Board; Sangeet Natak Akadami; Sahitya Akadami; Lalit Kala Akadami; Bharat Kala Samiti; Indian National Commission for Co-operation with UNESCO; Indian Council of Cultural Relations; All India Council of Technical Education; All India Council for Secondary Education; National Board for Audio-Visual Education; National Commission on Early Childhood Education; Standing Committee of the Central Advisory Board of Education on Basic Education; Assessment Committee on Basic Education; Indian Historical Records Commission; Central Advisory Board of Archaeology; School of Town and Country Planning; Board of Scientific Terminology; Hindi Shiksha Samiti; Folk Literature Committee; Public Services (Qualifications for Recruitment) Committee; Indology Committee; Scheduled Castes, Scheduled Tribes and other Backward Classes Scholarships Board; National Fundamental Education Centre; National Centre for Research in Basic Education; Central Advisory Board for Physical Education and Recreation; National Advisory Council for the education of the Handicapped; All India Sport Council; National Council for Rural Higher Education.

There is a Central Advisory Board with the Minister for Education as Chairman and also a Panel on education.

The following institutions are conducted under the direct auspices of the Ministry of Education:

Central Secretariat Library, Central Educational Library, Indian Museum (Calcutta), National Museum (New Delhi), Film Library, Central Institute of Education, Delhi Polytechnic, Indian Institute of Technology (Kharagpur), National Library (Calcutta), Training Centre for the Adult Blind (Dehra Dun), Central Braille Printing Press (Dehra Dun), Central Bureau of Text-Book Research, Central Bureau of Educational and Vocational Guidance, Indian Institute of Science, Bangalore, National Gallery of Modern Art, Nilokheri Polytechnic, Victoria Memorial Hall, Calcutta.

Some publications of the Ministry: *The Educational Quarterly* (periodical), quinquennial reviews, annual reports.

The Inter-University Board provides a forum for the discussion of University affairs, and acts as an advisory body on higher education.

## TECHNICAL EDUCATION

**THE** All-India Council for Technical Education was set up by the Government of India in November 1945 to advise them on all matters relating to the co-ordination and development of technical education in the country after the high school stage. Its personnel has been drawn from Government of India Departments, State Governments, Parliament, Industry and commerce, professional and educational bodies.

The Council during its existence of over 10 years has made valuable contribution towards the development and expansion of facilities for technical education. It functions through certain technical and *ad hoc* committees appointed from time to time. The Council does not however, have any executive, administrative or controlling powers.

The work of the Council falls broadly into three categories:—Framing of courses of technical studies and laying down of standards; Improvement and strengthening of the existing institutions; Establishment of new institutions, and the development of facilities in new fields of technical education.

For laying down standards in technical education, the Council has appointed seven Boards of Studies, viz., Engineering and Metallurgy, Chemical Engineering/Technology, Textile Technology, Architecture and Regional Planning, Applied Art, Commerce and Management.

In addition to the seven Boards, the Council has appointed four Regional Committees—one each for the eastern, western, southern and northern regions of the country to survey the facilities of their region, determine regional needs, foster liaison between industry and technical institutions, assist and advise on co-ordinated development.

Day to day work is, however, carried on by a small committee known as the Co-ordinating Committee of the Council which has on it representatives of all the interests that constitute the Council. The Council meets once a year; the Board once or twice a year; the Co-ordinating Committee and Regional Committees more often.

The All-India Council for Technical Education recommended to the Government of India that financial assistance should be given for the development of the following schemes:—Post-graduate courses, advanced work and research; Under-graduate courses, degree and diploma, full-time; Engineering and Technological subjects; Special subjects, e.g., Printing Technology and Textile Technology, etc.; Part-time courses; Loans for the construction of hostels.

A provision of Rs. 639.32 lakhs for carrying out all round development of Technical Education and Research in the country was made for the aforesaid schemes.

Between 1951 and 1956 grants and loans amounting to Rs. 213.03 lakhs and Rs. 122.71 lakhs respectively were sanctioned. Consequently the intake into the engineering and technical institutions was increased by about 45 per cent.

The total budget provision for the development of higher scientific and technical education in non-university institutions for 1956-57 was Rs. 258.55 lakhs for grants, Rs. 71.00 lakhs for loans for construction of students hostels and Rs. 25.63 lakhs for loans for construction of staff quarters.

In pursuance of the Sarkar Committee's recommendations the first institution, viz. the Indian Institute of Technology, Kharagpur was started in 1951. The Western Institute of Technology, Bombay, will start functioning in 1958. The remaining two institutions will be set up before the Second Five-Year Plan period ends.

For the development of facilities for post-graduate education and research in engineering and technology, grants amounting to Rs. 13.94 lakhs were paid upto the end of Sept. 1956.

For the development of facilities at the under-graduate level, grants amounting to Rs. 193.41 lakhs were given to non-university institutions from April 1951 upto the end of Sept. 1956 for improving instruction facilities in engineering and technology at the first degree and diploma level.

For the development of facilities for specialized courses, grants amounting to Rs. 11.75 lakhs were paid from April 1951 to the end of Sept. 1956.

The Practical Training Stipend Scheme was formulated to give post-institutional practical training in industrial establishments to selected students qualifying from engineering and technological institutions. There are two categories of stipends, namely senior stipends of the value of Rs. 150 per month and junior stipends of the value of Rs. 100 per month which are awarded to graduates and diploma-holders in engineering and technology respectively. The stipends are instituted in selected Government establishments and industrial concerns who offer training under proper supervision and assume responsibility for it.

Courses in Management Studies have been started at the Indian Institute of Technology, Kharagpur; the Delhi School of Economics, Delhi; the Department of Economics, Madras University, Madras; the School of Economics and Sociology, Bombay University, Bombay; the Indian Institute of Science, Bangalore; and the Institute of Social Welfare and Business Management, Calcutta. The Victoria Jubilee Technical Institute, Bombay was expected to start this course with effect from the academic session 1957-58.

On the recommendation of the All India Council for Technical Education, it has been decided to establish an Administrative Staff College in India on the lines of the Administrative Staff College, Henley-on-Thames, England. The College will be established as a joint enterprise of the Central Government, private industry and commerce. It will be an autonomous organisation, and will function as a registered Society under the Societies Registration Act. A Planning Committee under the Chairmanship of Mr. T. T. Krishnamachari, Minister for Finance, has prepared a detailed plan for the establishment of the College. The administration and management of the affairs of the College will be entrusted to a Court of Governors.

The object of the College is to promote and provide for the study of principles and techniques of organisation and administration in the various spheres of national life and of cognate subjects. The scheme is estimated to cost about Rs. 9 lakhs. Hyderabad has been selected for the location of the College, which was expected to start functioning during 1957.

It has been proposed to create a Department of Mining Engineering for the First Degree Course in the following technical institutions:

1. The Indian Institute of Technology, Kharagpur.
2. Bengal Engineering College, Shibpur.
3. Engineering College, Jabalpur, or alternatively in the new Engineering College to be established in the Bhilai Steel Project area.
4. College of Engineering, Guindy, Madras.
5. Engineering College, Osmania University, Hyderabad.
6. M. B. M. Engineering College, Jodhpur.
7. Western Higher Technological Institute, Bombay.

The annual admissions to the course in each Department would be 25 students.

The existing facilities at the Indian School of Mines and Applied Geology, Dhanbad, and the College of Mining and Metallurgy, are proposed to be expanded so as to provide for

an annual admission of 80 and 40 students respectively to the First Degree Course in Mining Engineering.

It has also been decided to organize National Certificate Courses in Mining Engineering in various Metalliferous and coal mining areas.

The Printing Schools at Madras, Bombay and Calcutta have already started functioning, and the school at Allahabad was expected to start at the academic year 1957-58.

A School of Town and Country Planning has been set up by the Central Government as a joint enterprise with the Institute of Town Planners (India) to provide facilities for training in Town and Country Planning. The first course in Town and Country Planning commenced with effect on 16th August, 1956. Thirteen students have been admitted to this course, out of which three will take the intensive course. Ten students have been sponsored from the States. It is the intention that for the first few years preference should be given to State Sponsored Scholars.

The School is temporarily housed in the Library Building of the Delhi Polytechnic, Delhi, but a two acre plot of land in the Indraprastha Estate in the capital has been acquired, and the construction of the school building is expected to be taken in hand during 1957-58. The School has been registered as a Society under the Societies Registration Act of 1860.

The quinquennial review of the working and progress of the Indian Institute of Science, Bangalore, has been completed by a Committee under the Chairmanship of Dr. J. C. Ghosh appointed by the Visitor of the Institute. The report is under consideration.

On the recommendations of AICTE schemes costing about Rs. 18 lakhs (non-recurring) and Rs. 2.5 lakhs (recurring) have been approved for the Institute.

During the Second Five-Year Plan it is proposed to spend Rs. 115 lakhs approximately for the development of the Delhi Polytechnic, Delhi, in addition to the normal recurring expenditure.

The Second Five-Year Plan of Technical Education as prepared by the All India Council for Technical Education includes proposals for projects which are estimated to cost Rs. 80 crores. The Plan envisages development of technical education at all levels in addition to the improvement and development of the existing institutions. The Plan provides for the establishment of three Higher Technological Institutions in the western (Bombay), northern and southern regions. The Plan also provides for the establishment of 40 new polytechnics, 6 engineering colleges and about 200 junior technical schools. Further, there is a provision for starting refresher and summer courses for teachers, schemes for training of technical personnel.

At its 10th annual meeting the All-India Council for Technical Education approved proposals for the opening of 88 new technical institutions and the expansion of 65 existing ones to meet the increasing demand for technical personnel under the Second Plan.

The new institutions will comprise five engineering colleges, 22 polytechnics and 61 junior technical schools. Nineteen existing engineering colleges and 49 polytechnics in different parts of the country will be expanded.

The measures are expected to yield 7,500 engineering graduates and 15,000 diploma-holders annually by 1960-61.

A sum of about Rs. 50 crores has been provided in the Second Plan for the development and expansion of technical education.

Of the five new engineering colleges, one each will be established in Andhra, Assam, Madhya Pradesh, Orissa and the Punjab.

Of the 22 polytechnics, five will be established in Bombay, two each in Andhra, Madhya Pradesh, Mysore, the Punjab, Rajasthan, U.P. and West Bengal and one each in Assam, Kerala and Jammu and Kashmir.

The junior technical schools will be established as follows: 18 in Kerala, 10 in Bihar, seven in West Bengal, six in the Punjab, five in Madhya Pradesh, four each in Rajasthan and Jammu and Kashmir, two each in Bombay and Orissa and

one each in Assam, Himachal Pradesh and Tripura.

The Council meeting at the same time recommended the creation of a pool of trained teachers for the various technical institutions.

This proposal envisages the creation of a large number of teaching fellowships in selected institutions. These fellowships will be awarded to promising young men, who will be apprenticed through professors and other senior teachers for

specified periods to give them teaching experience. Those selected will also be required to spend at least six months in an industrial undertaking to get practical experience.

On completion of the apprenticeship, fellowship holders will form a pool from which technical institutions will be invited to recruit teachers both for their normal and developmental requirements.

The senior fellowship will be of Rs. 350-25-400 and the junior fellowship of Rs. 250-25-300.

## NON-AFFILIATED INSTITUTIONS FOR DEGREE OR DIPLOMA ENGINEERING AND TECHNOLOGY

[Note: For others see under Universities in each State.]

### ANDHRA

Andhra Polytechnic, Kakinada.  
Government Ceramic Institute, Gudur.  
Vuyyur Polytechnic, Vuyyur.  
Central Crafts Institute, Mallepally, Hyderabad.  
Government Technical College, Hyderabad.  
Government Technical Training Centre, Nizamabad.  
Government College of Fine Art, Hyderabad.  
Warangal Polytechnic, Warangal.

### ASSAM

Assam Civil Engineering Institute, Gauhati.  
E.R.H. Prince of Wales Technical Institute of Engineering and Technology, Jorhat.

### BIHAR

Indian School of Mines and Applied Geology, Dhanbad.  
Jamshedpur Technical Institute, Jamshedpur.  
Ranchi School of Engineering, Sindri.  
Tirhut School of Engineering, Muzaffarpur.  
Chaibasa Technical School, Chaibasa.  
Dehri Technical School, Dehri.  
Ranchi Technical School, Ranchi.  
Sindri School of Engineering, Sindri.

### BOMBAY

Birla Vishwakarma Mahavidyalaya, Anand.  
College of Engineering, Poona.  
Government Leather Working School, Bandra (Greater Bombay).  
Government Tanning Institute, Bandra (Greater Bombay).  
L. D. College of Engineering, Ahmedabad.  
Nautical and Engineering College, Bombay.  
Radio Electric Institute, Bombay.  
R. C. Technical Institute, Ahmedabad.  
St. Xavier's Technical Institute, Bombay.  
Sir Cusrow Wadia Institute of Electrical Technology, Poona.  
S. N. Farukh Parsi Polytechnic, Surat.  
Victoria Jubilee Technical Institute, Bombay.  
Deccan Education Society's Technological Institute, Poona.  
Aurangabad Polytechnic, Aurangabad.  
Lukhdhri Engineering College, Morvi.  
Shri A. V. Parikh Technical Institute, Rajkot.  
Sir Bhavsinhji Polytechnic, Bhavnagar.

### DELHI

Delhi Polytechnic, Delhi.

### KERALA

Kerala Polytechnic, Kozhikode.

### MADHYA PRADESH

Central Technical Institute, Gwalior.  
Govindram Sakasaria Kala Bhawan, Indore.  
Polytechnic Institute, Bhopal.  
Government Polytechnic, Ujjain.  
Polytechnic Institute, Nowgong.

### MADRAS

Arthur Hope Polytechnic, Coimbatore.  
Central Polytechnic, Madras.  
O. N. Technical & Industrial Institute, Vepery, Madras.

Institute of Leather Technology, Madras.  
Madras Institute of Technology, Madras.  
P.S.G. and Son's Charity Industrial Institute, Coimbatore.  
Ramakrishna Mission Technical Institute, Madras.  
Seshasayee Institute of Technology, Tennur, Tiruchirappalli.  
Tamilnad Polytechnic, Madurai.

### MYSORE

D. R. R. Occupational Institute, Davangere.  
Indian Institute of Science, Bangalore.  
National Institute of Engineering, Mysore.  
Occupational Institute, Chintamani.  
Silver Jubilee Technical Institute, Bhadravati.  
School of Engineering, Bangalore.  
S.L.V. Occupational Institute, Hassan.  
Sri J. Occupational Institute, Bangalore.  
Sri K. Silver Jubilee Technological Institute, Bangalore.  
Rayalaseema Polytechnic, Bellary.  
Dharmaprakasam C.P.C. Occupational Institute, Mysore.  
National Institute of Engineering, Mysore.  
B.V. Bhoomrati College of Engineering and Technology, Hubli.  
Gulbarga Polytechnic, Gulbarga.  
Karnatak Polytechnic, Mangalore.

### ORISSA

Orissa School of Engineering, Cuttack.

### PUNJAB

Engineering College, Ludhiana.  
Government Hosiery Institute, Ludhiana.  
Government Institute of Dyeing & Calico Printing, Ludhiana.  
Government School of Engineering, Nilokheri.  
Government Tanning Institute, Jullundur.  
Government Technical Institute, Ambala.  
Guru Nanak Engineering College, Ludhiana.  
Mehar Chand Technical Institute, Jullundur.  
National Institute of Engineering, Hoshiarpur.  
Polytechnic, Nilokheri.  
Punjab Institute of Textile Technology, Amritsar.  
Surgical Instruments Centre and Developments Laboratory, Sonapat.  
Tara Karam S.D. Technical Institute, Baij Nath (Kangra).  
Technological Institute of Textiles, Bhiwani.  
Shri Vishwakarma Polytechnic, Phagwara.  
Polytechnic, Nilokheri.

### RAJASTHAN

M. B. M. Engineering College, Jodhpur.

### UTTAR PRADESH

Chaudhry Mukhtar Singh Government Polytechnic, Meerut.  
Civil Engineering School, Lucknow.  
Government Wood Working Institute, Allahabad.  
Government Central Textile Institute, Kanpur.  
Government Central Weaving Institute, Banaras.  
Government Central Woodworking Occupational Institute, Bareilly.

Government Polytechnic, Allahabad.  
Government Polytechnic, Dehra Dun.  
Government Polytechnic, Jaunpur.  
Government Polytechnic, Ghazipur, Lucknow.  
Government Technical Institute, Gorakhpur.  
Government Technical Institute, Jhansi.  
Government Technical Institute, Lucknow.  
Harcourt Butler Technological Institute, Kanpur.  
Hewett Engineering School, Lucknow.  
I. D. Technical Institute, Bahjoi.  
Indian Institute of Sugar Technology, Kanpur.  
Prem Mahavidyalaya Engineering College, Mathura.  
Technical College, Dayalbagh, Agra.  
Government Leather Working School, Kanpur.  
Government Technical Institute, Ghazipur.

### WEST BENGAL

Air Technical Training Institute, Dum Dum.  
Bengal Ceramic Institute, Calcutta.  
Bengal Tanning Institute, Calcutta.  
Bengal Textile Institute, Serampore.  
Berhampore Textile Institute, Berhampore.  
Calcutta Technical School, Calcutta.  
College of Aeronautical Services, Dum Dum.  
Hooghly Institute of Technology, Hooghly.  
Indian Institute of Technology, Kharagpur.  
Institute of Jute Technology, Calcutta.  
Jalpaiguri Polytechnic, Jalpaiguri.  
Kanchrapara Technical School, Kanchrapara.  
K. G. Engineering Institute, Vishnupur, Bankura.  
Directorate of Marine Engineering Training, New Taratala Road, Calcutta.  
M. B. C. Institute of Engineering & Technology, Burdwan.  
R. K. Mission Silpa Mandir, Belur, Howrah.

### AGRICULTURE

Indian Agricultural Research Institute, New Delhi; Indian Dairy Research Institute, Bangalore; Government Agricultural Institute, Bulandshahr (U.P.); Government Agricultural Institute, Chirgaon (U.P.); Government Agricultural Institute, Gorakhpur; Agriculture Institute, Laxmipur, Panna, Madhya Pradesh.

### BANKING, COMMERCE AND CO-OPERATION

Co-operative Training College, Poona; Delhi Polytechnic, Delhi; Government College of Commerce, Hyderabad; Co-operative College, Trivandrum; Sanatan Dharam College, Alleppey.

### DOMESTIC SCIENCE

Lady Irwin College, New Delhi; Domestic Science Training College, Hyderabad; Girls' Vocational Institute, Aurangabad; Girls' Vocational Institute, Gulbarga; Girls' Vocational Institute, Warangal; Girls' Vocational Institute, Hyderabad; Girls' Vocational Institute, Secunderabad.

### FORESTRY

Southern Forest Rangers College, Coimbatore; Indian Forest College, Dehra Dun; Northern Forest Ranger College, Dehra Dun.

**MARINE TRAINING**

Training Ship "Dufferin", Bombay.

**MUSIC AND FINE ARTS**

Gandharva Mahavidyalaya Mandal, Poona; Madhava Music College, Gwalior; Central College of Karnataka Music, Madras; Government School of Arts, Simla; S.S.T. Academy of Music, Trivandrum; Bhatkhande (Marris) College of Hindustani Music, Lucknow; Kamboj Sapt-kala Niketan, Meerut; Prayag Sangit Samiti, Allahabad; Sangot Vidyalaya, Almora; All India College of Music, Arts and Crafts, Dhakuria (24, Parganas); Aryya Sangeet Vidyapeeth, 199, Landedowne Road, Calcutta; Bengal Music College, 4, Hindusthan Road, Calcutta; Government College of Art and Craft, 28, Chowringhee Road, Calcutta; Rain Saran College of Music, Vishnupur, Bankura; Art College, Gwalior; Art College, Indore; Laxmi Kala Bhawan, Dhar; M. S. Bhand's School of Arts, Gwalior; Music College, Indore; Gita Bitan Sikshayatan, 155, Russa Road, Calcutta; Harishikesh Sangeet Vidyalaya, Nabadwip, Nadia; Ajmer Music College, Ajmer.

**ORIENTAL LEARNING AND THEOLOGY**

Swadhyaya Mandal, Killia-Pardi (Dist. Surat); Government Sanskrit College, Gwalior; Sanskrit Mahavidyalaya, Indore; Maharaja's Sanskrit College, Mysore; Sanskrit College, Melkote (Mysore); Sanskrit College, Siddaganga (Mysore); Sri Chamarajendra Sanskrit College, Bangalore; Bidyabhushan Sanskrit College, Bolangir (Orissa); Maharaja's Sanskrit College, Parlakimedi (Orissa); Sadasiva Sanskrit College, Puri; Birla Sanskrit College, Pilani; Government Sanskrit College, Alwar; Government Sanskrit College, Jodhpur; Government Sanskrit College, Sikar (Rajasthan); Government Sanskrit College, Udaipur; Maharaja's Sanskrit College, Jaipur; Rishikul Brahmarshya Ashram Sanskrit College, Lakhim Garh (Rajasthan); Sanskrit College, Nathdwara (Rajasthan); Shri Dadu Mahavidyalaya, Jaipur; Shri Digamber Jain Sanskrit College, Jaipur; Shri Ramanuj College, Dildwana (Rajasthan); Shri Sardul Brahmarshya Ashram Sanskrit College, Bikaner; Shri Vithal Nath Sanskrit Mahavidyalaya, Kotah; Alla Oriental College, Rampur; Darul-Uloom, Deoband (U.P.); Darul-Uloom Nadvatul Uloom, Lucknow; Government Sanskrit College, Banaras; Gurukul University, Kangri (Dist. Saharanpur, U.P.); Gurukul Vrindaban, Mathura; Kashi Vidyapith, Banaras; Mazhar-Uloom, Saharanpur; Calcutta Madrasah,

21, Wellesley Square, Calcutta; Prachyavani (Institute of Oriental Learning), 3, Federation Street, Calcutta; Serampore College, Serampore, Hooghly; Bhajan Das Sanskrit Pathshala, Nayan (Rajasthan); Chamariya Sanskrit Mahavidyalaya, Fatehpur (Rajasthan); Choukhani Sanskrit Pathshala, Reengus (Rajasthan); Dhuleshwar Sanskrit Pathshala, Manoharpur (Rajasthan); Ganga Sanskrit Pathshala, Bikaner; Goenka Sanskrit Pathshala, Doondalod (Rajasthan); Goverdhan Sanskrit Pathshala, Khadagada (Rajasthan); Government Sanskrit Pathshala, Bundi; Hanumat Sanskrit Vidyalaya, Sardarshahr (Rajasthan); Harimukh Raya Sanskrit Vidyalaya, Ramgarh (Rajasthan); Jangid Vedic Vidyalaya, Fatehpur (Rajasthan); Khandal Vipra Vidyalaya, Jaipur; Mangal Dutta Mahavidyalaya, Ratangarh (Rajasthan); Matribhasha Vidyapeeth, Karauli (Rajasthan); Pareek Vidyalaya, Merta City (Rajasthan); Reengata Sanskrit Vidyalaya Bagar (Rajasthan); Sakseriya Sanskrit Vidyalaya, Chirawa (Rajasthan); Sanskrit Mahavidyalaya, Chittor; Saraswati Vidyapeeth, Kotah; Sarvajani Sanskrit Vidyalaya, Baran (Rajasthan); Shridhar Sanskrit Pathshala, Brahmapuri, Jaipur; Kanya Gurupal, Dehra Dun (U.P.); and Sanskrit Pathshalas at Amarsar, Hanswara, Bharatpur, Bonli, Chak, Cheethwari, Chomu, Dausa, Dhobial, Ganora Kaladera, Kaushi, Karauli, Khorli, Lalot, Muchkund Dolpur, Neemkathana, Niwai, Paota, Samode, Talabgaon all in Rajasthan.

**PHYSICAL EDUCATION**

Andhra Training College of Physical Education, Vijayawada; College of Physical Education, Muzaffarpur (Bihar); Government College of Health and Physical Education, Patna; Kaivalyadhana S.Y.M.Y. Samiti, Lonavla (Bombay); Training Institute for Physical Education, Kandivli (Bombay); Academy of Physical Education of Sri Hanuman Vyamshala, Hyderabad; Physical Training College, Shivpur (M.P.); Hanuman Vyam Prasarak Mandal, Amravati; Y.M.C.A. College of Physical Education, Saidapet, Madras; Physical Training College, Trivandrum; Government College of Physical Education, Rampur; Government College of Physical Education, 30, Ramkrishna Samadhi Road, Calcutta.

**RURAL STUDIES**

Shri Shivaji Lok Vidyapitha, Amravati

**SOCIAL SCIENCES**

Tata Institute of Social Sciences, Chembur, Bombay.

**STATISTICS**

Statistical Branch of Indian Council of Agricultural Research, New Delhi; Indian Statistical Institute, Calcutta.

**TEACHERS' TRAINING**

Basic Training College, Turki (Bihar); B.N.R. Training College for Women, Patna; Women's Training College, Muzaffarpur (Bihar); Teachers' Training College, Ranchi; Training College, Bhagalpur; Graduates' Basic Training Centre, Dhulia (Bombay); Graduates' Basic Training Centre, Rajppla (Bombay); Graduates' Basic Training Centre, Dharwar; Jamia Training Institute, Jamia Millia Islamia, Jamlanagar, Delhi; Lady Irwin College, New Delhi; Domestic Science Training College, Hyderabad; C. T. College, Jaora (M.P.); Government Teachers' College, Dewas (M.P.); Nai Talim Bhawan, Sevagram; Government Secondary Training School, Berhampur (Orissa); Secondary Training School, Cuttack; St. Bedes College, Simla; A.P. Mission Higher Secondary School, Dehra Dun; Balwant Rajput College, Agra; D. A. V. College, Kanpur; Dharan Sama College, Aligarh; Gorakhpur University Foundation Society, Gorakhpur; Government Basic Training College, Lucknow; Government College of Home Science for Women, Allahabad; Government Constructive Training College, Lucknow; Government Junior Basic Training College, Allahabad; Government Junior Basic Training College, Lucknow; Government Junior Basic Training College, Muzaffarnagar; Government Nursery Training College, Allahabad; Government Training College for Women, Allahabad; Government Training College for Women, Lucknow; Kishori Raman College, Mathura; K. P. Training College, Allahabad; Lucknow Christian College, Lucknow; Meerut College, Meerut; Queen Victoria Higher Secondary School, Agra; Tilak Dhari College, Jaunpur; Women's Training College, Dayabagh, Agra; Government Central Pedagogical Institute, Allahabad; Government School of Arts and Crafts, Lucknow; St. Mary's Convent Training College for Anglo-Indians, Allahabad; Training College for Teachers for Schools for Defectives, Lucknow; Basic Training College, Banipur (24 Parganas, West Bengal).

**VETERINARY SCIENCE**

Indian Veterinary Research Institute, Izatnagar (U.P.); Indian Veterinary Research Institute, Mukteshwar (U.P.); Bengal Veterinary College, Calcutta.

## EDUCATIONAL STATISTICS (1954-55)

Note that figures for 1954-55 are provisional. Also, the States mentioned in these tables are the ones existing before the proposed reorganization in Oct. 1956.

## 1. INSTITUTIONS, ENROLMENT, EXPENDITURE

State	Number of Institutions for		Enrolment in Institutions for		Expenditure on Institutions for	
	Boys	Girls	Boys	Girls	Boys	Girls
			(In Thousands)		(In Rs. Lakhs)	
Andhra .. .. .	22,164	118	14,44	7,84	8,21	32

# PUBLIC HEALTH

## PUBLIC health is a State subject.

The Central Ministry of Public Health administers quarantine in ports, controls quality of imported drugs, and promotes research.

Other items with which it deals are: food adulteration, medical and public health training abroad, examination of medical and public health plans of States.

Subjects on which it exercises advisory and co-ordinated functions are: development of health services relating to malaria, tuberculosis, blindness, venereal disease, maternity and child welfare and nursing, filaria, leprosy, nutrition, national water supply.

It also gives advice, collects information and acts as a co-ordinating and liaison agency. The department which deals with public health under the Central Government is called Directorate-General of Health Services.

The Prevention of Food Adulteration Act, 1954 (37 of 1954) was brought into force on the 1st June, 1955.

In accordance with the provisions of section 31 of this Act, a Central Committee for Food Standards was constituted and a Central Food Laboratory was also established simultaneously on the 1st June, 1955.

In consultation with the Central Committee for Food Standards, the Prevention of Food Adulteration Rules, 1955, were made by the Government of India and promulgated throughout India (except Jammu and Kashmir) with effect from the 24th September, 1955, with the exception of Part VI (Colouring Matter) and Part VII (Packing and Labelling of Foods) which came into force on the 1st December, 1956.

Certain amendments to these rules were notified on the 28th July, 1956 (S.L.O. 1687) and on 24th November, 1956 (S.L.O. 2765.)

State Governments who are primarily responsible for the actual implementation of the Act have further been advised not to enforce Part VI and Part VII rigidly for another six months upto 31st May, 1957, in order to enable the trade to exhaust their existing stocks of food articles and packing and labelling material lying with them and to switch over to the requirements of these rules without any difficulty.

The main facts (based on 1951 census reports) are given below:

About 380,000 persons are engaged in medical and health services in the country as a whole. Out of this 230,000 live in towns and 150,000 live in villages. These may be divided as follows (exclusive of five Districts in Bihar):

Registered medical practitioners (91,930); Vaidas, hakims and those not registered (96,147); Compounders (38,407); Nurses (31,517); Midwives (23,938); Vaccinators (5,928); Dentists (3,288); Others engaged in hospitals and private establishments rendering medical or health services but not including scavengers or sanitary staff (72,970).

Number of hospitals, 8,601 (1951); no. of beds, 113,557 (1951); no. of nursing homes, 500 (1952); no. of medical colleges (including 3 dental colleges, 3 nursing, one pharmacy), 34 (1952); no. of colleges for indigenous systems, 50 (1952); no. of special institutions (e.g., radiological) conducted by private agencies, 195; no. of maternity and child welfare centres (urban) 694, (rural) 418 (1947); no. of trained visitors (urban) 231, (rural) 136 (1947); no. of trained midwives (urban) 922, (rural) 255 (1947); no. of trained dais (urban) 1,204, (rural) 1,367 (1947).

In 1956, it was estimated, there were about 10,000 medical institutions and about 125,000 beds. This would represent an increase during the First Plan of about 16 per cent in institutions and 10 per cent in beds.

## VITAL STATISTICS

The registered birth rates, death rates and infant mortality rates are given below:

	Birth rate.	Death rate.	Infant Mortality rate.
1921 ..	32.0	30.6	198
1930 ..	33.0	25.0	189
1940 ..	33.0	22.0	160
1947 ..	26.6	19.7	146
1948 ..	25.4	17.1	130
1949 ..	26.7	15.8	123
1950 ..	24.8	16.0	127
1953 ..	24.8	14.4	118
1954 ..	25.4	12.9	113

Note: Figs. for 1921, 1930 and 1940 relate to British Indian provinces. The rest relate to former Part 'A' States and Delhi, Ajmer, Coorg.

The infant mortality rates in some of the Indian cities per mille of live births are given below.

Name of the City	1953	1954
Ahmedabad ..	162	147
Bombay ..	134	124
Calcutta ..	161	137
Delhi ..	95	N.A.
Lucknow ..	128	124
Madras ..	180	136
Nagpur ..	227	193

N.A. = Not available.

The following paragraph gives the maternal death-rate (deaths per 1,000 of live and stillbirths) for 1954 in some major towns in India.

Ahmedabad, 1.1; Bombay, 1.0; Calcutta, N.A.; Delhi City, 1.7; Lucknow, 1.8.

## TROPICAL DISEASES

The following table gives the number of deaths and rates (number of deaths for every 1,000 of the population) from different diseases recorded in former Part 'A' States and Delhi, Coorg and Ajmer.

	1953		1954 †	
	Total	Rate	Total	Rate

\* Information not available.

† For 1953.

The incidence of venereal disease is particularly high in the hill tracts from Kashmir to Assam. It is also estimated that in the three States (pre-reorganization) of Madras, Bombay and West Bengal the incidence was between 5 and 7 per cent.

The number of persons who die of cancer annually is believed to be in the neighbourhood of 2 lakhs. There are only two institutions for the treatment of cancer in India: Tata Memorial Hospital at Bombay and the Chittaranjan Hospital at Calcutta. Research is conducted at the Cancer Research Centre at the Tata Memorial Hospital in Bombay. The Indian Cancer Society has its headquarters in Bombay and its divisional headquarters in Calcutta and Madras.

A Central Council of Health exists with the Union Health Minister as chairman and State Health Ministers as members. The Deputy Director-General of Health Services is the Secretary.

The All-India Council of Post-graduate Medical Education prescribes standards for post-graduate medical education.

The body in charge of research is the Indian Council of Medical Research.

(For a list of research institutions see under Research.)

The laboratories are: B.C.G. Vaccine Laboratory (Guindy, Madras); Central Drugs Laboratory (Calcutta); Serologist Laboratory (Calcutta); Central Research Institute (Kasauli).

There are four main medical depots—one each at Bombay, Calcutta, Karnal and Madras. The depots at Bombay and Madras have factories attached to them.

The Haffkine Institute, Bombay, manufactures sulphur drugs.

Among important Acts in force are Vaccination Act, Drugs Act of 1940, Drugs Rules of 1945. Then there are the Indian Medical Council Act, the Nursing Act of 1947, the Dentist Act, the Pharmacy Act.

The following medical bodies are in existence: The Indian Medical Council, the Indian Nursing Council, the Dental Council of India, the Pharmacy Council of India, and of course, the Indian Council of Medical Research.

Reports from the following committees appointed by the Central Council of Health have been submitted: Committee to draft a model Public Health Act; Committee to control leprosy; Committee to review conditions of service of nurses; Committee to study training imparted to students undergoing combined courses in ayurveda and unani colleges.

The Committee set up to formulate uniform standards of education and regulation of practice in respect of vaidyas, hakims, homeopaths has submitted an interim report.

### CONTROL OF DISEASES

Steps are being taken to control a number of diseases that are rampant.

National Malaria Control Programme was launched with effect from April, 1953 as a part of the first Five-Year Plan. It provides for the establishment of 136 field malaria control units to give protection to 136 million people out of the 200 million residing in the malarious areas. These units have been allotted to all the 29 States forming the Republic of India according to the importance of malaria problem in each State. In 1956, 133 units were in operation and 162 had been sanctioned. During 1956-57, 38 additional units were to be established. Up to end of March 1956, 107 million people were protected and 23 lakh cases treated with drugs. The emphasis is now in the eradication of the mosquito rather than control.

When the 38 additional units have started operation all the malarious areas would be covered.

According to data received from 24 States malaria incidence went down by about 37 lakhs from 1953-54 to 1954-55.

The measures adopted are residual indoor spraying of houses with DDT and treatment of malaria cases to reduce the reservoirs of infection.

Free supplies of insecticides, transport and spraying equipment are made by the Central Government from the aid received from the United States Technical Co-operation Mission to India.

The State Governments are also given grants-in-aid to cover the cost of customs duty in respect of imported supplies.

The D.D.T. factory set up at Delhi as a joint project under the Government of India, U.N.I.C.E.F. and U.N.T.A. with a production capacity of 700 tons (Tech.) D.D.T. went into production early in 1955. Under the 2nd Five-Year Plan the production capacity of the Delhi Plant is being doubled. Another D.D.T. Plant is being set up at Alwaye and is expected to go into production by the middle of 1958.

During the First Five-Year Plan period the total expenditure on the National Malaria Control Programme was 1,151.68 lakhs (including the cost of D.D.T. donated by the U.N.I.C.E.F.) against Rs. 1,500 lakhs provided in the Plan. During the Second Five-Year Plan the Planning Commission have earmarked a sum of Rs. 27 crores for the National Malaria Control Programme out of which the Central Government will contribute Rs. 14 crores and the States' share will be Rs. 13 crores.

Because of the recently reported possibility of the development of resistance in the mosquitoes against D.D.T., the Government of India are considering the question of switching over the National Malaria Control Programme to National Malaria Eradication Programme from 1958.

With the object of setting up a demonstration project for the control of filariasis in each State to operate for two years—1954-55 and 1955-56, the Government of India have drawn up a National Filariasis Control Programme as a part of the first Five-Year Plan. Out of the thirteen States, where filariasis is prevalent, 12 have given their consent to Government of India's proposal to establish control and survey units in them.

These States were (pre-reorganization): Andhra, Bihar, Bombay, Madhya Pradesh, Madras, Orissa, Hyderabad, Saurashtra, Travancore-Cochin, Vindhya Pradesh, West Bengal, Uttar Pradesh.

Accordingly 13 control and 22 survey units were allotted to the various States. Out of this 11 control and 18 survey units have started functioning.

The others were expected to be formed at any time.

Among mosquito-borne diseases filaria is second only to malaria. No satisfactory cure has been found for this disease. What is aimed at is the control of the carrier species, and anti-mosquito measures have to continue for five years before results become apparent.

Filariasis survey with the object of delimiting the extent of the filariasis problem and to collect the pre-control data have been in progress in the States of Bihar, Uttar Pradesh, Orissa, the areas of the former Vindhya Pradesh, Madhya Pradesh, Hyderabad, Saurashtra, Bombay, Andhra, Madras and Travancore-Cochin.

So far representative sample of nearly 7.5 million persons residing in places known to be or suspected to be filarious have been surveyed.

The control units have started operating in the States of Bihar, Uttar Pradesh, Orissa, the areas of the former states of Madhya Pradesh, Saurashtra, Bombay, Andhra, Madras, and Hyderabad and have completed the collection of the pre-control data covering a population of nearly 3 millions.

Mass drug administration with Diethylcarbamazine (Hetrazan) is in progress as part of the control programme in the States of Uttar Pradesh, Orissa, the areas of the former Andhra and Bombay States (Surat Municipality), Kerala (Kozhikode, Kasargod) and Mysore (Mangalore), while anti-mosquito measures are in force in the States of Orissa, Andhra, Bombay and Madras.

In 1955 there were 13 control units and 22 survey units. In 1956 it was proposed to start 20 units. There was a provision of Rs. 153 lakhs for the programme during 1956-57.

A number of bodies are fighting to control leprosy—Mission to Lepers, Hind Kusht Nivaran Sangh (formerly Indian Council of the British Empire Leprosy Relief Association), Gandhi Memorial Leprosy Foundation, Kasturba Gandhi Trust, Maharogi Sewa Mandal.

The Mission runs 50 leper homes with about 10,000 inmates and gets grants from State Governments.

The Sangh has as its president the President of the Indian Republic. It carries on research work at the School of Tropical Medicine at Calcutta, conducts courses in post-graduate training in leprosy, undertakes surveys.

The mainstay in the treatment of leprosy has been injections of chaulmoogra (hydnocarpus) oil or its preparations. Recently encouraging results have been reported by the use of certain sulphone drugs such as "Promine" and "Diazone."

The Sir Profulla Chandra Research Laboratory and the connected Bengal Chemical and Pharmaceutical Works Ltd., Calcutta are producing an anti-leprosy drug called "Novotrone". Both the mother sulphone (Diamino-Diphenyl-Sulphone) called "Novophone" and a soluble derivative called "Novotrone", which is similar in composition to the well known compound Sulphonamide prepared by Burroughs Wellcome & Co., London are being manufactured.

The only sure method of preventing contact with infective cases is the isolation of cases in leprosy hospitals, sanatoria, or colonies. There are in all about 153 colonies, homes, asylums and hospitals for the treatment of leprosy patients and the number of beds provided is estimated at 19,620.

Treatment in out-patient leprosy clinics is also available in various parts of India. The number of such clinics is approximately 1,172 and the total number of cases taking treatment therein is roughly 1,20,000 per year.

Under the Leprosy Control Scheme of the Government of India included in the First Five-Year Plan at a cost of Rs. 30 lakhs to the Central Government alone, 4 treatment and study centres and 38 subsidiary centres were sanctioned in 16 different States. Till the end of 1956 four treatment and study centres and 30 subsidiary centres were established in 13 States.

It is proposed to continue the Scheme in the Second Five-Year Plan in a more expanded form. An amount of Rs. 400.48 lakhs has been allocated for this purpose in the Second Five-Year Plan out of which an amount of Rs. 271.50 lakhs is to be borne by the Central Government. Besides adding 100 more subsidiary centres during the Second Five-Year Plan, the scheme provides for the training of medical and para-medical personnel, upgrading of leprosy clinics and in-patient institutions and treatment facilities for leprosy patients in N.E.S. Blocks.

A scheme for the training of Medical Officers in Leprosy has been sanctioned. The training course is likely to be started by the beginning of 1957.

A Central Leprosy Teaching and Research Institute has been established at Tirumani in Madras State in association with the Lady Willington Leprosy Sanatorium, Tirumani and the Silver Jubilee Children Clinic for Child Leprosy, Saidapet.

A sum of Rs. 28.00 lakhs has been provided for this Institute during the Second Five-Year Plan.

Mortality figures for cities show a tuberculosis death-rate ranging from 200 to 450 per 100,000 as far as can be ascertained. Little information is available from rural areas but certain investigations have shown that in small towns the infection rate is nearly as high as in the larger cities, and that in the villages it is lower though considerable.

It can be safely estimated that there are at least 500,000 deaths from tuberculosis annually. If the ratio of 5 cases of active tuberculosis to one death from tuberculosis is accepted, there will be, at least, 2,500,000 active cases of tuberculosis in India.

The Government of India has an Adviser in Tuberculosis in its Directorate-General of Health Services. He advises the Central Government and the various State Governments on tuberculosis policy and helps in co-ordinating various tuberculosis schemes. He is also Technical Adviser to the Tuberculosis Association of India.

Prophylactic (BCG) Vaccination against tuberculosis was introduced in India in August, 1948 with the assistance of W.H.O. The mass campaign was started in April, 1951 and is now (Nov. 1956) in progress in all the States except the Andamans and the Laccadives. In the Andamans it was expected to be introduced at any time. Up to the end of Sep. 1956, about 8 crore persons had been tuberculin tested of whom about 2.8 crores were vaccinated with BCG and thus given protection against tuberculosis.

The contribution of UNICEF and W.H.O. amounted to over 1.23 mn. dollars upto the end of 1955 to cover the services of the international personnel and provision of equipment and supplies, consisting of vaccination equipment and vehicles, film projectors, public address equipment, etc. The UNICEF and W.H.O. will continue to render assistance in the development of this programme through 1957 and 1958 for which purpose a sum of 204,000 dollars has been allocated.

There are at present (Nov. 1956) 131 technicians' teams with 110 doctors and 775 technicians.

In furtherance of the object of introducing B.C.G. Vaccination in India, a laboratory for the manufacture of this vaccine was established by the Government of India at the King Institute, Gulindy, in 1919. It supplies vaccine not only to centres in India but also to centres in South-East Asia.

In order to find out if it is possible to obviate certain difficulties experienced in the use of the liquid vaccine, it has been decided to instal a freeze drying vaccine plant for manufacturing and using dry vaccine as a pilot project. This plant was expected to be installed early in 1957.

There are at present four anti-tuberculosis demonstration and teaching centres, one each at New Delhi, Patna, Trivandrum and Madras. The Madras centre which was established in 1950 is beginning its career with an important research project namely the study of the role of modern tubercular drugs in the prevention of the spread of tuberculosis.

It is proposed to establish or upgrade about 300 TB Clinics during the Second Plan so as to have at least one Clinic in each District.

The establishment of 12 more centres is envisaged in the Second Five-Year Plan period.

Attached to the Delhi University is the 'Patel Chest Institute' for teaching and research in T.B. and other diseases of the chest.

The needs of tuberculous children could not be attended to so far, but now two hospitals for tuberculosis children have been established, one in Delhi and the other at Arogyavaram in Andhra State.

According to the latest available figures there are for the treatment of T.B. patients, 69 sanatoria, 67 hospitals, 170 clinics, 140 wards with a strength of 20,322 beds.

These beds are meant mostly for giving treatment. Beds for isolating advanced cases of T.B. for whom much treatment is not possible, have so far been negligible, and it is proposed to establish at least 4,000 beds for the isolation of such cases during the next 5 years.

There are about ten After Care and Rehabilitation Centres for ex-tuberculosis patients, and it may be possible to establish 8 more rehabilitation centres during the second Five-Year Plan period.

The Government of India have also provided for research in various aspects of tuberculosis by providing funds for the purpose to the Indian Council of Medical Research.

Various International bodies also co-operate with the I.C.M.R. in conducting this research on sound lines. A notable research now in progress is the national survey to find out the true incidence of tuberculosis in the urban, semi-urban and rural areas of India.

A provision of Rs. 102 lakhs was made by the States for affording facilities for the treatment and control of venereal diseases. It was proposed to establish 71 clinics during the First Plan. The information about the number of clinics actually opened is not available.

The maternal and child mortality as already indicated is high—the maternity death rate is about 10 and infant mortality about 113.

In all States welfare activities are in progress. There are posts of maternity and child welfare officers in Madras, West Bengal, Orissa, Assam,

Delhi, U.P., Punjab, Madhya Pradesh, Bihar, Andhra, Himachal Pradesh, Kerala, Bombay. The Government of India has an officer in the Directorate-General of Health Services who gives special attention to maternity and child welfare problems.

Non-official bodies engaged in welfare work are the Association of Medical Aid to Women by Women, Bombay; Mothers' and Children's Welfare Society, Bombay; the Bihar Maternity and Child Welfare Society; the Indian Council for Child Welfare, New Delhi; The Kasturba Gandhi Memorial Trust; and the Indian Red Cross which has a special bureau.

The Central Social and Welfare Board is assisting the State Boards in promoting Maternity and child welfare services. As a result, a large number of agencies are undertaking services for mothers and children and training programmes for staffing the services with trained personnel.

The total number of maternity and child health centres has now increased to over 3,000.

The Government of India in their first Five-Year Plan paid special attention to the expansion of Health Services for mothers and children and under the Community Projects provided necessary staff to offer health services to mothers and children.

A sum of Rs. 60 lakhs was ear-marked by the Government of India in the first Five-Year Plan for establishing Maternal and Child Health Centres in rural areas of the States.

This sum was utilised by the States, and 201 maternity and Child Welfare Units, each serving a population of 60,000 to 70,000, were established in association with the existing dispensaries.

The staff provided at each unit is one Health Visitor and 4 Midwives for the main centre as well as the 3 sub-centres distributed over the area.

It is proposed to cover 3,000 National Extension Blocks during the Second Five Year Plan period, under the Primary Health Centre Scheme. The Maternity and Child Welfare Services will be included in the activities of Health Centres.

During the First Five-Year Plan, the target was to train 600 Health Visitors and 2,400 Midwives. It is proposed to further expand the existing 9 Health Schools, 8 in the States and 1 in Delhi (under Central Government) and to establish 5 new Health Schools in the States to train another 1,700 Health Visitors under the Second Five Year Plan to staff the proposed health centres.

The large bulk of midwifery services in the villages will continue to be rendered by *dais* already practising in the villages. Under the Second Five Year Plan a short six months course has been designed to orient them in modern techniques of aspsis, and make better and fuller use of their services, and provision has been made in the Plan for training 36,000 *dais*. A sum of Rs. 90 lakhs has been provided in the Plan for the purpose. The training will be given at health centres and at existing Maternity and Child Welfare Centres. An additional provision has been made to detail a trained midwife for purposes of supervision and continued assistance.

A sum of Rs. 45 lakhs has been provided in the Second Five Year Plan to assist medical colleges to improve paediatric training so that medical personnel can, during the training, receive adequate instruction in paediatrics and are better equipped to play their role in Child Health services.

Twelve States have undertaken comprehensive Maternal and Child Health Programmes under WHO-UNICEF assistance which aims at the expansion and improvement of facilities for the training of various levels of health personnel and for the expansion of health services of mothers and children. The UNICEF provides equipment while W.H.O. provides technical

personnel. State Governments provide necessary funds and national personnel to develop the services.

The results of these programmes are encouraging in so far as it has succeeded in reducing the maternal and infant mortality of the country as a whole.

The present rates are 10 and 113 per 1,000 live births, respectively.

## DEFECTIVES

The last census of handicapped persons (blind, deaf, crippled, mentally retarded, etc.), took place in 1931. These put the number of blind at about 600,000 and the number of deaf and hard-of-hearing at 230,000.

It is estimated that today the total number of blind is about 2,000,000 and the deaf about 700,000.

There is a Training Centre for the Adult Blind at Dehra Dun to impart vocational training. It imparts training in cottage-industry-type handicrafts to about 150 adult blind. There is also a common Braille code for Indian languages known as Bharati Braille. The Central Braille Printing Press at Dehra Dun has already published several Braille books in English, Hindi and other regional languages.

There are in all 69 institutions for the blind and 44 for the deaf and 4 for the mentally handicapped. Five institutions cater for the orthopaedically handicapped children. About 2,000 blind children and adults and about 2,000 deaf children and adults receive training at these institutions.

A Sheltered Workshop for the Blind is functioning as part of the Training Centre where 10 blind workers are employed in chair-caning and weaving of woollen textiles. An Employment Office of the Training Centre has been functioning in Madras to try and secure remunerative employment for blind persons in ordinary industrial establishments. 52 persons have so far been placed by this office.

The Government of India give scholarships to blind and deaf persons over the age of 16 in order to help them to undertake higher academic education, or, professional, vocational or technical training in normal institutions of learning. Scholarships are also awarded to orthopaedically handicapped children and adults.

In September, 1955 the Government of India appointed a National Advisory Council for the Education of the Handicapped to advise Government, to formulate new schemes, and to serve as liaison between Government and voluntary bodies.

On the advice of the Council, the Government of India have included several schemes for the education and welfare of the handicapped in the Second Plan. These schemes include the establishment of a comprehensive National Centre for the Blind at Dehra Dun consisting of the existing Training Centre for the Adult Blind and the Central Braille Press, a model school for blind children with a kindergarten section and a teacher's training department attached, an expanded sheltered workshop and a Braille Circulating Library.

On the lines of the National Centre for the Blind a National Centre for the Deaf is also proposed to be established. This will consist of a model school, a technical training centre for the Adult Blind and an audiological centre.

For the first time the Government of India will also make a beginning with the education and welfare of the mentally handicapped. A model school for the mentally retarded children is proposed to be established in Delhi during the Second Plan period.

One of the most difficult problems in the welfare of the handicapped is to secure employment for suitably trained handicapped persons. In order to deal with this problem the Government of India propose to establish a special organisation during the Second Plan period to assist handicapped persons in finding employment in the public services, industry and commerce.

The number of mental cases is about one million, mental defectives one and a half million, of psycho-neurotics about three million.

There are at present three institutions for mentally retarded children.

At present there are 32 mental hospitals with accommodation for about 20,000 patients.

The Mysore Government Mental Hospital at Bangalore and the Hospital for Mental Diseases at Ranchi are the ones which are best equipped.

The following is a list of mental hospitals in India :

Mental Hospital, Tezpur; Inter-Provincial Mental Hospital, Kanke, Ranchi; Indian Mental Hospital, Kanke, Ranchi; N. M. Mental Hospital, Thana (Bombay); Mental Hospital, Ratnagiri (Bombay); Central Mental Hospital, Yeravda; Mental Hospital, Ahmedabad; Mental Hospital, Dharwar; Mental Hospital, Baroda; Mental Hospital, Nagpur; Government Mental Hospital, Madras; Government Mental Hospital, Waltair; Government Mental Hospital, Kozhikode; Punjab Mental Hospital, Amritsar; Mental Hospital, Agra; Mental Hospital, Bareilly; Mental Hospital, Banaras; Mental Hospital, Mankunda, Calcutta; Lambini Park Mental Hospital, P.O. Tiljala, 24 Parganas; Bangiyannad Ashram, 20-A, Vivekananda Road, Dum Dum; Mental Observation Ward, Bhawanipur, Calcutta; Mental Hospital, Jalna; Mental Hospital, Srinagar; Mental Hospital, Lashkar; Mental Hospital, Bonganga, Indore; Mental Hospital, Bangalore; Mental Hospital, Jaipur; Mental Hospital, Jodhpur; Mental Hospital, Udaipur; Mental Hospital, Bhavnagar; Mental Hospital, Trivandrum; Mental Hospital, Trichur.

The Hospital for Mental Diseases, Ranchi which was under the administrative control of a Board of Trustees was taken over by the Government of India, with effect from the 1st June, 1954 with a view to reorganising it and making it a model centre for treatment and training in Psychiatry.

The Government of India, in collaboration with the Government of Mysore, have established an All India Institute of Mental Health at Bangalore in association with the Mental Hospital there, under the short term proposal made by Professor Mayer-Gross, W.H.O. Consultant in Psychiatry, who was assigned to the Government of Mysore for a short period. The Institute is managed by a Governing Body. The chief object of the Institute is to make provision for and to promote post-graduate and special studies and research in mental health.

The courses for the post-graduate diploma in Psychological Medicine (D.P.M.) and Medical (Clinical) Psychology were started on 3rd January 1955. A post-graduate course in Psychiatric Nursing was also started in 1956 January.

Increase of mental health activity in India is envisaged under the Second Five Year Plan. The improvement and development of institutional facilities by State Governments by opening new hospitals and psychiatric clinics, the training programme already started or to be started by the Government of India at the All India Institute of Mental Health for Psychiatrists, Psychiatric Nurses, Psychologists and ancillary personnel, the establishment of Child Guidance Clinics and homes for incurables will bring the problem of mental ill-health in the country under control within the next decade.

### INDIGENOUS SYSTEMS

General policy is based on the reports of the Chopra Committee set up in December 1946 (to enquire into the facilities available for training and research and need for general control), the Pandit Committee set up in 1949 to work out the details concerning research in the ayurvedic and unani systems.

A Homoeopathic Enquiry Committee was also set up in 1948 November to recommend measures for the control and development of homoeopathy.

The general policy of the Government is that there should be only one system—the allopathic—and that steps should be taken to eradicate quackery from the indigenous systems and put them on a more scientific basis. It is held that in any reorganised training anatomy, physiology and surgery should be part of the curriculum.

There are about 50 colleges which afford a training in the indigenous systems of medicine and about 8 in homoeopathy.

Research is conducted at the School of Tropical Medicine, Calcutta; Central Drug Research Institute, Lucknow; the Drugs Research Laboratory in Jammu, and the Central Research Institute in Indigenous Systems of Medicine, the Ayurvedic Research Institute under the Thakurdatta Sharma Dharmarth Trust. There is also a Board in Bombay to promote research.

The Union Ministry of Health has published what is the first complete national pharmacopoeia of India. It gives information about the standards to be prescribed and tests to be used to establish the identity and purity of a number of indigenous medicinal preparations.

The Committee appointed by the Government of India to report on the question of establishing uniform standards in respect of education and regulation of practice of vaidyas, hakims and homoeopaths has published its report.

Among the recommendations are : five and a half years course of study inclusive of one year's internship with at least three months training in the rural areas; all members of the medical profession whatever the system they practise should enjoy an equal status; the existing institutions should be up-graded; new text-books should be written; post-graduate study and research facilities should be available; there should be separate Directorates for ayurvedic and unani, and for the homoeopathic systems.

Under the First Plan the States had an allotment of Rs. 95.23 lakhs to provide training and Rs. 1.06 crores for hospitals and dispensaries.

Under the Second Five Year Plan, the States have provided Rs. 554.59 lakhs in their revised Plans. Rs. 62.2 lakhs have been provided for opening of new colleges of indigenous medicine and attached hospitals.

Out of this, Rs. 15.6 lakhs are provided by U.P. for opening of Homoeopathic College and attached hospital.

The provision for expansion of existing colleges and attached hospitals is Rs. 181.51 lakhs and Rs. 6.93 lakhs respectively. Under 'Miscellaneous Schemes' the provision for research and training is Rs. 14.17 lakhs and Rs. 6.925 lakhs respectively.

In addition to this assistance, the Centre has provided Rs. 100 lakhs for upgrading of colleges of indigenous medicine and research.

### DRUG PRODUCTION

The most important step taken in the field of Antibiotics was the establishment of a Penicillin Factory in the public sector. The Hindustan Antibiotic Ltd., Pimpri, went into trial production in March, 1955. Regular production of Penicillin was commenced from August, 1955. The factory has already achieved a production capacity of 12.5 million mega units of Penicillin. The production of this factory for 1955-56 was estimated at 6.6 million mega units.

Among the new drugs recently developed for the treatment of tuberculosis are para-amino salicylic acid and isonicotoni-hydraside (INH).

The manufacture of para-amino salicylic acid (PAS) was taken up by Biochemical and Synthetic Products whose plant was nearing completion at the end of 1956. The manufacture of INH was taken up by two new firms from raw material.

Among the synthetic anti-leprosy drugs (DDS) and its derivative (Sulphone) are at present produced from basic raw materials.

During the First Plan period, the Madras Government expanded facilities for quinine production with the establishment of a new factory at Annamalai with a capacity of 80,000 to 100,000 lbs. of quinine salts.

DDT and Benzene hexachloride are two important insecticides whose production was taken up during the First Plan period. With the completion of the factory of the Hindustan Insecticides in Delhi which went into production in March, 1955, an indigenous capacity has been created for the manufacture of 700 tons of DDT per annum. The present rate of output of this factory is about 1.5 tons per day.

The production of benzene hexachloride in a plant with an annual capacity of 500 tons was commenced at Bihra near Calcutta in 1953. Its capacity has been further expanded to 1,000 tons per annum. Another new factory has been set up in Mithapur with an annual capacity of 1,500 tons.

No substantial development in the field of vitamins took place during the First Plan period. Shark liver oil which provides an important source of vitamin A is produced in factories set up by the Bombay, Madras and Kerala Governments.

### BHORE COMMITTEE'S PLAN

The key report for public health is the one submitted by the Health Survey and Development Committee appointed by the Government of India in October, 1943 under the chairmanship of Sir Joseph Bhore. The Committee was to make a survey of existing health conditions in the sub-continent and to formulate plans for future health development.

In putting forward its recommendations the Committee kept in view a scheme, which when fully developed, should provide each individual in the country with adequate medical care, curative and preventive, irrespective of his ability to pay for such services.

The scheme visualized by the Committee is as follows :

The district health organisation will have as its smallest unit of administration a primary unit which will normally serve a population of 10,000 to 20,000. About 15 to 20 such primary units will together constitute a secondary unit and a varying number of the latter (3 to 5) will form the district health unit, the designation suggested by the Committee for the district health organisation.

At each of the headquarters of the district, secondary and primary health units will be established a Health Centre from which will radiate the different forms of health activity into the territory covered by each type of unit. The provision made for medical relief and preventive health work at each of these Health Centres will increase in scope and efficiency from the primary unit to the district health unit.

The District Health Centre will possess general and special hospitals with a total bed strength of about 2,500 and all the consultant and laboratory services required for the diagnosis and treatment of disease on up-to-date lines. The Secondary Health Centre will have a hospital with 500 beds and the primary unit headquarters a 75-bed hospital.

A system of ambulances and telephone connections between these three types of hospitals will help to promote the fullest utilisation of the higher types of service available at the larger institutions by the people living in the remoter parts of the district.

These hospitals will also take an active part in the preventive health campaign. They will be linked with the field health organisations in respect of such services as those for tuberculosis, for mothers and children or for venereal diseases.

The Committee made it plain that no health development plan could produce adequate results unless sufficient measures were taken for the provision of a healthy environment for community life, such as safe water-supply,

hygienic houses, a satisfactory system of conservancy and proper supervision over the production, distribution and sale of food intended for public consumption. Specific recommendations were put forward in respect of these.

In order to secure the active support of the people, the establishment of a Health Committee in every village was recommended.

Government accepted in principle all the recommendations of the Bhoze Committee and have been carrying out recommendations about the following items: post-graduate training abroad and travel fellowships (now under Colombo Plan, Point Four Programme and other international auspices), up-grading departments of medical colleges and research institutions for post-graduate training and research, establishment of departments of social and preventive medicine in medical colleges, research into indigenous systems of medicine and better organization of homoeopathy, and generally in the improvement of drainage water supply and preventive medicine.

It may be mentioned here that only about 6.2 per cent of the total population of India enjoys protected water supply. The urban population is better served: 6 per cent of the total number of towns and 48.5 per cent of the urban population. The five-year plan drawn up by the Environmental Hygiene Committee will entail an annual expenditure of Rs. 16.77 crores.

About sewage, only 3 per cent of the population enjoys the benefits of a sewage system. Only 23 cities with a population of a lakh and over have a full sewage system, and about 12 towns have partial systems. The Committee's Five-Year Plan will cost Rs. 15 crores.

A sum of Rs. 5.30 crores was paid to State Governments upto the end of 1955 for water supply and sanitation for urban areas.

### FAMILY PLANNING

The total expenditure during the First Five Year Plan comes to Rs. 20.41 lakhs, i.e. about 30 per cent of the total provision.

Financial assistance of Rs. 11.50 lakhs was offered to 15 State Governments, 8 local bodies and 35 voluntary organisations for opening of family planning clinics.

In all 201 clinics were aided by the Central Government by the end of the First Plan period.

A Contraceptive Testing Centre was opened in the Indian Cancer Research Centre, Bombay and a number of contraceptives were tested for finding out their suitability.

During the Plan period efforts were directed to the building up of an active public opinion in favour of family planning and promotion of family planning advice and service on the basis of the existing knowledge. Demographic as well as medical and biological studies were also carried out.

An education and propaganda scheme was initiated in 1955-56. A number of posters and leaflets were printed and distributed free to the States, local bodies and voluntary organisations conducting family planning clinics.

Nine films about planning, biology of reproduction and child welfare were procured and shown to the public.

Twenty research programmes relating to demographic, medical and biological studies were supported at a cost of about Rs. 6.20 lakhs.

Training programmes in Family Planning were conducted in which 20 doctors, 21 health visitors and 5 social workers were trained.

### AUXILIARY WORKERS

In order to meet extreme shortage of doctors in the country as a whole and particularly in the rural areas, it was proposed to introduce a new type of Auxiliary Medical and Public Health Worker.

He would not be entrusted with diagnosis and treatment of diseases beyond what is necessary as a part of ordinary first-aid work, and the training should be such as to enable him to assist the health authorities, in as large a measure as possible, in preventive measures including sanitation, health education, etc. The syllabus of training throws more emphasis on the preventive aspects of the training, rather than the curative side.

During training it was proposed to give the trainees free lodging and a stipend of Rs. 50 p.m. The following States agreed to participate in the Scheme:—

Madras, Andhra, Assam, Rajasthan, Kerala, Himachal Pradesh.

### NURSING

At the end of the year 1955, there were 22,386 registered nurses and 28,823 registered midwives. During the year, 1,200 trained health visitors were available as well as 6,826 registered *dais* and nurse-*dais* and 288 auxiliary nurse-midwives. Separate figures in respect of these nursing personnel for urban and rural areas are not available.

The Health Survey and Development Committee recommended that there should be a ratio of one nurse to 500 of population, and one midwife for every 1000 births. On this basis, the total requirements for nurses would be 7,00,000 and 87,500 midwives for the present population.

As some of the nurses and midwives get themselves registered with more than one State Nursing Council it is estimated that there are about 17,000 nurses and 21,000 midwives actually in practice in India.

The Plan targets for 1956 were: Nurses 22,000; Midwives 26,000; Health Visitors 800; *dais* and nurse-*dais* 6,000.

The number of nurses and midwives available in India falls far short of actual requirements. In order to meet the increasing demand for health personnel in connection with the expansion of health programmes under Community Development Projects a scheme for the training of about 6,000 additional auxiliary nurse-midwives has been included in the Second Five Year Plan at an estimated cost of Rs. 80 lakhs to be shared by the Central and State Governments concerned.

A scheme for the integration of public health with the basic course in nursing, which will serve as a pilot project, has been included in the Second Five Year Plan with a view to preparing nurses and midwives to play an effective role in the health services of the country. It is proposed to provide financial assistance by the Central Government to 10 training institutions for the implementation of the scheme. A provision of Rs. 11.70 lakhs has been made by the Government of India in the Second Five Year Plan.

Training in nursing is offered in centres attached to almost all large hospitals. The Nursing Colleges at Delhi and Vellore offer a higher basic course leading to a B.Sc. degree in nursing.

The number of training institutions for nursing personnel and of students under training at the end of 1955 were as follows (The second figure gives the number of trainees):—

Nurses: 181, 6,300; Midwives: 206, 2,100; Health Visitors 15,600; Auxiliary Nurse-Midwives: 47,915.

Information about the number of nurse-*dais* and *dais* trainees is not available.

The following post-certificate courses in nursing are at present available:—

- (a) *Sister Tutors' Course*.  
Christian Medical College, School of Nursing, Vellore (Madras).
- (b) *Nursing Administration Course*.  
(i) Christian Medical College, School of Nursing, Vellore (Madras).  
(ii) General Hospital, Madras.

(c) *Teaching and Nursing Administration Course*.  
College of Nursing, New Delhi.

(d) *Midwife Tutors' Course*.  
College of Nursing, New Delhi. (This course was instituted in 1956 in collaboration with the WHO and UNICEF).

(e) *Public Health Nursing Course*.  
All India Institute of Hygiene and Public Health, Calcutta.

(f) *Ward Sisters' Course*.  
Examination Board of Nurses Auxiliary of Christian Medical Association of India, (Mid India Branch) Girls High School, U.C.C. Mission Hospital, Indore.

(g) *Psychiatric Nursing Course*.  
(i) Mental Hospital, Ranchi.  
(ii) All-India Institute of Mental Health, Bangalore.

(h) *Tuberculosis Nursing Course*.  
Tuberculosis Sanatorium, Arongavaram (Andhra).

Health visitors are trained at centres in Bombay, Calcutta, Delhi, Hyderabad, Madras, Lucknow, Nagpur, Poona, Ludhiana, Amritsar, Trivandrum, Ranchi, Indore, Patna and Vishakapatnam.

Over 1,400 trained lady health visitors will be available during the Second Plan period to man maternity and child welfare centres—one of the most vital needs for the provision of adequate health protection to rural population—under the Community Development Programme.

At present, approximately 400 students are receiving training at eight centres. To double the number of trainees, these centres located in the States of Madras, Uttar Pradesh, Madhya Pradesh, Andhra, Punjab, Delhi and Bombay, were expanded during the First Five-Year Plan with Central assistance.

With the expanded programme, it will be possible to train 720 health visitors in the existing eight schools during the Second Plan period and 180 at the Lady Reading Health School. Besides, it is also proposed to establish six new schools where another 540 health visitors will be trained during the Second Plan period.

### FIRST FIVE-YEAR PLAN

The total provision for Health schemes in the First Five Year Plan was Rs. 140 crores. Rs. 101 crores were provided by the States and Rs. 39 crores by the Centre. During the period 1951-56 expenditure on medical and public health amounted to Rs. 10,546.20 lakhs which is about 75 per cent of the planned outlay.

The progress under broad heads of development is given below.

Rs. 30 crores were provided by the States in their plans for water supply and sanitation of which Rs. 14 crores were meant for rural and Rs. 16 crores for urban areas.

For the urban areas 196 water supply and 58 sewage schemes were sanctioned. The total amount of money sanctioned was Rs. 12.00 crores and the money paid was Rs. 8.3 crores. The number of water supply schemes actually taken in hand was 187 and of sewage schemes 42 in March 1956.

In the rural areas 134 schemes were sanctioned. The total amount of money sanctioned was Rs. 5.8 crores, and the money paid Rs. 2.8 crores upto March 1956.

The urban programme has been more successful than rural, but even here some of the schemes were just getting started and the majority only about 40 to 50 per cent complete in March 1956.

### MEDICAL COLLEGES

There were at the end of 1956, 42 properly so-called colleges\* and the number of admissions into the colleges was about 3,500.

1. The Andhra Medical College, Vishakapatnam.
2. The Assam Medical College, Dibrugarh.
3. The B. J. Medical College, Ahmedabad.
4. The B. J. Medical College, Poona.

\* Five new medical colleges were to be started from the academic year 1957-58 at Kozhikode, Bhopal, Kanpur, Jamnagar and Jabalpur.

5. The Baroda Medical College, Baroda.
6. The Christian Medical College, Ludhiana.
7. The Christian Medical College, Vellore.
8. The Darbhanga Medical College, Laherisara (Bihar).
9. The Gajra Raja Medical College, Gwalior.
10. The Grant Medical College, Bombay.
11. The Guntur Medical College, Guntur.
12. The Kasturba Medical College, Manipal (South Kanara Dt., Mysore State).
13. The Lady Hardinge Medical College for Women, New Delhi.
14. The Madras Medical College, Madras.
15. The Mahatma Gandhi Memorial Medical College, Indore.
16. The Medical College, Kanpur.
17. The Amritsar Medical College, Amritsar.
18. The Calcutta Medical College, Calcutta.
19. The University Medical College, Mysore.
20. The Nagpur Medical College, Nagpur.
21. The Government Medical College, Patiala.
22. The Trivandrum Medical College, Trivandrum.
23. The National Medical Institute, Calcutta.
24. The Nilratan Sarkar Medical College, Calcutta.
25. The Osmania Medical College, Hyderabad.
26. The Prince of Wales Medical College, Patna.
27. The R. G. Kar Medical College, Calcutta.
28. The Sarojini Naidu Medical College, Agra.
29. The Sawai Man Singh Medical College, Jaipur.
30. The Seth G. S. Medical College, Bombay.
31. The Sriram Chandra Bhang Medical College, Cuttack.
32. The Stanley Medical College, Madras.
33. The Topiwala National Medical College, Bombay.
34. The Bangalore Medical College, Bangalore.
35. The Bhopal Medical College, Bhopal.
36. The Jabalpur Medical College, Jabalpur.
37. The Jamnagar Medical College, Jamnagar.
38. The King George's Medical College, Lucknow.
39. The Madurai Medical College, Madurai.
40. All India Institute of Medical Sciences, Safdarjung, New Delhi.
41. Aurangabad Medical College, Aurangabad (Bombay).
42. Medical College, Kurnool (Andhra).
43. Medical College, Pondicherry.

#### Medical Schools

1. The Arya Medical School, Ludhiana.
2. The University Medical School, Bangalore.

#### Dental Colleges

1. The Calcutta Dental College, Calcutta.
2. The Dental College, Amritsar.
3. The King George's Medical College's (Dental Wing), Lucknow.
4. The Madras Medical College (Dental Wing), Madras.
5. The Nair Hospital Dental College, Bombay.
6. The Sir Currimbhoy Ebrahim Memorial Hospital and Dental College, Bombay.

#### Others

1. The All-India Institute of Hygiene and Public Health, Calcutta.
2. The College of Nursing, Delhi.
3. The Malaria Institute of India, Delhi.
4. The School of Tropical Medicine, Calcutta.
5. Sri Vallabhbhai Patel Chest Institute, Delhi.
6. All-India Institute of Mental Health, Bangalore.

### AYURVEDIC INSTITUTIONS

- Government Ayurvedic College, Gauhati.
- Ajodhya Sheekumari Ayurvedic College, Begusarai, Bihar.
- Government Ayurvedic College, Patna.
- Government Tibbi College, Patna.
- Shree Ganga Ayurvedic Mahavidyalaya, Madhubani (Bihar).
- Sri S. N. Y. Aslaing Ayurvedic College, Bhagalpur (Bihar).
- Aryanga Vaidyak Mahavidyalaya, Satara (Bombay).
- Ayurveda Mahavidyalaya, Ahmednagar.
- Ayurveda Mahavidyalaya, Poona.
- B. A. Poddar (Ayurvedic) Medical College, Worli, Bombay.
- M. G. Ayurveda Mahavidyalaya, Nadiad (Bombay).
- O. H. Nazar Ayurveda Medical Mahavidyalaya, Surat (Bombay).
- Ayurvedic and Unani Tibbia College, Delhi.
- Government Ayurvedic College, Hyderabad.
- Nizam Government Tibbi College, Hyderabad.
- Government Ayurvedic College, Gwalior.
- Raj Kumar Singh Ayurvedic College, Indore.
- College of Indigenous Medicine, Madras.
- Government Ayurvedic and Unani College, Mysore.
- All India Institute of Mental Health, Bangalore.
- Gopabandhu Ayurveda Vidyapith, Puri (Orissa).
- Arya Medical School, Ludhiana.
- Dayanand Ayurvedic College, Jullundur.
- Government Ayurvedic College, Jaipur.
- S. G. A. S. Ayurveda Vidyalaya, Jamnagar.
- Ayurvedic College, Rishikul, Haridwar.
- Bundelkhand Ayurvedic College, Jhansi.
- Gurukul University, Kangri (Dist. Saharanpur, U. P.).
- Lalit Hari Ayurvedic College, Pilibhit (U. P.).
- Takmil-ut-Tib College, Lucknow.
- Unani Medical College, Allahabad.
- Ayurvediya Pratishthan, 123, Harish Mukherjee Road, Calcutta.
- D. N. De Homoeopathic Medical College and Hospital, 63, Upper Circular Road, Calcutta.
- Jamini Bhuvan Ashanga Ayurveda College, 170, Raja Dinendra Street, Calcutta.
- Pratap and Hering Memorial Homoeopathic College and Hospital, 14-1, Narkeldanga North Road, Calcutta.
- School of Tropical Medicine, Calcutta.
- Shyamadas Vaidya-hastapith, 204/3/1, Upper Circular Road, Calcutta.
- The Calcutta Homoeopathic Medical College and Hospital, 265, Upper Circular Road, Calcutta.
- The Midnapore Homoeopathic Medical College and Hospital, Midnapore.
- Vaidyak Pathshala, Contai, Midnapore.
- Vishwanath Ayurveda Vidyalyaya, Calcutta.

### SPECIAL TRAINING

Post-graduate medical education facilities are now available at the following institutions:

1. Andhra Medical College, Vishakapatnam—M.D. (clinical, pathology, bacteriology); M.Sc. (clinical); D.G.O.; D.V.; Dip. Dermatology; D.L.O.; D.O.; D.A.; M.Sc. (physiology, anatomy, biochemistry).
2. Grant Medical College, Bombay—M.D. (medicine, pathology, midwifery, gynaecology, pediatrics, T.B., pharmacology); M.S. (gen. surgery, ophthalmology, E.N.T., orthopaedics); D.P.H.; D.M.R.E.; D.P.M.; D.A.; D.V.D.; M.Sc.

(biochemistry); M.Sc. (microbiology); M.Sc. (medical).

3. College of Physicians and Surgeons, Bombay—D.O.M.S.; D.A.; D.D.V.; D.P.B.; D.G.O.; F.C.P.S.; D.P.M.; D.C.H.

4. Topiwala National Medical College, Bombay—M.D. (medicine, pathology, bacteriology, obstetrics, gynaecology, pediatrics); M.S. (surgery); B.Sc. (medical); M.Sc. (medical).

5. B. J. Medical College, Poona—M.D. (medicine), M.D. (midwifery, gynaecology); M.D. (pathology); M.D. (pharmacology); M.S. (surgery).

6. B. J. Medical College, Ahmedabad—M.D. (medicine); M.S.

7. Medical College, Nagpur—M.D. (medicine); M.S. (surgery); M.O. (obstetrics, gynaecology); M.Sc. (medical, anatomy, pharmacology, physiology, pathology, bacteriology).

8. Stanley Medical College, Madras—M.D. (gen. medicine); M.S. (gen. surgery); M.Sc. (anatomy, physiology, pharmacology); Ph.D. (anatomy).

9. Christian Medical College, Vellore (Madras State)—M.D. (medicine, pathology, bacteriology).

10. Medical College, Mysore—T.D.D.

11. Medical College, Amritsar—M.D.; M.S.; D.T.D.; D.O.M.S.

12. S. M. S. Medical College, Jaipur—M.D. (medical, pathology, bacteriology); M.S. (surgery); M.Sc. (anatomy, physiology, pharmacology).

13. All India Institute of Hygiene and Public Health, Calcutta—D.P.H., L.P.H., D.M.C.W. (Dip. in Maternity and Child Welfare); certificate in Maternal and Child Health; Dip. Diet; D.I.H.; Dip. in Nutrition; D.Sc. (Public Health).

14. Calcutta School of Tropical Medicine, Calcutta—D.T.M. & H.; L.T.M.

15. R. G. Kar Medical College, Calcutta—D.G.O., D.O.M.S.

16. Medical College, Agra—M.D.; M.S.; D.C.H.

17. Medical College, Lucknow—M.D. (medical, pathology, physics, forensic medicine, social med. and pub. health, pharmacology, tuberculosis, radiology); M.S. (surgical, ophthalmology, obstetrics, gynaecology, anatomy, orthomology, surgical, E.N.T.); D.M.R.E. (medical, radiology and electricity); D.L.O. (laryngology, otology); D.T.D. (tuberculosis); D.O.M.S. (ophthalmic, medicine and surgical); D.G.O. (gynaecology, obstetrics); D.C.P. (clinical pathology); D. Orth. Sur. (orthopaedic surgery).

18. Institute of Ophthalmology, Allgarh Muslim University, Allgarh—D.O.M.S.

19. Lady Hardings Medical College, New Delhi—M.D. (medicine, pathology, obstetrics, gynaecology); M.S.; M.Sc. and Ph.D. (anatomy, physiology, pharmacology).

20. Vallabhbhai Patel Chest Institute, Delhi—D.T.D.; M.Sc. and Ph.D.

21. Institute of Obstetrics and Gynaecology, Government Hospital for Women and Children, Madras—D.G.O., M.D. (Midwifery).

22. Institute of Venerology, Government General Hospital, Madras—D.V.

23. All India Institute of Mental Health, Bangalore—D.P.M., D.M.P.

24. Indian Cancer Research Centre, Bombay—Cancer (research and clinical work).

Training in nursing is offered, as already mentioned, in almost all hospitals. The Nursing Colleges at Delhi and Vellore offer higher training equivalent to the B.Sc. standard.

Health visitors are trained at centres in Bombay, Calcutta, Delhi, Hyderabad, Madras, Lucknow, Nagpur, Poona, Ludhiana, Amritsar, Vishakapatnam, Indore, Patna, Ranchi, Trivandrum.

Courses in malaria are conducted at the Malaria Institute of India.

## SOCIAL WELFARE IN INDIA

**T**HE period under British rule (1800-1947) witnessed a destruction of the older social structure in India. In the newer structure that emerged a number of reforms and institutions were introduced by bodies like the Brahmo Samaj (associated with the name of Raja Ram Mohan Roy), the Prarthana Samaj, the Deccan Education Society and the All-India Social Reform Association (Justice M. G. Ranade), the Ramkrishna Mission (Swami Vivekananda), the Servants of India Society (G. K. Gokhale) and the Arya Samaj (Dayanand Saraswati). Though these organisations were in the nature of religious orders, they took it as a part of their faith to serve the needy and the suffering. The Arya Samaj and the Ramkrishna Mission sponsored social reforms, established orphanages, widows' homes, free dispensaries and relief centres in periods of emergency. The Servants of India Society is especially notable for its ramifications in the fields of labour, tribal welfare, youth welfare and emergency and relief work. An impetus to women's welfare was given by D. K. Karve's Women's University and G. K. Devadhar's Seva Sadan in Poona.

During this period pioneering work in many neglected fields of service, e.g. founding homes, leper asylums and institutions for the maimed and the handicapped, was undertaken by Christian missionaries in the country.

By 1920 Mahatma Gandhi's contribution began to gain recognition throughout the country. He provided for a number of constructive social welfare programmes through organisations like the Harijan Sewak Sangh, All India Village Industries Association, Charkha Sangh, the Hindustani Nai Talim Sangh, Goseva Sangh, and the Kasturba Gandhi National Memorial Trust, etc. His constructive programme also included dignity of manual labour and labour welfare, prohibition of alcohol, drugs and gambling, Tribal welfare and leprosy relief.

The late '30s saw the formation of the first popular Ministries in eleven provinces in India. During the same period professional social work began to be recognised with the establishment of the Tata Institute of Social Sciences in 1936.

The new profession generally covers the following fields of social work: Community Welfare Services; Family, Child and Youth Welfare Service; Public Welfare Administration; Social Security Services; Services for the mal-adjusted and handicapped groups; Social Defence and Correctional Administration; Services for Emergency Relief and Rehabilitation; Social Legislation and Social Action; Social Research; Training in Social Work; Tribal Welfare and Rural Welfare.

The establishment of the Indian Conference of Social Work at a meeting of over 450 social workers assembled in Bombay in November 1947 marks a significant development in the field of social work in India. The Conference undertakes and promotes the study of social problems and endeavours to foster co-operation, collaboration and co-ordination amongst social service agencies in India and abroad. It has held sessions in Bombay (1947), Madras (1948), Delhi (1949), Jamsledpur (1950), Calcutta (1951), Hyderabad (1953), Lucknow (1954), Bangalore (1955) and Jaipur (1956). In 1952, it enabled the International Conference of Social Work to hold its Sixth Session at Madras—the first International Conference on Asian soil. In 1955, a very successful Seminar on "Casteism and Removal of Untouchability" was organized by the Indian Conference of Social Work. This Seminar was given very wide publicity both in India and abroad.

Another national seminar on slum clearance was scheduled to be held in Bombay in May 1957.

The aspirations of the Indian people towards State responsibility for social welfare are reflected in Part IV of the Constitution which lays down the "Directive Principles of State Policy", as follows:—

"The State shall strive to promote the welfare of the people by securing and protecting as effectively as it may, a social order in which justice, social, economic, and political, shall inform all the institutions of the national life."

### SOCIAL LEGISLATION

Social legislation on an all-India scale dates back to 1843 when the first law abolishing slavery was passed. The earlier laws sought to reform the evil social practices existing at the time, practices such as Sati, infanticide, and child marriage. Later, social legislation began to assume a more positive and constructive role. Laws for better working conditions in factories, laws providing maternity benefits, for the abolition of traffic in women and children, and laws for the protection and care of destitute and delinquent children have all received attention in the first half of this century.

Since 1947 there has been an unprecedented increase in social legislation both at the national and the State levels.

Some of the laws which are applicable to the entire country are the Industrial Disputes Act, 1947, The Factories Act, 1948; The Coal Mines Provident Fund and Bonus Schemes Act, 1948, Minimum Wages Act, 1948; Employees State Insurance Act, 1948, The Plantation Labour Act, 1951, The Mines Act and the Provident Fund Act, 1952.

Two Acts were passed to remove caste discrimination, namely, the Caste Disabilities Removal Act XXI of 1950 and the Untouchability Offences Act XXII of 1955.

Three laws introducing changes in Hindu law governing Marriage and Succession have been passed since 1954, namely, The Special Marriage Act 43 of 1954; The Hindu Marriage Act XXV of 1955 and the Hindu Succession Act XXX of 1956. (See also 'Laws of 1955').

According to the Constitution of India, social legislation can be formulated and implemented both by the Central and State Governments. Most social subjects are on the concurrent list, i.e. they can be legislated upon by the Central or State Governments. These subjects include marriage and divorce, social security and social insurance, economic and social planning, welfare of labour, charities and charitable institutions, vagrancy and mental deficiency.

Prison Reform Bills and Borstal Institutions are subjects in the State list. An informative volume entitled "Social Legislation", which contains detailed information regarding the laws pertaining to women, children, handicapped groups and social defence was published in 1956 by the Planning Commission of the Government of India.

### GOVERNMENT SET-UP

In India, the Central Government does not have a special Ministry or department for social welfare. The Ministries of Health, Education, Labour, Home, Rehabilitation, Agriculture and the Office of the Commissioner for Scheduled Castes and Tribes undertake several important social services. The States of Andhra Pradesh, Madhya Pradesh, Punjab, Rajasthan, Uttar Pradesh and West Bengal have Departments of Social Welfare, whereas Madras possesses a Women's Welfare Department.

The expenditure allocated to Social Services in the 1st Five-Year Plan period was 547 crores of rupees out of a total outlay of 2,356 crores, which works out to 23 per cent, whereas in the Second Five-Year Plan, out of a total outlay of 4,800 crores of rupees 940 crores that is 20 per cent has been earmarked for Social Services, including Housing, Rehabilitation, etc.

To the above amount we could also add the provision of 90 crores in the First Plan period for community development and 200 crores in the Second Plan period, both of which work out to four per cent of the total outlay, respectively.

PLAN OUTLAY BY MAJOR HEADS OF DEVELOPMENT

	First Five-Year Plan		Second Five-Year Plan	
	Total Provision (Rs. crores)	Per cent	Total Provision (Rs. crores)	Per cent

(e) Rehabilitation .. ..	136	6	90	2
<b>Total .. ..</b>	<b>547</b>	<b>23</b>	<b>946</b>	<b>20</b>

### VOLUNTARY SOCIAL WORK

The groups of voluntary social work in India largely fall under the following heads: Administrators; Professional social workers; Missionaries; The Gandhian social workers; and Voluntary social workers belonging to the various private agencies.

Of these the religious believe in the traditional form of charity, the Missionaries in institutionalised social work, the Gandhian in the 14-point constructive programme.

The group of professionally trained social workers is small though most compact. This group consists of some 1,000 alumni and teachers of the following post-graduate schools of social work in India, viz., The Tata Institute of Social Sciences, Devnar, Chembur, Bombay 38; Delhi University School of Social Work, 3, University Road, Delhi 8, the Faculty of Social Work of the M. S. University of Baroda, Camp Road, Baroda; Shri Kashi Vidyapeeth, Banaras, Chavni, Banaras 2; Madras School of Social Work, 1, Jarrett's Gardens (upper gat), 23-24,

Casa Major Road, Egmore, Madras 8; The All India Institute of Social Welfare and Business Management, College Square West, Calcutta 7. The J. K. Institute of Sociology and Human Relations, Lucknow University, Lucknow also imparts training in social work, while the Patna University has a department to train social workers for industrial welfare work.

Voluntary Social Service Agencies operating on an All-India basis are mentioned below:—

#### Child Welfare

Balkan-Ji-Bari (6-A, Cooperage, Bombay 1); Society for the Protection of Children in India (2-B, Camac Street, Calcutta); Indian Council for Child Welfare, 5, Sikandra Road, New Delhi; Indian Council for Child Education (Sumanas, 39 Edward Elliotts Road, Madras 4).

#### Youth Welfare

Y.M.C.A. (5, Russel Street, Calcutta 16); Y.W.C.A. (Parliament Road, New Delhi); Bharat Scouts and Guides Association (Regal Building, Parliament Street, New Delhi).

#### Women's and Family Welfare

All India Women's Conference (5, Sikandra Road, New Delhi); Family Planning Association of India (Metropolitan House, Dadabhai Naorji Road, Bombay 1); National Council of Women in India (C Block, Western House, Curzon Road, New Delhi); Kasturba Gandhi National Memorial Trust (Kasturba Gram P.O. Indore, Madhya Pradesh).

#### Health

Tuberculosis Association of India (20, Red Cross Road, New Delhi 2); Indian Red Cross Society (20, Red Cross Road, New Delhi 2); All India Cancer Prevention Society (Tata Memorial Hospital, Parel, Bombay 13); Hind Kusht Niwaran Sangh (Red Cross Road, New Delhi); Akhil Bharat Sharirik Sikshan Mahamandal (Tilak Road, Nagpur, Bombay State).

#### Rehabilitation of the Handicapped

Convention of the Teachers of the Deaf in India (50, Bondel Road, Ballygunj, Calcutta); All India Light House for the Blind (89, Elliot Road, Calcutta); National Association for the Blind (Victoria Memorial Blind School, Tardeo, Bombay 7); All India Blind Relief Society (11-F, Jajati Nagar, New Delhi).

#### Rural Welfare

Sarva Seva Sangh (Maganwadi, Wardha, Bombay State); India Village Service (I.V.S. House, Marhera, Dist Etah, U.P.).

#### General Social Welfare

Servants of India Society (Poona 4); Ramkrishna Mission (Belur, Dist Howrah); Gandhi Memorial Fund (5, Mansingh Road, New Delhi); Salvation Army (Moreland Road, Bombay 8); Friends' Service Unit (1, Upperwood Street, Calcutta 16); All India Seva Samiti (Seva Samiti Building, Allahabad); Indian Co-operative Union Ltd. (American Barracks, Queensway, New Delhi).

#### Rural Women's Welfare

Kasturba Gandhi National Memorial Trust (Kasturbagram, Indore, Madhya Pradesh).

#### Relief and Rehabilitation

United Council of Relief and Welfare (Rashtrapati Bhavan, New Delhi).

#### Social Education

Indian Adult Education Society (30, Faiz Bazar, Delhi); Nai Talimi Sangh (Wardha, M.P.); Jamia Millia (Okhla, Delhi).

#### Welfare of Under-Privileged Groups

Harijan Sewak Sangh (Kingsway, Delhi); Bhartiya Adimjati Sevak Sangh (Kingsway, Delhi).

#### Social Defence

All India Crime Prevention Society (Behari Niwas, Kanpur, U.P.); Association for Moral and Social Hygiene in India (Room No. 211, 'P' Block, Raisina Road, New Delhi).

#### Co-ordination of Social Welfare

The national organization for the co-ordination of all welfare services is the Indian Conference of Social Work located at 6/A, Cooperage, Bombay 1.

There is also a South-East Asia Regional Office of the International Conference of Social Work which has been established in conjunction with the Indian Conference of Social Work in Bombay.

#### International Welfare Agencies in India

The following are some of the International agencies and organizations working in the country: International Conference of Social Work (South East Asia Regional Office (6/A, Cooperage, Bombay-1); Ford Foundation (32, Ferozshah Road, New Delhi); World Health Organisation (S.E.A. Office, Patia's House, Harding Avenue, New Delhi); Rockefeller Foundation (Room No. 16, Indian Red Cross Society, Red Cross Road, New Delhi); International Labour Organisation, Indian Branch (Mandi House, New Delhi); International Union for Child Welfare (Consultant for Far East Asia, Rooms Nos. 14 & 15, Block A, Barracks B, Queensway, New Delhi); United Nations International Children's Emergency Fund (Patia's House, Harding Avenue, New Delhi); United Nations Educational, Scientific and Cultural Organization (Old Mill Road, New Delhi); Food and Agricultural Organization, UNO.

#### Bhoodan Movement

Special mention must be made of the Bhoodan Movement initiated by Acharya Vinoba Bhave, one of the ablest disciples of Gandhiji. He is effecting a silent but nevertheless remarkable social revolution within the country by the voluntary gift of land (Bhoodan), wealth (Samattidan), labour (Shramdan) and life (Jeevandan).

#### RECENT DEVELOPMENTS

The Hyderabad State Branch (now Andhra) of the Indian Conference of Social Work has established an Institute of Radiology in Hyderabad at a cost of Rs. 10 lakhs and is sponsoring another Baffle to get more money for the same purpose.

The Madras State Branch has started a School of Social Work, the only post-graduate institution of its kind in South India, as well as a Juvenile Service Bureau.

The Children's Aid Society, Bombay, has initiated a Juvenile Service Bureau for Bombay City, and through a grant from the Central Social Welfare Board, a Bureau of Delinquency Statistics and Research, which has prepared a detailed Report on this subject.

The Union Ministry of Health has decided to encourage Medical Colleges to employ Medical Social Workers and Occupational Therapy Workers by granting them substantial financial assistance for the purpose.

A significant development in the movement for planned parenthood in India has been the active interest taken by the Municipalities of Bombay, Bangalore and Madras in incorporating family planning services in their welfare programmes. Several large industrial concerns are also working in this direction.

An important conference, at which 73 Indian social workers, social scientists and administrators played an important role, was the 7th Session of the International Conference of Social Work held in Toronto, Canada, in June-July, 1954.

The 3rd annual conference of the All India Council of Labour and Welfare officers was held at Nagpur in December 1955, to discuss various questions connected with labour welfare.

An annual session of the Association for Moral & Social Hygiene was held at Jaipur in January, 1956.

The First National Conference on Child Welfare was held at Delhi in May 1956.

In May 1956, the Indian Conference of Social Work submitted a Memorandum to the Prime Minister on the creation of a Ministry of Social Welfare at the Centre and Departments of Social Welfare in all the States. The main objective of the Memorandum is to secure the establishment of a single channel for welfare administration.

The Indian Conference has also undertaken a research survey of beggars in Bombay city, which is financed by a grant-in-aid from the Ministry of Education.

The Eighth Session of the International Conference of Social Work was held in Munich, Germany in August, 1956. About 8,000 delegates from 56 countries participated. The main theme for discussion was "The Impact of Industrialisation on the family and community". About 25 delegates from India under the leadership of Mrs. Hanra Mehta, President, Indian Conference of Social Work and the Vice-Chancellor, Baroda University attended the Conference.

The Prison Reforms Committees in Madras, Orissa and Kerala have published their Reports.

On 1st September 1956 a Family Planning Board was set up, by the Union Ministry of Health to direct the family planning programme in the Second Five-Year Plan period. The Board consists of members whose term of office will normally be for five years, under the Chairmanship of the Union Minister for Health.

The Government of India have made a provision of Rs. 497 lakhs (Rs. 400 lakhs at the Centre and 97 lakhs in the States) for family planning work. The Board will advise on various matters and the recommendations of the Board will be implemented by the Ministry of Health.

On 18th September 1956 the Government of India announced the creation of a new Ministry of Community Development with Mr. S. K. Dey as Minister.

The creation of the new Ministry will involve no major change in the present organisation of the Community Projects Administration, but it will work in full co-operation with the Ministry of Food and Agriculture, and, when necessary, will utilize the resources of that Ministry.

The co-ordinated development programmes under Community Projects and National Extension already cover 123,000 villages and a population of 80 million. It is proposed that the entire country should be served by the National Extension Service during the Second Plan period through the creation of 3,800 additional development blocks of which 1,120 should be converted into community development blocks.

With a provision of Rs. 200 crores community development should become one of the most important activities of Government during the Second Plan period.

#### CENTRAL SOCIAL WELFARE BOARD

The Central Social Welfare Board was set up in August 1953 as an autonomous body under the general administrative charge of the Union Ministry of Education to promote programmes of social welfare under the First Five-Year Plan. The two main functions of the Board are:—

1. To extend financial assistance to existing voluntary welfare organisations;
2. To sponsor and aid new welfare services in uncovered areas where they are needed.

Under its grant, the Board gave (up to 24th November, 1956) a total number of 4,081 grants of the total value of Rs. 1,47,28,189. Of these, 1,208 grants amounting to Rs. 42,66,197 were given to Child Welfare Organisations; for women's welfare programmes, 1,371 grants amounting to Rs. 48,14,125; for the Welfare of the handicapped persons, 299 grants of the order of Rs. 20,36,970; and for general welfare institutions, 1,208 grants of the total value of Rs. 36,10,897.

In fulfilment of its second function of sponsoring and aiding new services, the Board has sponsored the following schemes:—

1. Welfare Extension Projects for women and children in rural areas; 2. Urban Family Welfare projects for women in the low income groups in urban areas; 3. After-care programmes for women rescued from moral danger and for other persons discharged from correctional and non-correctional institutions.

A Welfare Extension Project consists of about 25 villages having 5 multipurpose welfare centres, each to cater for about five villages. The activities in the centres are:—

Balwadis (creches-cum-pre-basic schools), maternity services, craft classes, social education for women and recreational activities for women and children. There are nearly 350 such projects functioning all over the country.

From the beginning of January 1957, eleven Welfare Extension Projects were sanctioned by the Central Social Welfare Board—one in the Punjab, four in West Bengal, five in Bombay and one in Rajasthan bringing another 300 villages in these four States within the ambit of Welfare Extension work for women, children and the handicapped sections.

The Central Social Welfare Board will not thereafter entertain any proposals from State Social Welfare Advisory Boards for sanctioning new projects, except those in an advanced stage of consideration, in view of the scheme for the co-ordination of welfare activities for women and children in the community development blocks and Welfare Extension Projects proposed to be put into effect from about April 1957.

Under this scheme all new Welfare Extension Projects of the Board are to be located in Community Development Blocks and each such

project would be co-extensive with a community development block of 100 villages.

Of the Urban Family Welfare Projects, there are four of these functioning one each at Delhi, Vijayawada, Hyderabad and Poona. These are really industrial co-operatives for the manufacture of matches. The making of match boxes was selected because of the facilities for distribution of work to women in their homes for six out of the nine processes that go into the making of match boxes. A few women work in the factories also. The capacity of each co-operative is 500.

Under the Second Five Year Plan, a sum of Rs. three crores had been set apart for grants-in-aid to voluntary welfare organisations. Of these, some grants will be given on an assured basis for a continued period of five years to institutions of good standing and for new effort in undeveloped areas. For smaller organisations, grants will continue to be given on a year to year basis.

For Welfare Extension Projects, a provision of Rs. 8.6 crores is made in the Second Plan to provide half the cost of 1,320 projects which will include those already started.

The provision for Family Welfare Industrial Co-operatives would come from the plans of the Ministry of Commerce and Industry.

The Board has a training programme for gram sevikas and midwives which is entrusted to existing voluntary welfare organisations like the Kasturba Gandhi National Memorial Trust, and to hospitals, etc. The total number of persons to be trained would be about 6,600 gram sevikas and about 1,320 midwives. A total provision of Rs. 50 lakhs has been made for the purpose.

#### Social Welfare

Budget estimates for 1957-58 : Rs. two crores.

Revised estimates for 1956-57 : Rs. 1.25 crores.

#### Advisory Committees

The Central Social Welfare Board appointed an Advisory Committee under the chairmanship of Mr. M. S. Gore, Principal, Delhi School of

Social Work to report on the after-care programmes. The Committee came to the conclusion that the programme of Rehabilitation consists of two phases—institutional and post-institutional or after-care. After-care in its turn has two aspects, namely vocational rehabilitation and social rehabilitation.

The Committee has suggested a total outlay of Rs. 1,77,00,000 for after-care services during the Second Plan period.

The Board also appointed another Advisory Committee under the Chairmanship of Mrs. Dhanvanti Rama Rau to study the problem of social and moral hygiene in the country. The Report observes that prostitution is mainly an urban problem and as many as 66.5% of women come from the rural areas in the age group 10 to 29. The causes that lead to prostitution:—55.4% economic stress, 27.7% disharmony or family mal-adjustment, and 6.9% social and religious practices. Figures for kidnapping and seducing were not available.

It is the view of the Committee that vigilance or preventive work is very scanty and the standard of rescue work by voluntary institutions needs to be improved.

As a result of the recommendation of the Advisory Committees, appointed by the Board, a programme of social and moral hygiene and after-care services has been drawn up for the Second Plan. Under these, 80 institutions would be set up in groups of five each. One of the institutions will be for the rehabilitation of women rescued from moral danger. Two institutions will be for persons discharged from correctional institutions and the remaining two, for persons discharged from non-correctional institutions. In addition, there will be a shelter in each district to receive and transmit persons to these after-care centres. Each institution will have a production unit on a co-operative basis attached to it. The capacity of each institution will be a hundred and that of the production unit five hundred. This scheme will also be run by Managing Committees consisting of officials and non-officials. A total provision of Rs. 9.5 crores has been made in the plans of the appropriate Ministries in the Government of India and also in the State plans.

# THE CO-OPERATIVE MOVEMENT

**Note:** The States referred to in this article are the old States before the reorganization in November 1956, unless otherwise stated.

**T**HERE were 2,19,288 societies of all types at the end of 1954-55 as against 1,98,598 societies at the end of 1953-54. In the same period, the membership of primary societies rose from 151.80 lakhs on June 30, 1954 to 160.21 lakhs at the close of 1954-55 covering 21 per cent of the population. The total working capital of all types of societies showed an increase from Rs. 351.79 crores at the end of 1953-54 to Rs. 390.52 crores as on June 30, 1955.

The total advances made during 1954-55 showed a rise of 6.9 per cent over the previous year's figure. The increase was more marked in former Part 'A' States where the loans rose from Rs. 94.73 crores to Rs. 101.16 crores. There was a deterioration in the position of overdrafts being 17 per cent of the outstanding at the end of 1954-55 against 15.5 per cent at the close of 1953-54.

At the apex level the increased demand for funds was met out of increased borrowings from the Reserve Bank, Governments and commercial banks which in all amounted to Rs. 12.14 crores as against Rs. 10.33 crores in the previous year. The investments of the State co-operative banks amounted to Rs. 14.38 crores as against Rs. 13.06 crores and of the Central banks amounted to Rs. 19.88 crores as against Rs. 18.84 crores.

The number of agricultural credit societies, which constitute the base of the co-operative credit structure in the country, increased from 1,29,951 on June 30, 1954, to 1,43,320 at the end of 1954-55, their membership and working capital respectively being 65,65,416 and Rs. 62.93 crores. The upward trend in fresh advances which was noticed in the preceding year was maintained during the year under report being Rs. 35.48 crores as against Rs. 29.64 crores. Overdrafts amounting to Rs. 14.70 crores formed 30.3 per cent of the outstanding loans. They were especially heavy in Bhopal (86 per cent).

The working capital of all types of societies were 11 per cent higher at Rs. 390.52 crores as on June 30, 1955, as against Rs. 351.79 crores as at the close of 1953-54. Of this, deposits formed 38.2 per cent and owned funds 31 per cent.

Co-operative societies in the long-term credit sector are most unevenly distributed among different States. There were several States where there were no arrangements for long-term agricultural finance and certain States where the arrangements were inadequate. Consequently at the end of 1954-55 the number of central land mortgage banks (excluding the Land Mortgage Banking Section of the Madhya Pradesh Co-operative Bank) was unchanged at nine as in the previous year and twelve States had primary land mortgage banks. Of the total number of 292 primary land mortgage banks, as many as 56 were in Andhra, 73 in Madras and 83 in Mysore. Central land mortgage banks advanced fresh loans to the tune of Rs. 2.43 crores during the year as against Rs. 1.92 crores in 1953-54. Debentures of the value of Rs. 12.71 crores were in circulation at the end of 1954-55 as against Rs. 11.45 crores in the preceding year. Andhra and Madras between themselves accounted for nearly 63 per cent of the total debentures.

Agricultural non-credit societies showed a decline in their number and membership at 30,197 and 24,94,508, respectively on June 30, 1955, as against 30,306 and 25,11,386 at the end of the previous year. So also their working capital recorded a fall from Rs. 21.54 crores to Rs. 20.72 crores and their sales from Rs. 33.74 crores to Rs. 27.04 crores.

During 1954-55, 2,593 societies were brought under liquidation as against 3,496 societies in the previous year.

At the end of the year, 13,639 societies were under liquidation as against 12,938 at the close of June 1954, with liabilities amounting to Rs. 4.07 crores and assets to Rs. 3.72 crores.

During the year under review, profits of practically all types of co-operative societies showed a general improvement. While the primary non-credit societies continued to register losses, though of a lesser extent, the State and Central non-credit societies, which had suffered losses in 1953-54, were able to earn a profit. The net profit in 1954-55 of all the societies amounted to Rs. 271.52 crores as against Rs. 167.79 crores in 1953-54.

## MAIN FACTS

The main position as at the end of 1954-55 is as follows:

Total number of Co-operative societies, 2,19,288; the total number of agricultural societies, 1,81,911; non-agricultural societies, 33,614.

If we take the average size of an Indian family as 5 this means that about 80.1 million people were served by co-operative societies. The percentage of the population served works out at 21.

Total membership, 1,60,20,681; membership of agricultural societies, 1,00,22,360; membership of non-agricultural societies, 59,98,321.

Total number of Central Societies, 517 (excluding Bhopal State Co-operative Bank); of supervisory unions, 547; of provincial and central non-credit societies, 2,659.

Total membership of Central Societies, 3,08,294 (excluding data for Bhopal); membership of supervising unions, 76,086; membership of provincial and central non-credit societies, 18,27,601.

Total number of agr. credit societies, 1,43,320; number of non-agr. credit societies, 9,348; number of agr. non-credit societies, 30,197; number of non-agr. non-credit societies, 24,237.

Total membership of agr. credit societies, 65,65,416; membership of non-agr. credit societies, 28,47,944; membership of agr. non-credit societies, 24,91,508; membership of non-agricultural non-credit societies, 28,95,855.

**Note:** All the figures below are in lakhs of rupees. Working capital (1955 June), 390.51 66; Paid-up share capital, 64.72-72; Loans and deposits from members, 30.40 98; Loans and deposits from societies, 20.44-65; From Provincial or Central Banks, 68.08-78; From Government, 20.16-25; From non-members and other sources, 105.61-93; Borrowings of land mortgage banks and societies, 24.05-35; Reserve Fund, 56.10 99. Loans to individuals, 11.15 17; Loans repaid by individuals, 99.14 88; Loans outstanding against individuals, 1.24-33.74; Loans overdue from individuals, 21.82-12.

## LAND MORTGAGE BANKS

The position about central land mortgage banks is as follows (Rs. in lakhs):

No. of banks, 9; no. of individual members, 65,418; no. of bank members, 475; share capital, 60.83; funds, 48.00; working capital, 15.78.83; loans due at end of year, 11.62.20.

The position about primary land mortgage banks is as follows: no. of banks, 292; no. of members, 2,90,931; share capital, 77.95; funds, 16.36; working capital, 10.41-97; loans due at end of year, 9.51-06.

## CENTRAL FINANCING AGENCIES

The Central financing agencies are of two types, the central bank at the headquarters of a district and the provincial bank at the headquarters of the State.

The position about provincial banks is as follows (Rs. in lakhs): no. of provincial banks, 23; no. of offices, 166; no. of individual members, 11,188; no. of banks and societies which are members, 25,106; share capital, 3.23-62; reserve fund, 1.39-24; bad debt reserves, 72.68; other funds, 1.18-92; working capital, 47.62-63; loans to individuals, 7.45-99; loans to societies, 42.77-83; investments, 14.38-36 (in addition, there was a State Co-operative Bank in Bhopal with a membership of three individuals and 33 banks and societies; a share capital of Rs. 5.28 lakhs; and a working capital of Rs. 5.86 lakhs).

The position about central banks, (Rs. in lakhs): No. of banks, 485; no. of offices, 811; share capital, 6.92-16; reserve fund, 3.17-41; bad debt reserve, 1.13-18; other funds, 1.82-99; working capital, 73.69-37; no. of individual members, 1,32,272; no. of banks and societies which are members, 1,39,728; loans advanced to individuals, 17.84-60; loans to societies and banks, 51.32-18; investments, 19.88-46.

The rate of interest on borrowings and lendings varies from State to State.

## NON-AGRICULTURAL CREDIT SOCIETIES

The position about the non-agricultural credit societies is as follows (Rs. in lakhs):

No. of societies, 9,348; number of members, 28,47,944; share capital, 17.43-83; Reserve fund, 4.72-44; other funds, 2.85-79; working capital, 78.31-66; loans due at end of year, 54.97-82; value of goods marketed, 2.77-46.

## NON-CREDIT MOVEMENT

The position about the provincial non-credit societies (marketing unions) is as follows (Rs. in lakhs):

No. of societies, 17; no. of individual members, 3,058; no. of societies which are members, 3,431; share capital, 26.81; funds, 96.65; working capital, 4.96-11; goods sold, 3.42-16.

The position about other provincial non-credit societies (whole-sale stores and supply unions) is as follows (Rs. in lakhs):

No. of societies, 10; no. of individual members, 2,132; no. of societies which are members, 684; share capital, 3.57; funds, 12.82; working capital, 21.49; goods sold, 12.86.

The position about yet other provincial non-credit societies (industrial unions) is as follows (Rs. in lakhs):

No. of societies, 13; no. of individual members, 927; no. of societies which are members, 1,443; share capital, 21.05; funds, 15.33; working capital, 79.19; goods sold, 49.07.

The position of another type of provincial non-credit societies (housing societies) is as follows (Rs. in lakhs):

No. of societies, 3; no. of individual members, 63; no. of societies which are members, 447; share capital, 68.29; funds, 1.02; working capital, 80.41; loans advanced, 26.47.

The position about the rest of the provincial non-credit societies is as follows (Rs. in lakhs):

No. of societies, 17; no. of individual members, 1,741; no. of societies which are members, 1,983; share capital, 10.21; funds, 54.21; working capital, 2.10-88; goods sold, 3.61-58.

## CENTRAL NON-CREDIT SOCIETIES

The position is as follows (Rs. in lakhs):

Total no. 2,599; no. of marketing unions or federations, 2,233; whole-sale stores and supply unions, 98; industrial unions, 107; milk unions, 63; other types, 97; no. of individual members, 17,43,072; no. of societies which are members, 68,710; paid-up capital, 3.88-16; funds, 49.17-70; working capital, 17.55-24; goods sold, 50.44-66.

## AGRICULTURAL NON-CREDIT SOCIETIES

Total no. of societies, 30,197; purchase and sale societies, 4,150; production and sale societies, 14,184; production societies, 6,499; social services societies, 5,236; housing 128; no. of members 24.96 lakhs; share capital, Rs. 5.71-78 lakhs; funds, Rs. 4.60-60 lakhs; working capital, Rs. 20.72-14 lakhs; loans made during year, Rs. 8.88-41 lakhs; value of goods sold, Rs. 27.74-42 lakhs.

## NON-AGRICULTURAL NON-CREDIT SOCIETIES

Total no. of societies, 24,266; purchase and sale societies, 8,182; production and sale societies, 9,852; production societies, 1,863; social services

societies, 2,782; housing societies, 2,118; insurance, 29; no. of members, 31.50 lakhs; share capital, Rs. 10,92.38 lakhs; funds, Rs. 15,11.82 lakhs; working capital, Rs. 62,54.55 lakhs; value of goods sold, Rs. 31,65.55 lakhs.

#### INSURANCE SOCIETIES

The position of life insurance societies is as follows (Rs. in lakhs):

No. of societies, 23; no. of members, 2,51,091; no. of policies, 2,36,235; sum assured, 25,12.48; premium income, 1,23.23; life fund, 6,46.00; assets, 7,16.36; cost of management, 29.70.

#### SUPERVISING UNIONS

The position about supervising unions is as follows:

No. of unions, 563; societies affiliated, 36,673; individual members of societies affiliated, 29.80 lakhs; working capital of affiliated societies, Rs. 43,29.94 lakhs.

The position about provincial unions and institutes is as follows:

No. of unions, 24; primary affiliated societies, 38,700; central affiliated societies, 713; individual members, 808; expenditure Rs. 41.45 lakhs.

#### FINANCIAL STRUCTURE

The total working capital in the movement on June 30, 1955 was Rs. 390.52 crores (excluding data relating to the Bhopal State Co-op. Bank), composed of owned funds 120.84 crores, deposits 149.32 crores, debentures 12.79 crores, and loans 96.30 crores.

This working capital was spread among different types of institutions as under :—

Institutions	No.	* Working Capital (Rs. in lakhs)
Provincial Banks .. .. .	24	47,62.53
Central Banks and Banking unions .. .. .	485	73,69.37
Primary Agricultural Credit Societies .. .. .	1,43,320	62,92.70
Primary Non-Agricultural Credit Societies .. .. .	9,348	78,31.66
Credit—Total .. .. .	1,53,177	262,56.26
Provincial Non-credit Societies .. .. .	60	8,91.09
Central Non-credit Societies .. .. .	2,599	17,55.24
Primary Agricultural Non-credit Societies .. .. .	30,197	20,72.14
Primary Non-agricultural Non-credit Societies .. .. .	24,237	52,54.55
Non-credit—Total .. .. .	57,093	99,73.02
Central Land Mortgage Banks .. .. .	9	15,78.82
Primary Land Mortgage Banks .. .. .	292	10,41.97
Land Mortgage—Total .. .. .	301	26,20.79
GRAND TOTAL .. .. .	2,10,571*	388,50.07†

\* The figure does not include 8,102 grain banks and 563 supervisory or educational societies.

† The figure does not include working capital of grain banks which amounted to Rs. 2,01.59 lakhs.

The following tables give the position as regards Co-operative Societies for the year 1954-55 :—

State*	CENTRAL										AGRICULTURAL

## LABOUR

[Where any statistics about States are given, or any reference to States made, the States mentioned are those existing before the reorganization in November 1956].

**THE** achievement of Independence and the emergence of India as a Republic wedded to the idea of a welfare State has made the welfare of the working classes a prime responsibility of the State. Several administrative and legislative measures of far-reaching significance have already been introduced in the country. Health, education, housing and social welfare for the masses find a prominent place in the First and Second Five-Year Plans.

The general position in 1953-54 was as follows:—

Total Labour Force .. .. .	139,300,000
(men 98,700,000; women 40,600,000).	
No. employed in factories coming under the Factories Act of 1948 .. .. .	2,564,534
No. of trade unions on register .. .. .	6,034
No. of trade unions which submitted returns of membership .. .. .	3,300
No. of members of trade unions submitting returns .. .. .	2,113,904

The Central co-ordinating authority in India for questions connected with labour legislation is the Ministry of Labour of the Government of India with the Labour Minister in charge. The administration of matters connected with the English and Indian Merchant Shipping Acts, the Mercantile Marine Department and Indian Seamen is with the Ministry of Transport. In respect of all the Railways, the Labour Minister is responsible for the administration of the Payment of Wages Act, 1936, trade disputes, hours of work for employees not covered by the Factories Act and regulation of employment of children. He is also responsible for regulation of labour and safety in respect of mines and oilfields; trade disputes in industries, businesses or undertakings carried on by the Central Government, and inter-State migration.

Among the more important Acts that govern labour conditions and relations in India are the following: 1. Indian Factories Act, 1948; 2. Indian Mines Act; 3. Payment of Wages Act; 4. Minimum Wages Act; 5. Workmen's Compensation Act; 6. Maternity Benefit Act (States); 7. Indian Trades Union Act; 8. Industrial Disputes Act; 9. Industrial Disputes (Appellate Tribunal) Act; 10. Shop Assistants Act (States); 11. Employees' State Insurance Act; 12. Collection of Statistics Act; 13. Employees Provident Funds Act.

### FACTORIES ACT, 1948

The Act covers all industrial establishments employing 10 or more workers and using power and establishments employing 20 or more workers and not using power. The State Governments have been empowered to apply the provisions of the Act to any premises, irrespective of the number of persons employed, where a manufacturing process is carried on with or without the aid of power, except where the work is done by the worker solely with the aid of his family.

The Act prescribes that every factory should be kept clean and free from effluvia arising from drains, privies, etc., and lays down stipulations regarding sweeping, cleaning, disinfecting, white-washing, ventilation, temperature, drinking water, latrines, etc.

In existing factories 350 cubic feet of space should be provided for every workman. In new factories to be built the space for each workman should be 500 cubic feet.

Elaborate provision regarding safety such as fencing of machinery, etc., has been laid down. Women and children are prohibited from employment on certain types of machinery.

Washing facilities for the workers, appliances for first-aid, rest shelters, canteens, etc., are prescribed under the Act. In every factory where 500 or more workers are employed the occupier shall employ Welfare Officers.

Weekly hours of work have been fixed at 48 and daily hours at 9. The maximum spread-over allowed is 10½ hours. No worker shall work for more than 5 hours (later amended to 6) before he has had an interval for rest of at least half an hour. Payment for overtime has been prescribed at double ordinary rate of wages. No woman shall be employed in any factory except between the hours of 6 a.m. and 7 p.m. A weekly day of rest has also been prescribed.

No child who has not completed his fourteenth year shall be required or allowed to work in any factory. A child who has completed his fourteenth year or an adolescent (a person who has not completed his eighteenth year) shall not be allowed to work in a factory unless a certificate of fitness by a certifying surgeon is in the custody of the manager of the factory and he carries while at work a token giving reference to such certificate. No 'child' shall be employed or permitted to work in any factory for more than 4½ hours in a day or between the hours of 7 p.m. and 6 a.m.

Every adult worker who has completed a period of 12 months' continuous service in a factory (later amended, see below) shall be allowed during the subsequent period of 12 months leave with wages including dearness allowance for a period calculated at the rate of one day for every 20 days of work performed by him during the previous 12 months, subject to a minimum of 10 days. In the case of children the leave should be at the rate of one day for every 15 days of work subject to a minimum of 14 days.

Where any worker in a factory contracts any disease specified in the schedule appended to the Act, the manager of the factory shall send notice thereof to such authorities, and in such form and within such time, as may be prescribed.

The administration of the Act is left to the State Governments. The Central Government have set up an advisory organisation, namely the Office of the Chief Adviser, Factories.

The Act was amended in 1954. Under this amendment eligibility for leave with pay would be 240 days' service during a calendar year. Proportionate leave will be granted to those whose service starts after the beginning of the calendar year.

The annual leave with wages will be exclusive of holidays during or immediately before or after the period of leave.

The leave can be carried forward from one calendar year to another provided the maximum does not exceed 30 days in the case of an adult and 40 days in the case of a child.

No prior notice will be necessary when a worker requires leave to cover a period of illness.

The Act permits six hours' work at a stretch without any interval when the total number of hours to be worked on any day in a shift does not exceed six.

It also permits newspaper printing presses to work their entire night shift of six hours at a stretch.

It allows a worker a maximum of 50 overtime hours in a quarter year which is deemed to have begun on the first day of January, April, July or October.

It enables continuous employment of workers in case some of the subsequent shift workers do not turn up in time.

For the purpose of computing the rate of wages of a person who takes advantage of the concessional sale of foodgrains and other articles the basis will be the maximum ration admissible to a standard family of a specific number of consumption units.

Women and children are prohibited from working in factories at night.

Women and children are also prohibited from cleaning, lubricating or adjusting any prime mover of transmission machinery while it is in motion if such work exposes them to risk of injury.

### FACTORY STATISTICS

Under the provisions of the Factories Act, 1948, registered factories submit annual and half yearly returns on employment to the Chief Inspectors of Factories in the various States. All-India figures are compiled by the Labour Bureau and are published in the *Indian Labour Gazette*.

The number of factories on registers in the areas covered by the Part A States and of the States of Ajmer, Coorg, Delhi and Andamans during 1953 and 1954 was 30,458 and 30,053 respectively.

In the Part B States and the remaining Part C States there were in 1952, 4,794 factories with an average daily employment of 4,50,148.

The following table sets out the statistics of the average daily numbers of persons employed in factories during the year 1954.

#### WORKERS EMPLOYED 1954.

(Section 2m(i) and 2m(ii) factories only.)

Industry	Average Number of Workers Employed Daily
Processes allied to agriculture (Gins and Presses) .. .. .	93,352
Food except beverages .. .. .	310,326
Beverages .. .. .	5,135
Tobacco .. .. .	129,119
Textiles .. .. .	1,024,374
Footwear, other wearing apparels and made up textile goods .. .. .	13,088
Wood and Cork except furniture .. .. .	23,790
Furniture and fixture .. .. .	7,413
Paper and paper products .. .. .	24,079
Printing, publishing and allied industries .. .. .	69,996
Leather and leather products (except footwear) .. .. .	18,129
Rubber and rubber products .. .. .	23,228
Chemicals and Chemical products .. .. .	77,238
Products of petroleum and coal .. .. .	10,449
Non-metallic mineral products (except products of petroleum and coal) .. .. .	93,548
Basic metal industries .. .. .	86,781
Metal products (except machinery and transport equipment) .. .. .	52,918
Machinery (except electrical machinery) .. .. .	84,892
Electrical machinery, apparatus, appliances and supplies .. .. .	26,668
Transport equipment .. .. .	211,708
Miscellaneous industries .. .. .	125,697
Electricity, gas and steam .. .. .	24,865
Water and sanitary services .. .. .	4,849
Recreation services (Cinema Studios) .. .. .	3,582
Personal services (Laundries, dyeing, cleaning) .. .. .	19,316
<b>Total .. .. .</b>	<b>2,564,534</b>

Women formed 10.9 per cent of factory employment during 1954. Adolescents and children constituted 0.48 per cent and 0.18 per cent respectively.

## MINES ACT

With a view to amending and consolidating the law relating to the regulation of labour and safety in mines, the Mines Act, 1952 was passed and brought into force from July 1952. The Act extends to the whole of India except Jammu and Kashmir. The Act restricts the hours of work for adults to 9 per day and 48 per week above ground and 8 per day and 48 per week below ground. Overtime work below ground should be paid for at twice the ordinary rate and above ground at  $1\frac{1}{2}$  times the ordinary rate. The Act prohibits the employment of children below 15 years of age. It also prohibits the employment of women in any part of a mine which is below the ground level. Women can be employed above ground only between the hours of 6 a.m. and 7 p.m. Adolescents who have not completed 18 years of age are not

allowed to work underground unless they are certified fit to work as adults. Adolescents not certified fit to work as adults should not be allowed to work for more than  $4\frac{1}{2}$  hours a day. Annual leave with wages for a period of 14 days in a year in the case of monthly-paid employees and 7 days in the case of weekly-paid employees and piece workers is granted to the workers. Provisions relating to health and safety are laid down in the Act, besides which the Central Government may direct that the Health and Safety provisions under the Factories Act, 1948 shall apply to all mines and the precincts thereof.

### MINING STATISTICS

Figures are published in a Monthly Bulletin which is being issued by the Chief Inspector of Mines. We set out the available figures in the following table:—

EMPLOYMENT IN MINES  
(Figures for the Indian Union)

State*	1939	1951	1952	1953
Bihar .. .. .	170,384	247,780	240,666	235,542
West Bengal .. .. .	60,065	96,293	98,700	96,154
Madhya Pradesh .. .. .	41,666	75,994	86,225	104,975
Madras .. .. .	14,549	22,748	24,750	7,189
Others .. .. .	11,086	106,233	108,837	150,008
Total ..	298,650	549,048	559,196	593,868

The average daily number of workers employed in mines in 1954 was 568,254.

\* Old States existing before the reorganization on November 1, 1956.

## PAYMENT OF WAGES ACT

The Act applies only to wages and salaries which average below Rs. 200 per month.

For purposes of the Act 'wages' means all remuneration capable of being expressed in terms of money and includes any bonus or additional remuneration but does not include travelling allowances, employers' contribution to provident funds, gratuities payable on discharge or the value of housing or other services rendered to the worker.

No wage period is to exceed one month and wages are to be paid within a prescribed time not exceeding 10 days from the end of the wage period. All wages are to be paid in coin and, or, currency notes. Fines are not to exceed half anna in the rupee. Permissible deductions from wages have also been specified.

The administration of the Act, as far as factories are concerned, has been entrusted to the Inspectors of Factories in the States. In regard to persons employed in mines and in railways the responsibility of administering the Act rests upon the Chief Labour Commissioner (Central).

## MINIMUM WAGES ACT, 1948

The Act covers the following industries or types of establishments. Woollen carpet making or shawl weaving; rice, flour or dal mills; tobacco manufacturers (including bidi making); plantations; oil mills; employment under any local authority; road construction or building operations; stone breaking or stone crushing; lac manufacturers; mica works; public motor transport; tanneries and leather manufacturers; and agriculture. The appropriate Governments can extend the application of the Act to any industry wherein, in their opinion, minimum wages should statutorily be fixed.

The Act requires the Central or State Governments, as the case may be, to fix minimum rates of wages payable to persons employed in the industries mentioned above.

The Act provides for the fixation of minimum time rates, minimum piece rates, guaranteed time rates and overtime rates appropriate to different occupations, or localities and for adults, adolescents, children and apprentices. The minimum rate may consist of a basic rate and a cost of living allowance and/or cash value of concessions or it may be an all-inclusive rate.

The Act authorises the appropriate Governments to appoint Committees and Sub-Committees to hold inquiries and advise them to fix minimum rates of wages in respect of any scheduled employment or for the revision of these rates. They may also appoint an Advisory Board for co-ordinating the work of various Committees and also to advise Government generally in the matter of fixing or revising minimum rates of wages.

The Central Government have set up a Central Advisory Board for advising the Central and State Governments and for co-ordinating the work of State Advisory Boards. The Committees and Sub-Committees as well as the Central and State Advisory Boards are to consist of equal number of representatives of employers and employees, and of independent persons not exceeding a third of the total number of members.

The Central or the State Governments, as the case may be, can fix the number of hours of work per day, provide for a weekly holiday, etc., in regard to any employment in which minimum wages have been fixed under the Act.

## WORKMEN'S COMPENSATION ACT

Under the Act payment of compensation has been made obligatory on all employers whose employees come within its scope, and injured workmen or the dependents of those killed can obtain compensation in all cases where personal injury has been caused by

accident arising out of and in the course of employment and where, except in the case of injury resulting in death, the accident is not directly attributable to the workman having been at the time of the accident under the influence of drink or drugs or to wilful disobedience of rules or orders or wilful disregard of safety devices.

Besides bodily injuries the contracting of certain occupational diseases such as anthrax and mercury, lead and phosphorus poisoning were deemed and treated for the purposes of compensation, as injuries caused by accident, provided however, that the worker concerned was in the service of the same employer for more than six months.

The main provisions of the Workmen's Compensation Act as it stands today are as follows:

In all cases persons employed in an administrative or clerical capacity and those whose monthly earnings exceed Rs. 400 (except Railway Servants) are excluded.

As far as seamen are concerned, those employed on ships registered in India are covered. But if accidents take place within the three mile limit of the territorial waters the Act applies even to those employed on ships not registered in India.

Not only workmen employed within the precincts of a factory or a mine but also men engaged in any kind of work incidental to or connected with a factory or any mining operation are entitled to the benefits of the Act.

Any person who is covered by the Employees' State Insurance Act, 1948, and who is entitled to receive disablement or dependent's benefit from the Employees' State Insurance Corporation is not entitled to claim any compensation from the employer under this Act.

The amount of compensation payable depends, in the case of death, on the average monthly wages of the deceased workman and in the case of an injured workman both on the average monthly wages and the extent of disablement. The term 'wages' includes overtime pay and the value of any concessions or benefits in the form of food, clothing, free quarters, etc.

The amounts of compensation payable in the case of an injured workman whose monthly wages are not more than Rs. 10 are Rs. 500 for death, Rs. 700 for permanent total, and half the monthly wages for temporary disablement. For a workman whose monthly wages are between Rs. 50 and Rs. 60, the corresponding figures are Rs. 1,800, Rs. 2,520 and Rs. 15 respectively. The maxima for persons earning over Rs. 300 per month are Rs. 4,500, Rs. 6,300 and Rs. 30 per month respectively. In the case of minors the amounts of compensation for death and for permanent total disablement are at the uniform rate of Rs. 290 and Rs. 1,200 respectively, and half the monthly wage for temporary disablement.

The interests of dependents in cases of fatal accidents have been safeguarded by ensuring that (1) all cases of fatal accidents should be brought to the notice of the Commissioner; (2) in all cases where an employer admits liability the amount of compensation payable is to be promptly deposited with the Commissioner; and (3) in cases where the employer disclaims liability and there are good grounds for believing compensation to be payable, the dependents get the information necessary to enable them to judge if they should make a claim or not.

An employer is permitted to make to any dependent advances on account of compensation not exceeding an aggregate of one hundred rupees.

The Act is administered by Commissioners appointed by State Governments. In areas in which the Employees' State Insurance Scheme has been implemented, the payment of workmen's compensation is the responsibility of the E.S.I. Corporation.

## STATISTICS

An annual note on the working of the Act is published regularly in the *Indian Labour Gazette*. The latest available statistics on the subject will be found in the following table :—

Year	Total number of cases	Total compensation paid Rs.
1944 † .. ..	31,581	16,96,494
1945 .. ..	67,390	42,25,339

## MATERNITY BENEFIT ACT

The first Maternity Benefit Act in India was passed by the Government of the former Bombay State in 1929. After that, Maternity Benefit Acts were passed by the Governments of all the pre-reorganization Part 'A' States; Hyderabad, Madhya Bharat, Mysore, Rajasthan, Saurashtra and Travancore-Cochin among Part 'B' States; Ajmer, Bhopal, Delhi and Tripura among the pre-reorganization Part 'C' States and similar Acts. The West Bengal Legislature passed a separate Act in 1948 for women employed in tea-plantations under the title of the West Bengal Maternity Benefit (Tea Estates) Act, 1948. The Government of India passed the Mines Maternity Benefit Act in 1941.

The scope, qualifying conditions and rate of benefit are not uniform under the various State Acts. The Andhra, Assam, Madhya Pradesh, the Punjab, Orissa, Mysore, Hyderabad, Travancore-Cochin and Bhopal Acts apply to women employed in regulated factories. The other State Acts apply to women employed in non-seasonal factories only. The Bihar Act till recently applied to non-seasonal factories only, but by an amending Act passed in 1953 it now applies to all registered factories except those engaged in cotton ginning, jute pressing, manufacture of lac or sugar (including gur). The Bombay Act applies to women employed in regulated factories in certain notified districts and towns of the State. Women employed in plantations in Assam,

Travancore-Cochin and West Bengal only are entitled to maternity benefits under the respective Acts.

The qualifying period of service is generally 9 months though under the Bihar, Orissa, Uttar Pradesh and the Mines Acts it is 6 months. The period of benefits is 8 weeks in most of the States, it is, however, 7 weeks in Madras, Andhra and Orissa and 12 weeks in Hyderabad and Travancore-Cochin under the Acts.

The rate of benefit is annas eight per day in Madras and Andhra under the Acts. In the Hyderabad Act and the Mines Benefit Act the rate is Ann. 12 or average daily earnings whichever is more. In Orissa, it is the actual daily wage or salary subject to a maximum of Ann. 12 per day. The Travancore-Cochin and West Bengal (Tea Estates) Acts provide for Rs. 5-4-0 per week. Women workers on plantations in Assam receive under the Act Ann. 11 Pies 6 per day in addition to the usual food concessions and women in other industries in the State get their average weekly earnings subject to a minimum of Rs. 2. Although maternity benefit legislation does not apply to plantations in other parts of South India, the employers' associations have recommended payment of benefit on a voluntary basis at the rate of Ann. 12 per day for a period of 8 weeks.

The Mines Maternity Benefit Act and the Assam, Bihar and U.P. Acts provide for some additional benefits which take the form of free medical treatment, maternity bonus, provision

of creches, additional rest intervals for nursing mothers etc. In the Central Act for women employed in mines and in the U.P. and Bihar Acts, an additional bonus of Rs. 3 and in Rajasthan Rs. 5 is paid if the women avail themselves of the services of a qualified mid-wife. But if such assistance is provided by or in an institution of an employer, the bonus is not paid.

The U.P. and Bihar Acts lay down that factories employing 50 or more women or where women employed form 25 per cent. or more of the workers, should maintain creches, and appoint female attendants to look after the children.

Provision is made in the Acts for protection of women against dismissal by the employers to avoid liability of payment. Nor can a woman be discharged during the period of maternity leave. Employment of women during maternity leave is a penal offence but the Assam Act permits such employment provided it is on light work during the four weeks preceding child birth. The West Bengal Maternity (Tea Estates) Act also permits such employment on light work during 6 weeks before confinement if certified fit to do such work by the prescribed medical practitioners.

The administration of the Acts in the States is the responsibility of the Factory Inspectors. The enforcement of the Mines Maternity Benefit Act in the coal mines is the responsibility of the Coal Mines Welfare Commissioner. In other mines, it is administered by the Chief Inspector of Mines.

The table below shows the figures relating to payment of Maternity Benefit in 1954 :

Statest	Average No. of women employed.	No. of women who claimed maternity benefit.	No. of women who were paid maternity benefit in full or in part.	No. of cases in which a bonus was given or maternity benefit was paid for miscarriage or death.	Total amount paid.

\*\* In some cases only second instalment of 1953 benefit was paid in 1954.

† States before reorganization in Nov. 1956.

The average amount of benefit paid in the years 1953 and 1954 was: Rs. 80 and 82 for Part 'A' States; Rs. 53 and 61 for Part 'B' States; Rs. 23 and 20 for Part 'C' States; and Rs. 41 and 38 for Mines.

### TRADE UNIONS ACT, 1926

This Act was brought into operation with effect from 1st June 1927 and was slightly amended in 1928.

Apart from the necessary provisions for administration and penalties, the Indian Trade Unions Act, 1926, makes provision for three matters: (1) conditions governing the registration of trade unions; (2) the obligations to which a trade union is subject after registration; and (3) the rights and privileges accorded to registered unions. 'Trade Union' has been defined in such a way as to cover both combinations of workers and of employers but not of workers and employers. Persons under the age of 15 are debarred from membership of any registered union.

The administration of the Act is entirely on a State basis and each State Government is required to appoint a Registrar of Trade Unions. Any seven or more members of a union can apply for registration but no union can be registered unless at least fifty per cent of the executive consist of members actually engaged in the unit or group of units which the union proposes to cover.

Any union aggrieved by the refusal of a Registrar to register it or by the cancellation of its registration may prefer an appeal to a Judge appointed by the State Government for the purpose; and, in the event of the dismissal of such an appeal, the aggrieved party has the right of a further appeal to the High Court.

The general funds of registered trade unions cannot be spent on objects other than those specified in Section 15 of the Act nor on political objects; but the Act makes provision for the creation of a separate political fund, subscription to which may be collected from such members as voluntarily desire to contribute to it. All registered unions are required to submit annually to the Registrar duly audited statements of accounts in prescribed forms together with changes in officers and the executive and a copy of the rules corrected up to date.

A registered trade union is immune from prosecution for criminal conspiracy in respect of an agreement, unless it is one to commit an offence, made between its members for the furtherance of a trade dispute or for restraint of trade and from any legal difficulties arising therefrom.

### STATISTICS OF TRADE UNIONS

**All-India Figures.**—The following tabular statements show the latest available position in regard to Registered Trade Unions:—

### INDUSTRIAL DISPUTES ACT

The Act provides for setting up of two types of organisations, namely, (1) Works Committees and (2) Industrial Tribunals for the prevention or settlement of disputes. It makes conciliation compulsory in all disputes in public utility services and optional in other cases.

Section 22 of the Act declares any strike or lock-out in a public utility service to be illegal if it is commenced or declared (i) without giving to the employer or employees, as the case may be, a notice of strike or lock-out in a prescribed manner, within six weeks before striking or declaring a lock-out, or (ii) within 14 days of giving such notice, or (iii) before the expiry of the date of strike specified in any such notice; or (iv) during the pendency of any conciliation proceedings before a conciliation officer and 7 days after the conclusion of such proceedings, etc. The Act also prohibits certain other strikes and lock-outs and declares them illegal if commenced or declared during the pendency of (i) conciliation proceedings before a Board and 7 days after the conclusion of such proceedings; (ii) proceedings before a Tribunal and 2 months after the conclusion of such proceedings, or (iii) during any period in which a settlement or award is in operation, in respect of any of the matters covered by the settlement or award.

The Act was amended once in 1953 and twice in 1956. It now provides that no workman, who has been in continuous employment for more than a year, shall be retrenched unless he has been given a month's notice or wages in lieu thereof and also compensation calculated at the rate of 15 days' average pay for every completed year of service. If a workman who has put in more than a year's continuous service is laid off, he is required to be paid compensation which should be equal to 50 per cent of the total of basic wages and dearness allowance for a maximum of 45 days in a year unless periods of lay-off after the first 45 days are of the duration of one week or more on each occasion.

According to a decision of the Supreme Court in November 1956 on retrenchment compensation, workers cannot, under the Act, claim compensation for retrenchment in case of bona fide closure of business or termination of their services by the employer on the business being sold to another employer.

The definition of the term "workman" has been extended to cover technical personnel and supervisory staff drawing upto Rs. 500 per month.

The machinery for adjudication of disputes has been recast and a three-tier machinery consisting of National Tribunals, Industrial Tribunals and Labour Courts is brought into being. Functions of these tribunals are demarcated and the importance of the dispute will determine which tribunal should adjudicate upon it. The tribunals are authorised to appoint experts having special knowledge as assessors to advise them. Schedules covering subjects which should go before each tribunal are attached to the Act.

Every employer who proposes to effect any change in the conditions of service of his workmen in respect of wages, hours of work, rationalisation, shift-working, increase or reduction in complement, etc., is required to give 3 weeks' prior notice to the workmen concerned.

The Act also provides for voluntary reference of disputes to arbitration by agreement between the employer and the workmen. Such a reference may be made to the Tribunals constituted under the Act.

All State Acts relating to the settlement or adjudication of disputes are expressly saved and the Industrial Disputes Act will not override them.

## STATISTICS

The following table sets out the number of disputes in some of the years since 1946, the number of persons affected by these disputes and the total time lost in man-days:

Year.	Number of disputes.	Number of workpeople involved.	Number of man-days lost.
1946 ..	1,629	1,961,948	12,717,762
1947 ..	1,811	1,840,784	10,562,666
1948 ..	1,259	1,059,120	7,837,173
1949 ..	920	685,457	6,600,595
1950 ..	814	719,383	12,806,704
1951 ..	1,071	691,321	3,818,928
1952 ..	963	809,242	3,836,961
1953 ..	772	466,607	3,382,639
1954 ..	840	477,138	3,372,808
1955 ..	1,160	527,767	5,697,848

An analysis of the disputes for the year 1955 by States is given in the following table:—

State*.	No of disputes.	No. of workers involved.	No. of man-days lost.
Andhra ..	6	7,797	15,806
Assam ..	3	463	793
Bihar ..	91	19,093	263,702
Bombay ..	252	102,605	374,080
Madhya Pradesh ..	39	27,678	316,816
Madras ..	189	67,007	193,266
Orissa ..	13	2,278	148,907
Punjab ..	20	1,784	31,919
U t t a r Pradesh ..	88	57,364	2,025,071
West Bengal ..	399	219,795	2,192,641
Ajmer ..	7	1,336	1,505
Delhi ..	59	19,667	134,362
Total ..	1,166	527,767	5,697,848

Statistics presented in this section relate to industrial disputes which have resulted in work-stoppages involving 10 or more workers.

## APPELLATE TRIBUNAL ACT, 1950

The divergent and sometimes conflicting decisions given by the various Tribunals set up in different States under the Industrial Disputes Act, 1947 created serious anomalies leading to discontent and bitterness among parties to industrial disputes. To meet this situation the Government of India enacted the Industrial Disputes (Appellate Tribunal) Act, 1950 to enable them to set up a Labour Appellate Tribunal which would hear appeals from awards or decisions of Industrial Tribunals, Industrial Courts, Wage Boards, and other statutory bodies set up by the Central or State Governments to adjudicate on industrial disputes.

The Appellate Tribunal consists of a Chairman and such number of other members as the Government may, from time to time, think fit to appoint. The Chairman is authorised to constitute as many benches of the Appellate Tribunal as he may consider necessary. Each bench is to consist of not less than two members, one of whom is to be appointed as the President. Four benches of the Tribunal are functioning at Calcutta, Bombay, Lucknow and Madras. The Appellate Tribunal is empowered to hear appeals from any award or decision of an adjudicating authority if (i) the appeal involves any substantial question of law, or (ii) the award or decision relates to wages, bonus or travelling allowance, employers' contribution to any pension or provident fund, gratuity payable on discharge, classification by grades, retrenchment and any other matter which may be prescribed by rules made under the Act.

During the period of 30 days allowed for filing the appeal or during the pendency of an appeal no employer shall alter the conditions of service to the prejudice of the workmen concerned nor shall he discharge or punish any such workman without obtaining the written permission of the Appellate Tribunal.

The Industrial Disputes (Appellate Tribunal) Act, 1950 has been repealed by the Industrial Disputes (Amendment and Miscellaneous Provisions) Act, 1956 with effect from 1st September 1956. After that date no appeals were to be entertained. Pending appeals were however, to be disposed of by the Appellate Tribunal as if the Act had not been repealed.

On 30th June 1956 the number of appeals pending with the Labour Appellate Tribunal was 593 of which no less than 145 were more than one year old.

The headquarters of the Tribunal are now in Bombay.

## BANKS DISPUTE

The industrial dispute between the Banks and their employees numbering about 60,000 was decided by an Industrial Tribunal presided over by Mr. K. C. Sen, an ex-Judge of the Bombay High Court in 1950. The award was declared void by the Supreme Court of India.

The dispute was thereafter referred to the All-India Industrial Tribunal (Bank Disputes) popularly known as the Sastry Tribunal which gave its award on 20th April 1953. The employees appealed against the award to the Labour Appellate Tribunal which gave its decision on 25th April 1954. As the Government of India considered it inexpedient to give effect to certain provisions of the Appellate Tribunal's decision it modified the award on 24th August 1954 by restoring the original recommendations of the Sastry Tribunal in so far as they related to adjustments of the new scales of pay and dearness allowance.

This action of Government evoked strong criticism from trade union organisations in the country mainly on the ground that it would undermine the faith of the people in the judiciary established by law. The Union Minister for Labour, Mr. V. V. Giri resigned on this issue. Mr. Khandubhai Desai who was appointed in his place announced the appointment of a one-man Commission consisting of Mr. Justice Rajadhyaksha, Judge of the Bombay High Court, who was to conduct a fact-finding enquiry and to report on the steps to be taken. Upon the death of Mr. Rajadhyaksha which took place before the inquiry was completed, Mr. Justice Gajendragadkar of the Bombay High Court was appointed to complete the enquiry.

While the Gajendragadkar Commission recommended substantial acceptance of the Labour Appellate Tribunal's Award it effected certain alterations in Government's award. The Commission fully upheld the protection granted to employees in the matter of their existing emoluments; it confirmed the creation of a separate class for towns with less than 30,000 population; it confined the exemption to rural areas in Part 'B' States\* to Travancore-Cochin State\* only; and it restored the Appellate Tribunal's scale of dearness allowance to all class A, all but two class B and a few class C Banks.

The Government of India accepted the recommendations of the Commission and introduced a Bill in the Lok Sabha for giving statutory effect to them. The Bill which was passed without any amendments received the assent of the President on 21st October 1955.

## RECENT COLLECTIVE AGREEMENTS

The Ahmednagar Millowners' Association and the Textile Labour Association signed two collective agreements on 27th June 1955. The first Agreement provides that disputes between a member-mill of the Association and the Trade Union shall be settled by mutual negotiations

and if negotiations fail by arbitration. This agreement is to be in force till 30th Dec. 1957.

The second Agreement lays down the formula for grant of bonus.

The Bombay Millowners' Association and the Rashtriya Mill Mazdoor Sangh, Bombay have also reached a similar agreement. The Bonus Agreement which was signed on 1st March 1956, is to cover the period 1952 to 1957. The pact provides for the appointment of a Commission to investigate into the requirements of industry for rehabilitation and modernisation. Finally and though this does not form a part of the Agreement, the Association has agreed to pay a sum of Rs. 50 lakhs towards industrial housing which will enable 4,000 tenements to be built.

The machinery for settlement of disputes, an agreement regarding which was signed between the parties on 18th September 1956 consists of a Committee of Assessors and a Board of Arbitrators.

The agreement between the Tata Iron and Steel Co. Ltd. and the Tata Workers Union reached on 8th January 1956, is to remain in force for 3 years. The most distinctive feature of the agreement is that it provides, *inter alia*, for union security, workers' participation in management and recognition of the union as the sole bargaining agent.

The Company accepts the principle of union membership security system and the collection of union dues through the pay-roll. The Union recognises the right of the Company to take disciplinary action and lay down personnel policies.

With a view to the improvement of productivity, the parties agree on the need for establishment of a standard force in each department, on the assurance that no employee will be retrenched and that if they are transferred to other jobs after training their earnings will not be adversely affected.

The agreement stipulates that a programme of job evaluation should jointly be undertaken in order to eliminate inequities in the structure of wages and other emoluments.

In a supplementary agreement reached on 4th August 1956 machinery has been devised to associate works employees with Management in the working of the industry.

A five-year Agreement between the Indian Aluminium Company Limited, Calcutta and its workers represented by the Indian Aluminium Belur Works Employees Union was reached on the 31st August 1956.

The most significant part of the Agreement is that dealing with bonus.

## WORKING JOURNALISTS' ACT

(See under article on the Press)

## THE EMPLOYEES' PROVIDENT FUNDS ACT, 1952

The Act was enacted to provide for the institution of provident funds for employees in factories and other establishments. It applies to factories employing fifty or more persons in the cement, cigarettes, electrical, mechanical or general engineering products, iron and steel, textiles (made wholly or in part of cotton, wool, jute or silk whether natural or artificial) industries.

The Scheme framed under the Act requires the employer and the employee to contribute at the rate of 6½ per cent of the basic wages and the dearness allowance. The Scheme which was enforced on 1st November 1952 applies to employees whose basic pay does not exceed Rs. 300 per month.

The Act does not apply to any factory belonging to the Government or a local authority and any other factory established before or after 1st November 1952 unless three years have elapsed since its establishment. The Central Government is also empowered to exempt any

\* States existing before reorganization in Nov. 1956.

class of factories having regard to the financial position or other circumstances of the case by a notification in the Official Gazette.

The Scheme provides for prompt settlement of claims in case of retirement, migration, death or other circumstances. Withdrawals from the Fund are permitted subject to fulfilment of certain conditions, for payment towards a policy of life insurance.

The Scheme is administered by a Central Board of Trustees which is tripartite in character. The Central Provident Fund Commissioner is the Chief Executive Officer and is assisted by Regional Commissioners for different regions. The Act aims at the decentralisation of the administration of the Scheme by setting up State Boards with the State Commissioners as Chief Executive Officers.

Section 17 of the Act empowers the appropriate Government to exempt from the operation of all or any of the provisions of the scheme factories which provide provident fund benefits which are equal to the benefits provided under the Act; or factories where the employees are in enjoyment of benefits in the nature of provident fund, pension or gratuity which the appropriate Government considers are, on the whole, not less favourable to such employees than the benefits provided under the Act.

In the middle of February 1957, the total number of factories under the Act was about 4,000, number of subscribers about 20 lakhs, average monthly collection of fund contribution Rs. 1.65 crores.

With effect from 31st July 1956, the Act and the Scheme were applied to the factory industries of edible oils and fats, sugar, rubber and rubber products, electricity (including generation, transmission, distribution), tea, printing, stone-ware pipes, sanitary wares, electrical porcelain insulators, refractories, tiles and match and sheet glass factories. With this extension about 4 lakhs of additional workers in approximately 1,400 factories are estimated to get provident fund benefits and their monthly contribution together with the employers' share will be about 32 lakhs.

By a notification dated 3rd September 1956 the scheme was extended to four more industries viz. (1) Heavy and Fine Chemicals, (2) Indko, (3) Iac including Shellac, (4) Non-edible Vegetable and Animal Oils and Fats. Approximately 54,000 workers in about 200 factories would be covered as a result of this extension.

In February 1957 it was decided to extend the operation of the Act to cover plantation workers in plantations employing 50 or more. This was to be effective in May 1957.

At the end of 1955, the Act covered about 2,146 factories of which 522 factories had been permitted to run their own schemes of provident fund. The total number of subscribers to the Fund as on 31st January 1956 was 14.55 lakhs of whom 9.15 lakhs were in exempted factories. The total collection of subscriptions till the end of January 1956 was over 56 crores.

To supervise the administration of the scheme, the Central Government constituted six Regional Committees in the States\* of Bombay, Bihar, Madras, Madhya Bharat, Uttar Pradesh and West Bengal.

The total number of employees covered by the Employees' Provident Funds Act is now about 20 lakhs.

Provident fund for workers in the coal industry was introduced by an Ordinance, namely, the Coal Mines Provident Fund and Bonus Schemes Ordinance, promulgated in December 1948. The Ordinance was later repealed by an Act which authorised the Central Government to frame a scheme for bonus and another for provident fund in coal mines. The scheme applies to the coal mines, in Bihar, West Bengal, Orissa, the former Madhya Pradesh, the former Vindhya Pradesh, Assam, Rajasthan and the former Hyderabad. The rate of contribution is one anna per rupee of the total of basic wages,

dearness allowance and value of food concessions in cash or in kind. An equal contribution is paid by the employer. About 3.5 lakhs of workers are members of the Fund. In the middle of 1956, the provisions relating to forfeiture of employer's contribution to the provident fund were liberalised. The employer's contribution will now not be forfeited in the case of members who retire after reaching the age of 50 years though they have not completed 5 years service as members. The proportion of forfeiture of employer's contribution for varying periods of service has also been reduced. There will be no forfeiture at all in the case of employees who have been members of the fund for 15 years or more.

## TEA DISTRICTS EMIGRANT LABOUR ACT

The Tea Districts Emigrant Labour Act, 1932, was brought into effect from the 1st October 1933.

State Governments are empowered, subject to the control of the Government of India to impose control over the forwarding of assisted emigrants (chapter III) or over both their recruitment and their forwarding as occasion may dictate (chapters III and IV).

The forwarding of recruits to Assam must be made through the prescribed routes where arrangements for feeding, rest and medical treatment have been made and by authorised forwarding agents. It is made unlawful to assist persons under 16 to migrate unless they are accompanied by their parents or guardians. A married woman who is living with her husband may only be assisted to emigrate with the consent of the husband.

**Repatriation.**—It is provided that where an employer fails to make all the necessary arrangements for the repatriation of a worker within fifteen days from the date on which a right of repatriation arises to an emigrant labourer, the Controller may direct the employer to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (sections 13 and 15).

Section 3 of the Act makes provision for the appointment of a Controller of Emigrant Labour with some staff and possibly one or more Deputy Controllers for supervising the general administration of the system which the Act seeks to establish. The charges for this establishment are to be met from an annual cess called the Emigrants Labour Cess which is to be levied at such rate not exceeding Rs. 9 per emigrant as the Central Government may determine for each year of levy.

The cess is collected by the Controller by the sale of certificates of emigration. Every assisted emigrant has to be provided by the employing interest on whose behalf he was recruited with such a certificate. All particulars about the emigrant together with a running record of the details of his employment in Assam are given on it. Failure to provide a certificate is punishable with a fine which may extend to Rs. 500. The rate of the cess is fixed at Rs. 5.

According to the statistics collected under the Act, the labour force in Assam in 1953 consisted of approximately 471,200 adults and 445,600 children. The number of new emigrants dropped from 38,593 in 1952 to 3,881 in 1953 because the Government of Assam requested the employers not to recruit labour from outside the State but to meet their requirements by transfer of labour from gardens having surplus workers. The number of emigrants repatriated and of those who postponed their right to repatriation during the year 1953 was 31,240 and 16,051 respectively.

## SHOPS AND COMMERCIAL ESTABLISHMENTS ACTS

Subject to certain exceptions the Acts apply to shops, commercial establishments, restaurants and places of amusement in certain select

urban centres. Some employees such as those employed in a confidential capacity and those whose work is of an intermittent character are excluded from the scope of the Acts.

The Bombay, Madhya Pradesh and Assam Acts have fixed daily hours of work at nine. In the U.P. and Madras Acts the daily hours are eight while in the West Bengal and the Punjab Acts a ten-hour day has been prescribed. Rest intervals, of half an hour are prescribed in the West Bengal, U.P. and the Punjab Acts while an hour's interval has been granted in the Assam, Bombay, U.P. and Madras Acts. Opening and closing hours have also been fixed by the Acts. The Assam and West Bengal Acts, however, prescribe only closing hours. Most of the Acts also fix the maximum overtime work that can be taken from the employees. In some cases slightly different hours of work have been fixed for employees of commercial establishments, restaurants and places of amusement.

Provision has been made in all the Acts for weekly closure of shops and establishments although in some Acts, for example the Bombay and Assam Acts, theatres, hotels, etc. are exempted from this provision. In addition to the weekly holiday, provision for privilege leave of 12 to 15 days in a year has been made in all the Acts. The Assam, West Bengal, Madras and U.P. Acts make further provision for casual leave and sick leave of 10 to 12 days and 12 to 30 days respectively.

All the Acts, except the Bengal Act, have made provision for the regulation of employment of children and young persons. The minimum age for the employment of children in the Assam, and Madhya Pradesh Acts is 12 while in the Madras and U.P. Acts it is 14. The hours of work for children and young persons are 7 per day in the Punjab, Madras and Madhya Pradesh Acts and 6 in the Bombay and U.P. Acts. Children cannot work after 7 p.m. according to the Bombay, Madras and the Punjab Acts and after 9 p.m. according to the Madhya Pradesh Act.

The Bombay Act empowers the Government to apply the provisions of the Payment of Wages Act to establishments covered by the Shops and Commercial Establishments Act. By a notification issued under Section 38(1) of the Bombay Shops and Establishments Act, 1948, the Government of Bombay made the Payment of Wages Act applicable to all establishments in the local areas of Greater Bombay, Ahmedabad, Poona, Solapur, Surat, Belgaum, Hubli, Kolhapur and Baroda Cities.

By the Madras and U.P. Acts the wage period should not exceed one month and by the Punjab Act it should not exceed a fortnight. The Assam Act fixes the wage period at one month. After they become due wages should be paid within 10 days in Assam and West Bengal, 7 days in U.P. and 5 days in Madras. In the area covered by the former Punjab wages should be paid on demand at the expiry of the wage period. Overtime wages are payable at twice the ordinary rates in Madras, U.P. and the Punjab, at one and a half times in Bombay and the area covered by the former Madhya Pradesh and at one and a quarter times the ordinary rate in Bengal. Hotels, restaurants and other eating places in Bombay are, however, required to pay overtime wages at twice the ordinary rate. Fines and deductions are regulated under the Madras and U.P. Acts.

One month's previous notice or one month's wages in lieu of notice before discharge is stipulated in the Acts of U.P., Punjab, Madras and Madhya Pradesh. The Bombay Act provides for only 14 days' notice or pay in lieu thereof. The Madras and Bombay Acts make provisions relating to cleanliness, ventilation, lighting and precautions against fire in establishments covered by the Acts.

Delhi, Bihar, Ajmer and Saurashtra (former States)† passed similar legislation. The total number of establishments covered by the various State Acts and the persons employed therein

\* Pre-organization.

† That is, before the reorganization in Nov. 1956.

were 811,851 and 1,029,821 respectively during the year 1954

The Weekly Holidays Act, 1942 provides for a weekly closure of shops and for the grant of a weekly holiday to employers. The Act has been in force in the areas of the former Bihar, Ajmer, Coorg, Orissa, Rajasthan, Vindhya Pradesh and Hyderabad States.

### INDUSTRIAL EMPLOYMENT (STANDING ORDERS) ACT, 1946

The Industrial Employment (Standing Orders) Act, 1946 which applies to industrial establishments employing 100 or more workers provides for the framing of Standing Orders laying down the conditions of employment of workers employed in the establishments

The Act extends to the whole of India except the State of Jammu and Kashmir, and is administered both by the Central and State Governments.

So far as the Central Government is concerned it is responsible for administering the Act on railways, major ports, mines, oil fields and other establishments under its control. Both the Central and the State Governments have been empowered to extend the scope of the Act to establishments in any industry employing less than 100 workers or to any other class or classes of establishments or to exempt any establishment from any of the provisions of the Act

In exercise of these powers the Government of Uttar Pradesh has extended the Act to all establishments which are members of the Employers' Association of Northern India and the U.P. Oil Millowners' Association and to the

glass industry, electricity supply undertakings and water works.

The Government of Assam has extended the Act to all industrial establishments employing 10 or more workers excepting mines, quarries, oil-fields and railways.

In January 1952 the Government of West Bengal extended the Act to all industrial establishments employing 50 or more workers.

In December 1955 by an amendment of the Act the Government of Bombay made the Act applicable to establishments employing 50 or more workers and provided that so long as a set of Standing Orders have not been certified for an industrial establishment the Model Standing Orders framed under the Act will apply.

Till the end of the year 1954, 3,815 establishments had certified Standing Orders in the then Part A States, 741 in the then Part B States and 135 in the then Part C States.

Besides these there were 675 Central Undertakings which had certified Standing Orders.

### COLLECTION OF STATISTICS ACT, 1953

This Act which replaces and embodies the main provisions of the Industrial Statistics Act is designed to facilitate the collection of statistics of certain kinds relating to industries, trade and commerce. It empowers the Central and the State Governments to direct that statistics shall be collected about—

(a) any matter relating to any industry or class of industries,

(b) any matter relating to any commercial or industrial concern or class of commercial or industrial concerns and in particular any matter relating to factories, and

(c) any of the following matters, so far as they relate to the welfare of labour and the conditions of labour, namely, (1) price of commodities, (2) attendance, (3) living conditions including housing, water supply and sanitation, (4) indebtedness, (5) rents of dwelling houses, (6) wages and other earnings, (7) provident fund and other funds, (8) benefits and amenities provided for labour, (9) hours of work, (10) employment and unemployment, (11) industrial and labour disputes, (12) labour turnover, and (13) trade unions.

The Central or State Government can appoint an officer to be the Statistics Authority for the purpose of collecting any statistics and such authority has the power to call upon the owner of an industrial or commercial concern to furnish the necessary information. He has also the right of access to any relevant records or documents in the possession of any person required to furnish the information and can enter any premises where he believes such records or documents are kept for the purpose of inspecting them or taking copies. The Act prescribes penalties for improper disclosure of information or returns or for wilfully furnishing false information.

### WAGES

No serial statistics of wages and earnings are available in India except for those compiled under the Payment of Wages Act. The returns under the Act, however, relate only to persons in receipt of wages and salaries of Rs. 200 per month.

### AVERAGE ANNUAL EARNINGS OF FACTORY EMPLOYEES DRAWING LESS THAN Rs. 200 PER MONTH.

(Excludes railway workshops, the groups of food, beverages, tobacco, gins and presses)

Dockyards†† ..	Calcutta ..	30 0 0	31 0 0	61 0 0

The most important wage revision during the year 1956 was in the collieries. By an award of the All India Industrial Tribunal (Colliery Disputes) which was published on the 26th May 1956 and which came into force from that date, the minimum daily wages of the lowest category of male and female workers were fixed as under:

	Male Workers	Female Workers
Basic wages ..	Rs. a. p. 0 15 0	Rs. a. p. 0 11 8
Dearness Allowance (150 per cent) ..	1 6 6	1 0 11
	2 5 6	1 12 2

Inclusive of the statutory bonus, the minimum wage will be Rs. 2-10-6 for male and Rs. 1-15-11 for female workers. Those working underground will get an allowance of 12½ per cent of basic wages.

\* June 1956.

† December 1955.

†† September 1955.

The Chief Inspector of Mines in his Monthly Coal Bulletin publishes figures of average weekly earnings of certain categories of workers in different coalfields. The position in Dec. 1954 (the latest available information) is given in the table below :

AVERAGE WEEKLY EARNINGS IN COAL MINES.\*  
(December, 1954).

Employees of about 228 plantation estates in the districts of the Nilgiris, Ma'alalar, Coimbatore, Salem, Madurai and Tirunelveli have been awarded revised scales of pay and dearness allowance by the Industrial Tribunal for plantations. It has fixed the rate for first and second grade workers at Rs. 2-4-0 and Rs. 1-12-0 respectively while a child worker will get Re. 1 per day. This revision is to be given, according to the decision, retrospective effect from 24th March 1952.

\* It has been mentioned elsewhere that by a collective agreement employees of the Tata Iron and Steel Co. Ltd., Jamshedpur have been given an increase in wages.

\* The States existing before the reorganization in November 1956.

### DEARNESS ALLOWANCE

The scale of the allowance varies not only from centre to centre and industry to industry, but also, except where these matters are adjudicated upon, from unit to unit in the same industry at the same centre.

In coal mines dearness allowance is paid on the basis of a percentage of basic wages. In Bihar and Bengal the dearness allowance is 150 per cent of basic wages for those earning up to Rs. 30 per month.

In the engineering industry in West Bengal dearness allowance is graded according to income and ranges from Rs. 25 per month in the case of those getting basic wages up to Rs. 50 per month to Rs. 60 for those getting more than Rs. 200. In Bombay some concerns pay at a flat rate and others on a graded scale. Several Adjudicators have granted dearness allowance either at the Bombay Millowners' Association scale which was Rs. 70-8-0 in August 1950, or at a percentage, varying from 66½ per cent to 85 per cent, of that scale. The rate of dearness allowance payable to Bombay City cotton mill workers itself was increased by a decision of the Labour Appellate Tribunal by 5 per cent when the Bombay Cost of Living Index Number is between 325 and 335; by 7½ per cent when it is between 336 and 350; and by 10 per cent when it is above 350. The enhanced rate was given retrospective effect from May 1953; the average dearness allowance for a month of 26 working days now comes to Rs. 71-11-0 for 1954 and Rs. 64-12-0 for 1955.

In Madras the rate varies from 8 annas to Re. 1-9-6 per day and in a number of concerns it is paid at a flat rate of Rs. 25 per month. In the tanneries and leather goods industry dearness allowance paid is around Rs. 25 per month in West Bengal and Madras, about Rs. 36 in Bombay and between Rs. 40 and 60 in Kanpur.

The Committee on Fair Wages appointed by the Government of India examined the question of dearness allowance and came to the conclusion that for the lowest categories of employees the target should obviously be compensation to the extent of 100 per cent of the increase in the cost of living, but that in the case of higher categories

a lower rate of compensation should apply and that the amount of compensation should be based on salary scales or slabs.

### BONUS

As in the case of dearness allowance the practice in regard to the quantum of profit bonus varies from centre to centre and industry to industry. In Bombay City and Ahmedabad the cotton mill workers received for the year 1951 a bonus equivalent to 25 per cent of basic wages earned. In 1952 the cotton textile workers of Bombay got 20 per cent of their wages as bonus. In Madras cotton mills workers received 3 months' basic wages.

A five-year agreement to settle the problem of bonus for about 250,000 textile workers in Bombay City was entered into on 1st March, 1956 between the Bombay Millowners' Association and the Rashtriya Mill Mazdoor Sangh. The agreement will assure the workers of both profit and non-profit making mills a bonus ranging from 15 days to 3 months basic wages for every year of service for 5 years from 1953 to 1957 both years inclusive. The quantum of bonus will be decided by the profit made by each unit. Mills whose bonus disputes for 1952 were pending before the courts were also covered by the agreement for that year. There were 20 of these employing about a third of the textile labour.

Subsequently, it was calculated that about 250,000 textile workers in 56 mills would receive by the end of 1956 about Rs. 6 crores as bonus for the first three years of the agreement starting 1953.

For the year 1955 the workers received as bonus an amount of about Rs. 2.5 crores which was paid at the time of the Diwali festival in 1956. As many as 21 mills paid their workers bonus equivalent to 3 months' basic wages.

The Millowners' Association also agreed to contribute Rs. 50 lakhs during the five years 1956 to 1961 towards housing schemes which the State Government might undertake for industrial workers. It is estimated that this might finance the construction of 4,000 tenements.

The Textile Labour Association and the Ahmedabad Millowners' Association have also entered into an agreement laying down a procedure for the grant of bonus. This agreement applies to all member mills of the Association in Ahmedabad, in respect of bonus claims for the years 1953 to 1957.

Claims are to be determined on the basis of published balance sheets and profit and loss accounts for the year adopted by each mill company. It is provided that a claim for bonus would only arise if there is an available surplus of profit after making provision for all the prior charges including a return on paid-up capital and on reserves employed as working capital in accordance with the formula laid down by the Full Bench of the Labour Appellate Tribunal. In no case will a mill pay to its workers by way of bonus less than 4.8 per cent, or more than 25 per cent of the basic wages earned during the year. If in any year the mill has an available surplus of profit which according to the Full Bench formula is adequate for granting bonus at a higher quantum than the ceiling of 25 per cent of basic wages, then such a mill will be deemed to have set aside a part of the residue not exceeding 25 per cent to a reserve for bonus for purpose of adjustment in subsequent years, provided, however, that such amount shall at no time exceed an amount equivalent to 25 per cent of basic wages. On the other hand, a mill whose profit is not adequate to provide for any prior charges or has suffered a loss and which will, in any case, be required to pay the minimum bonus of 4.8 per cent, of the basic wages will be entitled to set off the amount so paid against the amount of bonus payable in subsequent years.

Though under the provisions of the Bombay Industrial Relations Act, the parties are free to terminate the agreement after a period of one year, the parties to the bonus agreement have agreed not to exercise the right of termination of the agreement for a period of five years.

The amount of bonus for the year 1955 distributed to the workers before the Diwali festival in 1956 totalled Rs. 1.2 crores.

No bonus has so far been paid in the jute mill industry in West Bengal.

By an agreement with the Workers' Union the Madura Mills, Madurai paid their 24,000 workers bonus equal to Rs. 35 lakhs for the financial year 1955. The bonus was distributed in April 1956.

The dispute regarding bonus for the year 1955 to the textile workers of Coimbatore was decided by a board of arbitrators representing employers and labour with the District Judge as Chairman. As a result of the decision, employees of 44 mills were required to pay varying amounts of bonus to their workers before Diwali. Two mills which incurred losses were exempted. As many as 23,000 workers in 21 mills got bonus equal to 5 months' basic wages.

The dockyards in West Bengal generally pay an annual bonus amounting to a month's wages. Some of the dockyards in Bombay pay two months' wages as bonus.

The Tata Iron and Steel Co. at Jamshedpur pay a good attendance bonus amounting to 10 to 12 per cent of basic wages and a performance bonus of 10 to 50 per cent of basic wages is also given to workers. To the latter, however, only skilled and semi-skilled workers are entitled. Under the Company's revised Profit Sharing Scheme, the employees are entitled to a share of 27½ per cent of the annual net profit of the company and such share is credited to and/or distributed among the employees of the company in proportion to the basic salaries and wages earned or deemed to be earned by such employees respectively during the year in which such net profits were earned by the Company. In 1951-52 this bonus amounted to 3 months and 8 days wages. The Indian Iron and Steel Company pays bonus at the rate of 2 days' wages for every one per cent dividend declared by the Company.

The Board of Conciliation appointed for the coal-mining industry recommended the grant of an annual bonus equal to four months' basic wages, split into two parts. An attendance bonus of two months' basic wages to those ful-

filling specified minimum attendance requirements, and a production bonus related to output and basic earnings and subject to their qualifying for it on the basis of a minimum attendance of 66 days per quarter in the case of surface workers and 64 days per quarter in the case of underground workers in the case of collieries in Bihar and West Bengal. Bonus on the above basis is also to be paid, according to the Fact-Finding Committee's recommendations subject to a minimum attendance of 60 and 66 days in a quarter in the case of underground and surface workers respectively in Madhya Pradesh, Andhra and Orissa collieries. In Assam, the existing rate of bonus has been raised by fifty per cent so as to raise the amount of bonus earned to a sum equal to four months' wages per year.

An agreement between the representative of the Indian Tea Association and the workers' representatives regarding bonus for the years 1953, 1954, 1955 and 1956 was reached on 7th January 1956. According to the agreement the claims for 1953 and 1954 will be met by lump sum payments to male and female adult workers who have completed at least 240 and 175 days of work in the year 1954. The payments are Rs. 130 for the Assam and Doars Zones, Rs. 100 for Terai, Rs. 65 for Tripura and Cachar and Rs. 55 for Darjeeling. Workers who have not put in the requisite number of days will receive *pro rata* bonus. It was also agreed that the figures for bonus laid down for 1953 and 1954 will be the base upon which entitlement of bonus for 1955 and 1956 shall be calculated.

The demand for bonus made by the Sindri Fertilizer Factory was not conceded, but the Government decided to give on an ad hoc basis a sum of Rs. 16 lakhs, partly in cash and partly in the form of special amenities.

### PAY STRUCTURE

As for wages, allowing for minor differences and considering the major industries and the important centres it can be stated that in the jute industry in West Bengal and in the plantations the wages are generally paid weekly. The

system of wage payment in the cotton textile industry in Bombay City and Sholapur is monthly. A peculiarity of Ahmedabad is that the wages are paid per *hapse* which varies from 14 to 16 days. The month is the accepted wage period for the railways. In some concerns wages are paid daily to certain types of workers, weekly to others, fortnightly to yet others and monthly generally to the clerical and supervisory staff.

Mining labour is mostly paid on a weekly basis.

A study was recently made by the Labour Bureau of the Government of India of the wage periods in factories covering about 7½ lakhs workers in the former Part 'A' States of Andhra, Bihar, Bombay, Madhya Pradesh, Madras and the Punjab where the total employment is over 14 lakhs; about ½ lakh of workers in Part 'B' States of Hyderabad, Saurashtra and Pepsu out of a total of 1½ lakhs; and almost the entire employment of about ½ lakh workers in Delhi, Ajmer, Bhopal and Coorg. The study showed that 81.2 per cent of the workers were paid monthly, 3.7 per cent fortnightly and 15.1 per cent weekly. In the textiles the percentage of monthly paid workers was as high as 95.7 per cent. The industries in which the proportion of weekly paid workers is higher than that of monthly paid workers were food (except beverages), tobacco, wood, cork and non-metallic mineral products.

The wage structure just before Independence was chaotic. Reform in this sphere was brought about through the agency of industrial tribunals, industrial courts, etc. As a result, not only was an increase in wages to conform with the rise in the cost of living granted but also a degree of rationalisation and standardisation was introduced in the wages schemes. The Planning Commission had advised that during the First Plan period an upward movement of wages should be discouraged in order to arrest inflationary tendencies, but wage increases should be allowed to remove anomalies and to restore the pre-war real wage as a first step towards a living wage. The following table shows the comparison between the real wages in 1939 and in the post-war years:

INDEX OF EARNINGS (1939 = 100)

Year	All India Consumer Price Index	Factory workers		Miners	
		Index of earnings	Index of real earnings	Index of earnings	Index of real earnings
1940	285	208.6	73.2	250.7	88.0
1947	323	253.2	78.4	342.8	106.1
1948	360	304.0	84.4	361.8	100.5
1949	371	340.3	91.7	376.2	101.4
1950	371	334.2	90.1	391.9	105.6
1951	387	356.8	92.2	413.0	108.7
1952	379	385.5	101.8	436.9	115.8
1953	385	384.6	99.9	437.4	113.6
1954	371	381.2	102.7	441.0	119.1

According to a decision of the Bombay Labour Court delivered on 29th Nov. 1956, textile workers in Bombay were to get gratuity upto a maximum of fifteen months basic wages if their services were to be terminated after 15 years' service.

The award was to have retrospective effect from 22nd Nov. 1954.

They would get this gratuity whether they were mentally or physically handicapped for further service or, voluntarily retired after 15 years' service.

The gratuity was to be calculated at the rate of one month's basic wages for every completed year, for the period before the coming into force of the Provident Fund Act, 1952, and half a month's basic wages for each completed year of service thereafter, subject to a maximum of 15

months' basic wages to be paid to them or their heirs or executors or nominees as the case might be.

### HOURS OF WORK

The most important happening in regard to hours of work in factories was the reduction of the weekly hours of work for adults to 48.

Actually, in many industries in this country the hours of work were not in excess of 8 per day. In the coal-mines in Bihar and West Bengal the workers seldom work for more than five to six hours in the day or for more than four to five days in the week. According to a recent investigation the average weekly attendance of a coal-miner was 4.66 days. The cotton textile industry in almost all centres normally works a uniform 8-hour day.

In all cases where continuous production is necessary such as in electricity generating plants and certain water pumping stations, cement factories, etc., work is arranged on a system of three shifts—the different shifts changing over every week or fortnight. The change-over is so arranged that every workman gets a rest period of at least twenty-four continuous hours once in one week.

As far as railways are concerned, hours of work in railway workshops are regulated by the Indian Factories Act. Most of the larger running sheds have also recently been classified as factories and work in these large sheds is arranged on the basis of three shifts of 8 hours each. In the smaller sheds where work is of a fairly intermittent character, systems of two shifts of 12 hours each obtain but the work of the individual is so arranged as not to work each operative for more than 8 hours.

The question of hours of work of railway servants was one of the points submitted for adjudication to the late Justice Rajadhyaksha of the Bombay High Court who made the following recommendations:

The employment of railway servants under the Hours of Employment Regulations should be classified under anyone of the following heads:

- (i) Intensive.
- (ii) Continuous.
- (iii) Essentially Intermittent.
- (iv) Excluded.

(i) The statutory limit of weekly hours for persons whose employment is classified as intensive should be fixed at 75 hours a week on the average in a month;

(ii) The statutory maximum limit for the employment of continuous workers should be fixed at 64 hours a week on the average in a month;

(iii) The statutory maximum for staff classified as essentially intermittent should be 75 hours a week; and

(iv) For excluded workers no statutory minimum limit can be prescribed but this should not absolve the Administrations of their responsibility on humanitarian grounds, of seeing that unreasonable conditions are not imposed. The Government of India accepted these recommendations and by an Order dated 15th June 1948 declared them binding for a period of three years. These regulations are still in force.

The Plantations Labour Act, 1951 has restricted hours of work to 54 per week for adults and 40 per week for children and adolescents.

In the major municipalities the hours of work vary from department to department but are generally 8 to 10 per day. Speaking generally, municipal workers get a weekly holiday. Although those in the conservancy department get half a day off per week, there is a certain amount of discontent among the conservancy staff: they demand a weekly holiday. But since they are engaged in essential work most of the municipalities find it difficult to grant a full holiday.

## COST OF LIVING

Bombay (pre-reorganization State) was the first State in India to compile and publish a price series intended for measuring changes in the cost of living.

Other States in India which compiled cost of living index series for working classes are pre-organization Andhra, Madras, Madhya Pradesh, Punjab, Mysore, Travancore-Cochin and Hyderabad States, and the U. P., Bihar and Orissa States. The Mysore Government compiled figures for Bangalore, Kolar Gold-fields and Mysore.

The Government of Madras compiled six series in all: Madras City, Cuddalore, Coimbatore, Madurai, Tiruchirappalli and Kozhikode with the average prices for the twelve months from July 1935 to June 1936 as base. The Government of Andhra compiled cost of living indices for Vishakhapatnam and Eluru.

In Uttar Pradesh, the series are for low paid Government employees at Lucknow, Banaras, Bareilly, Meerut and Gorakhpur.

The Government of Orissa compiled a cost of living series for its headquarters town of Cuttack and another for Berhampur.

## INDEX FIGURES

Owing to the variations in the method of compilation of these indices, they are not strictly comparable, but the table below shows the movement of the working class cost of living index numbers in selected centres for the twelve months of the year 1955:—

(Base shifted to August 1949 = 100).

\* Provisional.

The Government of India, in consultation with the State Governments, launched upon an All-India Scheme for the preparation and maintenance of working class cost of living index numbers for selected centres in the country. This scheme was started in the year 1942 and

was completed in 1946. Over 27,000 family budgets were collected in some 25 selected centres.

The main object of these investigations was to obtain weights for compiling and maintaining cost of living index numbers on uniform lines. Accordingly, the Labour Bureau of the Govern-

ment of India started publishing regularly in the Indian Labour Gazette on base 1944=100 cost of living index numbers for some 20 centres in India and the latest available annual average figures for these centres with base shifted to 1949 = 100 are given below:—

Year	Del- hi	Aj- mer	Jam- shed- pur	Jha- ria	Deh- ri on Sone	Mon- ghyr	Cut- tack	Ber- ham- pur	Gau- hati	Sil- char	Tin- sukia	Lud- hi- ana	Ako- la	Ja- bal- pur	Kha- ra- pur	Mer- cara	Mad- ras Pla- ntation Centres	Bho- pal	Bea- war	Sat- na
1950 .. ..	100	104	105	114	109	113	111	105	98	106	104	101	96	101	100	105	112	—	—	—

1954 .. ..	105	91	102	82	85	78	100	101	95	83	103	90	89	93	93	105	104	91	83	86
1955 .. ..	99	83	98	77	82	79	90	97	87	86	99	84	79	88	92	99	93	87	78	77

The original base for all these series is calendar year 1944 except as follows:

(i) Madras Plantation Centres—January to June 1949. (ii) Bhopal—Calendar year 1951. (iii) Beawar—August 1951 to July 1952. (iv) Satna—Calendar year 1953. The group House Rent is not included in the indices for Jharia, Mercara and Madras Plantation Centres. In all other centres, it is kept constant at 100.

The group fuel and lighting is not included in the index for Madras Plantation Centres as the priced items of this group have been included in the miscellaneous group.

## STANDARD OF LIVING

The Bombay Labour Office carried out two family budget enquiries for working classes in Bombay City, one in 1921-22 and the other in 1932-33 and the results were published in the years 1923 and 1935 respectively. Similar enquiries were also con-

ducted in Ahmedabad and Sholapur cities and the results of both these enquiries were published in the year 1938. In Madras, the Director of Industries published in 1938 the results of an inquiry into the family budgets of industrial workers in organized and unorganized industries

in Madras City conducted under the direction of the Commissioner of Labour. A number of family budgets were also collected at Kanpur, Nagour, and Jabalpur with the object of compiling cost of living indices.

The statement below contains in a tabular form the main results of some of these surveys.

COMPOSITION OF THE FAMILY, THE AVERAGE MONTHLY INCOME AND EXPENDITURE AND THE ACTUAL AND PERCENTAGE DISTRIBUTION OF EXPENDITURE ON DIFFERENT IMPORTANT GROUPS

Centres (States before re-organization)				Average number of per- sons in the family	Average number of earn- ers in the family	Average monthly in- come per family	Average monthly family expenditure on																Total family expenditure
							Food		Fuel and Lighting		House Rent		Clothing and Footwear		Bedding & Household Requisites		Miscellaneous

## RECRUITMENT

Many of the larger and more progressive concerns have Labour Officers who are directly responsible for all new recruitment.

The evils in connection with recruitment were most marked in the case of casual or substitute labour. The Millowners' Association, Bombay, have dealt with the problem by establishing what is known as the "Badli Control System." Daily casual vacancies are filled only from card holders and whenever there is a permanent vacancy it is filled from these card holders. The evil influence of the jobber is thus eliminated. A recent development in this matter is the 'decasualization' scheme of the Government of Bombay which has been introduced in some of the textile centres.

In the jute mill industry during recent years, many of the mills have established what are known as Labour Bureaux out of whose functions it to recruit labour.

In this connection mention might also be made of the Employment Exchange started by the Northern India Employers' Association in Kanpur. Some progressive cotton mills in the south have also opened special Labour offices through which only recruitment is made.

The Millowners' Association, Bombay conducts special classes for the training of Mill Labour Officers and actively supervises and controls the work done by all such Officers where they have been appointed through the Association. Following the example of the Millowners' Association, Bombay, the University of Calcutta, in co-operation with the Indian Jute Mills Association, has a special course of social work for giving suitable training to Labour Welfare Officers engaged in jute mills. Among other institutions imparting training for Labour Officers mention may be made of the Tata Institute of Social Sciences, Bombay; Institute for Training of Welfare Workers, Bombay; Delhi School of Social Work, Delhi; Institute of Social Sciences, Banaras; Xavier Labour Relations Institute, Jamshedpur; Department of Labour and Social Welfare, Patna University; J. W. Institute of Sociology and Human Relations, Lucknow University, and the training course conducted by the Madhya Bharat Millowners' Association, Indore.

The Directorate-General of Resettlement and Employment set up by the Government of India organises technical training.

There were 454 training centres in June 1956 and the number of persons undergoing training in these centres was as follows:—

Technical training .. .. .	9,378
Vocational training .. .. .	1,310
Apprenticeship training .. .. .	1,030
Vocational training—women .. .. .	555
<b>TOTAL .. .. .</b>	<b>12,278</b>

The number of registered unemployed was 792,345 in July 1956, of whom 301,809 were unskilled and 231,109 were clerks.

A survey conducted by the National Sample Survey towards the end of 1953 revealed that approximately 2.6 per cent of the population in these towns was unemployed. The towns covered were over 175 and each had a population of over 50,000. The four big cities of Calcutta, Bombay, Madras and Delhi, however, were not covered by the Survey. Of the 2.6 per cent unemployed 1.16 were seeking employment for the first time and about 1.44 per cent were out of work. The Survey also disclosed that 55.85 per cent of the population belonged to working age-group (16-61).

## EMPLOYMENT EXCHANGES

### WORKING OF THE EMPLOYMENT EXCHANGES IN INDIA

1955	No. of exchanges at the end of the period	No. of registrations during the period	No. of applicants placed in employment during the period	No. of applicants on the live registers at the end of the period	Monthly no. of employers using the exchanges	No. of vacancies notified during the period	No. of vacancies being dealt with at the end of the period

November .. .. .	138	129,227	14,456	581,164	4,835	23,625	42,425
December .. .. .	136	147,990	16,817	691,958	5,330	25,514	42,248

The number of the educated unemployed registered at the employment exchanges all over India at the end of December 1955, was 216,157. Of these, 189,933 were matriculates and 26,224 graduates.

Among the graduates, 628 were engineers, 179 doctors and 25,417 were degree-holders in subjects other than engineering and medicine. The number of women unemployed was 10,510 of whom 9,276 were matriculates and 1,235 graduates.

Of the educated unemployed 96,679 were registered during October-December, 1955, and those placed in jobs by the exchanges numbered 13,486 during the period.

The largest number of registrations—21,134—were made at the employment exchanges in Uttar Pradesh and the largest number of placements, namely, 1,868, were secured in Madras State.

The number of the educated unemployed registered at the exchanges during the period in Uttar Pradesh was 40,072, in West Bengal 31,046, in Bombay 28,718 and in Madras 25,084.

In February 1956 the total number of educated applicants on the live registers of 142 employment exchanges was 260,000.

### SHIVA RAO COMMITTEE

A Committee, with Mr. B. Shiva Rao as Chairman, was appointed in November 1952 to inquire into the future set up of the Organisation of the Director-General of Re-settlement and Employment. The Committee submitted its report in April 1954.

The Committee recommended that the Employment Exchange Organisation should be placed on a permanent footing and its administration should be handed over to the States. The Central Government, however, should lay down national policies, standards and

programmes to be followed by the Exchanges. Private employers should be required on a compulsory basis to notify all vacancies to the exchanges, and the Employment service should develop standardised aptitude tests. A Central Advisory Committee representing employers, labour and other important public interests should be formed to advise the Director.

### EMPLOYMENT EXCHANGES

The Government of India have accepted in principle the recommendation of the Shiva Rao Committee that all recruitment to Government posts not filled through Public Service Commissions or by competitive examinations, should be made through employment exchanges. Now that the administration of the employment services is transferred to the State Governments, this recommendation will be taken up by them. The Union Government bears 60 per cent of the expenditure in respect of the Exchanges while

the State Governments meet the remaining 40 per cent.

Provision has been made in the Second Five-Year Plan for opening an additional 125 employment exchanges, bringing the total number of exchanges at the end of the Plan period to 256. In locating the new exchanges the need for developing the employment service uniformly in all states as well as the requirements of specific local areas would be kept in view.

Government has also decided to set up a National Council for Training in Vocational Trades with the Union Labour Minister as the Chairman. The Council includes representatives of Central and State Governments, employers' and workers' organisations, and professional bodies. Its functions are to co-ordinate vocational training of national importance throughout the country, to advise Government of India in the framing of training policy and to establish and award national trades certificates.

A pilot scheme to help the educated unemployed enter into avenues of employment other than 'white collar' jobs was sanctioned by the Government of India in February 1957.

Under the scheme, four work and orientation centres will be set up in the country, one each in the States of Kerala, Delhi, West Bengal and Uttar Pradesh.

At each of the proposed work and orientation centres 250 educated unemployed of the matriculation to university standard and registered with the exchanges will be given an orientation course for about six months. They will also be paid a stipend.

The centres will give vocational counselling, manual work and some theoretical and practical instruction in occupations selected with reference to the aptitudes of the participants. The plans of Government to develop small scale industries, the loans available and the facilities accessible to co-operative societies will also be explained at the centres.

The scheme will not guarantee subsequent placement in life, though some may get placed in positions in which shortages are felt. The instruction and orientation given, however, will be directed to giving them the necessary 'know how' to set up business either by themselves as entrepreneurs or in co-operatives.

The centres will be guided by Local Advisory Committees, consisting of officials and non-officials and will maintain close liaison with important local employers. The centres will be organised and administered by the State Governments.

### ABSENTEEISM

One of the commoner complaints of Indian industrialists has been the high percentage of absenteeism and the large labour turnover in Indian factories, mines, etc. The percentage of absenteeism amounts to about 8 to 15 per cent in factories, about 10 to 15 per cent in mines and about 20 per cent in plantations. It is noteworthy that in factories in which the conditions of work and wages are satisfactory and also where there is a system of granting leave with pay apart from the statutory holidays with pay, the incidence of absenteeism is not so high as is otherwise the case. The available statistical data on absenteeism in certain types of concerns for the years 1950, 1951, 1952, 1953, 1954, and the twelve months of 1955 are given in the tabular statement below :—

### ABSENTEEISM IN MANUFACTURING INDUSTRIES IN INDIA

(Percentage of man-shifts lost to man-shifts scheduled to work)

## EMPLOYEES' STATE INSURANCE CORPORATION

The Employees' State Insurance Act, 1948 applies to all factories including factories belonging to Government other than seasonal factories and covers employees in receipt of wages or salaries up to Rs. 400 per month. The administration of the Act is entrusted to an autonomous body called the Employees' State Insurance Corporation. A Standing Committee is set

as the executive of the Corporation. There is also to be a Medical Benefit Council to advise the Corporation on matters relating to administration of medical benefit, certification, etc. All these bodies are tripartite in character. The scheme is contributory but the Central Government is to make an annual grant to the Corporation during the first five years of a sum equivalent to 1/3rd of the administrative expenses of the Corporation. The rates of contribution payable in respect of an employee have been fixed as follows:—

Group of employees	Employees' contribution (recoverable from employees)			Employers' contribution			Total contribution (employees' and employers' contribution)		
	Rs.	As.	Ps.	Rs.	As.	Ps.	Rs.	As.	Ps.
1. Employees whose average daily wages are below Re. 1	Nil			0	7	0	0	7	0
2. Employees whose average daily wages are Re. 1 and above but below Rs. 1-8-0	0	2	0	0	7	0	0	9	0
3. Employees whose average daily wages are Rs. 1-8-0 and above but below Rs. 2-0-0	0	4	0	0	8	0	0	12	0
4. Employees whose average daily wages are Rs. 2-0-0 and above but below Rs. 3-0-0	0	6	0	0	12	0	1	2	0
5. Employees whose average daily wages are Rs. 3-0-0 and above but below Rs. 4-0-0	0	8	0	1	0	0	1	8	0
6. Employees whose average daily wages are Rs. 4-0-0 and above but below Rs. 6-0-0	0	11	0	1	6	0	2	1	0
7. Employees whose average daily wages are Rs. 6-0-0 and above but below Rs. 8-0-0	0	15	0	1	14	0	2	13	0
8. Employees whose average daily wages are Rs. 8-0-0 and above	1	4	0	2	8	0	3	12	0

The insured persons are entitled to the following benefits:

(i) sickness benefit, (ii) maternity benefit, (iii) disablement benefit, (iv) dependents benefit and (v) medical benefit.

Amounts (Rs.) distributed in form of cash benefits in 1955-56 are as follows:—

Amounts (Rs.) distributed in form of cash benefits in 1955-56 are as follows:						Rs. '000
State	Sickness Benefit	Maternity Benefit	Temporary Disablement Benefit	Permanent Disablement Benefit	Dependent Benefit	
Delhi .. .. .	590	3	60	27	4

Total .. .. .	5,735	214	1,123	89	38	

\* Amounts below Rs. 500.

The implementation of the scheme throughout the country simultaneously being attended with practical difficulties, a plan of phased application of the scheme in different places was drawn up.

Under this plan, it was proposed to introduce the scheme in Kanpur and Delhi in July 1950. The proposal had to be postponed at the last moment owing to objections received from

employers in Kanpur that the introduction of the scheme in selected places, without its simultaneous application elsewhere, would place industries in those areas at a competitive disadvantage. To overcome these objections, and to remove a few other lacunae, the Employees' State Insurance Act, 1948, was amended in 1951. Under the amended Act, the employers' contribution will be levied from employers throughout the country in a manner which will make the extra cost on all employers as equitable as possible.

The scheme was inaugurated in Kanpur and Delhi on 24th February 1952.

The Schemes covered over 10.5 lakh employees in Dec. 1956.

The number of employees covered in different areas are:

Delhi (40,000); Kanpur (80,000); seven cities of the Punjab State (32,000)—namely, Amritsar (including Chhahrata), Ambala, Batala, Bhiwani, Jagadhri-Abdullapur, Jullundur and Ludhiana; Nagpur (22,000); Greater Bombay (4,30,000); Coimbatore (36,000); Indore, Gwalior, Ujjain and Ratlam (50,000); Hyderabad (17,000); Calcutta City and Howrah District (2,30,000); seven industrial centres of Andhra State (17,000)—namely, Vishakapatnam, Chittivale, Nellimarla, Guntur, Mangalagiri, Eluru and Vijayawada; and Madras City and suburbs (50,000); Agra, Sagarapur and Lucknow (17,000); Akola and Hinganghat (10,000); Quilon, Alleppey, Ernakulam and Trichur (31,000); Madurai, Ambasamudram and Tuticorin (40,000).

On 1st Dec. 1956 the scheme was extended to the following cities of Rajasthan: Jaipur, Jodhpur, Pali, Bikaner, Bhiwara, Lakheri.

A Scheme to liberalise benefits to insured workers suffering from T.B. was put into force from 1st June 1956. After exhausting his sickness benefit of 56 days, an insured person suffering from T.B. who has put in two years continuous service in a factory will get additional sickness benefit at a reduced rate of Anna 12 for 18 weeks more. Insured persons with three years continuous service will receive free medical treatment for an extra period of about one year.

The Government of India has decided to extend medical care under the scheme to families of insured persons with effect from April 1957. Co-operation of the State Governments is being sought to implement this decision. The rates of contribution from employers will then be raised from 1½ per cent. to 2½ per cent. in the implemented and from 1 per cent. to 1½ per cent. in the non-implemented areas. The insured employees will pay the scheduled rates of contribution in the implemented areas and nothing in the non-implemented areas.

Sickness and Maternity Benefits became payable from the date of commencement of the first benefit period and the remaining three benefits from the date of implementation in each area which are indicated below:—

State	Area	Date of Implementation	Date of commencement of 1st benefit period
Delhi .. .. .	Delhi State .. .. .	24-2-52	23-11-52
Punjab .. .. .	Punjab Areas .. .. .	17-5-53	14-2-54

Main Office : 2A-3, Asaf Ali Road, New Delhi.

Delhi Regional Office : B-9, Pusa Road.

Kanpur Regional Office : 7-202, Swarup Nagar.

Bombay Regional Office : Colaba Causeway, Bombay 5.

Madras Regional Office : 2, Sir Desikachari Road, Mylapore.

Calcutta Regional Office : 64, Ganesh Chandra Avenue.

Indore Regional Office : 65, Race Course Road, Indore.

## ACCIDENTS

The Mill-owners' Association, Bombay, has done a considerable amount of good work of a pioneering character in connection with Safety-First measures. Working in conjunction with the Safety-First Association of India, the Association drew up a Safety Code for the Cotton Textile Industry and this Code was published and put into operation from August 1940. It is of interest to note that most cotton mills in Ahmedabad had also established safety-first committees by the end of the year 1939.

The Indian Factories Act requires the manager to report all accidents which cause death or bodily injury whereby the person injured is prevented from returning to his work in the factory during the 48 hours next after the occurrence of the accident.

It is the duty of the Inspector of Factories to make an investigation as soon as possible into the causes of and the responsibility for a fatal or serious accident, and to take steps

for the prosecution of the person concerned if it is found that the death or serious injury resulted from any infringement of the provisions of the Act or of the rules framed under the Act.

Provision has been made for the training of miners in first-aid. There are also in the mining areas two rescue training centres where training has been given for fighting fires, etc. in coal mines.

The Department of Mines has been strengthened to facilitate more frequent inspection of mines. As an emergency measure, the Coal Mines (Temporary) Regulations, 1955 have been promulgated for the prevention of apprehended danger and for the speedy remedy of the conditions likely to cause danger. The entire codes of coal and non-coal mines regulations are being revised to provide for more comprehensive measures for safety in mines.

The Government of India has constituted four Committees for collection of the basic data for preparing safety pamphlets on different types of machinery. One of the Committees has already completed its work and will report shortly.

An unofficial Council of Industrial Health, Hygiene and Safety was formed in Bombay with a view to promoting interest in safety measures. The Council works in close co-operation with the State factory Inspectorate and the Industry.

The Office of the Chief Adviser, Factories now issues from time to time valuable literature on the subject of industrial safety.

The table below shows the number of accidents in Indian factories and mines in the years 1939 and 1941 to 1953.

Year	FACTORIES				MINES			
	Fatal	Serious	Minor	Total	Fatal	Serious	Minor	Total
1939	221	5,837	29,948	36,006	286	1,410	10,584	12,280
1941	271	8,374	40,091	48,736	303	1,489	10,969	12,761

\* Excluding the Punjab and the N.W.F.P. in the case of factories.

† From 1950 onwards figures for Serious and Minor accidents have been combined into Non-fatal accidents.

‡ The figures relate to 12 States of the Indian Union, known as Provinces before the 1950 constitution whereas the previous figures relate to the pre-partition British India.

§ Excluding Punjab and West Bengal in the case of factories.

|| Since Statistics for minor injuries are incomplete, total figures for 1951 onwards in respect of mines are not strictly comparable with those for the previous years.

N. A. Not available.

The latest available figures show the number of accidents in mines as follows :—

	Fatal	Serious	Total
1954 .. .. .	281	4,332	4,613
1955 .. .. .	270	4,229	4,499

## WELFARE ACTIVITIES

The Reports of the Labour Investigation Committee on labour conditions in 38 industries as also their Main Report as well as the issues of the Indian Labour Year Book published by the Labour Bureau of the Government of India contain detailed and comprehensive information regarding labour welfare undertaken in various States and industries.

Until recently the Government of India had not undertaken any activities to promote the welfare of industrial labour employed in Central concerns. Recently, however, they have done a great deal in this respect. Welfare Funds have been instituted in coal and mica mines. The

Central Government have issued directives to all employing departments to constitute Labour Welfare Funds in all Government undertakings. The Fund is to be utilised for providing indoor and outdoor recreation, reading rooms, etc., to workmen employed in the undertakings. The Fund will be financed partly by Government grants.

Welfare work had been done directly by the Governments of the pre-Reorganization States of Assam, Bihar, Bombay, Madhya Pradesh, Punjab, U.P., West Bengal, Hyderabad, Madhya Bharat, Mysore, Rajasthan, Saurashtra, Travancore-Cochin Coorg, Delhi and Tripura in the areas which these States covered.

## HOUSING

In the past the policy of Government as well as of industrial employers was to leave the matter of housing more or less in the hands of private enterprise. The rapid growth in industrial employment made the housing problem serious

and the influx of large numbers of workers to urban centres during the war further aggravated the situation.

In April 1948 the Government of India announced as part of their industrial policy a scheme for the construction of a million workers' houses to be completed within a period of ten years but on account of financial stringency much headway could not be made in the furtherance of the scheme.

The Government of India introduced a Subsidised Industrial Housing Scheme in 1952. Under the Scheme, houses are to be constructed for industrial workers through the agency of State Governments, Statutory Housing Boards, employers and registered co-operative housing societies of industrial workers. The Central Government would assist financially these agencies both in the form of subsidies and loans. For housing schemes undertaken by State Governments or Housing Boards the subsidy will be to the extent of 50 per cent of the cost of construction and the loan also to the extent of 50 per cent. In the case of other housing schemes the subsidy and loan will be to the extent of 25 per cent and 37½ per cent respectively. The Government of India also allotted during 1952-53 a sum of Rs. 716.625 lakhs for the industrial housing scheme. As a result of the review of the working of the scheme during 1952-53 certain important modifications were later made in the scheme.

During the year ended September 1954 a number of State Governments' and Employers' schemes for the construction of 22,881 tenements, involving the grant of Rs. 6 crores as loans and subsidy were sanctioned. Up to 31st July 1954, 15,441 tenements were completed.

The scale of financial assistance to the employers and workers' co-operatives under the Government of India Subsidised Housing Scheme was liberalised for the period 1953-1956. The percentage of loan payable to co-operatives under the original scheme was 37½. This was raised to 50 to offer better incentive to workers' co-operatives. The employers and workers' co-operatives may get as much as 25 per cent of the approved cost of a project as subsidy; in addition 37½ per cent of the cost is advanced as loan to employers and 50 per cent as loan to co-operatives. The loan to employers is repayable in 15 years and bears an interest of 4½ per cent. In the case of workers' co-operatives, the period is 25 years and the rate of interest 4½ per cent.

The draft outline of the Second Five-Year Plan gives rough figures of the total number of houses constructed during the First Plan period in the public and private sectors, as follows :—

Public construction :	No. of houses/tenements.
Industrial Housing .. .. .	77,000
Low Income Group Housing. . . .	40,000
Refugee Housing .. .. .	323,000
Housing by Central and State Governments .. .. .	300,000
Total .. .. .	740,000
Estimate Private Construction .. .. .	750,000
Grand Total .. .. .	1,490,000

The subject of industrial housing has also been engaging the attention of several State Governments in recent years. The pre-reorganization Governments of Bihar, Bombay, Madhya Pradesh, Punjab, U.P., Madhya Bharat, Mysore, Travancore-Cochin, had in hand schemes of industrial housing and some of the States, as for instance Bombay, Bihar, and U.P. made substantial progress in regard to the construction of new houses.

As regards housing accommodation provided by employers, the standards vary widely. In the cotton mill industry only a small proportion of the workers are provided with houses. The jute mills in and around Calcutta have provided housing for about a third of their workers but the standards of housing provided leave much to be desired. In the engineering industry only

the larger units generally provide housing for their employees. The Tata Iron and Steel Co. for instance, have provided 12,000 houses at Jamshedpur. As many as 8,600 houses have also been built by the employees themselves on the company's land leased to them at very low rates. The cement industry in India is much ahead of other factory industries in regard to the proportion of workers housed as well as the standards of housing provided.

The Scindia Shipyard at Vishakhapatnam houses about 25 per cent of their workers in a special housing colony. In the sugar industry, the employers provide housing for about 30 to 50 per cent of their labour force.

In the coal mines up to 80 per cent of the workers are housed in dhowrahs free of rent. Under the housing scheme of the Coal Mines Labour Welfare Fund constituted by the Government of India for coal miners over 1,500 houses have been completed. The mining companies in the Kolar Goldfields in Mysore provided about 12,800 houses for their employees.

In the plantations nearly all the settled labour force have been provided with housing but the scale and standard of houses provided are far from adequate. However, in recent years the industry has become keenly alive to the urgency of the problem and at a Tripartite Conference held in November 1950, the planting interests agreed to replace the then existing sub-standard houses by stages spread over 12 years. The number of houses provided for plantation labour up to September 1951 was as follows: Assam and Bengal 323,865; Bihar 1,531; Madras 22,864; Orissa 40; U.P. 103; Mysore 2,171; Travancore-Cochin 18,216; Coorg 1,877.

On Government Railways there were on 31st March 1952, 230,988 units of residential quarters for the use of class III and class IV employees. During 1952-53, 7,323 quarters were constructed.

During the year 1953-54 further 6,848 tenements of various types were added.

Several co-operative housing societies have recently been formed in Ahmedabad through the efforts of the Ahmedabad Textile Labour Association.

Out of the 24,056 tenements sanctioned, under the Central Government's subsidized industrial housing scheme 4,570 had been constructed upto the end of Nov. 1953 and 6,888 were under construction.

Under the industrial housing scheme of 1949 2,856 tenements had been constructed and 940 were under construction.

Under the Bihar State Industrial scheme financed by the Centre 763 tenements had been constructed and 316 were under construction.

In all upto the end of 1954, about 32,000 houses had been built—13,000 by State Governments, 8,000 by employers and 16,000 by other agencies except co-operative societies.

#### SHELTERS, CANTEENS

Section 47 of the Factories Act, 1948 makes it obligatory for all factories employing more than 150 workers to provide adequate shelters and a suitable lunch room for the use of workers during periods of rest. Almost all large industrial establishments had provided tiffin rooms and rest shelters for their workmen. Most concerns had also permitted the establishment of tea stalls on the premises but apart from this, little effort had been made to run co-operative canteens on the lines of those which are associated with most of the large factories in the West.

The Act of 1948 provides for the setting up of canteens in factories that employ more than 50 women.

Except for the Ahmedabad Textile Labour Association, the Railwaymen's Unions, and the Masdoor Sabha of Indore labour unions have not done much by way of labour welfare. This has been due largely to lack of funds. Some of the Railwaymen's Unions have organised co-operative societies, and various kinds of funds

for the provision of specific benefits, such as, legal defence, death and retirement benefits, unemployment and sickness benefits and life insurance, etc.

In 1939, the Bombay Government first organised model welfare centres. In July 1953, the Government of Bombay transferred all welfare activities to the Bombay Labour Welfare Board constituted under the Labour Welfare Fund Act, 1953. The Board consisted of 14 members including representatives of employers, workers, independent persons and women. The Board maintained (in the area covering the pre-reorganization State) 54 labour welfare centres classified under four classes—'A', 'B', 'C' and 'D'. In Bombay now there are 3 'A' class 13 'C' class and 2 'D' class centres, located in various parts of the city; at Ahmedabad, 1 'A' class and 8 'C' class centres; at Sholapur there are 1 'A' class and 8 'C' class centres; at Jalgaon, Hubli and Dhulia there is 1 'B' class and 1 'C' class centre each. There is one 'B' class centre each at Poona, Baroda, Gadag, Barsi, Viramgaum, Broach, Surat and Nadiad. 'A' class centres have a full-time nursery school for children; a women's section providing literacy, sewing and embroidery classes and suitable games; outdoor games and gymnasium with all facilities for men; and separate arrangements for water-taps and shower baths for both men and women. Static as well as circulating libraries are attached to these centres; radio sets are provided; monthly cinema shows are arranged; and well-equipped dispensaries are attached. 'B' class centres are intended to be a replica of 'A' class centres but on a very much smaller scale. 'C' class centres provide indoor recreation and educational facilities, static and circulating libraries and dispensaries. 'D' class centres provide only outdoor recreation, such as games and sports.

Welfare centres were also opened in the areas covered by the pre-Reorganization States of Assam (12), Bihar (3), Madhya Pradesh (4), Punjab (5), U.P. (38), West Bengal (25), Hyderabad (1), Madhya Bharat (4), Mysore (2), Rajasthan (3), Saurashtra (20), Travancore-Cochin (3), Delhi (1) and Tripura (2).

#### MEDICAL FACILITIES

Medical facilities provided by employers range from first-aid posts and dispensaries to first-class hospitals. There are some examples, in which first rate medical facilities are provided. The Tata Iron and Steel Co. maintain a large well-equipped hospital with 400 beds, and also 8 outdoor dispensaries. The Delhi Cloth Mills maintain a hospital which is fully equipped with X-ray apparatus and other modern appliances, and which gives free medical aid to both mill workers and their families and free food to indoor patients. The hospital at the Kolar Goldfields is a model of its kind. The Buckingham and Carnatic Mills of Madras and the three important groups of employers of the Assam Oil Co. at Digboi have also provided adequate medical facilities. In all railways in India there are medical departments under the control of chief medical and health officers with divisional medical officers seconded by a number of assistants.

Although the Factories Act requires that provision should be made for washing especially in factories where workers come into contact with injurious or obnoxious substances, very little effective provision exists in this regard because most factories only provide water for washing but not soap, soda, towels, etc. As for bathing facilities, extremely few employers provide this amenity. Section 48 of the Factories Act, 1948 provides for the maintenance of such facilities in every factory.

Other types of welfare work done by factories relate to the provision of recreational facilities, amenities for the education of workers and their children, the provision of cost price grain shops, the establishment of co-operative societies, etc.

On railways there are educational facilities for the children of the employees mostly free of charge. Staff Benefit Funds have also been created which give monetary help to the children and widows of the deceased employees.

#### COAL MINES WELFARE FUND

This Fund was constituted under the Coal Mines Labour Welfare Fund Act of 1947. The principal objects for which this fund is to be utilised are defined in the Act. These are: (1) the improvement of standards of living including housing and nutrition, the amelioration of social conditions and the provision of recreational facilities for the benefit of the labour employed in the coal mining industry; (2) the provision of transport to and from work; (3) the improvement of educational facilities; (4) the provision of improvement of supplies of water; and (5) the improvement of public health and sanitation, the prevention of disease, the provision of medical facilities and the improvement of existing medical facilities. The Act makes provision for the appointment of an Advisory Committee consisting of Government Officers and an equal number of members representing colliery owners and workers employed in the coal mining industry of whom one has to be a woman.

Both the cost of administration of the fund and the salaries and allowances of the officers appointed in connection therewith are to be defrayed from the fund itself.

At present a cess of six annas per ton of coal or coke has been levied for being credited to the welfare fund. The principal activities of the fund which are financed out of this cess are:—

- (i) Housing
- (ii) Hospitals
- (iii) Prevention of disease
- (iv) Water supply
- (v) Pit-head baths and creches and others.

The cess is now being apportioned between the Housing Account and the General Welfare Account of the fund in the ratio 2:7. A Coal Mines Labour Housing Board consisting of eight members has been set up.

The fund gives certain grants and subsidies to various other funds such as the Leper Fund.

Regional hospitals and maternity child welfare centres at Katras and Tisra in the Jharia coalfield and Chora and Searosole in the Raniganj coalfield have been opened. A central hospital for Jharia coalfield has been opened and the construction of a central hospital for the Raniganj coalfield has started.

For the prevention of disease, grants are being made to the Mines Boards of Health and a scheme for the treatment of tuberculosis has been drawn up. Anti-malaria work is also in full progress.

The construction of pit-head baths and of creches has now been made compulsory.

**Mica Mines Labour Welfare Fund.**—The Mica Mines Labour Welfare Fund Act, 1946, which was designed to constitute a similar fund for the benefit of mica workers, provides for the levy of an *ad valorem* duty not exceeding 6½ per cent on all mica exported from India. Under the Act Advisory Committees for Bihar, Madras, and Rajasthan were constituted. In Madras three dispensaries have been started for use by mica miners and five radio sets have been installed in selected mica mining centres.

In June 1956, the Fund was running 13 primary schools, one middle school and 10 adult education schools at its own expense and was giving financial and other aids in the shape of buildings, furniture, books, etc. to 10 schools.

#### PENSIONS, GRATUITIES

All monthly and time-rated workmen in the industrial establishments of Government are entitled to pensions on retirement provided that a minimum of ten years' service has been put in. Outside Government concerns, pensions on retirement are almost non-existent although some concerns give

small pensions to old employees who have put in long periods of trusted and faithful service but these are mostly *ad gratia* and cannot be claimed as of right.

All railway employees and the employees of local and public bodies and a few of the larger public companies receive gratuities on retirement. Gratuities are also paid to non-pensionable workers who have put in not less than thirty years' service in Government concerns.

In all cases specified periods of qualifying service have to be put in before gratuities can be earned. The rules of individual administrations vary widely but the most generally accepted principle is half a month's pay for each year of service limited to fifteen months' pay in all. Permanent Government servants who have put in less than ten years' active service are entitled to gratuity if they are compelled to retire on medical certificate.

The Employees' Provident Funds Act, 1952 provides as already mentioned for compulsory provident funds for employees in Cement, Cigarettes, Engineering, Iron and Steel, Paper and Textile Industries. A provident funds scheme under the Act was prepared and brought into force from October 1952.

A few large industrial establishments in India have started on their own Retirement Benefit schemes where an account is opened for every individual worker to which a fortnight's or 13 days' pay is credited every year interest is allowed and the amount standing to a worker's credit is paid to him on retirement.

The Provident Fund Rules of different State Governments in India are by no means uniform. The Government of the former Bombay State by a notification dated 20th March 1941, made it compulsory for all Government servants in receipt of a monthly income of Rs. 50 per month who joined Government service before that date or of Rs. 25 per month who joined after that date to subscribe to the Government Provident Fund. Pensionable Government servants can only join the non-contributory section of the fund.

**Compulsory Schemes.**—Compulsory contributory schemes are provided for all permanent workmen in the factories owned by certain public bodies such as the Bombay Port Trust; whilst both compulsory and optional non-contributory and contributory schemes obtain for permanent workmen in the factories owned by most municipalities. Most of the larger public utility companies and corporations such as the Tata electricity generating and distributing plants, and the Burmah Shell Corporation, to mention only a few of many, provide contributory schemes for the benefit of the majority of their workmen. Several others have schemes for their supervisory and clerical establishments but not for their workmen.

The most usual amount of deduction from pay is one-twelfth of the monthly pay but the amount contributed by employers varies from 50 per cent to 100 per cent of the amount put in by the employee.

Profit sharing in this country has mostly taken the form of payment of bonuses according to the profit making ability of a concern. The question of bonus has already been dealt with elsewhere.

Under the Factories Act, 1948, the factory employees are entitled to a minimum of 10 days holidays with pay in the year. However the recent tendency for many units particularly in south India, has been to allow holidays with pay in excess of this limit. In many of the recent awards of Adjudicators, leave with pay up to 14 days has been awarded.

The workers in Jute Mills in West Bengal have been awarded gratuity by the Industrial Tribunal on the following lines. On retirement, resignation or death after 15 years' service  $\frac{1}{2}$  month's pay has been awarded.

Organisation.

basic wages per year of service subject to a maximum of 15 months' basic wages. On reaching the age of superannuation or termination or retirement on medical grounds and on death  $\frac{1}{2}$  a month per year of service with a maximum of 15 months' basic wages.

No gratuity is payable to a worker dismissed for mis-conduct.

For the period for which provident fund has been in operation no gratuity will be payable.

Schemes of gratuity have been introduced in several engineering concerns by awards of Tribunals, the pattern followed being similar to that in the case of the Jute mills.

## AGRICULTURAL LABOUR

Out of 68 million rural families in India nearly 17.6 million are those of agricultural labourers having an average annual income of Rs. 447 per family as against an expenditure of Rs. 468, according to an inquiry into the working and living conditions of agricultural labour conducted by the Union Labour Ministry in 800 villages representative of the Indian Union.

The object of the agricultural Labour Enquiry was to collect data on employment, earnings, cost of living, living standards and indebtedness of agricultural labourers in the Indian Union with a view to considering what protective and ameliorative measures, including the fixation of minimum wages, should be undertaken to improve conditions.

The enquiry was conducted in three stages viz General Village, General Family and Intensive Family Surveys in about 800 villages selected on the principles of stratified random sampling. The General Family Survey covered 104,000 families and the Intensive Survey about 11,000 agricultural labour families. The data collected during the Intensive Family Survey related to the year March 1950 to February 1951. For administrative convenience the Inquiry was divided into six zones namely, North, East, South, West, Central and North-West, which corresponded with the Census Zones of 1951.

## FINDINGS

The more important findings of the Enquiry are summarised below—

**Earning Strength.**—On an average the total earning strength (which included helpers) per family was about 2.6. Work was done by almost all the men and a little over half the women and the children above 10 years of age. The proportion of women was more in south, west and central India.

**Employment.**—The Zonal differences in the average number of days employed on wages were considerable. Male agricultural labourers were employed for 280 days in North, 245 in Central, 224 in East, 202 in North West, 196 in West and 181 in South India.

Most women undertook casual employment mainly to supplement the family income. The average employment of women workers was 120 days in agricultural and 14 in non-agricultural labour. Of the total number of man days worked by casual labourers, men contributed 62 per cent, women 35 per cent and children the remaining 3 per cent.

**Unemployment.**—In the Indian Union as a whole as many as 97 per cent of the attached workers reported wage-paid employment every month; and on the average they were unemployed for only 10 days during the year. The problem of unemployment concerned essentially the casual workers, of whom 82 per cent at a monthly average reported unemployment during an average of 8 days per month. On the average in the whole of India, an agricultural worker had paid employment for 218 days in the year, cultivated his own land for 49 days and was unemployed for 98 days.

**Wages.**—The actual payment of wages was made in a variety of ways, wages in cash and in kind, wages partly in cash and partly in kind, payment on time basis and on a piece basis, with or without perquisites in the form of mid-day meal, tea or tobacco.

Of the total man days worked by adult casual workers in the Indian Union, payment on a piece basis accounted for only 5.5 per cent. Time wages amounted to 94.5 per cent.

In the total wage employment in agriculture 57.7 per cent of the man days were paid in cash, 32.2 per cent in kind and the balance 10.1 per cent partly in cash and partly in kind. The practice of supplying perquisites prevailed to the extent of 33 per cent of the total man days worked by adult workers.

The average daily wage rate of the casual worker was found to be 17.5 annas for the whole of India. It was 23 annas in the North-West, 20 in the East, 19 in the North, 18 in the West, 16 in the South and 13 in Central India.

The average daily wage of women workers amounted to 62 per cent of the men's average daily wages. The wage rates of women workers in South, West and Central India were proportionately much lower than in other zones.

Of the male workers about 58 per cent could secure additional non-agricultural employment during an average of 56 days per annum. Among women about 34 per cent were employed on non-agricultural labour for an average of about 41 days a year.

Unlike casual workers attached workers, who were mostly men, received fixed wages that were generally for a period of one year irrespective of the seasonal nature of the work.

Minimum wage rates have so far been fixed for agricultural workers under the Minimum Wages Act, 1948 by the States of Punjab, Delhi, Kutch, Himachal Pradesh, Uttar Pradesh, Bihar, Assam and Rajasthan, in Kutch, in Bombay, in Coorg, in Mysore, and in the former Vindhya Pradesh area in Madhya Pradesh.

In the Indian Union as a whole children formed 4.6 per cent of the total agricultural labour force. On the average they were employed for 150 days in agricultural and 15 days in non-agricultural work during the year. The daily wage was 11.1 annas in agricultural and 9.9 in non-agricultural employment.

**Income.**—The family had as an economic unit various sources of income, including agricultural and non-agricultural labour, the cultivation of its own land, and occupations other than farming. The average annual income per family worked out to Rs. 447 of which Rs. 287 accrued from agricultural labour. About 57 per cent of the total income from agricultural wages accrued from cash payments and the remaining 43 per cent from payment in kind, including perquisites.

The average income of an attached worker's family was Rs. 489 and that of a casual worker's family Rs. 442.

**Cost of Living.**—The income of the agricultural labour families being low, it was the necessity to subsist that guided their expenditure and there was hardly any problem of preference as regards goods and services on which money should be expended.

With an all India average income of Rs. 447 the expenditure per agricultural labour family was Rs. 468 including Rs. 70 on ceremonies. There was thus a deficit of Rs. 14 on consumption alone. Of the 461 rupees spent on recurring items of expenditure, Rs. 393 (85.3 per cent) was spent on food, Rs. 29 (6.3 per cent) on clothing, totalling 91.6 per cent on food and clothing alone. Considered by zones, the annual income per family was Rs. 551 for North, Rs. 506 for East, Rs. 382 for South, Rs. 391 for West, Rs. 417 for Central, and Rs. 651 for North-West.

Taking the Indian Union as a whole the calorific intake of an agricultural worker was 2,220 and thus short of the normal requirement (3,000 calories) by about 25 per cent.

**Indebtedness.**—About 45 per cent of the agricultural labour families were indebted, the average debt per family being Rs. 47. Taking into account only the indebted families, the average debt was Rs. 105. The percentage of indebted families was the highest in North-West (75.8) and lowest in North. The percentage of casual workers families in debt was 44 and of attached workers families 51. The amount of debt per indebted family was Rs. 100 for casual workers and Rs. 143 for attached workers. The higher indebtedness of the latter was accounted for by the fact that it was easier for them to secure loans from their employers, generally as advances from wages. Debts were incurred mainly for production, consumption and social purposes, the debt on consumption alone being Rs. 78 out of an average debt of Rs. 105 per indebted family.

The biggest single source of borrowing was moneylenders; next in importance came employers. The amounts borrowed were Rs. 38 from the former and Rs. 22 from the latter. Shopkeepers lent Rs. 6 and Co-operative Societies only Re. 1.

### CENTRAL LABOUR INSTITUTE

As a step towards meeting the need for an agency designed to afford facilities for the scientific study of the various aspects of industrial development as relating to the human factor, the Planning Commission, as part of the First Five Year Plan, recommended the establishment of a National Museum of Industrial Safety, Health and Welfare. The Museum is to serve as a nucleus of an Institute for conducting specialised courses of training and education in labour problems.

The Institute will be a composite one, comprising (1) a Museum of Industrial Safety, Health and Welfare, (2) and Industrial Hygiene Laboratory, (3) a Training Centre, (4) a Library-Information Centre, (5) a Productivity Centre, and (6) a Training-within-Industry Centre.

A course in Training-within Industry has started functioning with a well-equipped staff. It provides facilities for the training of nominees of industrial concerns as T.W.I. instructors. The Centre which is designed to cater to the needs of the industry in the country is at present located in the Industrial Assurance Building, Churchgate, Bombay, 1, and is under the direction of Mr. P. K. Sathe, Deputy Adviser (Factories) Ministry of Labour, Government of India.

The Government of Bombay have made available free of cost a 13 acre plot of land on the Kurla Hills just behind the Santa Cruz Aerodrome at Bombay. A capital grant of Rs. 10 lakhs has been sanctioned by the Central Government for the construction of the main Institute building. An Operational Agreement has been signed between the U.S. Government and the Government of India under which a sum of \$100,000 has been made available for the purchase of plant, equipment and technical publications of the Institute. The Institute is expected to start functioning by the middle of 1957.

### TRIPARTITE LABOUR MACHINERY

The Tripartite Labour Machinery at the centre consists of (a) Indian Labour Conference, (b) Standing Labour Committee and (c) Industrial Committees. Besides, there are such bodies as the Joint Consultative Board, the Central Advisory Council, the Labour Ministers' Conference etc.

#### Indian Labour Conference

The Indian Labour Conference is composed of 24 members representing the Central and State Governments and 9 members each representing the employers and workers, nominated by the Government of India in consultation with the

all-India organisations of employers and workers.

The function of the Conference as laid down at the fourth Indian Labour Conference is to "advise the Government of India on any matters referred to it for advice taking into account suggestions made by the Provincial Governments, States and Chamber of Princes and the representative organisations of employers and workers recognised for the purpose of the Conference".

Since 1942 the Indian Labour Conference has held 11 sessions. No meetings were held in 1946, 1949 and 1953. The last session was held in Bombay in May 1955.

#### Standing Labour Committee

The Standing Labour Committee was constituted by a resolution of the Indian Labour Conference adopted in August 1952. At present the Committee consists of 5 representatives each of the employers and workers and 12 representatives of the Government. The representatives are nominated by the Government of India in consultation with the all-India organisations of employers and workers. The function of the Committee is to consider and examine such questions as may be referred to it by the Plenary Conference or the Central Government. The Committee has met 15 times so far, the last session being the one held in New Delhi in April 1956.

Both the Conference and the Committee have so far considered no less than 80 items each and besides promoting such legislation as Industrial Employment (Standing Orders) Act, 1946, Minimum Wages Act, 1948, and the Employees' Provident Funds Act, 1952, they were responsible for the appointment of the Labour Investigation Committee, introduction of health insurance schemes for industrial workers etc.

#### Industrial Committees

The Eighth session of the Indian Labour Conference decided to establish Industrial Committees to discuss various specific problems special to industries covered by them and submit their reports to the Conference. The first Industrial Committee to be set up in pursuance of the decision was that on Plantations in January 1947. In 1948 Industrial Committees were set up for four important industries viz. Cotton Textiles, Coal Mining, Cement and Leather goods, and in 1955 for Building and Construction Industry. There is no uniformity in the representation accorded to Government, employers and workers in these Committees but the representation given to employers and workers is equal in all cases.

Barring the Plantation Committee which has met seven times so far, the other Committees have not been very active. The Plantation Labour Act, 1951, the extension of the Industrial Disputes (Amendment) Act 1953 relating to lay-off and retrenchment compensation to plantation labour, grant of sickness benefit of two weeks in a year are some of the achievements of this Committee.

#### Joint Consultative Board

The Joint Consultative Board for Industry and Labour was constituted to promote agreements between employers and workers and to ensure their proper implementation following a recommendation in that regard made by the Development Committee on Industries in 1951. The Board as originally constituted consisted of three representatives each of employers and workers with the Union Minister for Planning as Chairman. Since February 1954 the Board has been reconstituted as a purely bi-partite body and it now consists of 8 members, 4 representing employers and 4 workers. It considers such questions as rationalisation, productivity studies, payment by results, association of workers with management etc. At its last meeting held in September 1956 the Board decided to set up a subsidiary Joint Consultative Board for the Cotton Textile Industry.

### Tripartite Machinery in the States

Bombay was the first State to set up tripartite Labour Advisory Board in March 1947. This example was followed by Uttar Pradesh, Bihar, West Bengal, Madras etc.

The function of these boards is to help maintain harmonious industrial relations and advise Government on matters affecting labour.

### LABOUR ADMINISTRATION

Apart from dealing with labour legislation and labour conditions and attempting and bringing about uniformity of standards in the different States the Ministry of Labour of the Government of India has undertaken additional responsibilities for the placement of civil and military demobilized personnel, refugees, etc. It has continued active co-operation with organized employers and labour organizations through the Tripartite Labour Conference and Standing Labour Committee.

Apart from the main Secretariat of the Ministry of Labour it has several attached and subordinate officers. The activities of some of these have been described in the relevant sections, such as Miners' Welfare Fund, and notes on some others are briefly given below.

**Labour Bureau.**—To meet the ever growing needs of Government, industry and labour for accurate and reliable information relating to labour conditions, labour legislation, etc., the Central Government established on 1st October 1946, a Labour Bureau.

Among other things the Bureau edits the *Indian Labour Gazette* and the *Year Book*.

**Chief Labour Commissioner.**—The Central Government, in the Ministry of Labour, have also appointed a Chief Labour Commissioner. This officer is in charge of industrial relations and conciliation, labour welfare, operation of labour laws, and maintenance of information regarding wage rates and conditions of work in Central undertakings. There are a number of deputies working under him known as Regional Commissioners.

**Chief Adviser of Factories.**—In order to ensure uniformity in the administration of the Indian Factories Act and to improve conditions generally in Indian factories, the Government of India have appointed an officer designated the Chief Adviser of Factories. The Chief Adviser has a number of deputies, including deputies who attend to matters relating to the health of the workers and the sanitation and cleanliness of factories.

### INDIA AND THE I. L. O.

India joined this organisation at the very start and since 1922 has been one of the eight countries of chief industrial importance and as such has been allotted a permanent seat on the Governing Body of the Organisation. India also contributes liberally towards the finances of the Organisation. In 1956 India's contribution amounted to U.S. \$252,194 which is 3.41 per cent. of the total contribution of all member States. India's share in the appointments of the office is, however, somewhat inadequate.

At the headquarters in Geneva the number of Indian nationals employed at the end of 1955 as Assistant Members of division and above was twelve. Among these the highest post is held by Mr. R. Raghunath Rao who is the senior-most Assistant Director General and the only Asian holding such a post. The Indian Branch at New Delhi employs 19 persons including the Director. The Asian Field Office of the I.L.O. at Bangalore which has been supervising the technical assistance programme in countries of South and East Asia employs 15 Indians.

† Does not now exist.

India has so far ratified 23 out of the 103 Conventions adopted by the International Labour Organisation. Twelve of these were ratified upto 1951. She has in addition incorporated into her national legislation the essential features of many other Conventions.

The following is a list of Conventions ratified by India together with the dates of ratification within brackets:—

- †1. No. 1 Hours of Work (Industry), 1919 (14-7-1921).
- @2. No. 2 Unemployment, 1919 (14-7-1921).
- 3. No. 4 Night Work (Women), 1919 (14-7-1921).
- 4. No. 5 Minimum Age (Industry), 1919 (9-9-1955).
- 5. No. 6 Night Work of Young Persons (Industry), 1919 (14-7-1921).
- 6. No. 11 Right of Association (Agriculture), 1921 (11-5-1923).
- 7. No. 14 Weekly Rest (Industry), 1921 (11-5-1923).
- 8. No. 15 Minimum Age (Trimmers & Stokers) 1920 (10-12-1922).

- 9. No. 16 Medical Examination of Young Persons (Sea), 1921 (20-11-1922).
- 10. No. 18 Workmen's Compensation (Occupational Diseases), 1925 (30-9-1927).
- 11. No. 19 Equality of Treatment (Accident Compensation), 1925 (30-9-1927).
- 12. No. 21 Inspection of Emigrants, 1926 (14-1-1928).
- 13. No. 22 Seamen's Articles of Agreement, 1928 (31-10-1932).
- 14. No. 26 Minimum Wage-Fixing Machinery, 1928 (10-1-1955).
- 15. No. 27 Marking of Weight (Packages Transported by Vessels), 1929 (7-9-1931).
- 16. No. 29 Forced Labour, 1930 (30-11-1954).
- 17. No. 32 Protection Against Accidents (Dockers) (Revised), 1932 (10-2-1947).
- @18. No. 41 Night work (Women) (Revised), 1934 (21-11-1935).
- 19. No. 45 Underground Work (Women), 1935 (25-3-1938).
- 20. No. 80 Final Articles Revision, 1946 (17-11-1947).

- 21. No. 81 Labour Inspection, 1947 (8-4-1949).
- 22. No. 89 Night Work (Women) (Revised), 1948 (27-2-1950).
- 23. No. 90 Night Work of Young Persons (Industry) (Revised), 1948 (27-2-1950).

In April 1951 the I.L.O. and the Government of India concluded an agreement for provision of technical assistance to India. In consequence of this three experts visited India in September 1952 to advise the Government of India on the implementation of the Employees' State Insurance Scheme. A team of five experts on productivity came to this country in December 1952 to show how productivity and earnings of workers could be improved by the application of modern techniques of work-study, plant organisation and payment by results. To prepare plans for a national Training within Industry Centre an expert arrived in this country in August 1953 and demonstrated the utility of the system in mills in Ahmedabad and Baroda. Besides this assistance, I.L.O. experts have also advised on vocational training, employment information and occupational classification.

† Conventions containing special provisions applicable to India.

@ Ratification denounced.

## FORESTS

**Total Forests:** 280,348 sq. miles;  
**Percentage of Forests to Land:** 22.8.

**Average annual revenue:** Rs. 20.5 crores.

**Allotment under First Five-Year Plan:** Rs. 11.69 crores.

The general policy of Government in relation to forests was laid down in 1894, when forests were classified into four classes: (a) protection forests; (b) timber forests; (c) minor forests; and (d) pasture lands.

The limited outlook of this policy was enlarged upon by the Government of India, and the new forest policy laid down in 1952 provides for the following:

(1) An objective of one-third of all land in the country under forests, with a larger proportion in the hills; (2) the reconditioning of our mountainous regions, river valleys and coastal lands by preserving and establishing protection forests; (3) the immobilisation of deserts and shifting sands; (4) sustained yield management of national forests, aiming at national self-sufficiency; (5) regulated development and utilisation of village forests; (6) development of tree lands more systematically; (7) State control over and guidance of working of private forests; (8) preservation of wild life; and (9) for State policies to be in conformity with the general principles laid down in the National Forest Policy.

Most of the country's forests are worked according to Forest Working Plans prepared by special staff. On the basis of present conditions and past working, these plans lay down, for a 10-15-year period at a time, silvicultural systems, schedules for thinning and other cultural work, methods of management, staff requirements and exploitation programmes, besides development schemes for roads, buildings.

The formation of forest plantations involving a long-term policy for increased production, is now-a-days an important feature of Indian Forestry, e.g. the very valuable and extensive plantations of Teak, Bluegum, Wattle, Casuarina, Sal, Deodar, and evergreen species.

'Forests' are a State subject.

The Government of India, however, are responsible for forest research and forest education. The Ministry of Agriculture in the Government of India co-ordinates forest activities in the country, but no forests are directly worked by it. The Inspector-General of Forests is his technical adviser in forest matters.

All States have separate Forest Departments. Usually a Chief Conservator of Forests (C.C.F.) heads the Department.

For purposes of administration the States are divided into one or more Forest Circles, each in charge of a Conservator of Forests.

Forest research and education are centralised in one large institution known as the Forest Research Institute and Colleges located at Dehra Dun.

The Forest Research Institute as such came into being in 1906 as an adjunct to the Imperial Forest College, as it was then called. Through progressive stages of development the Institute has now attained a position which has earned for it international prestige as evidenced by its recognition by the Food and Agricultural Organisation of the United Nations as a Centre for training in Forestry for South-East Asia.

The Forest Research Institute and Colleges are under the administrative control of the Ministry of Agriculture of the Government of India. Its administrative Head is designated the President.

The education wing of the Institute comprising three Colleges is in the charge of the Director of Forest Education.

The Indian Forest College trains recruits of the State Governments to their gazetted forest services. The course stretches over a period of three years.

The Northern Forest Ranger College (Dehra Dun) and the Southern Forest Ranger College (located in Coimbatore) offer training for two years to rangers selected by State Governments in the northern and southern regions of the country respectively.

The research wing of the Institute is organised under two main heads—biological and utilisation. Research on the biological side pertains to the rearing and protection of forests and is conducted in the Silviculture, Botany, Mycology and Entomology branches, while that on the utilisation of forest products is undertaken in the Wood Anatomy, Wood Seasoning, Wood Preservation, Composite Wood, Timber Mechanics, Timber Engineering, Minor Forest Products, Chemistry of Forest Products and Cellulose and Paper Branches.

Silviculture is under the direction of a Silviculturist. Much of the actual research work is, however, decentralised and done by local State silviculturists in the States, but the Central Silviculturist co-ordinates their work, does all the statistical computing and acts as an information bureau on silvicultural matters for the whole of India.

The Institute also runs a Service Branch, a Statistical Branch and a Publicity and Liaison Branch.

### FOREST PRODUCE

Forest produce is divided into two main heads—(1) Major produce, i.e., timber and firewood, and (2) Minor produce, comprising all other products, such as bamboos, canes, leaves, fruits, fibres, grasses, gums, resins, essential oils, medicinal and poisonous plants, fatty oils and fats, dyes, tans and animal and mineral products.

The annual outturn of timber and fuel from all sources averages about 559 million cubic feet.

The bulk of the timber supply is used for railway sleepers, constructional requirements, furniture, plywood (especially for tea chests), matches, etc.; but the country imports timber for specialized uses such as jute and textile mill accessories.

Exports from India are limited to selected rosewood logs for high grade furniture to Europe, teak poles for the Middle East and a few other items. Up-to-date, Indian rural economy (and perhaps only to a slightly less extent even its urban population) depends on wood fuel, most of which is derived from the forests. The large-scale use of bamboos and some forest grasses in the expanding paper industry, the exports of sandalwood and its oil and the development of medicinal plants deserve mention in connection with the utilisation of other forest produce.

In the Andamans, a recent departure from usual practice was the monopoly lease to a private agency for working the virgin forests of the North Andamans. The Middle and South Andamans continue to be worked departmentally, mainly to meet the needs of the mainland especially for matchwood and plywood logs. The Andamans are also expected to contribute in an increasing measure (by restricting on exports abroad) towards the needs of railways, etc. on the mainland for Paduk, Gurjan and other hardwoods.

The census show nearly two million people and their dependents employed on forest work, but these are probably below the actuals, as much forest labour is not full-time labour, devoting seven or eight months in the year to forest work and the rest to agriculture.

The general practice of the Forest Departments in the various States is to dispose of standing timber and forest produce by open auctions. Departmental conversion and sales of the produce itself are resorted to only where special considerations necessitate them, e.g. working of sandalwood because of its great value.

While recent investigations have shown that Andaman timbers could be successfully marketed in Europe, the mainland requirements under the development schemes of the Second Five-Year Plan have necessitated curtailment of export efforts.

A large number of bulletins and other publications are issued by the Forest Research Institute. Of these a list can be obtained from the Publicity and Liaison Officer, Forest Research Institute, New Forest, Dehra Dun.

#### FIVE-YEAR PLANS

Expenditure on forests steadily increased in the first four years of the First Five-Year Plan from Rs. 8.51 crores in 1950-51 to Rs. 10.14 crores in 1953-54. The revenue from forests during the same period has remained more or less unchanged at about Rs. 20 to 21 crores.

The States made provision in their First Plan for an expenditure of Rs. 9.70 crores on schemes of forest development of which Rs. 3.46 crores or 35 per cent had been spent by the end of 1953-54.

Expenditure incurred by the following States on development of forest communications in the first three years is: Assam: Rs. 7.78 lakhs on 57 miles of new construction and 185 miles of road improvement against the Plan provision of Rs. 12.4 lakhs; Madhya Pradesh: Rs. 3.6 lakhs on forest roads against Rs. 2.85 lakhs

earmarked in the Plan; Orissa: Rs. 2.34 lakhs on 187 miles of roads.

As against 7,500 tons of hard and soft wood in 1951-52, about 25,000 tons were supplied from Andamans in 1953-54.

Matchwood Plantations: A provision of Rs. 7 lakhs was made in the plan for the development of matchwood plantations out of which Rs. 2.17 lakhs have been spent by the end of 1953-54. Plantations of trees suitable for the match industry are being raised in Assam, Madhya Pradesh, Madras, U.P. and Kerala. About 15,000 tons of matchwood timber are being obtained from the Andamans.

In order to protect the interests and to improve the condition of the forest tribes co-operative societies of Adibasis and forest labourers were formed in Bombay State. Similar measures were initiated in Madhya Pradesh and, Andhra.

In the Second Five-Year Plan, forest development will be co-ordinated and assisted by the Centre on a large scale, in the period 1956-61. States have adopted many schemes for raising commercial, industrial and fuel plantations, for increased output of timber and other produce, for afforestation of degraded forests and waste lands, for making forests more accessible for extensive working, for conservation of wild life and for amenities for forest labour and staff.

On all this an expenditure of about Rs. 25 crores is proposed and the Centre is likely to help the States with loans and grants. To co-ordinate this work and generally to advise States on their forestry problems, a Central Forestry Commission is being established. The Government of India has also plans for an expenditure of over Rs. 2 crores for expanding their research and training organizations.

# AGRICULTURE

**SOME** major facts about Indian agriculture (1953-54): Area of India, 811 mil. acres; area available for land utilization, 719 mil. acres (rest is mostly unsuitable for cultivation); uncultivated area 406 mil. acres (forest 128 mil. acres, area not available for cultivation 119 mil. acres, other uncultivated area 98 mil. acres and fallow 61 mil. acres); area actually sown 313 mil. acres; total cropped area taking into account area sown more than once 352 mil. acres; area sown with food crops 270 mil. acres; area sown with non-food crops 82 mil. acres; total area irrigated 54 mil. acres.

Average rainfall 45"; deficiency of 25 per cent is classed dry; deficiency of 40 per cent severe drought; usually one year in five is a dry year, one in ten, a year of severe drought, one in 20 to 25 years wide-spread severe drought.

Out of the total cultivated area in the Indian Union of 313 million acres about 54 million acres are irrigated annually. Of this area 22 million acres are irrigated by canals, 10.2 million acres by tanks, 16.4 million acres by wells, and 5.1 million acres from other sources. The percentage of irrigated area to total cultivated area is, however, small, being only a little over 17 per cent. Protective irrigation works have made agriculture stable instead of precarious in many districts.

About one-fifth of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet.

Tank irrigation is common in central and southern India. Large quantities of rain water are stored in lakes (or tanks) during the rainy seasons and distributed during the drier seasons of the year. Often the indirect effect of the tank in maintaining the sub-soil water level is as important as the direct irrigation.

Construction of temporary Bandharas across streams and small rivers after heavy monsoon period is over is also common in parts of Bombay and Madras States for irrigation during the drier Rabi period.

The great bulk of agricultural land in India is deficient in organic matter. In the other agricultural countries of the world, this want is usually met by the return of farmyard manure to the land or by the use of compost made from crop residues and similar waste organic materials. In India, however, cattle dung is largely utilised as village fuel and only about 40 per cent of it is used for manurial purposes.

The agricultural season is divided into two main sub-divisions the Kharif season of the

monsoon and the Rabi season of the cold weather. This is not well-marked in the extreme east or extreme south. Each of these seasons has its own distinctive crops.

The ground is generally prepared for cultivation in April and May for kharif crops, and by the end of October or early November for rabi crops, i.e., after the kharif crops have been harvested. Kharif crops are sown in the monsoon, generally after the first shower. The usual time for sowing of rabi crops is the middle of November. The crops are harvested from the middle of March to the end of April.

The chief Kharif crops are: rice, jowar, bajra, maize, cotton, sugarcane, sesamum and groundnut. The chief Rabi crops are: wheat, barley, tea, gram, linseed, rape and mustard; and in south India rice, jowar and cotton.

The harvest comes on the market as follows: Kharif crop (Nov. 1), Rabi crop (May 1), Rice (Nov. 1), Wheat (May 1), Sugarcane (Nov. 1), Cotton (Sept. 1), Jute (July 1), Kharif oil-seeds (Nov. 1), Rabi oil-seeds (April 1), Tea (Jan. 1), Coffee (July 1), Sugar (Jan. 1).

The following table will show the area under principal crops and the yield:

Crops	Area under crops (thousand acres)			Production (thousand tons)		
	1953-54	1954-55 (a)	1955-56 (a)	1953-54	1954-55 (a)	1955-56 (a)

Lac (d)	—	—	—	654,000	1,023,000	NA

Note:—(a) Figures for 1954-55 and 1955-56 are based on revised and partially revised estimates respectively, hence subject to revision. (b) Figures for tea and rubber relate to the calendar year (i.e. for 1953-54 relate to 1953 and so on) and production (of tea, rubber and coffee) is mentioned in thousand pounds. (c) Coconut production is mentioned in terms of 1,000 nuts. (d) Estimates of area and production of non-forest crops (i.e. banana, papaya, sweet potato, tapioca, turmeric, sann-hemp, indigo, lac, opium, coconut, and pulses excluding gram and redgram (tur) are made on *ad hoc* basis, and hence subject to revision. (e) Rice production is estimated in terms of cleaned or husked rice; sugarcane in terms of raw sugar or gur; groundnut unshelled; cotton as lint (of bales of 392 lbs.); jute and mesta as fibre (in bales of 400 lbs.); pepper as dry black pepper, ginger and chillies dry. (f) In the case of banana, papaya, sweet potato, tapioca, turmeric, sann-hemp, indigo the acreage is in acres (and not in thousand acres) and production in tons (and not in thousand tons). Similarly also opium, the production of opium and lac is however expressed in maunds (of 82 2/7 lbs.). NA stands for data not available.

## SOILS

Four main soil groups can be recognized in the sub-continent, viz., (1) the red soil derived from rocks of the Archaean system which characterises Madras, Mysore and the south-east of Bombay and extends through Andhra Pradesh and Madhya Pradesh to Orissa, Chota Nagpur and the south of W. Bengal; (2) the black cotton or *regur* soils which overlie the Deccan tract and cover the greater part of Bombay, Berar and Andhra Pradesh with extensions into central India and Bundelkand; *regur* soils also occur in Madras though not so typical as proper *regurs*; (3) the great alluvial plains, agriculturally the most important tract in the country as well as the most extensively cultivated includes mainly the Indo-Gangetic plain embracing northern Rajasthan, most of the Punjab area, the plains of Uttar Pradesh, most of Bihar and the West Bengal area and half of Assam and (4) the laterite and lateritic soils which are found in the east a belt round the Peninsula and extend through West Bengal into Assam and Burma. Besides these soils there are muck soils in Travancore and forest soils in the northern part of India.

In addition to the four main groups of Indian soils mentioned above, the desert soils of the sub-continent occupy a large tract in Rajasthan and the south Punjab area of which the Thar-Rajasthan desert—alone occupies an area of 40,000 square miles.

Saline and Alkali soils also form an important group of Indian soils which are known as *reh* or *war* in Uttar Pradesh, *rakkar* and *thur* in the Punjab and *chopan*, or *kari* in Bombay State. Such soils are characterized by a high degree of impermeability and "stickiness" together with high alkalinity and frequent presence of large excesses of free salts. They are usually poor in nitrogen and humus and unsuitable for crop growing without previous reclamation. A considerable amount of working the reclamation of these soils has already been done in the Punjab area and Bombay which shows the possibility of bringing these unproductive lands back to cultivation.

Forest soils occupy a large part of the sub-continent. Investigations on the nature of soil profiles of the Chaubatia Hill in U.P. and of the Kulu Forest in the Punjab area indicate that these soils belong to the brown-earth and podsol groups.

Marshy and peaty soils are found in coastal areas of Orissa and West Bengal, North-West Bihar, Almorah district of U.P., south-east coast of Madras, and in Kerala.

The important question of soil conservation and development is receiving great attention. A sample soil conservation survey conducted over 80,000 acres of the scarcity tract of Bombay State reveals that over 71 per cent of the land surface has been denuded either partially or severely out of which about 32 per cent is unfit for crop growing.

A basic soil region map of India has been prepared at the Indian Agricultural Research Institute.

Run-off and soil loss studies on black soils of the Deccan derived from basalt have been carried out at the dry farming research station at Sholapur (Bombay) and Bijapur (Mysore) and at Hagari (Andhra). The average percentage run-off of total annual rainfall is 18, 22 and 20, and the average soil loss in tons per acre per year, is 44, 8 and 6 at Sholapur, Bijapur and Hagari, respectively, on 1.25 per cent slope. Similar studies are also in progress on the red and laterite soils derived from granite at Nanjanad (Madras), from old alluvium at Shantiniketan (Visva Bharati Soil Conservation Research Station, West Bengal) and at the experimental station of the D.V.C. at Deochanda in Hazaribagh. At Nanjanad, in one season, the soils loss on 20 per cent slope, was 1 ton per acre under sod and six tons per acre in cultivated fallow. At Shantiniketan, the soil loss is as much as 23 tons in a year in a bare plot on 1.7 per cent slope.

Under the Technical Co-operation Administration Programme a research project on soil

fertility and fertilizer use has come into operation at the Indian Agricultural Research Institute. Under this project the twenty major soil regions of India have been grouped into six zones (Poona, Delhi, Kanpur, Nagpur, Colimatore and Sabour) for purposes of soil survey and collection of soil data.

The fertility status of these soils is being examined by manual trials at 40 centres throughout the country.

The organization of soil conservation work in the States and Territories is the responsibility of the respective Governments. The co-ordination of work between these is achieved through the agency of the Central Soil Conservation Board which was set up in the Ministry of Food and Agriculture in 1953. Similar boards are also set up in most of the States and Territories.

The function of this Board includes the organization, co-ordination and initiation of research in soil conservation, the arrangements for the training of the State technical officers in soil conservation, collaboration between the States and the Centre in the promotion of soil conservation research, and the provision of financial assistance for projects undertaken in the States and Union territories and in the river valleys.

Altogether seven research-cum-training centres have been established at the following places:—

1. Ootacamund (Madras) for erosion control in the Nilgiri and other hills;
2. Bellary (Mysore) for soil conservation studies in black soils;
3. Kotah (Rajasthan) with sub-centre at Agra for erosion control in the Chambal and Jumna ravines;
4. Jodhpur (Rajasthan) for afforestation in the Rajasthan desert;
5. Dehra Dun (U.P.) for studying problems of afforestation in the Sivalik hills with the sub-station at Chandigarh (Punjab) for training *chao* (hill torrents);
6. Vasad (in the Gujarat tract of Bombay) for erosion control in the ravines along rivers in Gujarat.
7. Research-cum-training centre at Hazaribagh (in Bihar) under the Damodar Valley Corporation.

The Desert Afforestation Research Station at Jodhpur (Rajasthan) maintained shelter belts of 25 miles (along roads and railway tracks) and continued tree planting on 27 miles of road sides bringing the total so covered to 52 miles by the end of September 1955. The Station also carried on experiments in afforestation on 354 acres of desert areas in Rajasthan, besides maintaining the previous plantation on 1,003 acres making a total of 1,357 acres on which experimental afforestation was done by the end of September 1955.

Large financial assistance was given by the Soil Conservation Board to State Governments in respect of soil conservation schemes. The total assistance afforded upto 31st October 1955 comes to Rs. 7.3 million as loans, and Rs. 3.8 million as subsidy. As many as sixteen States benefited by this assistance. Besides this, the Board also sanctioned a grant of Rs. 2,000 for each of the two years 1954-55 and 1955-56 to the Soil Conservation Society of India.

## AGRICULTURAL ECONOMICS AND STATISTICS

The Directorate of Economics & Statistics is one of the main organizations under the Central Government which deals with all agro-economic problems in the sphere of food and agriculture.

The main functions of the Directorate are to advise the Ministry on all agro-economic problems, to prepare memoranda on current issues of agro-economic policy and to prepare special periodical statements and reports either for the use of the Ministry or for submission to U.N. Bodies.

The Directorate also collects, compiles and publishes all types of agro-economic intelligence and statistics relating to food and agriculture. Other activities of the Directorate include measures for the improvement of land records and agricultural statistics for which a provision of

Rs. 2 million existed in the First Five-Year Plan. Besides the scheme for training of primary reporting agencies, grants-in-aid have been given to various State Governments for certain schemes designed to effect improvements in land record and agricultural statistics. The State Governments of Andhra, Assam, Bengal, Bombay, Kerala, Madhya Pradesh, Madras, Mysore, Punjab, Rajasthan and U.P., have taken advantage of this.

Assistance was continued for the conduct of research in agricultural economics through special grants to the Indian Society of Agricultural Economics and the four agro-economic research centres set up early in 1954. The studies into the economics of farm management initiated during 1954 under the auspices of the Research Programmes Committee of the Planning Commission was continued in six regions viz., Bombay, Bengal, Madhya Pradesh, Madras, Punjab and U.P.

The statistical wing of the Indian Council of Agricultural Research is a sister organisation, but mainly concerned with fundamental and applied research in statistical technique, to impart training in agricultural and animal husbandry statistics, and to tender advice to central and State Governments, Commodity Committees, etc. on the application of statistics in these fields.

## RICE

Rice crop occupies the largest area in the Indian Union, 76 million acres giving 25.5 million tons of cleaned rice.

Rice is a predominantly tropical crop requiring warm temperature and high humidity. It requires 70°-100°F. temperature throughout its growing period and in India, its distribution follows the rainfall line. Where the annual rainfall exceeds 80" rice is predominant; with 30"-80" it is still an important crop, while under 30" it is grown mostly with irrigation. Madras, Bihar, Bengal, Orissa, Madhya Pradesh, Uttar Pradesh, Assam, Andhra and Bombay are the main rice growing States and they together claim about 95 per cent of the total rice area in India.

About a third of the crop is irrigated.

The bulk of the rice is winter crop, i.e., sown in June-July and harvested in November-December, but there are rice grown in different seasons the harvest coming in summer, autumn or winter.

Rice yield in India is, however, one of the lowest in the world. The average yield is a fourth of that of Spain and Italy, a third of Japan, and half of what the Chinese and the American rice farmers obtain. At present 76 research stations spread almost all over the States of the country are working on similar problems of rice. Though about 4,000 distinct types of rice differing in essential characteristics occur in this country, 455 superior strains giving an average of 10 to 20 per cent better yield than the farmers varieties have been evolved.

The recent investigations in Kashmir revealed the possibilities of growing rice at high altitudes of 7,000 ft. where higher to low-grade millets and other coarse grains only grew. Some of the acclimatized Chinese varieties of rice have also yielded bumper harvests in that State, which on an average was 60 per cent more than any of the local or introduced rice varieties. The diseases are also tackled particularly in Madras and Bengal and blast resistant varieties have already been produced in Madras, where programmes for resistant varieties of shorter seasons are now being worked. Similarly effective formulations for seed treatment against another fell disease of rice, foot rot, were successfully adopted in that State.

Rice farming practices vary considerably from region to region and even from place to place depending upon such factors as climate, soil type, and rainfall. Investigation on various aspects of these have shown that early planting (May-June) with a spacing of about 6" x 6" for early maturing varieties and wider 6" x 9" for larger duration varieties is conducive to higher yields. Also that transplanting is superior to broadcast

sowing as it gives about 15-80 per cent increase in the produce with  $\frac{1}{2}$  of the seeds used for broadcasting. Manuring is an effective way of stepping up the yield of the produce. A rational and general plan of manuring rice crop is as follows. First apply 50-150 lbs. of superphosphate to the soil in April-May and grow a green manure crop over it. Plough it down after 6-8 weeks of growth, timing it to be about a week before transplanting the crop. Twenty cartloads of cattle manure or compost may be substituted for green manuring and be applied before planting. A month after planting 100-150 lbs. of ammonium sulphate is to be applied as a top dressing.

The dietetic importance of rice and its nutritive value have always been questioned. But it has not been widely realised that the comparatively lower protein content of rice can be conserved by parboiling and other processing and that it is more easily digested than the comparatively larger quantum of protein contained in wheat. However, among different rices, wet cultivated is known to be more nutritious than dry, and long duration varieties are better cookers than short duration ones.

#### Japanese Method

In the last few years the Japanese method has been tried with good results specially in areas of assured water supply. But many

individual steps in this were evolved through research in India.

The main feature of the Japanese method of paddy cultivation is heavy manuring of the crop both in the nursery (seed bed) and in the field. In the nursery, one maund of farm yard manure or compost is applied for every 100 square feet of the area. Then a mixture of equal parts of ammonium sulphate and superphosphate is next sprinkled at the rate of one pound for every sq. ft. In the field, farm yard manure or compost at the rate of 15-20 cartloads per acre are applied. If the field is green manured, half of the above quantity will be sufficient. At puddling time a mixture of 100 lbs. of ammonium sulphate per acre is supplied next. A month after transplanting, the same dosage of fertilizers is applied.

The increase in rice production as a result of this method was 0.2 mln. tons in 1953-54, 0.67 mln. tons in 1954-55, and 0.8 mln. tons in 1955-56. The experiment was started with 0.4 mln. acres in 1953-54. The area rose to 1.32 mln. acres in 1954-55, and in 1955-56 to 2.01 mln. acres. The yield per acre in 1953-54 was 25.82 mds. as against 16.92 mds. by local methods. In 1954-55 the respective yield was 23.46 and 12.93, and 24.89 and 13.33 in 1955-56.

In the Second Plan it is proposed to cover 4 million acres with Japanese methods.\*

The seasonal rice crop has different names in different States :

State	Autumn	Winter	Spring
Andhra .. .. .	...	Sarava, abh	Dalua, Tabl
Assam .. .. .	Ahu, aus	Sall, Bao	Boro
Bengal .. .. .	Aus	Aman	Boro
Bihar .. .. .	Bhadol	Aghani	Boro

Madras .. .. .	Kar, Kuruval	Samba	Navara
Mysore .. .. .	....	Hainc	....
Orissa .. .. .	Beali	Sarad	Dalua
Punjab, U.P. and Madhya Pradesh .. .. .	....	Karlf	....

#### WHEAT

The area under wheat is about 29.2 million acres and production about 8.3 million tons. Wheat is grown widely throughout the north as a winter crop. U.P., M.P. and Punjab supplying over 72 per cent of the total output in the country. This crop occupies, on an average, about 10 per cent. of the total cultivated area.

More than one-third of the crop is irrigated.

The majority of the varieties grown belong to the species *Triticum vulgare*; *T. durum* is also cultivated to some extent particularly in Peninsular India.

The crop is generally grown after a summer fallow and except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. On irrigated land 2 to 4 waterings are generally given. Dry crop is rarely manured, but application of 5 cartloads of farm yard manure or compost is useful. For irrigated wheat an application of 15-20 lbs. of nitrogen together with a dose of 20-30 lbs. of phosphoric acid (in phosphate deficient soil) in addition to farm yard manure or compost is necessary. The crop is generally harvested in February to April and the threshing and winnowing go on up till the end of May.

Unfortunately, wheat is subject to a virulent fungus disease called rust, which is the potent factor limiting its larger production in all wheat growing regions of the world, including India. The magnitude of the loss to wheat crop due to this fell disease during periods when it occurs in an epidemic form is very great indeed. For example, during 1946-47, as a result of severe rust attack in Madhya Pradesh and elsewhere, nearly two million tons of wheat valued at 600 million rupees were lost. In normal years, the loss is about 5 per cent involving about sixty

million rupees. In other wheat growing countries, generally, one kind of rust only is a serious menace. Though in Peninsular India only black rust is serious, northern India with the largest wheat area has to face the onslaughts of three different rusts, i.e., black, red and yellow, each with a number of races.

Systematically planned work on the development of rust resistant wheats was started under the aegis of the Indian Council of Agricultural Research in 1935 at three centres, i.e. Simla, Mahabaleshwar (Bombay) and Powerkheda (Madhya Pradesh). In 1949 work on wheat rust problem was intensified and extended by the Council in a co-ordinated wheat rust control scheme located at New Delhi, Simla, Pusa, Indore and at Nilgiris. As a result of this, rust resistant strains such as Hy. 65-4 and 7 other hybrids in M.P. and in bread wheat group Kenphad 21, 25, 28 and 32 in Bombay have been evolved. Similarly, at the I.A.R.I., N.P. 789 and 790 resistant to black rust, N.P. 783 and 784 resistant to brown rust and N.P. 785 and 786 resistant to yellow rust have been produced. Crosses made to develop varieties that combine resistance to all the three rusts have resulted in the production of N.P. 800, which possesses appreciable degree of resistance to all the three rusts in the adult stage besides being agronomically superior. The Ministry of Agriculture is now financing a major part of the scheme. Varieties such as N.P. 710, 718, 761 and 770 which are highly resistant to loose smut disease are also evolved.

Breeding is not confined only to disease resistance. N.P. 710 is of great adaptability for a wide range of conditions and also yielding quality grain; N.P. 770 is suited to higher altitudes. Elsewhere in Punjab, also various

varieties are evolved; C. 217 and C. 250 for rainfed and humid conditions respectively and C. 253 and C. 281 for Kangra valley and Garhwal tract respectively.

Investigation for testing the milling and baking qualities of wheat showed that the vitamin B content of flour from wheat ground by power driven stone mill loses Thiamine most, upto 50 per cent, while the loss is only 20 per cent in hand mill. In baking tests a variety of *vulgare* wheat (i.e. Niphad 4) and *durum* wheat (Guah) proved best for bread making. Barley flour could be mixed upto 15 per cent with wheat flour without appreciably affecting the loaf making quality of the mixture. For making chapattis proportion of barley flour in the mixture can be increased even upto 25 per cent.

#### BARLEY

Barley is an important cereal in Northern India, particularly in U.P., Rajasthan, Bihar and Punjab. It is specially important in the hills and is grown even at considerable altitudes. The area under this crop in India is over 8 million acres, and production over 2.7 million tons, with an average yield of 748 lb. per acre. The advantage in the crop is that it can be grown on soils unsuited for wheat and that it generally matures earlier.

Improved varieties of barley have been evolved at Pusa such as N.P. 13 and 21. The former does well in the Delhi and surrounding areas yielding upto 56 mds. per acre, while N.P. 21 is a high yielding type suited to the eastern U.P. and Bihar. The Punjab varieties such as type 4 and 5 and C. 251 are not only high yielding quality varieties, but of excellent quality for malting and brewing. Malting and brewing tests at the Imperial Institute of Brewing, London showed that soil and climatic factors influence the malting and brewing quality of a barley type and that in U.P., the type 251 grown at places like Raya can match in quality the best Californian Barleys in England. Similarly, the Sahour barleys of Bihar are considered to be equal to Chilean barley of which a good deal is malted by English brewers. C. 155 is another variety bred in the Punjab suitable for pearing and powder products, in addition to its malting and brewing qualities. The commercial possibilities of these improved types are enormous. A fodder type called C. 144 with lesser requirements of water than other barleys and thrive well in alkali lands has also been bred in the Punjab.

#### MAIZE

Maize is cultivated over an area of about 9 million acres and gives an annual production of over 2.5 million tons. The average yield is about 633 lbs. per acre. It occupies the largest area in U.P., Bihar, and Rajasthan, but is also grown on a quite extensive scale in several other States. Maize crop is of special importance as the staple diet of the inhabitants of sub-montane, hilly regions. In the northern parts of the country it is extensively grown also as a fodder crop. The variety grown is mostly the "flint" type. Maize is grown both under rain-fed and under irrigated conditions. For irrigated crop, an application of 30-40 lb. nitrogen is profitable also 20-30 lb. of phosphoric acid in phosphate deficient soils; nitrogen may be given in two doses, half at the time of sowing and the other half, after about a month, as a top dressing.

In recent years, the investigations on this crop have been orientated to step up its yield by the technique of "hybrid corn".

While the researches in the Punjab, U.P., Rajasthan, West Bengal, Bihar and Andhra are concentrating on synthesis of high yield hybrids, the emphasis in the scheme operating at the I.A.R.I. is mainly on problems of fundamental importance, with a view to devise short cut methods for production of inbreds and also to conserve hybrid vigour induced in the first generation for two or more successive generations. Side by side with the above arrangement for the production of hybrids in India, ready made double crosses of "dent" corn are

\* It was later announced that this was likely to be raised to 10 million acres. This would give an additional five million tons of rice.

imported from U.S.A., Canada and Australia to test their suitability under Indian conditions. In the trials carried out with them both in the hilly regions and in the plains in almost all the important maize growing States during the last three years, the results have been generally favourable to certain American and Australian hybrids such as U.S. 13, Dixie 11, 22, 23 and N.C. 27 which have recorded better yield than local varieties. Steps have also been taken for the production of hybrid maize seed on a commercial scale on modern lines and a pilot scheme for this purpose has been in operation at Almora for the last 2-3 years for an annual production of about 100 mds. of seeds. Possibilities for the cultivation of another variety of maize, the "sweet corn", is also being investigated in the Kulu valley in Kangra.

### MILLETS

Mostly of short duration (2½ to 6 months from seed to seed) millets are grown in localities and in conditions where most of the other cereal crops are not grown, such as poor and infertile soils and low rainfall (of 20-50"). They are associated with the staple diet of the lower than the upper strata of society, and provide the chief cereal supplement for all regions outside the main rice and wheat tracts. Millet stalk form the chief food of the cattle population for about half the year in the millet regions of the country either in green or dry form. Some of them like jowar are grown in substantial areas solely for fodder purposes and special varieties are developed for forage purposes. Associated as they are with poor land, dry conditions, and the chief crops of the rain-fed and dry farmed tracts of the country, they respond to both manuring and irrigation. The major types of millets such as jowar, bajra and ragi require better land than others and are raised under irrigation also and sometimes with manuring with advantage. For crops like Jowar and Bajra which are usually grown in areas of scanty rainfall an application of 3-5 cartloads of farm yard manure or compost is useful.

Millets are grown in India on about 86 million acres annually and their production is estimated to be about 15 million tons. They are raised in almost all the States, particularly in the dry areas extending at a tangent from Punjab and Bombay in the north-west to Tinnevely in Madras, in the south-east.

The more common millets cultivated in India are:—

**Jowar** (*Sorghum sp.*), Bajra (*Pennisetum typhoides*), Ragi (*Eleusine coracana*), Kora or Kangni (*Setaria italica*), Kodon (*Paspalum scrobiculatum*), Same or Kutki (*Panicum miliare*), Chena or Varagu (*P. muticum*), Oodal or Sanwak (*Echinochloa frumentacea*) and Sawan (*P. crusgalli*).

**Jowar**—Among the millets jowar occupies a premier position because of the size of the crop and the economic importance of the grain. Annually about 43 million acres are grown under this to yield about 7 million tons of grain. Bombay, Madhya Pradesh, Andhra and Rajasthan contribute to about 89 per cent of the national acreage. Though mostly grown under rain-fed conditions about 3 per cent are raised by irrigation. Jowars require better land than the Bajras and the distribution of the two crops follow the quality of the soil. There are also two main types, dry or juicy. The former is mostly grown in the dry Deccan areas though those with the juicy stem are more relished by cattle. The duration of the crop ranges from 8 to 6 months.

The average yield is about 4½ mds. per acre.

About 42 improved high yielding strains with other desirable economic characters have been evolved. The Council has given considerable help in the investigations for the formulation of farming practices for raising this and other millets in dry farming, particularly at Rohtak in the Punjab, Bijapur in Mysore, Sholapur and Parbhani in Bombay, and Hagari in Andhra. Successful translation of the results of these investigations in ryots practices has made it possible to farm about 40 million acres in the

scarcity regions of the country where hitherto it was very difficult. Jowar grains have been successfully used for malting purposes at Coimbatore. Cholam malt being cheap can be utilised with profit in the preparation of malt biscuits, cakes, and bread for adults and invalids; also as supplementary food for infants.

**Bajra**—Bajra covers over 27 million acres to yield about 3.4 million tons of grain. The average yield of the crop is about 3.6 mds. of grain per acre. Bombay, U.P., Rajasthan, and Punjab are the chief growing tracts. The duration of the crop varies from about 2½ to 5 months. Recently the I.C.A.R. has initiated investigations to evolve high yielding types of bajra by the hybrid corn method at Coimbatore and Poona and some very promising hybrid seeds are under distribution. As in the case of jowar, investigations on dry farming practices have given considerable amount of information to raise it as a paying crop.

**Ragi**—Ragi ranks the third in importance among the Millets and occupies over 5 million acres to produce about 1.8 million tons of grain. Its average yield is rather high, 9 mds. per acre. More than half the area is in Mysore, Madras and Andhra. Sixteen improved strains of ragi evolved in Madras and two in Mysore are being grown in these States. In recent years, researches on various aspects of this crop have been undertaken in Bihar, Bombay and Uttar Pradesh also.

**Other Millets**—The others grouped under lesser or minor millets form about 1/6 of the total area under millets and are grown in about 14 million acres and yield about 2.4 million tons of grain. Some of them are of regional or local importance only and also of limited consumer demands. The most important among them are Kora or Kangni, Kodon, Cheena or Varagu, Oodal, and Sawan.

### PULSES

Pulses form an important group of crops occupying about 1/7 of the cultivated area in India. The total acreage is about 54 million and production over 10 million tons. They form the primary source of protein for the vegetarian population of the country. Some of them form a source of nutritious fodder, while others make excellent green manure crops. Being leguminous plants they enrich the soil and rightly form an inevitable component in mixed cropping as well as the linch pin in most crop rotation.

The major pulse crops of India are:—Gram or Bengalgram (*Cicer arietinum*), Redgram (*Cajanus cajan*), Blackgram (*Phaseolus mungo*), Greengram (*P. aureus*), Horsegram (*Dolichos biflorus*), Peas (*Pisum sp.*), Khesari (*Lathyrus sativus*), Lentil (*Lens culinaris*), Moth (*Phaseolus acutifolius*), Guar (*Cyamopsis tetraloboides*), Soyabean (*Glycine hispida*), Cowpea (*Vigna catjang*).

**Gram** is the most important pulse crop as it occupies about 40 per cent of the total pulse area and accounts for about 50 per cent of the total pulse production.

The main tracts of production are in U.P., Punjab, M.P. and Rajasthan where it is used to some extent as a substitute for cereal. Elsewhere it is considered merely as a pulse.

**Redgram** is the second important pulse crop covering about 11 per cent of the pulse area and responsible for about 16 per cent of the total pulse production. It is produced in U.P., M.P., Bihar, Andhra, Bombay and Madras.

**Blackgram** accounts for 6 per cent of the total pulse area and 4 per cent of the production. Improved varieties in this crop have been evolved in Bihar (B.R. 10, 11, 68 and S.T. 8); U.P. (Type 9 and 27); Madras (Vzm. 1) and Orissa (S. 1801). Mixed cropping of early autumn (beal) paddy with blackgram has been found to be more profitable than farming these crops alone in Orissa.

**Greengram** comes next as an important pulse crop with 6 per cent in the total pulse area and 2 per cent of the total pulse production. High yielding quality types of greengram is

produced in Bihar (B.R. 1-6 and S. 7); Bombay (781 and 1/49); and Madhya Pradesh (two strains). Also, one each in Orissa (3-150), Madras (Co. 1), and in U.P. (Type 1).

**Horsegram** covers 5 per cent of the total pulse area but accounts for 2 per cent of the production. Five improved types of this crop are under distribution in Madras and 2 each in Orissa and Andhra. Mixed cropping experiments at Vizianagram (Andhra) of horsegram with millets and cotton indicated that it forms a profitable mixture.

**Peas** form about 4 per cent of the total pulse area and about 6 per cent of the production. As in the case of green gram *vicia* redgram this is an important vegetable pulse crop of northern India as cowpea is in the high rainfall areas of south-west and north-east India. It is produced in Bihar and U.P.

**Khesari** accounts for 4 per cent of the acreage under pulses and 3 per cent of the production; Bihar is the most important Khesari growing State, M.P. and Bengal coming next.

**Lentil** is cultivated over 2 per cent of the pulse area and it accounts for 2 per cent of the production. Bengal, Bihar, M.P. and U.P. are the important lentil growing States. Type 677 and 94 in Bengal and two types (3 and 36) in U.P. are evolved, out of which type 36 has been found to be good for late paddy rotations in U.P. Lentil has been found to be very useful also for green manuring paddy crop in Kashmir valley.

**Moth** is cultivated in 5 per cent of the total pulse acreage and its contribution to the pulse production is 2 per cent. An improved variety of this crop (4301-12) has been distributed in U.P.

The rest of the pulse crop including guar, cowpea, wai and soyabean account for 17 per cent of the total pulse area and 14 per cent of the pulse production.

**Guar**—Cluster bean, is cultivated throughout India in varying extent and also for varied purposes. Not less than 0.2 million acres are under this crop and its grain production is estimated at about 2 million maunds annually. Except in North and North-Western India cultivation of guar is mostly as garden crop, particularly for its tender pod for vegetable purposes. On the other hand Punjab, Rajasthan, western U.P. and Bombay are the main areas of organized cultivation. The first region accounts for 60 per cent, U.P. for 12 per cent and Bombay for the rest.

About a third of the total grain produced in the country is exported mainly for industrial purposes. About 0.05 million maunds are used for the same purpose in India for finishing in the textile mills in the Gujarat tract; the rest is utilized as a concentrated feed for livestock. The foliage of the crop makes good forage and is often used for green manuring purposes also. Improved types of this crop suiting to various purposes have been evolved. Long podded types for vegetable purposes have been produced at Coimbatore, Nagpur and Pusa and four grain types in Bombay; also dual purpose, fodder cum grain types. Types purely meant for fodder purposes are also produced in Bombay (such as D. 111 and D. 128) and in the Punjab (D. FOS. 22).

**Soyabean**—The acreage under soyabean is not more than 0.2 million in India and production not more than 0.2 million mds. of grain. The crop is of some importance in U.P. and in the Himalayan tract and to a lesser extent in Madhya Pradesh, Bombay and Mysore. Soyabean flour can be blended in varying proportion with wheat flour for making chappatis and bread, cake and other bakery goods; it can be used also in the making of soyabean milk, curd, sauce, etc. Soya milk is almost as good as cow's milk and costs only as. 2 per lb.

**Cowpea**—Cowpea is an important vegetable and grain pulse particularly in the Kerala and Bengal regions where improved varieties are evolved; also in Madras and the Punjab.

## OILSEEDS

Excluding coconut and cotton, the total acreage under major oilseeds in India is over 29 million acres (i.e. about 9 per cent of cropped area) with a production of 5.6 million tons of seeds. Most of them produce edible oil while others (like castor and linseed) yield non-edible oils for industrial and medicinal uses. The cakes barring a few exceptions make good concentrate feed for the livestock or manures for our crops. Elsewhere industrial uses of these cakes have been increasingly exploited. They are grown under a variety of soil and climatic conditions. But, coconut is confined to the coastal areas mainly of South-West India and Linseed to the upper part of the Indian Peninsula.

The most important oilseed crops grown in the country are:—Groundnut (*Arachis hypogaea*), Rape and Mustard (*Brassica* sp.), Sesamum (*Sesamum orientale*), Linseed (*Linum usitatissimum*), Castor (*Ricinus communis*), Niger (*Guizotia abyssinica*), Safflower (*Carthamus tinctorius*), Coconut (*Cocos nucifera*).

**Groundnuts**—India is the largest producer of groundnuts accounting for about 40 per cent of the world's production. Groundnut occupies over 12 million acres representing about 44 per cent of the area under oilseeds in India. Total production is over 3.8 million tons. The average yield per acre is over 9 mds. Bombay, Andhra and Madras are the principal growing areas. Several varieties are under cultivation. Those commonly cultivated are broadly divided into "bunch" and "spreading" types. The Commercial types "Bold" and "Coromandel" are produced by the spreading type and the "Peanuts" and "Red natal" from the bunch varieties. The latter generally possess higher selling per cent (80 per cent) than spreading varieties (60-75 per cent). This, and the oil content of the Kernel as well as the colour and size of the produce are important factors apart from yield, deciding the economic assets of a variety. Four strains (TMV 1 to 4) are produced in Madras and 3 spreading and 2 bunch types in Bombay. The spreading type 25 is popular in U.P. and one spreading (H.G. 7) and ten bunch types have been produced in Mysore.

The most serious pests and diseases of the crop are the leaf miner and the tikka disease. Spraying, or dusting with DDT at 0.1 and 5 per cent strength respectively for the pest, and spraying 0.75 per cent Bordeaux mixture or sulphur dusting at monthly intervals for 3 months for tikka are effective. The rate of deterioration of the crop under storage is greater in the summer than in the winter crop.

**Rape and Mustard** cover over 10 per cent of the oilseed crop area. They are cultivated in 6 million acres and produce over 0.8 million tons. The average yield per acre is about 4.2 mds. U.P. accounts for nearly 1/4th of the area, and Punjab, Rajasthan, Assam and Bihar are other important States where this crop grows. In some regions it is grown as pure crop and in others, mixed with wheat and gram.

**Sesamum** is the next important oilseed crop covering about 22.0 per cent of the total oilseed area. It is cultivated on about 6 million acres and with an average yield of 2.4 mds. per acre the production is about 0.5 million tons of seed. U.P. is the largest producer, followed by Rajasthan, Madhya Pradesh, Madras and Bombay.

**Linseed** accounts for about 11 per cent of the total area under oilseeds in India. From about 3.4 million acres with an average yield of 12.3 mds. per acre this crop produces about 0.4 million tons of seed. States like Madhya Pradesh, Uttar Pradesh, Bihar, Andhra, Bombay, Rajasthan, Mysore and Punjab grow the crop to a considerable extent. Improved strains of this crop with high yield and oil content are produced in important growing areas.

More than a third of the crop is, however, confined to M.P.

An erect white-flowered variety which is resistant to rust as well as hilt diseases and matures about two weeks earlier and gives double the yield and better seeds has been produced for cultivation in the Kangra Valley in the Punjab.

**Castor**\* forms only 4 per cent of the total oilseed area in India, and about 1.5 million acres are under this crop. Its annual production is over 0.1 million tons and average yield, about 5 mds. seeds per acre. Over 60 per cent of the all India acreage is confined to Andhra; the next important castor growing area is Bombay. It is more often than not, raised as a mixed crop. The leaves of the plant are used for feeding Eri silk worm in Assam, Mysore and elsewhere. High yielding strains with other desirable economic characters have been evolved in castor also in various States.

**Niger**—India is the chief producer of Niger seed in the world and has an area of about 0.7 million acres under the crop with an annual production of about 0.06 million tons. It is chiefly cultivated in M.P., in the Deccan and North-East Madras. Five improved high yielding varieties of this crop with good oil content have been produced in Bombay; also one (i.e. N. 6) in M.P.

**Safflower** is the source of an important dye also of oil. It is largely cultivated in Bombay, M.P., Mysore and in the North-East of Madras. Five improved varieties have been brought out in Bombay and one (No. 7) in M.P.

**Coconut**—India ranks second among the coconut growing countries, accounting for about 18 and 22 per cent of the world's acreage and production respectively. 1.8 million acres were under this crop which produced about 3,900 million nuts in 1954-55. Kerala accounts for more than 75 per cent of the production. The rest are in Mysore, Andhra, Madras, Orissa, Bombay, Bengal, Andaman and Nicobar Islands and in the Laccadive Islands off the Kerala coast in scattered patches. Considering the importance of the crop as the main food and cash crop of the population of the Kerala region the Government of India set up the Indian Central Coconut Committee in 1945, which has concentrated attention on better production, marketing and utilization of coconut products and co-ordinated the various other aspects of the industry. It has set up two Central Research Stations one at Kasargod and the other at Kayamkulam both in the heart of coconut regions to deal with the various fundamental problems facing coconut farming. Regional Stations are also established in important coconut growing States.

Others like Mahua (*Bassia latifolia*), Punna (*Calophyllum inophyllum*), Choolmorga (*Hydnocarpus alpinus*) and Neem (*Azadirachta indica*) are also oil producing trees of local importance. Cotton seed is also an important source for vegetable oil in India.

The annual production is about 1.5 million tons, most of which—about 75 per cent—is *desi* and the rest American. The *desi* seeds contain more oil.

## SUGARCANE

India with its 35 per cent of the world's sugarcane acreage is the largest sugar producing country in the world. The total area under the cane is over 4 million acres. Sugar industry is one of the largest industries in India, second only to cotton textiles. The total capital involved in the industry is about 350 million rupees. The total value of the production of sugar industry (both gur and sugar) is about 2,600 million rupees. It finds employment for 3,500 university men and 0.13 million labour in addition to large number of persons employed in the Gur industry, transport, wholesale and retail trade. No less than 20 million farmers are also engaged in the cultivation of cane. The excise and other duties accruing due to sugar industry is more than 6 million rupees annually. These underline the importance of the crop in our national economy.

The Planning Commission has asked for an increased output of sugarcane to the extent of 0.69 million tons in terms of sugar which would enable the industry to work at full capacity and also raise the per capita consumption of sugar from 6.3 lbs. (in 1949-50) to 8.3 lbs. (in 1955-56). The increased output of cane will be large enough to allow simultaneous expansion in the production of white sugar to 1.5 million

tons (by 1955-56), and in the per capita consumption of gur and Khandassari from 22.8 lbs. to 24.4 lbs. This target was almost achieved by 1951-52, even though in the later years it has fallen down. Much worse, the production showed a negative relation to expanding consumption. Production in 1951-52 to 1953-54 was 1.48, 1.34 and 1.001 million tons while the consumption was 1.17, 1.06 and 1.82 million tons, with a progressive increase in per capita consumption of 8.14, 9.13 and 11.4 lbs. The gap is bridged with imports again, as it was before the production.

Sugarcane is consumed in India in four different ways: 1.5 per cent of the total product as Khandassari, 30 per cent as white sugar and about 50 per cent as gur and the rest for seed, chewing and such like. A portion of gur is also processed for white sugar. The consumption of factory sugar has gone up by about 60 per cent since 1951-52 when it was 1.17 million tons, while the consumption of gur has fallen from 3.24 million tons to 2.82 million tons in the same period. In the case of Khandassari there had been neither rise nor fall. Consumption has moved both ways around a rough average of about 0.1 tons. These show that the increasing demands of the nation for sugar have been met wholly by factory sugar industry which in addition has also encroached upon the market for gur.

The important sugarcane areas are U.P., Punjab and Bihar which contribute about 55.6, 8.9 and 8.3 per cent respectively of the total sugarcane area in the subtropical belt and Bombay, Madras and Andhra in the tropical areas making up 5.3, 3.3 and 3.1 per cent. Thus about 1/4 of the cane area is situated in the subtropical belt where the yield is 12-15 tons in contrast to 30-50 tons of the tropical region. Sugarcane being a tropical crop, yields better (i.e. by 25 per cent) and is raised cheaper in that area and a shift of the cultivation to the tropical belt of India itself will solve a major sugar problem.

## COTTON

Cotton area was 20.2 million acres (in 1955-56) with an estimated production of 4 million bales. The expansion in output consists mainly of better quality cotton of which we are still in short supply. At the same time, about one million bales of superior cotton still continue to be imported annually from Egypt, East Africa and U.S.A. for meeting the requirements of our mills.

Cotton is a subtropical crop grown in varying measures in all parts of India. The rainfall of the cotton tracts range from 10-12 inches in Punjab and Rajasthan to over 100 inches in the hill tracts of Assam. The crop is sometimes entirely rainfed or partly or wholly raised by irrigation. Cotton is sown in almost all parts of the year depending upon the region and the variety. Early sowing usually increases its yield. Cotton is rotated with various cereals, oilseed legumes and other crops in different areas. Of the 15 million acres planted with cotton only a million acres are under irrigation. They are largely confined to North and North-Western India and to the South.

Cotton is attacked by various pests and diseases. Among the diseases wilt is prevalent almost throughout. *Desi* cotton tracts and varieties resistant to it are bred such as "Suyog" and "Vijay" in Bombay, "Virmar", "Jarila" and "H. 420" in Madhya Pradesh and "Jaywant" and "Jayadhar" in Karnataka.

## JUTE

Jute is a very important fibre crop. India has the world monopoly for its production and trade. About 1.6 million acres are under the crop, almost 85 per cent of which are confined to Bengal Bihar and Assam. It is also grown to some extent in Orissa, U.P. and Tripura. The total production of the fibre amounts to 4.1 million bales (of 400 lbs.). Bengal accounts for about 42 per cent of the total acreage and about 50 per cent of the production. It is an annual crop cultivated for the fibre obtained from its bark. It is mostly grown in the alluvial soils with plenty of moisture. Seeds are generally sown on the prepared land

\* Final estimate of castor seed 1956-57: area 1,403,000 acres; production 129,000 tons.

in February to May and harvested in July to September. The crop is retted before fibre extraction. Outturn of dry fibre varies from 8-25 mds. per acre with an average of 11 mds., depending upon soil fertility and other factors.

Two varieties of Jute grown in India are *Corchorus olitorius* (Tossa Jute), and *C. capsularis* (White Jute) and in both of them high yielding strains of good fibre quality have been evolved, such as C.G., 0-620, 0-632 and 0-753 strains in *olitorius* and D.154, C.212 and C.321 in *capsularis*.

Best time of sowing jute is March second half to April end for *capsularis* and April first half to May second half for *olitorius*. Jute responds well to the application of all inorganic nitrogen fertilizers and most of the organic manures. The fungus (*Macrophomina phaseoli*) is the serious disease and various insects like Jute semi looper, hairy caterpillar, Indigo caterpillar and jute mites. Measures to control them are found and practiced.

Retting is the most important factor affecting the quality of jute.

### TOBACCO

Though contributing only about 8 per cent of the world's production, India is one of the principal tobacco growing countries of the world and third after U.S.A. and China. The total area under tobacco is over 0.92 million acres and production about 0.26 million tons. The average yield per acre is 644 lbs. Even though the area under tobacco is less than 0.4 per cent of the total cropped area of the country it is a leading cash crop and the mainstay of some of the regions and also of considerable importance to the national economy. It is the ninth important item of Indian export (of about 123 million lbs.) earning about 123 million rupees annually and in addition contributes about 327 million rupees to the nation's exchequer. It provides employment for millions of workers in farming and in its industry. However, India still imports manufactured tobacco (in the form of cigarette, cigar and pipe tobacco) amounting to about 2.5 million lbs. costing 7.9 million rupees and also unmanufactured tobacco (i.e. virginia cigarette tobacco leaf from U.S.A. for blending in the manufacture of high class cigarette; and cigar wrapper tobacco from U.S.A., Java, Pakistan and Burma, and chewing tobacco from Ceylon) of about 2.5 million lbs. costing 7.9 million rupees. But, the import requirements are steadily and speedily being met by indigenous production.

Andhra, Bombay and Madras account for about 71 per cent of the tobacco area and 72 per cent of the production. U.P., Bengal, Bihar and Mysore are other tobacco growing States of importance. There are about five zones of concentrated production of distinct types of Tobacco (1) North Bihar and Bengal area where tobacco is mostly grown for Hookah, (2) Charotar (Gujarat area), (3) Nipani area (Belgaum, Kolhapur, Sangli and Miraj) where bidi are extensively grown, (4) Guntur area in Andhra which is most important for cigarette (Virginia tobacco) and (5) Southern Madras area comprising mainly Madura and Coimbatore where cigar, binder and chewing tobacco are mostly grown.

The Central Tobacco Research Institute has now been established at Rajahmundry (in Andhra) for fundamental research on all tobaccos and applied research on cigarette and Lanka tobaccos grown in that area. Regional experimental stations have also been established for Cigar and Cheroot tobaccos at Vedasandur (Madras), for Hookah and Chewing tobaccos at Pusa (Bihar) and for wrapper tobacco at Dinhat (Bengal). Three sub-stations viz. Cigarette Tobacco Research Sub-Station at Guntur (Andhra), Cigarette Tobacco Research Sub-Station at Nipani (Bombay) and Hookah Tobacco Research Sub-Station at Ferozepore (Punjab) are also investigating their specific types of tobacco from a regional point of view. The Institute of Agriculture, Anand is being subsidised for bidi tobacco investigations and for aspects of the agronomy and pathology of local types of tobaccos. Measurable progress has

been made in the field of marketing with the establishment of a Tobacco Grading Inspectorate at Guntur and other packing centres around for the control of the quality of tobacco proposed for export. Achievements of the various agencies and sections mentioned above are reflected through the production of improved high yielding quality types of tobacco of various categories suited to different regions, raising them under modern farming conditions, protected from pests and predators, and disposing them through organized and regulated marketing conditions.

Tobacco grown in India belongs to two distinct botanical classes viz. *Nicotiana tabacum* and *N. rustica*. *N. tabacum* provides for the whole of export and forms about 92 per cent of India's production. 80-90 per cent of this is grown in Peninsular India for all the purposes not covered by the other variety. The latter forms only about 8 per cent of the total tobacco production in India and is mainly confined to upper India, where *tabacum* cultivation is not of much importance.

(a) *Cigarette Tobacco*: Andhra State accounts for almost the entire virginia tobacco in India as it produces about 96 per cent of the cigarette tobacco; rest in Mysore, Bihar, Punjab and Bombay. A new variety called "Cahtham" which is superior in quality and yield to the existing "Harrison special" has been recently released at Rajahmundry.

(b) *Cigar and cheroot types* of tobacco are cultivated mostly in Madras and West Bengal and to a lesser extent in Orissa.

(c) *Bidi Tobacco* is mainly confined to Charotar and Nipani areas of Bombay, Muzaffarpur, Dharbhanga tract of Bihar and to Farukhabad, Sitapur and Meerut districts of U.P.; also sparingly in Madras and Mysore States.

(d) *Snuff and Chewing* types are mostly produced in Madras, Bombay, Orissa, Bihar and U.P.

(e) *Hookah Tobacco* is primarily grown in U.P., Bihar and Punjab and to a much lesser extent in Bombay State also.

### MARKETING AND INSPECTION

There is a Central marketing organization called the Directorate of Marketing and Inspection, and a number of State marketing organizations, e.g., in Bombay, Bihar, Andhra, Madras, Mysore, Punjab and West Bengal.

The official in charge of the Central Directorate is designated Agricultural Marketing Adviser. The Directorate conducts marketing surveys for a number of commodities and issues reports. About 70 reports have so far been published and among the commodities covered are: rice, wheat, millets, potatoes, gram, other pulses barley, grape, bananas, citrus fruit, linseed, ground-nuts, cashewnuts, lac, sugar, coconuts, tobacco, milk, fish, cattle, hides, skins, wool and hair, sheep and goats, eggs, coffee, castor seed, ghee and milk products, arecanuts, rapeseed and mustard, sann hemp and cardamom.

Revised editions of the reports on rice, tobacco, skin and fish are now available. A brochure on Isopugil has also been brought out.

The Agricultural Produce (Grading and Marketing) Act, 1937 aims to provide the consumers with a standardized produce of specified purity and quality under a mark of guarantee. The process of grading and marketing is done commercially on a voluntary basis by packers holding a Certificate of Authorization issued by the Agricultural Marketing Adviser. There are now about 550 packers under the various grading schemes.

There are grade specifications for several varieties of rice, fruit, cotton, castor oil, coconut oil, sann hemp, tobacco, ghee, eggs, butter, sugarcane gum, vegetables, coffee, wheat, oilseeds, lac, myrobalans, hides and skins, wool, goat's hair, wood, turpentine, arora nuts, rosin, bristles.

The marketing of certain commodities is also regulated by law in some States. For instance, in Madhya Pradesh cotton is regulated in Amraoti; in the south, cotton is regulated in

Tirupur and Tirunelveli, ground nuts in South Arcot and Coimbatore, tobacco in Guntur, West Godavari and Coimbatore, arecanuts, coconuts, ground nuts, tobacco, turmeric and potatoes elsewhere; in Bombay there are over 50 regulated markets; in the Punjab about 100; in Madhya Pradesh Gwalior district has 36; in Mysore coconut, copra, oilseeds and jaggery are regulated at Tiptur, there is also a regulated market at Davangere. There are also regulated markets in Ajmer.

During 1956 quality grading of various agricultural commodities like ghee, edible oils, eggs, butter, cotton, rice, fruit and potatoes intended for internal consumption was undertaken on a voluntary basis.

The principle of compulsory grading of agricultural produce for export has been recognised by the Planning Commission. Exportable commodities such as tobacco, sann-hemp, wool, and bristles were graded on a compulsory basis.

It is proposed to extend compulsory grading to other exportable commodities such as essential oils (viz., lemon-grass and sandalwood oils), pepper, ginger, cardamom, cashewnut kernels, lac, raw goatskins, East-India tanned leather and vegetable oils and oilseeds.

Steps were also initiated for the establishment of a Central Control Laboratory at Nagpur (in Bombay State).

With a view to assisting and advising the State Governments in the matter of regulation of markets an Advisory Section was set up in the Directorate on 1st July, 1955. The Directorate is also assisting the National Extension Services Blocks and Community Project areas.

During the Second Plan, the number of regulated markets (under the Agricultural Produce-Markets Act) will be increased from 450 to 900.

An All-India Market News Service will also be set up in collaboration with the States, mainly to help the farmers.

### RESEARCH

The Indian Council of Agricultural Research was created in 1929. The Council is divided into a Governing Body composed of State Ministers of Agriculture, representatives of Parliament and an Advisory Board consisting of experts. The Governing Body is in charge of general affairs and of the funds, while the Advisory Board examines scientific projects submitted to the Governing Body.

To afford relief to the Governing Body in the discharge of its executive functions there is a Standing Committee. The Governing Body is also assisted by a Board of Research and a Board of Extension. The latter is concerned with pilot schemes.

The Minister for Food and Agriculture of the Government of India is the president of the Council.

In general the Council co-ordinates research work, suggests programmes of research, gives financial assistance for approved schemes, and also undertakes schemes of its own.

There is now an extension service to make known the results of research work to the cultivator. The training of extension workers for the National Extension Service blocks is arranged by the Council.

The annual grants made to I.C.A.R. fall under two main heads:—(a) An annual Government grant for running the administration. This varies from year to year according to requirements, and is estimated to be Rs. 13,15,000 for 1955-56. (b) Payment of the net proceeds of the cess on agriculture produce. The income from this source is estimated to be Rs. 49,12,400 during 1955-56.

Besides these, specific grants are made to I.C.A.R. for undertaking certain schemes from time to time. A sum of Rs. 10,34,000 was provided for this purpose in the 1955-56 budget. The total estimated expenditure (including the special grant) was about Rs. 5.3 mln. for 1955-56. Of the 775 schemes to be sponsored by the Council 346 relate to agriculture and 200 to animal husbandry.

The cess is a customs duty of one half of one per cent *ad valorem* on the following: bones, bristles, butter, cereals other than rice and wheat, drugs, fibre for brushes, fish, fruit, ghee, hides (raw), manures, oil cakes, pulses, seeds, skins (raw), spices, tobacco (unmanufactured), vegetables, wheat, wheat flour, wool (raw). This applies to the whole of India except Jammu and Kashmir.

A number of Central Committees have been set up to promote the production and marketing of agricultural commodities:

- Indian Central Cotton Committee, Bombay.
- Indian Central Jute Committee, Calcutta.
- Indian Central Tobacco Committee, Madras.
- Indian Central Oil-seeds Committee, New Delhi.
- Indian Central Coconut Committee, Ernakulam (S. India).
- Indian Central Sugarcane Committee, New Delhi.
- Indian Central Arcanut Committee, Kozhikode (S. India).
- Indian Central Lac Cess Committee, Ranchi (Bihar).
- All India Cattle Show Committee, Karnal (Punjab).

These Committees are financed by the proceeds of a cess levied on the particular commodity. For instance, for the Cotton Committee there is a cess of As. 4 per bale of 400 lb. of cotton; for the Coconut Committee there is a cess of As. 4 per cwt. on copra consumed in Indian mills; for the Lac Committee the cess is As. 14 per md. of export of lac and As. 10 for refuse lac exported; for the Oil-seeds Committee the cess is 1 anna per md. of oil extracted in mills, and annas 2 per md. of oil-seeds.

The Ministry of Food and Agriculture maintains a number of research laboratories:

1. Indian Agricultural Research Institute, Pusa, New Delhi.  
Sub-stations at Karnal (Punjab) and Pusa (Bihar).
2. Central Potato Research Institute, Patna. Laboratory, at Potato Multiplication Sub-division, Bhowali (U.P.).  
Laboratory, at Potato Breeding Sub-Station, Simla.
3. Central Rice Research Institute, Cuttack.
4. Research Laboratory, Central Palm Gur Training School, Cuddalore (Madras State).
5. Forest Research Institute and College, P.O. New Forest, Dehra Dun.
6. Sugar Cane Breeding Institute, Coimbatore. Sub-station at Karnal (Punjab).
7. Indian Veterinary Research Institute, Izatnagar-Mukteswar (U.P.).
8. Indian Dairy Research Institute, Bangalore.
9. Central Vegetable Breeding Station, Kulu, P.O. Naggar, District Kangra (Punjab).
10. Central Marine Fisheries Research Station, Mandapam, P.O., Southern Railway.
11. Central Inland Fisheries Research Station, Manrampur, Pulta P.O., Barrackpur, 24 Parganas.
12. Deep Sea Fishing Station, Bombay.

A number of research institutes, stations and farms are also maintained by the Central Commodity Committees:

- The Indian Central Cotton Committee has:
1. Technological Laboratory, Matunga.
  2. Institute of Plant Industry, Indore.
- The Jute Committee has:
1. Jute Agricultural Research Institute, Barrackpore (West Bengal).
  2. Technological Research Laboratories, Tollygunge, Calcutta.
  3. Economic Research Section, Indian Central Jute Committee, Calcutta.
- The Tobacco Committee has:
1. Central Tobacco Research Institute, Rajahmundry.
  2. Cigar and Cherooot Tobacco Research Station, Vedaasandur.
  3. Hookah and Chewing Tobacco Research Station, Pusa, Bihar.
  4. Cigarette Tobacco Research Sub-station, Guntur.

5. Wrapper Tobacco Research Station, Dinahatta (West Bengal).

The Coconut Committee has:

1. Central Coconut Research Station, Kasaragod.
2. Central Coconut Research Station, Kayangulam.

Three regional stations at Thodupuzha, Kumarakam and Neyyattinkara all in Kerala State. And two more at Rajole in Andhra and Ratnagiri in Bombay.

The Sugar Committee has:

Sugarcane Sub-Station, Karnal (Punjab).

The Indian Central Oil Seeds Committee has two regional centres for research, one at Tindivanam in Madras for the southern region, and the other at Kanpur for the upper India oil seeds.

Five regional stations for conducting research on fruit and vegetable preservation were opened in different States of India, one each in Punjab, U.P., Madhya Pradesh, Bombay and West Bengal. This arises out of a recommendation made by the I.C.A.R. Fruit and Vegetable Development Committee. It was recommended that two of these regional stations should be opened in 1957-58 and the other three in 1958-59.

There are 29 agricultural colleges in India; at (1) Bapatla and (2) Hyderabad (in Andhra); (3) Jorhat (in Assam); (4) Tollyganj (in Bengal); (5) Sabour and (6) Ranchi (in Bihar); (7) Anand, (8) Poona, (9) Nagpur and (10) Akola (in Bombay); (11) Vellayani (in Kerala); (12) Coimbatore (in Madras); (13) Gwalior, (14) Jabalpur and (15) Raipur (in Madhya Pradesh); (16) Dharwar and (17) Hebbal (in Mysore); (18) Cuttack (in Orissa); (19) Ludhiana and (20) Amritsar (in Punjab); (21) Jobner and (22) Udaipur (in Rajasthan); (24) Allahabad, (25) Baraut, (26) Banaras, (27) Lakhoni, and (28) Kanpur (in Uttar Pradesh); and (29) Delhi. (The Central College of Agriculture) in Delhi Territory.

## LAND POLICY

The land policy of the Government of India has been formulated for the promotion of agricultural production and for the provision of social justice in the rural economy. The agrarian reform undertaken by the various State Governments during the past few years fall generally into four broad classes:—

- (1) The abolition of intermediaries.
- (2) Tenancy reform designed to, (a) Scale down rents to 1/4-1/5 of the produce, (b) to give permanent rights to the tenants (subject to the landlord's rights to resume a minimum holding for his personal cultivation within a limited time) and (c) to enable tenants to acquire ownership of their lands (subject to the landlord's right of resumption for personal cultivation) on payment of moderate compensation to the landlord spread over a period of years.
- (3) Fixation of ceiling on holdings.
- (4) Reorganisation of agriculture including (a) Consolidation of holdings, (b) Prevention of fragmentation and (c) Development of co-operative village management and co-operative farming.

### Abolition of Intermediaries

Semi feudal conditions prevailed over a considerable part of the country and land was owned by intermediaries between the State and the actual tiller of the soil. Such tenures included permanently and temporarily settled estates, jagirs, talukdars and inam lands as well as non-ryotwari tenures.

There are three main systems of land tenure: the *ryotwari* or peasant proprietary tenure, where the individual owners are responsible for the payment of land revenue; the *zamindari* or landlord tenure where one or more persons jointly own a large estate and are responsible for the payment of land revenue; the *mahalwari* or joint village tenure where village communities jointly hold an estate and are jointly and severally responsible for the payment of land revenue.

The *ryotwari* system prevailed largely in Bombay and Madras; the *zamindari* in West Bengal, Bihar, parts of Assam, Orissa, Madras and Uttar Pradesh; the *Mahalwari* in Madhya Pradesh, the Punjab and parts of U.P.

The system of intermediaries (*zamindars*, *talukdars*, *jagirdars*, *inamdars*, *malguzars*, and similar special tenure holders) has been abolished in all States wherever they existed.

Most of the legal work in the acquisition of intermediate areas was undertaken during the First-Plan period. Intermediaries have been almost entirely abolished except in a few small pockets (such as temporarily settled estates in Assam, *zamindaris* in Rajasthan, minor intermediary tenures, such as service inams and other minor inams in a number of States and intermediary areas (i.e. Coorg in Mysore State, Kutch in Bombay, and in Tripura Territory). Progress, was, however, comparatively easy in the temporarily settled areas (such as U.P. and Madhya Pradesh), where adequate records and administrative machinery existed. On the other hand, in the permanently settled areas (i.e. Bengal, Bihar and Orissa) and in areas under jagirdari settlement (i.e. Rajasthan and Saurashtra) land records and revenue administration had to be built up from the beginning.

Nevertheless, abolition of intermediary tenures have been given effect to in most of the States. The total amount of compensation and rehabilitation assistance payable is estimated at Rs. 450 crores. Out of the total compensation, 70 per cent is accounted for by Bihar and U.P. The rate of compensation has been fixed as a multiple of the net income of the intermediaries from their estates. However, higher multiples are allowed to persons in the lower income groups. Compensation is payable in cash and also in the form of negotiable bonds redeemable over a period spread over 10 to 40 years.

With the abolition of intermediaries, the tenures come under two broad categories, i.e. (i) owners who hold land directly from the State; and (ii) the tenants who hold land from owners. Their rights and obligations are regulated under tenancy laws enacted in the States. Thus the multiplicity of tenancy has been considerably reduced, and in the most parts, tenants who hold land under intermediaries have now become owners of land.

### Tenancy Reform

(a) *Scaling down rents-Land revenue assessment*: The land revenue is assessed differently in different States. In the following States it is a fixed share of the net produce: Madras 50 per cent; Punjab 25 per cent; Uttar Pradesh 40 per cent. In these States it varies from time to time: Bombay, Mysore, parts of Madhya Pradesh and parts of Andhra.

The rent payable by tenant cultivators to landlords has now been reduced to about 1/4th over more than half the country.

In the following States the maximum rent noted against is applicable to tenants of all categories and in all areas: Bombay and Rajasthan 1/4th; Delhi 1/5th; Himachal Pradesh, former Hyderabad area and Orissa 1/4th; U.P. twice the hereditary rate.

In the following States the maximum rent is subject to the qualification noted against each: Assam, 1/4th (in the case of crop-sharers only); Bombay, five times the assessment (in Berar); Madhya Pradesh, twice the assessment (in the former Madhya Bharat area in respect of future tenancy only); Mysore, 1/4th (Malnad area); Bombay, 1/4th (in irrigated area in Kutch); in M.P., 1/4th (unirrigated areas of former Vindhya Pradesh); Kerala, thrice of annual assessment (dry land in Malabar); Jammu and Kashmir, 1/4th (irrigated land belonging to owners with 12½ acres of land and over).

(b) *Security of tenure and right of acquirement*: Land reform legislation with a view to security of tenure and right of acquirement to the cultivating tenants has been adopted in U.P., Delhi, Rajasthan. In the former Madhya Bharat area the right to acquire ownership had to be exercised within two years of the enactment of the

legislation. With a number of variations land-lord's right for personal cultivation, conferment of security of tenure upon tenants in non-renewable areas, and the right to purchase ownership have been adopted in Bombay, former Hyderabad area, Punjab and Himachal Pradesh, and parts of Mysore. The right of purchase has been given in Punjab only to those tenants who have held the land continuously for 12 years. On the other hand, such right has not been conferred in Bombay (in respect of Berar), Kerala (in respect of Malabar) and Mysore.

Considerable progress has been made in the conferment of security of tenure to tenants by law in a number of States such as Assam, Bihar, Bombay (Berar), Orissa, Punjab, U.P., former Hyderabad, Rajasthan, Delhi, Himachal Pradesh. In Kerala the ejection of tenants has been stopped for a year pending comprehensive legislation. In some other States legislative measures for security of tenures are still under consideration. In yet other States implementation is handicapped by the lack of a strong revenue administration and the weak socio-economic position of the tenants.

#### Fixation of Ceiling on Holding

(a) *Size of Holding*: One of the problems of Indian agriculture is the small size of the average holding and of fragmentation. The average size of a holding for the whole of India is 5.6 acres, but this varies from State to State: Assam 4.8 acres, Bihar 5.6 acres, Bombay 5.1 acres, M.P. 4.5 to 5.0 acres, Madras 4.4 to 5.8 acres, Orissa 5.1 acres, Punjab 5.6 acres, U.P. 5.0 acres, W. Bengal 4.9 acres, All India 5.6 acres. The majority of the holdings will be less than 5 acres, a great majority indeed less than 2.

(b) *Ceiling on Holding*: There is a general movement towards fixing a maximum and minimum on land holdings, as an aspect of land reform. This relates to the future acquisition of land as also the absolute amount of land which any individual may hold. No provision had been made in any State except U.P. (before 1951) limiting future acquisition of land. The limit placed by U.P. is 30 acres. Since then, limits on future acquisition have been imposed by former Hyderabad (three family holdings); former Saurashtra (three economic holdings); Delhi (30 standard acres); and former Madhya Bharat (fifty acres of dry land). As to the ceiling on existing holdings, only in Jammu and Kashmir, holding in excess of 22 and 4th acres have been transferred to the actual tiller without compensation.

In Assam, West Bengal and Rajasthan (Ajmer) and in former Hyderabad ceilings have been imposed on areas which can be retained for personal cultivation by intermediaries after the abolition of intermediary rights.

Punjab, Himachal Pradesh and former Hyderabad have imposed ceilings on existing holdings but have not implemented them.

It is proposed that during the Second Five Year Plan steps should be taken in each State, to impose ceilings in existing agricultural holdings. The ceiling would apply to owned lands (including land under heritable and permanent rights), held under personal cultivation tenants being enabled to acquire rights of ownership. As to the question whether ceiling should apply to individual holdings or holdings of family each State may decide according to social and other relevant considerations.

(c) *Regulation of Standards of Agriculture*: With the exception of former Hyderabad, no State has so far made provision for regulating the standards of cultivation and management of land and resumption of land in case of failure to maintain these standards. Some of the agricultural Legislation in Orissa and Himachal, however, have some provision for this, more or less of an obligatory nature.

#### Reorganization of Agriculture

(a) *Consolidation of Holdings*: The movement towards consolidation of holdings is partly voluntary and partly compulsory. Legislation towards this end has been enacted in the States

of Bombay, Madhya Pradesh, Punjab, Delhi, U.P., Jammu and Kashmir and Himachal. Special provision for consolidation of holding have also been incorporated in the Tenancy Acts of Orissa, former Hyderabad and Ajmer. Consolidation work has so far been undertaken in Bombay, Madhya Pradesh, Punjab, and Delhi. The total area consolidated upto date is about 1.36 million acres.

(b) *Prevention of Fragmentation*: Measures to check sub-division and fragmentation of holdings, relate to putting restriction on partition and transfer below specified limits. Legislation disallowing such partitions has either been enacted or in the process of enactment in the following states. U.P. below 6½ acres; former Hyderabad below a basic holding ranging from 2-24 acres; Rajasthan below a size to be determined by the State Government; Delhi below 8 standard acres; former Madhya Pradesh below 15 acres; former Bhopal below 15 acres; former Vindhya Pradesh below 5 acres of irrigated or 10 acres of dry land.

(c) *Co-operative Farming*: Co-operative farming has not made much progress in India. The total number of co-operative farming societies in Bombay by 1954 was 287 with a membership of 9,432 and covering 69,000 acres. In U.P., there were only 32,408 acres under co-operative farms with a share capital of about one million rupees. In former PEPSU, and Saurashtra, 8 and 6 co-operative farming societies respectively have been registered.

(d) *Agricultural Labour*: Out of about 250 million agricultural population 2 per cent is non-working landlords, 67 per cent peasant proprietors, 13 per cent tenants and 18 per cent landless labourers. There is tenancy legislation in many States while minimum wages for agricultural workers are fixed in former Ajmer, Delhi, Himachal Pradesh, former Kutch, Patna District of Bihar, Punjab.

Landless agricultural workers are now being settled on the Central Mechanized Farm, Bhopal, under a scheme for the settlement of 5,000 families over an area of about 6,800 acres.

#### Bhoodan

(See under 'Late Particulars').

### LAND USE

The topographical factors are as follows (the figures which are in lakh acres are inclusive of Jammu and Kashmir):

Total land area, 8,116; mountains, 873; hills, 1,506; plateau, 2,148; plains, 3,498; unusable

area, 3,082; topographically usable area, 5,034.

Land area per capita—2.25 acres.

The high density sub-regions are as follows:

Sub-regions	Population (lakhs)	Density per sq. mile	Land area (lakh acres)
Lower Gangetic Plains ..	700	832	538
Upper Gangetic Plains ..	389	681	366
Malabar-Konkan ..	238	638	239
South Madras ..	307	554	355
North Madras and Orissa Coastal ..	211	461	293
<b>Total 5 sub-regions</b>	<b>1,845</b>	<b>660</b>	<b>1,791</b>

The medium density sub-regions are as follows:

Sub-regions	Population (lakhs)	Density per sq. mile	Land area (lakh acres)
Trans-Gangetic Plains ..	259	332	499
South Deccan ..	315	247	817
North Deccan ..	239	246	621
Gujarat-Kathiawar ..	161	226	456
<b>Total ..</b>	<b>974</b>	<b>253</b>	<b>2,393</b>

The low density sub-regions are as follows:

Sub-regions	Population (lakhs)	Density per sq. mile	Land area (lakh acres)
The Desert ..	46	61	482
Western Himalayas ..	90	68	852
Eastern Himalayas ..	124	118	674
North-West Hills	104	163	409
North Central Hills and Plateau ..	138	164	537
North-East Plateau ..	290	192	967
<b>Total ..</b>	<b>792</b>	<b>129</b>	<b>3,921</b>

The following table shows the indices of land used in the high density, medium density and low density sub-regions:

Indices	High	Medium	Low	India
Percentage of net area sown to total land area ..	50	50	19	35
Percentage of net area sown to topographically usable area ..	62	70	40	56
Double-crop percentage ..	23	6	12	13
Irrigation percentage ..	25	11	10	16
Fallow percentage ..	18	26	22	22
Percentage of forests ..	11	11	22	15
Percentage unavailable ..	17	15	16	16
Percentage unused ..	12	8	27	17

It has been found by sample study of Districts in different parts of the country (with a population of 12 crores) that the area of cultivated land per capita has fallen from 1891 to 1951 in some such proportion as the following (the area is given in cents):

1891—109; 1901—103; 1911—109; 1921—111; 1931—104; 1941—94; 1951—84.

The same study revealed that double-crop area per capita has also fallen from 1891 to 1951: 1891—12; 1921—13; 1951—10.

So has the irrigated area per capita: 1891—16; 1921—18; 1951—14.

### FIRST FIVE-YEAR PLAN

The Plan sought to increase the production of food and raw material and transform the

village environment and outlook of the rural population.

The outlay was as follows (Rs. in crores):

Agriculture ..	199.18
Veterinary, dairying ..	20.68
Forests ..	11.17
Co-operation ..	6.38
Fisheries ..	4.83
Rural development ..	11.50
Community Projects ..	90.00
Local Works ..	15.00
Programme for scarcity affected areas ..	15.00
<b>Total ..</b>	<b>373.74</b>

The targets to be attained were additional production of 7.6 million tons of foodgrains, 1.26 million bales of cotton, 2.09 million bales of jute, 0.7 million tons of sugar, 0.4 million tons of oilseeds.

The major and minor irrigation works were to irrigate 19.7 million acres.

Under the reclamation programme 7.4 million acres were to be brought under the plough by the Central and State Governments at a cost of Rs. 35 crores. About 1.4 million acres would be reclaimed by the Central Tractor Organisation, 1.2 million acres by similar organizations in the States. The remaining 4.8 million acres were expected to be developed by the farmer with the assistance of the State.

Improved seeds and fertilizers would be supplied and the use of improved implements encouraged.

Besides schemes drawn up in consultation with the Central Government, there were supplementary schemes proposed by the Commission.

The allotments for the latter were as follows (rupees in crores):

Additional provision for minor irrigation works .. .. .	20
Construction of tube-wells .. .. .	25
Grow More Food .. .. .	86
Community Projects and National Extension Service .. .. .	101
Provision for landless labourers .. .. .	1.50

Under the Plan finance would be made available to the cultivator through the Reserve Bank, as well as by the States through co-operative credit societies.

It was hoped that by the end of the Plan period Rs. 100 crores, Rs. 25 crores, and Rs. 5 crores would be made available as short term, medium term, and long term loans respectively.

About land policy, the Commission thought that there should be an upper limit to the amount of land held by one person. This would apply to resumption of land for personal cultivation and future acquisition not exceeding three family holdings.

Tenants who hold land should be enabled to acquire ownership on payment of compensation. Where such land is cultivated by the owners themselves the test should be efficiency. Farms which are badly managed should be taken over by the State and cultivated through the co-operatives of landless or displaced workers.

Owners of middle-sized and small farms should be encouraged to develop their production on a co-operative basis. If they do not resume land for personal cultivation within a reasonable period the tenants should be allowed to become the owners.

A tenancy should last at least for five to ten years and should be renewable.

Rents should vary between one-fourth and one-fifth of the produce.

There should be co-operative village management under which land and other resources are pooled and utilized in the interests of the community as a whole.

For the same type of work everyone should receive the same remuneration.

Increased facilities for training and experiments in co-operative farming were to be provided at a cost of Rs. 50 lakhs.

A sum of Rs. 2 crores was provided for settling landless agricultural workers on reclaimed land.

The State should also provide them with house sites give preference to co-operatives of landless workers in the allotment of reclaimed land, entrust co-operatives of agricultural workers with construction work on behalf of the Public Works and Forest Departments.

The outlay item-wise is as follows :—

	Centre	States	Total
Agricultural Production .. .. .	97.0	719.009	816.009
Minor Irrigation .. .. .	28.0	631.824	659.824

<b>Total (Grand) .. .. .</b>	<b>650.00</b>	<b>5,026.710</b>	<b>5,676.710</b>

The targets to be attained are an additional production of 15.4 million tons of foodgrains, 2 million tons of sugar, 2.1 million tons of oilseeds, 2.3 million bales of cotton, and 1.5 million bales of jute, over the estimated production for 1955-56 in the First Five Year Plan.

If the Second Five Year Plan targets are realised agricultural production as a whole would increase by about 28 per cent, the increase in the production of foodgrains being nearly 25 per cent, and that of commercial crops about 34 per cent.

#### AGRICULTURAL PRODUCTION TARGETS OF THE SECOND FIVE YEAR PLAN

(In million tons)

Commodity	Estimated Production of 1955-56	Targets for the Second F.Y.P. 1960-61	Additional production over 1955-56	Per cent increase in index of production
Foodgrains .. .. .	65.0	80.4	15.4	24.6
Sugar (gur) .. .. .	5.8	7.8	2.0	33.9
Oilseeds .. .. .	5.5	7.6	2.1	37.0
Cotton* .. .. .	4.2	6.5	2.3	55.6
Jute* .. .. .	4.0	5.5	1.5	58.1
Other crops* .. .. .	..	..	..	22.4
<b>All commodities .. .. .</b>	<b>..</b>	<b>..</b>	<b>..</b>	<b>27.8</b>

\* In million bales.

This is to be effected through various measures including the following :—

(a) **Land Reclamation & Improvements** :—As against 7.4 million acres to be brought under the plough by the Central and State Governments (1.4 million acres by C.T.O., 1.2 million acres by State Tractor Organisation, and 4.8 million acres by the farmers themselves with State assistance) proposed in the First Five Year Plan, during the Second Five Year Plan, 1.5 million acres are to be reclaimed and land improvement measures are to be undertaken on 2 million acres through Central and State Tractor Organisation, farmers and other agencies.

(b) **Soil Conservation** :—The Second Five-Year Plan has provided Rs. 200 million for soil conservation alone as against a total of Rs. 130 million for forest and soil conservation combined provided in the First Five Year Plan. During the Second Plan soil conservation work is to be undertaken in a concentrated manner over 3 million acres of land in areas seriously affected by soil erosion. The programmes include soil conservation measures for two million acres of agricultural land. Measures for the control of shifting sand dunes are to be undertaken over an area of 0.85 million acres. Measures such as afforestation, fire control in forests, waste lands, contour bundings, etc. are to be undertaken in important river valleys over an area

of about 0.33 million acres, in hilly regions over an area of about 0.17 million acres, in ravine lands over an area of 0.15 acres, and in waste lands over 0.1 million acres.

(c) **Seeds**.—Each State will have seed farms for raising nuclear seeds and multiplying them through registered growers, keeping in view the requirements of the entire area to be served by State farms; 13,000 seed farms with a total area of about 93,000 acres are proposed. Co-operative seed stores will be set up at the headquarters of every national extension block and similar stores for each group of 20 villages. Fertilisers and other agricultural accessories will also be made available in these stores.

(d) **Irrigation**.—As against 19.7 million acres to be irrigated (by major and minor irrigation projects) in the First Five Year Plan, an additional area of 21 million acres (12 million acres from large and medium projects, and 9 million from minor irrigation projects) is proposed for the Second Five Year Plan.

(e) **Fertilisers and Manures**.—The consumption of nitrogenous fertilisers will be increased from 0.61 million tons (in 1955) to over 1.8 million tons during the Second Plan; phosphate fertilisers consumption will also be stepped up. Utilisation of oilcake (non-edible to livestock) will also be increased. Green manuring practice will receive increased attention in the manurial practices. Larger utilization of town compost and sewage too will be adopted.

### Horticulture

(f) **Fruits and Vegetables**.—About half a million acres of orchards will be rejuvenated in the different States and about 0.2 million acres of new orchards will be laid during the Second Five Year Plan. Vegetable production will be encouraged, particularly in the neighbourhood of towns by organising nurseries and providing seeds and plants to vegetable growers on credit, and by co-operative marketing organisation of food and vegetable growers. Nucleus potato seed production will be taken up in the different potato growing States. Fruit and vegetable preservation will be encouraged by assistance to the canning industry and by setting up cold storage plants, etc. Export of such products will also be encouraged.

(g) **Marketing**.—Compared with only Rs. 7.5 million in the First Five Year Plan, Rs. 60 million have been earmarked by the Centre for marketing, including warehousing. In addition, separate funds are also provided for a National Co-operative Development Board and an All-India Warehousing Corporation in State plans. The marketing programmes formulated on the basis of recommendations of the Rural Credit Survey Committee include 1,800 marketing co-operative societies, 350 warehouses and over 1,000 regulated markets.

(h) **Plant Protection**.—Plant protection work will be intensified; existing centres will be strengthened and five new centres will be established.

(i) **Research**.—For increasing the tempo of agricultural research in the States and in the Central Institutes and Commodities Research Stations, Rs. 140 million are provided. Agro-economic research will also be intensified, and two more agro-economic centres will be added to the present four.

(j) **Agricultural Education**.—For the training of village-level-workers, in addition to the existing 54 basic agricultural schools and 44 extension centres, it is proposed to establish 25 new basic agricultural schools, 21 extension centres and 16 basic agricultural wings attached to extension training centres. Additional agricultural colleges will be set up where they are needed, as 6,500 agricultural graduates are needed during the Second Plan. Financial assistance will be provided to State Governments for the establishment of four new agricultural colleges and expansion of training facilities in an equal number of existing agricultural colleges in the country. The financial details are, about 1/4th of the non-recurring expenditure will be provided by the Centre as grant, and the balance as loan, subject to a maximum of Rs. 2½ million for a new college and Rs. 0.75 million for the expansion of an existing college. The entire recurring expenditure would be the responsibility of the State Governments concerned. They are, however, obliged to reserve a suitable number of seats in their colleges for students from States without agricultural colleges.

## LIVESTOCK

It is estimated that there were about 307 million total livestock in 1956. Of these the cattle formed about 159 million, buffaloes about 46 million, sheep 38.6 million, goats about 56.6 million, horses, ponies about 1.5 million, other livestock (mules, donkeys, camels and pigs) about 6.7 million and poultry about 97.4 million.

The imports during 1954-55 and 1955-56 were worth Rs. 51 lakhs and Rs. 56 lakhs respectively, and exports (excluding monkeys) were worth Rs. 885 lakhs and Rs. 393 lakhs respectively.

Monkeys have been exported recently on a large scale, namely, 100,330 in 1954-55 valued at Rs. 18 lakhs and 106,296 in 1955-56 valued at Rs. 29 lakhs.

For draught purposes cattle are mainly used everywhere though male buffaloes are important as draught animals in the rice tracts and humid parts of the country. For dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in cow's milk.

As for the fodder that is required, only two-thirds in the roughage variety and one-third in the concentrate are available.

Generally speaking, cattle thrive well in the dry areas of less than 30" rainfall, but where the rainfall is heavy they are poor producers.

Among the well-defined breeds of cattle (26 in all), three broad divisions are: dairy and draught cattle and those that serve a dual purpose.

**Milch** :—The Sahiwal, the best milch breed, are responsive to environment, have an yield of 4,000 lbs. a year. The Sindhi are also responsive to environment, the Gir in Saurashtra and Rajasthan have an yield of 3,700 lbs. a year.

**Dual** :—The Gao in Madhya Pradesh are draught animals but also good milkers, 3,000 lbs. The Kangayam in the south and south-east of the country are powerful draught animals of average milk yield. The Kankrej, are essentially draught but have milk potentialities (3,000 lbs.), they belong to Gujarat. The best known in this group are the Hiriana (Punjab, 3,000 lbs.), Tharparkar (Gujarat and Rajasthan, 3,000 lbs.), and Ongole (Andhra).

The best known breeds (26 in all) are the Murrah, Nili and Ravi buffaloes of the Punjab, the Jufferbadi buffaloes of Saurashtra, Melnana of Gujarat, Nagpuri of Vidarbha and the Surti and Pandharipuri, a type of Nagpuri buffaloes of Bombay State. All except the Nagpuri are noted dairy breeds. Murrah, is adapted to all climates. They also yield on an average about 3,000 lbs. of milk for over 300 days in a year.

**Draught** :—The Amritmahal (Mysore) are poor milkers; then there are the Hallikar (Mysore).

Other breeds are the Konkatha (U.P.), the Kherigarh, chiefly draught (U.P.); the Malvi, chiefly draught (Malwa, Andhra); the Bachaur, chiefly draught (Bihar); the Krishna, fairly good milkers (Maharashtra, Andhra); the Mehwati, for heavy ploughing and carting (Rajasthan); the Nagori, essentially draught but good milkers too (Andhra); the Rath, strong and heavy (Rajasthan); the Dangi, active workers with poor milk yield but good for heavy rainfall areas (Maharashtra); the Deoni are good for cultivation and also as milch cattle (Maharashtra).

In the order of the productivity of milk we might arrange the cattle as follows: the Sahiwal, the Kankrej, the Ongole.

Generally speaking, buffaloes provide the Indian farmer with milk and ghee while the cow is only the mother of the working bullock. The buffalo is therefore better fed and looked after.

The average annual milk yield of buffalo is 1,100 lbs. against 413 lbs. of the Indian cow. Further buffalo milk being one and a half times as rich in fat content as cow milk, is more valued for butter and ghee production. Buffaloes are also better utilizers of coarse fodder and are less expensive to keep.

Experience of Government farms is that by better feeding and management the production of village cows can be increased by 50 per cent, whereas that of the buffaloes can be increased only by 15 per cent. In view of the early maturity of the cow and the greater utility of its males for work, cows have more overall utility, but buffaloes are comparatively economical where there is cheap fodder or free grazing in plenty.

It has been estimated that the number of sheep in the country is about 39 million and that the total quantity of wool produced is 52 million lb. annually valued at Rs. 10 million. The yield of wool per sheep varies greatly in different parts of the country. In Punjab, Uttar Pradesh and Rajasthan, the annual production per sheep is estimated at between 3.1 lb. and 4 lb., while in the rest of the States it does not exceed 1 lb. The average for the whole of the country is in the neighbourhood of 2 lb. per sheep per year.

Sheep also supply meat worth about Rs. 112 million every year in addition to pelts and manure.

India still requires large quantities of wool. About 16 million pounds of wool, tops and yarns costing about Rs. 120 million are imported. At the same time, we export about 38 million pounds valued at Rs. 81 million annually. This is because the fibre composition of the selected breeds of our major sheep rearing areas (such as Rajasthan, Saurashtra, Kashmir, Himachal Pradesh, Uttar Pradesh and Deccan) are variable, and also coarse or coloured or otherwise defective. The wool produced from Indian sheep is modulated and not fit for the manufacture of cloth. It is mostly used for making carpets.

A sheep and wool development scheme has now been launched on the lines of the key village scheme for cattle improvement, in 250 centres in different States.

Goats form an integral part of Indian agricultural economy. The goat is the principal source of meat supply; it also provides manure, skin, hair (Mohair) and milk. There are about 57 million goats in India, which is a fourth of the world's goat population. About a fifth of this is used for milk production. Annually about 17 million goats are in demand for human consumption. About 21.3 million pieces of goat skins and hides valued at Rs. 75 million are produced in India, of which skins worth about 57.2 million rupees are exported. Goats are of active habit and multiply rapidly. Rajasthan has the largest goat population followed by Bombay, Bihar and U.P.

The important breeds of Indian goats fall under four broad groups:—Himalayan Goats are found in the hills of Kashmir, Punjab and Uttar Pradesh. These are mostly reared for mohair production and also for meat. There is also the Pashmari goat of Kashmir which produces an undercoat of very fine variety of hair which goes into the manufacture of shawls. The plain goats, comprise some of the best mutton and milch animals. Some of the better known breeds are Marwari, Konor and Jamnapuri. The last yield 600 lbs. in a lactation of 250 days. Deccan plateau goats yield small quantities of milk and are mostly reared for mutton.

Another group consists of animals reared by landless labourers and artisan classes purely for milk supply. The local goat (Punjab) yields only 4 to 1 lb. of coarse hair mainly used for rope and belt, whereas the cross bred (with Angora) yields 4 to 6 of mohair a year. Results from the Punjab and U.P. have shown that selected goats yield (6 to 8 lbs. milk per day going up to even 12 lbs. in U.P.) on an average about 400 lbs. of milk per lactation of 150 days while a few went upto 700 lbs. and even higher.

Exploratory breeding of imported Sannien goat (which is one of the highest milk yielders of the world) at Poona have shown that a suitable milk breed can be evolved for the Hill regions of the Deccan plateaux.

Poultry-keeping is an important subsidiary industry of the poorer classes. Indigenous poultry of low grade produce on an average 50 small-sized eggs per year.

Even at a low rate of production, the annual contribution of Indian poultry to the country's economy is not less than Rs. 100 million.

At present, the *per capita* consumption of eggs in India is only four per annum as compared with 400 in U.K., U.S.A. or Denmark.

An improved strain of poultry has been evolved at Izatnagar by selective breeding for ten generations which give an average annual egg yield of 150 and sometimes of 234 of the larger egg type.

### DAIRYING

Like agriculture dairying is one of the major industries in India as milk and milk products contribute not less than Rs. 6,200 million to the national income.

Despite the large vegetarian population and large number of cattle, the dairy industry is still unorganised. Of 200 million cattle and buffaloes, 72 million or 36 per cent are milch animals (females over 3 years). Milk yield is, however, low: Cow 413 lb. per year, buffalo 1,100 lb. Though buffaloes form only 30 per cent. of milch animals, due to their comparatively high yield, they account for 55.9 per cent of the total milk produced. Buffalo milk has butter fat content 6.5 to 7 per cent, as against 4 to 5 per cent. of cow.

Gross production of milk is 20.65 million tons, of which 13.2 million tons are marketed, the rest being used for home consumption or fed to calves. *Per capita* daily consumption of milk and milk products varies from 16.89 oz. in the Punjab to 26.4 oz. in Orissa; average 5.5 oz.

Intensive steps are being taken by most States to improve the cattle, both from the view-point of draught and milk production; and many important schemes have been put in operation: cattle fairs, milk recording projects, cattle breeding farms. Cross breeding with imported bulls did not yield good results in the long run. Only Indian bulls are now used for this purpose.

Most of the States have appointed Dairy Development Officers to organize dairying both on co-operative lines as well as through private enterprise.

The Government of Bombay has established a very large milk colony at Aarey near Bombay where about 15,000 animals are housed under the most modern conditions and milk supplied to Bombay City after pasteurization. Milk supply schemes are operating in various States.

Research in dairying is done at the National Dairy Research Institute at Karnal and its southern regional station at Bangalore. This Institute also runs courses in Animal Husbandry and Dairying.

### ANIMAL DISEASES

There are fourteen Veterinary Colleges in India, one each at Gauhati, Patna, Calcutta, Bombay, Mathura, Hyderabad, Madras, Hissar, Bikaner, Bapatla, Mhow, Cuttack, Trichur and Jabalpur.

The chief research centre is the Indian Veterinary Research Institute at Mukteswar in Uttar Pradesh and its branch at Izatnagar, near Bareilly. This Institute is maintained by the Government of India.

The Indian Veterinary Research Institute also manufactures large quantities of sera and vaccines for the use of the State Department. There are serum institutes in various States such as Bombay, Madras, Andhra and Uttar Pradesh.

The chief diseases that the Animal Husbandry and Veterinary Departments have to deal with are glanders and surra in equines, foot and

mouth disease, haemorrhagic septicaemia, black quarter and anthrax in ruminants while tuberculosis, Johne's disease and contagious abortion are assuming greater importance than in the past. Glanders and surra are both scheduled diseases under the Glanders and Farcy Act. Glanders is incurable but surra can now be successfully treated with Naganol or Antypol. This disease (surra) also affects camels, cattle and dogs and in recent years its importance as a bovine disease has been more widely recognised.

A major scourge affecting Indian cattle is Rinderpest which causes a mortality of about 80 per cent resulting in an annual loss of 0.4 million heads of cattle, valued at about 300 million rupees. Because of the eradication campaign of the past, Kerala and Madras are now free from the disease. But, further North, in Andhra Pradesh, Mysore, and Bombay States the disease is prevalent and a pilot scheme to vaccinate and brand about 12 million cattle and buffaloes has been in operation since October, 1954.

Of the diseases of ruminants mentioned, all, with the exception of foot and mouth disease, can now be controlled either by means of sera or by vaccines.

Indian poultry are also subject to several contagious diseases. The dreaded "Ranikhet" disease is fairly widespread and its ravages have seriously hampered the poultry industry. A chick-passaged vaccine has now been developed at the Indian Veterinary Research Institute. Fowl pox and fowl cholera vaccines are available for the protection of poultry against these diseases.

### LIVESTOCK STATISTICS

The following table shows the estimates of livestock population for 1955 :

(In thousands).

Area	Cattle	Buffaloes	Sheep	Goats	Horses & Ponies	Other Livestock	Total Livestock	Poultry
<b>STATES</b>								
1. Andhra Pradesh .. ..	10,958	5,743	7,428	3,001	96	708	28,531	14,058

### FOOD

**T**OTAL foodgrains production in the country was as follows. (figures in million tons)  
1950-51 : 50; 1951-52 : 51.17; 1952-53 : 58.27; 1953-54 : 68.72; 1954-55 : 66.00; 1955-56 : 64 (estimates).

The total quantity of foodgrains distributed by Governments in 1955 was 0.23 million tons.

The year 1956 opened with a stock of 0.92 million tons with the Central and State Governments, of which half was in the States reserve.

It was hoped that the country's requirements of rice would be met from internal production and import if any would be only for building a reserve.

But there was no change in the basic policy of maintaining strategic controls.

Population under statutory rationing while it was in force : 1951—46 million, 1952—31.2 million, 1953—22.8 million.

Rationing was abolished in November 1954.

Population covered by other types of rationing (while it was in force) including Fair Price Shops : 1951—68.2 million, 1952 (Dec.)—97.1 million, 1953—60.6 million.

Total imports of foodgrains in 1955 : 0.7 million tons.

Cost of imported grains in 1955 : Rs. 33.11 crores.

The balance sheet of foodgrains distributed by Governments during 1944 and 1955 was as follows :

	(In thousand tons)	
	1954	1955
Opening Stock with States ..	950	784
Procurement .. ..	1,467	15
Net Supplies to States .. ..	248	232
Total Availability .. ..	2,665	1,031
Offtake in States .. ..	1,821	863
Transfer of Stocks to Centre ..	317	414
Stocks with States at the end of the year .. ..	784	168
Central Sales during the year ..	614	1,161
Central Reserves at the end of the year .. ..	856	750
	1,603	—

The areas covered by the Punjab and the former Vindhya Pradesh (now part of Madhya Pradesh) are generally surplus in wheat.

The areas covered by the following States are generally surplus in rice : Orissa, Madhya Pradesh, Uttar Pradesh, Punjab.

From the point of view of food generally the position is roughly as follows :

Surplus areas : Madhya Pradesh, Punjab, Orissa, Assam.

Self-sufficient areas : U.P.

Deficit areas : Bombay, Madras, Mysore, Rajasthan, Himachal Pradesh, Bihar, West Bengal, Kerala, Andhra.

Food policy for 1957 is : To build up a wheat and rice reserve by importing 700,000 tons of rice and two million tons of wheat.

#### IMPORTS (1950-55)

The imports for the years were as follows : (figures in million tons)

1950—2.1; 1951—4.7; 1952—3.9; 1953—2.0; 1954—0.808; 1955—0.7.

The cost of import of foodgrains was as follows :

(figures in crores of rupees)

1950—80.6; 1951—216.8; 1952—209.1; 1953—85.96; 1954—47.02; 1955—33.11.

The imports of individual grains were as follows : (in million tons)

	1953	1954	1955
Rice*	0.18	0.603	0.265
Wheat (including flour)	1.68	0.197	0.435
Others .. ..	1.44	0.008	—
<b>TOTAL</b> .. ..	<b>2.00</b>	<b>0.808</b>	<b>0.700</b>

The cost was as follows :

(Rs. in lakhs)

	1953	1954**	1955
Rice*	1,424	—	—
Wheat .. ..	6,613	—	—
Others .. ..	559	—	—
<b>TOTAL</b> .. ..	<b>8,596</b>	<b>4,702</b>	<b>3,311</b>

\* Excludes the quantity and value of 22,300 tons of Burma rice supplied by the Government of Ceylon on a replacement basis.

\*\* Individual figures are not available.

Countries from which imports were obtained from 1953 to 1955 with quantity (in million tons) and C & F value (in lakhs of rupees) were as follows: The figures are provisional:

Country	1953		1954		1955	
	Quantity	Value	Quantity	Value	Quantity	Value
U.S.A.	0.69	—	0.008	—	0.129	—
Australia	0.48	—	0.197	—	0.306	—
Argentina	0.24	—	—	—	—	—
Canada	0.42	—	—	—	—	—
U.S.S.R.	—	—	—	—	—	—
Pakistan	0.02	—	—	—	—	—
Burma	0.15	—	0.603	—	0.265	—
Thailand	Neg.	—	—	—	—	—
Other Countries	—	—	—	—	—	—
TOTAL	2.00	85.96	0.808	47.02	0.700	33.11

Neg.—Negligible.

Countries from which imports of individual grains were made in 1955 were as follows: (in thousand tons)

	Wheat	Rice	Millets
Canada	—	—	—
U.S.A.	129	—	—
Australia	306	—	—
Burma	—	265	—
Thailand	—	—	—
Pakistan	—	—	—
Argentina	—	—	—

In 1956, 325,000 tons of rice and 1.1 million tons of wheat were imported. In 1957 it is hoped to import about 700,000 tons of rice and about two million tons of wheat to keep down prices and build up reserves. Most of the wheat will be under the U.S. Public Law 480 and will not involve foreign exchange.

#### ESTIMATES FOR 1955-56

The All India (Final) Estimate of production of foodgrains for 1955-56 was 63.54 million tons.

State-wise details of production in 1955-56 (in 000 tons) are as under:—

Andhra Pradesh 5,537; Assam 1,071; Bengal (West) 4,681; Bihar 4,550; Bombay 7,218; Jammu and Kashmir 403; Kerala 944; Madhya Pradesh 7,337; Madras 4,453; Mysore 3,832; Orissa 2,496; Punjab 4,438; Rajasthan 3,769; Uttar Pradesh 11,633; Andaman and Nicobar Islands 3; Delhi 36; Himachal Pradesh 240.

The improved food situation led to a marked fall in prices in some items as shown by the following table of index numbers of wholesale prices:

	1954		1955		1956	
	January	December	January	December	January	November
Food Articles	381.5	318.0	310.3	323.7	333.4	411.2
Cereals	440.0	304.0	348.0	385	398	520
Pulses	424.0	276.0	239.0	345	361	413
Rice	478	424	399	463	449	509
Wheat	601	488	498	500	529	555
Jowar	222	147	136	133	141	307
Bajra	201	206	203	241	240	366
Gram	364	203	200	242	265	329
Red gram (fal)	546	302	322	622	607	603

Base August 1939 = 100

The continuing high prices of rice and wheat in spite of the rise in indigenous production and imports is attributed to a change in people's dietary habits and the emergence of the small hoarder.

It is believed that an increasing number of people are switching over from coarse grains to wheat not merely because of greater prosperity, but also due to the narrowing gap between their respective prices.

The poor peasant, who used to sell almost his entire output of wheat in the market for consumption in the urban areas two or three years ago, has begun to hold back a part of his produce in the hope of obtaining better prices later on.

He can afford to do so because he has more money in his hands and the State meets a considerable portion of his needs by way of aid under the community development programme or cash loans from the rural co-operatives.

It has to be said, however, that the total production of cereals has declined steadily from 58.28 million tons in 1953-54 to 55.73 million tons in 1954-55 and 53.34 million tons in 1955-56.

This is accounted for by the decline in the production of coarse grains due to seasonal factors. But the fall in the output of coarse grains has indirectly encouraged the change in the pattern of consumption.

#### GROW MORE FOOD

The figures below show the performance in the principal food crops as compared with the targets for 1955-56 (figures are in million tons):

	Target, 1955-56	Achievement	
		1954-55*	1955-56*
Rice	27.2	24.5	25.5
Wheat	8.3	8.8	8.3
Other Cereals	17.0	22.4	19.5
Pulses	9.1	10.9	10.2
TOTAL	61.6	66.6	63.5

For the execution of the various Grow More Food schemes during the year Rs. 26.18 crores were allotted. Out of this loans amounted to Rs. 22.9 crores and subsidies to Rs. 2.59 crores. It was expected that production would increase by 10.0 lakh tons as a result of the G.M.F. programme.

Reclamation of land by the Central Tractor organization: 1.84 lakh acres in U.P., M.P., M.B. and Bhopal with the help of 293 tractors; 330 acres of jungle cleared in Assam and Bhopal.

The cost of reclamation for 1951-55 came down to Rs. 46 per hour and Rs. 50 per acre from the corresponding figures of Rs. 51 and Rs. 59 in the preceding year.

Tubewell construction is undertaken under two different heads (i.e. Indo-American Technical Programme of 1952-53, and G.M.F. assistance). Under the former, out of the 2,650 tubewells originally proposed, 2,375 were drilled by the end of 1955 in the States of Bihar, Punjab (including former P.E.P.S.U.) and Uttar Pradesh. Under the G.M.F. assistance, out of the 700 tubewells proposed 206 were drilled during the same period. Exploratory Project for tubewell drilling is also proposed for most of the States under the Technical Assistance programme. Out of the 350 boreholes, 19 have already been drilled in the Narbada Valley (near Itarsi) in Madhya Pradesh.

About 90 thousand mannds of seeds were allocated to the States for the Kharif season and 66 thousand for the rabi.

The amount of compost produced from urban centres was 18.8 lakh tons during 1954-55, and the number of centres producing compost was 1,926.

There were about 23 schemes in operation during 1954-55 for the utilization of sewage and sullage. These schemes were estimated to give 14 million gallons of manurial water per day expected to irrigate about 14 thousand acres and yield 14 thousand tons of additional production.

The total supply of ammonium sulphate available for consumption during 1955 was about 0.7 million tons (made up of 0.104 million tons of carry-over stocks from the previous year with the State Governments, 0.32 million tons obtained from Sindri Fertilizer Factory, 0.072 tons procured from other indigenous sources and 0.20 million tons imported from abroad).

The maximum sale price of ammonium sulphate in 1954 came to Rs. 345 per ton as against prices ranging between Rs. 350 and Rs. 450 per ton during 1953.

This is now made available to farmers throughout the country at the uniform rate of Rs. 345 per ton. Subsidies are given to State Governments for transport to ensure that the consumer gets this at the fixed price.

The consumption rose to about 0.552 million tons during 1955 against 0.50, 0.427 and 0.276 million tons during 1954, 1953 and 1952 respectively.

The consumption of superphosphate was 0.061 million tons in 1953, 0.091 in 1954 and 0.078 in 1955.

The total quantity of fertilizers distributed in 1955 was 19,400 tons. Apart from this a total

quantity of 28,000 tons of other fertilizers (comprising 12,000 tons of urea, 14,000 tons of ammonium sulphate nitrate and 2,000 tons of calcium ammonium nitrate) were imported under the Indo-U.S. Technical Co-operation programme during 1955. Almost the entire quantity of these was distributed free of cost to the cultivators for demonstration purposes and also to popularise this type of fertilizer.

Grow More Food campaign is now merged in the Community Development and National Extension Projects. These latter are not really new to the country in a sense. Parts of the agricultural departments have always been engaged in the demonstration and propaganda of improved farm practices. This, however, did not prove effective.

The eleven Model Village Projects of the I.C.A.R. which successfully worked on a pilot scale during the forties in various parts of India, (viz., former Madhya Pradesh 4; Uttar Pradesh 4; Bombay 2; and Travancore-Cochin 1) showed what could be done to improve traditional methods. Brayne's work in the Punjab, the Firka Development in Madras, the Etawa Project in Uttar Pradesh and Sarvodaya work in Bombay and elsewhere, were more or less the successors of the I.C.A.R. Pilot Projects, but with varying emphasis on particular aspect of rural development.

### FOOD SHORTAGE

'Food controls' is really a misleading term for what is in reality a gigantic State trading system set up by the Central Government and

all State Governments working in co-operation with one another.

The operation of this system during 1949, 1950 and 1951 may be summed up as follows :

On an average 43.0 lakh tons were purchased every year in different States within the country—mostly from farmers directly, in some places from traders. Another 34.8 lakh tons were purchased every year from various foreign countries. These stocks were designed to meet the daily needs of crores of people. The average annual issues made from these stocks to grain shops, ration shops, etc. amounted to 77.1 lakh tons.

The total number of persons who received supplies (on March 31, 1951) numbered 12.66 crores.

The time when undivided India changed over from being a net exporter of foodgrains into a net importer was about 1921.

About 1880 the ordinary outturn of food in British India was 50 million tons and the surplus available for storage, export, etc. was more than five million tons.

The average imports in lakh tons for 1947-52 was 32.7.

The composition of the imports had changed greatly. Before World War II India was importing rice heavily but exporting wheat. After World War II there was very little rice and a great deal of wheat and coarse grains.

The sources from which the imports were coming in had also changed. The average

imports from Burma, for instance, were 12.1 lakh tons during 1948-50, which was less than two-fifths of the level reached just before World War II.

The decline in imports cannot be due to a shift in cultivation from food to cash crops, for this shift is hardly significant. From sample survey we find that the proportion of land sown with food crops to the total sown area changed as follows from 1891 to 1951 :

1891—80.7 per cent; 1921—77.8 per cent; 1951—77.2 per cent.

Figures for certain specific districts show : the shift was more significant before 1921 than after, it was more significant in south and west India than elsewhere, shifts in other directions also occurred being significant in north and central India.

A graph of the food prices from 1800 to 1950 will go something like this :

For the first fifty years there will be a more or less level course. For the next fifty years it is no longer level, each decade a little higher than the preceding one : the fluctuations tend to be sharper. Then for the last fifty years one big peak marking World War I, then a valley marking the depression, then finally the tallest of all peaks on which we stand today.

The index of food prices (Aug. 1939=100) was somewhat as follows :

1948—374; 1949—389; 1950—410; 1951—410; 1952—360; 1953—341; 1954—350; 1955—304.

The All-India index of whole sale prices of staple foodgrains with base 193 Aug. = 100 is given below :—

Foodgrains	1950	1951	1952	1953	1954	1955
Rice .. .. .	514	544	527	514	417	442
Wheat .. .. .	531	549	533	560	492	433
Jawar .. .. .	340	297	216	212	185	119
Bajree .. .. .	245	245	245	233	233	212
Gram .. .. .	364	384	403	417	277	205
Dal .. .. .	640	800	655	658	400	384
Chillies .. .. .	729	600	345	554	556	353
Pepper .. .. .	3,293	3,367	2,808	2,375	1,260	999
Sugar .. .. .	279	297	294	272	298	267
Coconut .. .. .	900	1,038	718	802	740	628
Groundnut .. .. .	800	849	619	771	539	428
Mustard .. .. .	657	574	353	412	430	337
Sesamum .. .. .	529	537	400	473	359	282

### CONSUMPTION

There are no reliable statistics and production and consumption figures are subject to a wide margin.

The National Sample Survey yielded the following results :

The average rural household produced 10.9 maunds of foodgrains every year and ate 26.4 maunds during the year.

The Sample accepted the figure for consumption but rejected as wide of the mark the figure for production.

Though figures for food production are throughout unreliable the following generaliza-

tions should be regarded as among the least inaccurate :

The average yield on one acre sown is 6.0 maunds for the country as a whole. The rates in maunds for the respective zones are : south India (8.2), east India (7.3), north India (6.6), north-west India (6.2), central India (4.5) and west India (3.8).

The average rate of consumption per head per annum is 4.5 maunds. The rates in maunds for the respective zones are north-west India (5.0), central India (4.8), north India (4.6), east India (4.0), west India (4.0).

These rates include the grain fed to cattle and grain wasted between field and kitchen.

India's shortage round about 1951 was 34 lakhs—being the difference between 590 lakh

tons of consumption and 556 lakh tons of harvested yield.

The shortage is equivalent to foodgrains needed for consumption for 21 days.

Among the zones the shortage is negligible in central India and relatively small in north India and north-west India. The shortage in the other three zones expressed in the number of days of consumption requirement is west India (67 days), south India (34 days), east India (17 days).

The average shortage (21 days' consumption) is small. But the fact is important because free trade cannot function in a market which is genuinely short of foodgrains—however small the shortage.

## FISHERIES

**T**HE fisheries of India potentially rich as yet yield a mere fraction of what they could were they exploited in a fashion comparable with those of Europe, North America or Japan. The fishing industry, particularly the marine section, has certainly expanded considerably within the last 50 years concurrently with improvement in the methods of transport and increase in demand for fish, cured as well as fresh, from the growing population of the great cities within reach of the seaboard.

The caste system, however, exerts a blighting influence on progress. Fishing and fish trade are universally relegated to people of certain castes who from their want of education, the isolation caused by their work and caste and their extreme conservatism, are among the most ignorant, suspicious and prejudiced sections of the population extremely averse to changing the old methods; but now with the help they receive from the State Government they have changed their outlook. 'Higher' caste capitalists have hitherto fought shy of associating with the 'low' caste fishermen, and except in large operations on new lines, the capitalists cannot be counted upon to assist in the development of Indian fisheries. As in Japan, it appears that the general conditions of the industry are such that the initiative must necessarily be taken by Government.

Four Japanese, one British and three F.A.O. experts are working in this country, and the Norwegian Government is operating a development scheme in Kerala as part of the Norwegian Aid Programme.

The draft 2nd Five-Year Plan provides about Rs. 12 crores for the development of fisheries.

### BOMBAY STATE

#### Post-reorganisation

The new Bombay State has a sea board of more than 1,400 miles extending from Reddy (District-Ratnagiri) in the south to Lakhapat (Kutch) in the north inclusive of Saurashtra coast. The Inland Fisheries extend to Bhandara District in the East, a crowflight distance of over 500 miles. The total number of fishing villages along the coast is estimated at over 450. With the enlarged sea coast, the Bombay State Fisheries now enjoy a pre-eminent position on the West Coast of India both from the point of view of total production and progress of developmental activities.

With the integration of Saurashtra, Kutch, Vidarbha and Marathwada, the Fisheries of the State are bound to expand and open a venue to enterprising fishermen to increase their output of fish. The Saurashtra region, rich in its fishing grounds, will open a new chapter in the State's programme for the fishery development.

The Fisheries Department of the new Bombay State will have its Head Office in Bombay having regional offices at the following places for administrative convenience, under control of the officers indicated against each region:

Region.	Controlling Officer.
1. Saurashtra ..	Officer on Special Duty (Marine Products), at Rajkot.
2. Kutch ..	Entomologist and Plant Protection Officer, in-charge Fisheries Department, at Bhuj.
3. Vidarbha ..	Superintendent of Fisheries at Nagpur and Bhandara.
4. Marathwada ..	Superintendent of Fisheries, Aurangabad.
5. Ratnagiri ..	Superintendent of Fisheries (Coast), Ratnagiri.
6. Kolhapur ..	Superintendent of Fisheries, Kolhapur.
7. Baroda ..	Superintendent of Fisheries, Baroda.
8. Surat & Broach ..	Superintendent of Fisheries, Surat.

The new Bombay State will have a total outlay of Rs. 1,10,85,000 for development of fisheries under the Second Five-Year Plan. All the schemes have been so drawn that those will ultimately lead to elevating the present standard of the fishing industry by augmenting available supplies of fish and also by promoting the socio-economic condition of fishermen. The schemes can broadly be classified as Research, Demonstration, Development and Training schemes.

#### Pre-reorganization

Important varieties of sea fish caught along the coastline: Saranga (White Pomfret); Halva (Black Pomfret); Ghul (Jew fish); Dara (Giant Threadfin); Ravas (Indian Salmon); Kuppa (Tuna); Surmai (Seer fish); Bol (Mullet); Bombli (Bombay duck); Bangda (Mackerel); Mushi (Sharks); Wam (Eels).

Estimated production: about 1,00,000 tons. Price per ton of fish at present: Rs. 300. The total value of fish caught in this State: Rs. 3,00,00,000.

The number and names of the more important fishing villages and of the fishing grounds:

**Greater Bombay:** Lower Colaba, Worli, Danda, Versova; **Thana District:** Basseln, Arnala, Uttan, Edwan, Usarni, Satpati, Navapur, Utchell, Nagaon, Dativare **Surat District:** Umarsadi, Kolak, Bulsar, Kosamba; **Broach District:** Broach, Bhadbhut, Kavi; **Amreli District:** Madhwar, Kotda, Velan, Okha; **Kolaba District:** Karanja, Versoli, Allibag, Theronda, Revdanda, Murud, Bharadkhol; **Ratnagiri District:** Burundi, Dabhol, Jalgaed, Ratnagiri, Vijaydurg, Jaitapur, Malvan, Deobag, Venguria.

Surveys carried out by several private and Government vessels in the north of Bombay, have revealed extensive fishing areas off Saurashtra and Okha.

The estimated fishing population: 175,000.

The facilities available for curing, storage and refrigeration, co-operative marketing are:

Several ice factories in the city and also at important fishing centres along the coast.

Annually, some addition to the available cold storage space is being made by extension to the existing plants and establishment of new plants.

A seven-ton ice plant and 30-ton cold storage were erected by the State Government at a cost of about Rs. 1,32,000 and handed over to the Satpati Fishermen's Sarvodaya Co-operative Society for operation. The Society has also been allotted by the Government, refrigeration equipment to increase the seven ton ice making capacity of its existing plant to ten ton and a four ton quick freezing plant and refrigeration equipment for a fish storage, ice storage and quick frozen fish storage received under the T. C. M. Programme of the American Government. It has now attached to it 98 out of the 732 mechanised craft in the State, all of which carry ice aboard their vessels to preserve fish right from the time it is caught.

**Marketing facilities.** A new building was put up in 1951 by the Bombay Municipality to cater for the City's fish trade. Lifts are being installed for the convenience of shoppers as the retail sale of fish is on the first floor.

The new market adjoining the original congested market was erected at a cost of about Rs. 8 lakhs. In the fish section space is provided for 250 aquatters. Sufficient space is now available to traders to display their products. Two new additional markets one at Grant Road and another at Umardhadi were also constructed during recent years.

Marketing facilities have also been provided at Kankavli and Malvan in the Ratnagiri district.

About five times the quantity of fish at present caught in the entire State will be necessary to meet the consumers' demand.

The quantity available for sale in Greater Bombay to the public was approximately as follows:—

Year	Tons
1950-51..	31,674
1951-52..	35,849
1952-53..	36,388
1953-54..	37,812
1954-55..	32,034
1955-56..	30,072

Taiyo Fishing Co. Ltd., was permitted by the Government of India to conduct trawling off Bombay and Saurashtra waters. The firm employed trawl nets for deep-sea fishing. The total quantity of fish landed by the trawler was about 1,800 tons. The Government of India have since terminated the contract with the firm.

West Coast Fisheries (Travancore) Ltd. commenced deep sea fishing operations in Bombay waters in February 1953. It employed trawl nets for deep sea fishing and landed about 94 tons of fish during four voyages. The trawler is now conducting fishing operations off Travancore waters. New India Fisheries Ltd., a firm registered under the Company's Act, has recently been permitted by the Government of India to undertake trawl fishing. The firm in collaboration with Japanese enterprises imported four trawlers from Japan and commenced fishing operations in Bombay waters. The firm commenced bull trawling in May 1956 and landed 2,300 tons of fish upto December 1956.

#### GOVERNMENT HELP

Government effort in up-to-date fishing technique, money spent, trawlers gear used, quantity of fish caught: The State Government built the vessel "Tapase", now renamed the "Mysis" in 1947, at Rs. 65,000 for catching fish.

Number of power-propelled vessels owned by fishermen: 732.

Two improved type of fishing crafts at a total cost of Rs. 54,000 were also built and allotted to two fishermen's co-operative societies in the State on half subsidy and half loan basis for capture of fish.

During 1954-55 Government advanced as subsidy Rs. 1,20,000 and as loans Rs. 4,16,100 for mechanisation of fishing craft whereas during 1955-56 subsidy of Rs. 2,02,240 and loans to the extent of Rs. 3,99,895 were granted for the purpose. Loans granted to individual fishermen during the past ten years for purchase of boats, nets, and other fishing gear: Rs. 37,15,000. Fishermen now possess more boats and nets with which they are able to catch more fish.

Government have received 322 marine engines of different H.P. valued at \$6,74,599.00 under the T.C.M. Programme of the American Government, which have been allotted to groups of fishermen on loan-cum-subsidy basis.

Government efforts in educating fishermen:—

10 fisheries schools have been established in important fishing centres, imparting special training in net making, boat repairing, fish preserving, etc. Ratnagiri District 4, Thana District 1 and Surat District 2.

Annual expenditure on these schools: Rs. one lakh (including for 3 in Kanara\*).

A building costing Rs. 1,34,468 was constructed by the Government for the Fisheries School, Karwar\* and Office of the Superintendent of Fisheries, Karwar.

The Department of Fisheries has also a scheme to train fishers-youths in the operation of power vessels as mechanics and navigators. So far 130 apprentices have been trained, 90 under the old scheme and 40 under the modified scheme. Under a modified scheme introduced by the Government, facilities are made available to train 20

candidates in the technique of improved methods of fishing. The centre is situated at Satpati, Tiana District and is financed by the Government of India. The duration of each course is six months, the scheme having been sanctioned for three years. Each candidate is paid a monthly stipend of Rs. 50 and food allowance of Rs. 10. A similar centre has also been established at Veraval (Saurashtra).

Besides, the State Government have started a new three months training course to train fisher-youths in handling and operation of marine engines. The trainees are paid a stipend of Rs. 40 per month each.

Two graduates of the fishing community were also sent to U.S.A. by the State Government for two years to receive training in canning, refrigeration and other specialised branches of fisheries. The scheme has now been discontinued by the Government.

Several candidates from fishermen's community have also received training aboard the Japanese trawler "Talyo Maru" at Government expense.

**Public aquaria:** The State Government maintains the Taraporevala Aquarium along the Marine Drive, Bombay. The exhibits include both fresh water and marine forms, found along the coast of the State. Attached to the Aquarium is the Marine Biological Research Station where facilities are available to research students for M.Sc. and Ph.D. degrees. The Institute is affiliated to the University of Bombay. It is now proposed, during the Second Five-Year Plan period, to construct one additional storey over the Aquarium building at an estimated cost of Rs. 90,000. The Marine Biological Research facilities will also be intensified by appointment of technical staff to guide research. The station will also be provided with a research vessel by conversion of the department's vessel 'Mysis'.

### FRESH WATER FISHERIES

The State being primarily a maritime province stretching along the western coast, fresh water fisheries have shown comparatively less expansion. Nonetheless, efforts are made to import better varieties of fish in the State such as Catla (*Catla catla*), Rohu (*Labeo rohita*) and Mrigal (*Carrhina mrigala*) from West Bengal, for their release in perennial waters in the State in larger numbers every year. Large irrigation reservoirs also are being stocked with these varieties so that they may thrive and breed there in course of time. In 1956-57 about 12,80,000 carp imported from West Bengal were released in different sheets of water.

Collection of local baby fish for stocking is attempted at several places around Kolhapur, Baroda, etc., and efforts are made in all directions to boost up these less developed fisheries.

Despite the handicaps, revenue from fresh water fisheries in the State exceeds Rs. 75,000 per annum.

### ANCILLARY PRODUCTS

A fisheries technological laboratory has been established at Sassoon Dock, for conducting research on problems relating to ancillary industries like shark liver oil, gelatine, glue, fish meal, etc. To ensure quick and clean extraction of oil a Sharple's super centrifuge, a fish liver boiler and a steam boiler have been installed. The laboratory also tests samples of shark liver oil from the public for vitamin 'A' content, the number of samples so tested average over 500 a year. A Beckman's spectrophotometer has been imported from the U.S.A. for this purpose.

In 1955-56, the output of neat shark liver oil was 5,420 gallons with an average vitamin 'A' content of 15,000 I.U./Gm. The oil when processed, was capable of yielding 396,720 lbs. of Oleum-vitaminatum of B.P. standard. Besides this, there is the oil disposed of by the fishermen direct which will be about 2,500 gallons.

The processed products marketed by the department comprise (i) "Sharkovit" with vitamin 'A' and 'D', 1,000 and 100 I.U.s per gramme respectively, (ii) "Elaasmin Liquid", a shark liver oil concentrate with vitamins 'A' and 'D' 20,000 and 2,000 I.U.s/Gm. respectively, (iii) "Elaasmin Pearls", Elaasmin Liquid is offered in 3 minims capacity gelatin capsules to facilitate its use by those who do not like to take the oil in its plain form. Each capsule contains 6,000 I.U.s of vitamin 'A' and 600 I.U.s of vitamin 'D' and (iv) Sharkomalt, Shark Liver oil with malt extract. This product contains 12,000 and 2,400 I.U.s of vitamins A and D respectively, per fluid ounce.

Another important by-product of fisheries is fish meal. The departmental laboratory is also well-equipped for the manufacture of edible gelatin and fish glue both for adhesive as well as photo-processing work.

The following schemes were included in the State Government's first Five-Year Plan: Study of marine biology and establishment of an aquarium in Bombay; Establishment of a marine biological station at Ratnagiri; Establishment of ice and cold storage plants along the coast; Development of inland fisheries at Khopoli; Stocking of inland waters with carp fry; Provision for merged States for inland pisciculture; Higher technical training for fisher-youths abroad; Establishment of fisheries schools along the coast; Provision for merged States for training schemes.

Receipts of the department during the financial year 1955-56, are shown below:—

	Rs.
Fish curing yards .. ..	1,01,508
Fisheries Tech. Laboratory ..	3,03,864
Other receipts .. ..	1,24,609
Taraporevala Aquarium .. ..	70,248
Receipts from T. C. M. .. ..	7,032
<b>Total .. ..</b>	<b>6,97,261</b>

The State Government's share under the U.S. operational Agreement No. 6 amounts to Rs. 30 lakhs, to be utilised to procure up-to-date equipment to increase existing supplies of fish and to improve the socio-economic condition of fishermen. The equipment ordered out is as follows: 322 marine diesel engines, one 11-ton ice plant and 30-ton cold storage for fish, one quick-freezing plant and equipment to enlarge the present ice production capacity of the plant at Satpati. Ice plant and cold storage machinery indented under the T.C.M. Programme have been received and distributed to the fisheries cooperative societies at Satpati and Versova. One twine and net making plant has also been indented under the T.C.M. Programme, which will be allotted to one of the fisheries cooperative societies in this State. The Plant was expected to be received in 1956-57. All the engines received under the T.C.M. Programme have been allotted to fishermen of the State. The State also received for distribution among fishermen, nylon, fish hooks and hemp twine. Additional quantity of nylon is being indented under the T.C.M. programme 1956.

### FISH CURING YARDS

During 1955-56 the department maintained 36 fish curing yards of which 21 were in North Kanara District\* and 15 in Ratnagiri District. Improvement comprising erection of cement concrete platforms, cement superstructure thereon, copious supply of fresh water, etc., which lead to improvement in cured product, have been provided at many of the important yards in the two districts at an approximate cost of Rs. 8 lakhs. A few of the yards still need such improvement. Accordingly it is proposed to provide the aforesaid facilities in the 2nd Five-Year Plan at an approximate cost of Rs. 80,000.

The transactions at the yards during 1955-56 were as follows:

Quantity of fish let in for curing—2,44,332 mds.

Quantity of salt issued—57,785 mds.

Quantity of cured fish removed—1,83,840 mds.

The total budget allotment for the department for the year 1955-56 was Rs. 14,76,100

The designation of the department is: Office of the Director of Fisheries, Bombay.

### MADRAS†

Statistics of landings of the important shoaling fishes of the west and east coasts of the State for the year 1955-56.

Name of fish	Wt. in Mds.	Value in Rs.
<b>A. WEST COAST</b>		
Oil Sardine .. ..	4,79,088	25,59,259
Mackerel .. ..	10,85,877	71,78,489
Silver Bellies .. ..	3,48,802	15,95,696
Ribbon Fish .. ..	1,08,208	5,55,179
Cat Fish .. ..	84,138	8,81,154
Soles .. ..	4,10,050	9,70,785
Prawns .. ..	1,90,990	11,08,721
Horse Mackerel .. ..	75,019	3,45,792
<b>B. EAST COAST</b>		
Sardines .. ..	40,500	4,05,000
Mackerel .. ..	20,250	1,21,500
Mulletts .. ..	94,500	9,45,000
Ribbon Fish .. ..	3,64,500	54,67,500
Cat Fish .. ..	1,62,000	16,20,000

† Pre-reorganization

Statistics of inland fish supply of 23 important markets for 1955.

Name of fish	1955 (From 23 markets)	
	Wt. in lb.	Value in Rs.
Carps .. ..	7,88,006	2,25,047
Cat Fish .. ..	1,66,250	58,828
Murrels .. ..	2,81,021	1,38,860
Notopterus .. ..	15,331	5,473
Eels .. ..	23,707	10,738
Etroplus .. ..	35,930	8,894
Glossogobius .. ..	36,097	14,944
Mulletts .. ..	96,902	37,057
Chanos .. ..	28,355	12,328
Megalops .. ..	9,187	3,057
Lates .. ..	24,533	6,807
Ilisa .. ..	580	270
Prawn .. ..	86,290	31,168
Crab .. ..	20,200	4,623
Polynemus .. ..	6,505	2,773
Miscellaneous .. ..	10,50,177	2,43,613
<b>Total .. ..</b>	<b>25,87,643</b>	<b>8,03,503</b>

The names of Sea Fish and average price per maund:—Sardine Rs. 5-2; Prawns Rs. 6-3; Pomfrets Rs. 8-6; Mackerels Rs. 6-10; Seer Rs. 10-8; Hilsa Rs. 40; Perch Rs. 30; Bekti Rs. 15; Flying Fish Rs. 30; Jew Fish Rs. 5-6; Shark Rs. 10; Silver Bellies Rs. 5; Caranx Rs. 2-8; Ribbon Fish Rs. 5-2; Lutjanus sp. Rs. 10; Polynemus Rs. 50; Soles Rs. 2-8; Freshwater Fish: Carps (red) Rs. 25; Cat Fish Rs. 30.

On the west coast there are 116 fishing villages in South Kanara\* and 93 fishing villages in Malabar.\*\* On the east coast there are 140 fishing villages. The total number of marine fisherfolk including women and children was 198,162 on the west coast and 84,400 on the east coast.

Census of Inland Fisherfolk for 1954:

Men engaged in actual fishing ..	12,745
Men engaged in part-time fishing ..	2,099
Number of women and children ..	29,500
<b>Total .. ..</b>	<b>44,344</b>

\* Now in Mysore.

\*\* Now in Kerala.

72 fish curing yards are maintained by Government where good salt is supplied and the process of curing is supervised and controlled by officers of the Fisheries Department. Salt is being issued for fish curing at subsidised rates in the fish curing yards.

Two ice-cum-cold storage plants have been erected one at Mangalore\* and another at Calicut†. The fishermen are able to save from spoilage at least 50 per cent of their catches and keep them in a fresh condition till they are taken to the market.

259 fishermen's co-operative societies formed in many villages buy the fish from the members and market it.

The department have tried deep-sea fishing with trawlers. A secondhand admiralty trawler "T.B.8" was purchased and reconditioned in England at a cost of £5,099 and named "Lady Goschen".

A survey of the fishing banks was made in 1927. Only a few trial trawls off Madras were possible during this period. The trawling ground explored is the extensive submarine plateau within the 100 fathoms line which is around Cape Comorin. The fish landed belonged to some 20 species nearly all of which were bottom feeders. The prime table fish caught: sea bream (*Lethrinus nebulosus*), Snappers (*Lutjanus dodecaanthus*) and *L. reivolatus* Rock cod (*Epinephelus* spp.) and Spade fish (*Ephippus* orbi). Arranged according to the quantity and value the species mostly caught are *Lethrinus nebulosus* over 1/6th of total catch, *Epinephelus* spp. less than 1/7th, *Lutjanus dodecaanthus* 1/9th and (*Diagramma punctatum*) 1/20th.

The aim of the survey was exploration and no attempt was made to capture large quantities of fish. The fish that were captured during the experiments amounted to 26,061 lb.

66 schools have been opened for fisherchildren. Natural Science and Fisheries Science play a large part in their curriculum. The children are taught handicrafts like coil rope making, mat weaving, net making, etc. Books, pencils and stationery articles are given free to these children.

Officers of the department and teachers of Fisheries schools have done a great deal to improve the standard of life of the children.

There are a museum and an aquarium belonging to the department. In the Museum, preserved specimens of all important marine and freshwater fishes, various kinds of sharks, aquatic curios like sepias, loligo, sea horses, etc. are all exhibited. The Aquarium has eight large aquaria in which Tropical Aquarium fishes like Gold Fish, Black Molles, Sword Tails, Guppies, Blue Gourami and Food fishes like Catla, Laboe, Cirrhina, Gourami, etc. are kept. Most important experimental fish farms are Mettur Fish Farm, Poondi Fish Farm, Thanthipandal Fish Farm, Chetput Fish Farm, Vellore Fort Moat Farm and Chingleput Fort Moat Farm. The ponds in the farms and other ponds belonging to the department are intensively stocked with quick growing fishes every year and the catches are marketed to the public.

In addition to being an important source of food supply rich in proteins and albumenoides, food fishes play an important part in the manufacture of several bye-products in use in the everyday life. They are fish-oil (body oil and liver oil), shagren, isinglass, fish glue, fish meal (guano), fin soup, pearl essence, fish manure, etc.

The Government Shark Liver Oil Factory was opened at Calicut†, which supplies shark liver oil for use in hospitals and for sale to the public.

Schemes under the first Five-Year Plan: Intensive seed collection and distribution for development of inland waters; Improvement of indigenous craft and tackle; Mechanisation of inshore crafts; Provision of quick transport facilities; Installation of cold storage and ice plants.

Revenue from Fisheries in 1955-56: Rs. 23,24,000.

Latest Budget Allotment for the Department for 1956-57: Rs. 33,00,000.

The designation of the department is: Government Fisheries Department, Madras.

## MYSORE

The facts given below refer to the post-reorganization Mysore State.

**Inland Fisheries:** There are 20,000 minor tanks and 3,000 major tanks in the State. The important rivers are: Thunga, Bhadra, Thunga-bhadra, Cauvery, Hemavathi, Laxmanathirtha, Vedavathi, Varada, Palar, Pennar, Sharavathi, Rheenu, Krishna, Manjeera, Don, Ghattaprabha, Mallaprabha, Chandragiri, Netravathi, Swarna and Seetha Nadi, comprising a total of over 3,000 miles. There are nearly 20 big reservoirs formed across the above rivers.

Inland Fisheries are developed only in selected areas of the State. There are 10 fishery divisions, 12 fish farms, 2 fishing units and 20 fish seed

*No. plying the trade:*

	No. of Fishermen.	No. of dependents on fishing industry.	No. of boats.	No. of nets.
North Kanara .. ..	7,132	23,508	—	—
South Kanara .. ..	12,096	100,000	6,700	18,900
Total .. ..	19,228	123,508	6,700**	18,900**

Average catch per fisherman per annum:—North Kanara: 2.77 tons; South Kanara: 3.00 tons.

Total annual internal consumption:—North Kanara: 7,200 tons; South Kanara: 15,000 tons.

**Marketing facilities:** North Kanara: Fish is transported to Bombay after icing in carrier launches. Surplus fish is dried and cured in fish curing yards. Modern facilities for marketing fish are lacking.

**South Kanara:** Fish is sold in local markets and also transported to interior markets in lorries and sold there in fresh condition. There is an ice factory-cum-cold storage plant of 50 tons capacity in Mangalore. Even here, marketing facilities are not adequate.

Capital value of the industry: North Kanara: Rs. 18,00,000 South Kanara: Rs. 1,50,00,000.

No. of fish curing yards:—North Kanara: 15; South Kanara: 16.

**Process of modernisation (South Kanara):** Mechanisation of boats for powered fishing is yet taken up as also ice plants and refrigerated storage facilities are lacking. There is considerable work to be done in this regard. The department has three 45 feet motor launches and three vehicles.

## SUBSIDIARY INDUSTRIES ESTABLISHED AND THE SCOPE FOR DEVELOPMENT:

	Fish meal plants.	Fish oil factories.
North Kanara .. ..	1	3
South Kanara .. ..	1	13
Total .. ..	2	16

collecting centres. The revenue from Inland Fisheries is approximately Rs. 50,000.

**Marine Fisheries:** The New Mysore State will have 300 miles of coast line on the Arabian Sea. All along this sea board, there are many fishing villages, the most important of them being Karwar, Ankola, Kumta, Honnawar, Bhatkal, Majali, Bingi, Chandia, Gangori, Malpaya, Udiyawar, Bukkapatnum and Mangalore.

Nearly 40 varieties of sea fishes are landed out of which the most important are Sardine, Mackerel and Sharks. The total fish production on Mysore coast is 1/5 of the total marine fish landings in India.

Thus, the marine fisheries confined to the districts of North and South Kanara are the richest in the whole of India.

Quantity of fish in tons and the approximate value:—North Kanara: 65,000; Rs. 44,80,000; South Kanara: 100,000; Rs. 66,00,000.

Value of fish:—exported North Kanara: Rs. 38,20,000; South Kanara: Rs. 45,00,000.

## AMENITIES TO FISHERMEN

	Fishermen Co-operative Societies.	Subscribed capital	No. of fishery schools.
North Kanara .. ..	30	Rs. 1,50,000	3
South Kanara .. ..	50	2,70,000	30
Total .. ..	80	4,20,000	33

The data on Inland Fisheries for the Kannada speaking areas of Hyderabad are not available.

There are possibilities of developing prawn fisheries around Mangalore.

Designation of the department in the State: Fisheries Section, Department of Animal Husbandry Services, Bangalore.

## ORISSA

(Later figures than those given here are not available).

Kinds of sea-fish caught: Pomfrets, Mackerel, Sardine and White Bait. Kinds of river fish caught: Labio Rohita, Catla Catia, Cirrhina, Migala, Labio kalbasu and other Carps and Cat fishes.

Latest figures of fish cured (Year 1947-48): Quantity: 20,254 maunds 20 seers.

Annual production of Shark Liver Oil: 1950-51 (3,000 lb.); 1951-52 (6,730 lb.); 1952-53 (7,658 lb.); 1953-54 (10,718 lb.); 1954-55 (6,587 lb.); 1955-56 (11,681 lb.).

Average price per maund of sea-fish in pre-war years: Between Rs. 5 and Rs. 10. Present price per maund of lower varieties: Between Rs. 10 and Rs. 20. Wholesale price per maund of good fish like Pomfrets: Between Rs. 35 and Rs. 55. Wholesale price per maund of higher varieties of river fish: Between Rs. 65 and Rs. 100. Price of smaller fish: Between Rs. 20 and Rs. 50.

\* Now in Mysore.

† Now in Kerala.

\*\* Exclusive of North Kanara for which figures are not available.

**Important marine fishing villages:** Patisonapur, Markandi, Gopalpur, Paayagi, Sonapur, Baria, Aryapalli, Kandarapalli, Gajapatinagar, Purnubandha, Damodarapur, Rambha, Channuhani and Arkhakuda.

**Important assembly centres in the Chilka lake:** Kaluparaghat, Rambha, Balugaon, Gangadharpur, Kuhuri, Chhatrapur and Khalikoti.

**Important inland fishing centres:** Ansupa lake, Russelkonda reservoir and Kausalya-ganga.

Number of fish curing yards run by the fishermen's own co-operative stores: 6. Number of ice factories which cater to preservation of fish for transport to Calcutta and elsewhere: 6. Co-operative marketing has developed in the Chilka area. The annual volume of trade ranges between Rs. 25 to Rs. 40 lakhs.

There is considerable demand for fish in the urban markets unlike the interior where it is very much less on account of lack of purchasing power.

The demand is approximately 100 times more than the supply.

There are no deep-sea fishing companies in the State.

The State has not taken up deep-sea fishing. There are no fishermen's schools.

There is a small experimental aquarium attached to the Fisheries Department in Cuttack.

**Major experimental farms in the State:** Cuttack fish farm; Puri fish farm; Chowdwar fish farm; Sonapur; Sambalpur; Balasore; Kausalya-ganga, Angul; Baudhi; Jajpur, Belguntha.

Shark liver oil industry has developed recently. Annual production: 1952-53 2,240 lb. crude oil; 1953-54—12,000 lb. crude oil; 1954-55—8,062 lb.

Research is going on in the manufacture of agar agar and hydrolysed protein.

Schemes under the revised first Five-Year Plan: Development of Inland Fisheries; Reclamation of swamps to relieve unemployment; Scheme for utilisation of T.C.A. equipments; Scheme in connection with Canadian assistance; Re-organisation of the Fishery Department; Development of Inland Fishery; Biological and Technological Investigation of the Chilka Lake Fisheries; Development of Mahanadi Estuary; Development of Marine Fishery; Co-operative Marketing of Chilka Fish. Such of these schemes as have not been completed would continue during the second Five-Year Plan period. Besides these, the following are the schemes under the second Five-Year Plan: Development of fish seed centres; model fish farms; research in fresh water biology and technology; marine farms; power fishing experiments in the sea, estuaries and inland waters, research in technology.

**Second Five-Year Plan provision 1956-61.** Rs. 52.25 lakhs.

**Income from Fisheries Department ranges between Rs. 1.5 and 2.2 lakhs per annum which does not include rent for water areas.**

**Budget allotment: 1956-57:** Rs. 16.39 lakhs.

A separate Directorate of Fisheries was created in 1955.

## THE PUNJAB

The present Punjab State comprises the former Punjab State and the former PEPSU State. Notes are separately given below about pre-reorganization Punjab and pre-reorganization PEPSU.

### PUNJAB

(Pre-reorganization)

**Kinds of fish caught:** Goonch (Bagarina), Boehwa (Chupisoma Garna), Silund (Siloma silondia), Mullae (Wallagonia attu), Nalakhli

(Heteroponustus fossilis), Singhari (Mystus aor), Khaga (Rita rita), Kalbons (Labeo calbasu), Bahu (Labeo Rohita), Gid (Labeo diplostomus), Bhangan (Labeo microphthalmus), Mori (Cirrhina mrigala), Sunni (Cirrhina raba), Thella (Catla Catla), Kharni (Barbus sarana), Mahseer (Barbus puitora), Chhliwa (Barilius modestus), Pari (Notopterus chitala), Saul (Ophicephalus Marulins), Daula (Ophicephalus punctatus).

Total quantity of fish caught in 1955-56: 5,769 maunds 5 seers 14 chh

Total value of fish caught in 1955-56: Rs. 52,727-14-0.

**Price level:** Prices vary from market to market. In some markets prices are fairly high. On the whole prices ranged for wholesale at as, 12 per seer; Retail at Rs. 1 per seer.

**Approximate strength of fishing population:** 15,000.

The demand for fish in the local market is very low, the population being mostly vegetarian.

After meeting the local demand the fish is exported to Delhi and U.P. where it finds a ready market.

There are no sea fisheries. There are no companies engaged in exploring and exploiting the fisheries of the State.

The catching and marketing of fish under the supervision of the departmental staff has been abandoned. The fishing rights in public waters are now regulated by means of public auction on yearly basis preference being given to organised fishermen's co-operative societies.

There are no facilities available for canning, storage and refrigeration. The party or the individual holding the contract for fishing rights of public waters in a particular district is bound to set up a fish sale shop at the district headquarters. Permits for export of fish outside the district are however issued by the Warden of Fisheries, Punjab, or by an officer specifically authorised by him in this behalf where the local consumption of fish is very low. No trawlers are used; only primitive methods of fishing by nets are used.

There is no school in this State for educating the fishermen and their children for improved and up-to-date methods of fishing.

Public museums and experimental farms in the State: Government Fish Farm, Batala (District Gurdaspur).

There are no industries for fish products in this State.

There are three organised Fishermen's Co-operative Societies functioning in this State. The fishermen are being persuaded to organise more such societies. In order to improve their socio-economic conditions, a scheme for the grant of interest-free loans to Fishermen's Co-operative Societies has been included in the Second Five-Year Plan so that the fishermen may be able to conduct their catching and marketing on co-operative basis and get the whole profit.

There are five schemes relating to Fisheries which have been included in the Second Five-Year Plan of the Integrated State of Punjab. Their details are as under:

Name of the Scheme.	Expenditure during the plan period (Rs. in thousands).
1. Scheme for the expansion of the development of fish by stocking with fish seed a large number of impounded waters.	261
2. Scheme for the provision of cold storage arrangements at three important fish consuming centres in the Punjab.	197

Name of the Scheme.	Expenditure during the plan period (Rs. in thousands).
3. Provision of a fish ladder in Ambala District	7
4. Scheme for the grant of interest-free loans to Fishermen's Co-operative Societies for co-operative marketing of fish.	60
5. Fisheries Development Scheme. (This is according to the plan of the erstwhile PEPSU State). Total amount provided in the Second Five-Year Plan for Fisheries Schemes.	600 1,125

**Revenue from Fisheries during 1955-56:** Rs. 106,708 (approximately).

**Budget allotment for the department (1956-57)** as a whole: Rs. 83 lakhs approximately including Rs. 3,15,400 for fisheries section.

Fisheries Department in the Punjab is attached to the Animal Husbandry Department under the control of the Head of the Department who is designated as Director, Animal Husbandry and Warden of Fisheries, Punjab.

### PEPSU

(Pre-reorganization)

Total quantity of fish caught from inland waters in the year ending August 31, 1956: about 6,000 md.

**Different varieties of fish caught:** Rohu (Labeo-Rohita), Thalla (Catla-Catla), Kalabans (Labeo-Calbasu), Mori (Cirrhina-Mrigala), Sol (Ophicephalus Manirulla), Singhari (Mystus-Aor), Daula (Ophicephalus-Gachua), Pari (Notopterus-Notopterus), Par (Notopterus-Chitala), Mully (Wallagonia-Attu), Khagga (Rita-rita).

**Average wholesale and retail price of fish at important towns of PEPSU.**

Name of Market	Kind of fish	Wholesale price per md.	Retail price per md.
Patiala	Carps and Cat fishes	Rs. 26	Rs. 55
Kapurthala		34	57

Fish is not an important item of diet in the region and about 50 per cent of the catch was exported to the neighbouring States in the year ending August 31, 1956.

There is a Fisheries Development Scheme for PEPSU area under the Second Five Year Plan and a sum of Rs. 6 lakhs has been allotted for its completion. During the plan period, it is proposed to construct three fish markets at Patiala, Kapurthala and Sangrur. The cost of each market will be Rs. 30,000. These markets are to be constructed during the year 1957-58 while in the year 1958-59 three cold storage plants will be installed in each fish market. A sum of Rs. 25,000 has been provided under the scheme for the supply of fishing requisites to Fishermen's Co-operative Societies at the rate of Rs. 5,000 per year. In addition to this 7 lakhs of Carp Fry will be stocked in ponds and tanks during the currency of the Plan. About 90 new tanks and ponds will be constructed for stocking purposes. It is also estimated that the fish production of the area will be increased from 6,000 md. to 10,000 md. at the completion of the Plan.

A few canals would be abandoned when perennial supply of water from Bhakra Canal commences. Possibilities of starting fisheries in such canals are great. Part of the canal from Doraia to Rohiti over a length of 60 miles is to be abandoned. A scheme has been drawn to use it for hatching fish. In addition, one mile of Choo Canal from Pavlana to Mallomagra is also to be abandoned. Series of bunds, one mile apart with inlets and outlets fitted with sluices, will be constructed to form one mile long tanks for Carp Culture.

## UTTAR PRADESH

### Kinds of freshwater fish caught :

**In plains :** (i) Major carps like Labeo Rohita, Labeo Catibau, Cirrhina Mirzala, Catla Catla, Labeo Gonius, (ii) Small carps, (iii) Minnows, (iv) Cat fishes, (v) Mullet, (vi) Spiny eels, (vii) Feather backs, (viii) Glass fishes.

**In hills :** (i) Kumaon Mahaseer, (ii) Hill Trout, (iii) Asela, (iv) Khurant, (v) Discognathus, (vi) Orelus.

The State also imported three exotic varieties of fishes, viz. Mirror Carp and Darjeeling Mahaseer for culture in Uttar Pradesh hills and Gourami for culture in the plains.

Total quantity of freshwater fish caught (1944) : 241,304 mds.

Total value of freshwater fish caught in 1954-55: The Department is concerned only with waters placed under its management. The value realised from such waters during 1956-56 was Rs. 2,74,890.

Price level of the fish during April 1955 to March 1956 :

Varities	Average wholesale price per maund	Average retail price per seer
	Rs.	Rs. a.
Rohu .. .. .	38	1 8
Nain .. .. .	37	1 6
Bhakur .. .. .	34	1 7
Calbose .. .. .	35	1 5
Parhin .. .. .	24	1 0
Tengan .. .. .	20	1 1

Approximate strength of the fishing population: Latest figures available are for 1944: about 10,695 families.

Facilities available for curing, storage and refrigeration, co-operative marketing: Generally fresh fish arrive in the markets and curing is rarely resorted to. Gorakhpur, Basti, Kanpur, Lucknow and Dehra Dun are some of the fish markets where there are some arrivals of dried and salted fish.

During the second Five-Year Plan stress is laid on inducing fishermen of the State to take up pisciculture as a cottage industry by organising them in co-operative societies. In order to release them from the clutches of the middlemen, provision has been made to assist 114 such parties during the plan period to give them grant-in-aid to the tune of Rs. 10,000 per party for purchase of modern fishing paraphernalia and improvement of their fishing areas, nursery ponds, stocking tanks, etc. The Department will also arrange to supply fish seed to these parties for stocking their tanks at a subsidised rate of Rs. 4 per 1,000. Besides, cold storage facilities at low rentals to preserve their produce will also be provided to fishermen by installing plants in the fish markets one each at Kanpur, Lucknow, Allahabad and Banaras.

Potential demand for fish in the local markets is such that a major portion of the fish production in the State is exported by the fish traders to more lucrative markets outside the State such as Calcutta, Delhi, etc. To satisfy the demand, the Tank Stocking and Development Scheme as part of Government of India's 'Grow More Food Campaign' was launched in the State in 1944-45.

It has been decided by the Government to restrict the departmental activities to large sheets of waters with no risk of driage and overflooding and easily accessible to the markets and to set aside the small village ponds for private enterprise.

Nearly 4,274 acres were stocked during 1955-56. Besides, the stocking of reservoirs, large sheets of water, viz. Pahuj (1,372 acres), Barwar (2,485 acres) in Jhansi, Kitham (840 acres) in Agra, Kandar Tal (375 acres) in Gomti, Nankuchla Tal (480 acres) and Bhim Tal (480 acres) in Nautal, Alwara Jheel (60 acres) in Allahabad, Kampur Narwi Jheel (100 acres) in Kanpur, Darogun Jheel (220 acres) in Etah, Rata Dabri (50 acres) in Shahjahanpur, Chauki Jheel (50 acres), Chandapur Jheel (50 acres) and Ramya Bihar (200 acres) in Kheri was also undertaken.

Government effort in up-to-date fishing technique, money spent, trawlers, gears used, quantity of fish caught: A provision of Rs. 20,000 was made in the budget allotment of 1955-56 to further equip each of the five circles in the State with adequate fishing paraphernalia. A fishing vessel at a value of \$2,879 has also been imported for use in fishing of the canal reservoirs at Jhansi. Eradication of aquatic vegetation both emergent and submerged, is receiving active attention of the department and the results so far achieved are satisfactory.

Government effort in educating fishermen: Training is imparted in the State at Banaras.

Public museums, aquaria, experimental farms in the State: A small museum exists in the Central Fisheries Research Laboratory, Badshahbagh, Lucknow where all possible fish species available in the State have been displayed. An aquarium room in the Laboratory is also being fitted up.

There are two Government experimental farms in the State—one at Bhowali, District Naini Tal, where an exotic fish, viz. Mirror Carp is kept for breeding and the other is at Mirzapur where problems which confront the growth of fishes in land-locked waters are studied.

Schemes under first Plan: (i) Research Fish Farm, Mirzapur; (ii) Revival or permanent posts of Fish Marketing Officer and Fisheries Inspectors of Lucknow Circle; (iii) Replacement of vehicles for Fisheries Section; (iv) Rentals for fry and fingerlings collection; (v) Construction of special transportation tanks for road and air transport of fry and fingerlings to reduce mortality; (vi) Development of Fisheries in Canal Reservoirs.

Schemes under the second Five Year Plan: (i) Establishment of Fisheries Co-ordination and Supervision Section at the Headquarters of Director of Animal Husbandry, U.P., (ii) Intensification of piscicultural activities with a view to augmenting fish production, (iii) Establishment of five demonstration farms with requisite nurseries, (iv) Rentals of nurseries for rearing fry and fingerlings, (v) Improvement of fish nurseries and renovation of two trout hatcheries in U.P. hills, (vi) Improvement and maintenance of tanks, (vii) Help to fishermen co-operatives and private pisciculturists, (viii) Extension and development of fisheries in Tarni State Farm, (ix) Provision of cold storage facilities in the fish markets at Kanpur, Lucknow, Allahabad and Banaras.

Revenue from Fisheries during 1955-56: Rs. 2,74,890.

Latest budget allotment for the Department (1955-56) :

	Rs.
(a) Direction .. .. .	36,400
(b) Research .. .. .	95,700
(c) Development and Stocking—	
(i) Scheme qualifying for Central subsidy .. .. .	2,73,700
(ii) Scheme not qualifying for Central subsidy .. .. .	1,51,000
(d) Works .. .. .	10,000
Total .. .. .	5,66,800

The designation of the Fisheries Department: Department of Animal Husbandry and Fisheries, Uttar Pradesh, Lucknow.

## WEST BENGAL

Kinds of sea fish caught: Pomfret, Bhetki, Mackerel, Prawn, Topsi, Hilsa, Chanda, Bhola, Bombay Duck, Kibbon, Shark, Rayr, Skate, Eel, Cat fish, Phasor, etc.

Total quantity of sea fish caught in 1955-56: 11,558 mds.

Total value of the sea fish caught in 1955-56: Rs. 2,05,562.

Price per maund of different kinds of fish in March 1956 :

Varities	Maxi-mum	Mini-mum	Average
	Rs.	Rs.	Rs. a. p.
Carps .. .. .	110	45	76 6 3
Hilsa .. .. .	70	40	51 10 0
Bhetki .. .. .	110	60	84 13 0
Mullets .. .. .	100	55	76 15 0
Butter .. .. .	95	20	54 5 6
Lobster .. .. .	115	60	87 5 9
Shrimp .. .. .	85	10	48 11 0

Approximate strength of the fishing population: 96,400 (1951).

Potential demand for fish in the local market: In West Bengal (27,647 mds.); In Calcutta (5,561 mds.).

Extent to which production meets this demand: Seven per cent.

Money spent by Government in connection with fishing in 1955-56: Rs. 2,35,000.

Gears used: Haddock trawl, Prawn trawl, Herring trawl, etc., all made of cotton twines.

There is one experimental fish farm in sewage fed water maintained by the State Government. There are demonstration fish farms in private parties' tanks in each Thana of the State.

Ancillary industries like liver oil, gelatin, glue, fish-meal, and their production: One Scheme for production of shark liver oil, fish-meal, processed fish and utilisation of other fish by-products is operated at Contal coast.

Production during 1955-1956 :

Shark liver oil—10,921 lb.; Fish-meal—29,866 lb.; Dry fish—640 lb.; Fresh fish—3,049 lb.

Approximate Revenue from fisheries during 1955-56: Rs. 3,03,700.

Budget allotment for the Department for 1956-57: Rs. 31,84,000.

The designation of the Fisheries Department: Directorate of Fisheries, West Bengal under the administrative control of Fisheries Department and Development Department, the latter controlling the sea fishing scheme only.

## IRRIGATION

**T**HE area under irrigation in India is about 56 million acres and is the largest irrigated area in any country of the world.

The total capacity of India's canals is over 220,000 cusecs, and the canals are over 67,000 miles in length.

The total amount of annual flow of water in the Indian Union is 1,356 million acre feet. Of this only 76 million acre feet or 5.6 per cent are at present being used for irrigation purposes.

The following are some of the more important new projects under construction: Bhakra-Nangal Project (Punjab), Damodar Valley Project (Bihar and West Bengal), Hirakud Dam Project (Orissa), Tungabhadra Project (Andhra, Mysore), Gangapur Storage Project (Bombay), Kakrapar Project (Bombay), Godavary Project, Stage I (Andhra), Ghatprabha Valley Project, Stage I, Left Bank Canal (Mysore), Kosi Project (Bihar), Koyana Hydro-electric Project (Bombay), Rihand Dam (U.P.), Nagarjuna Sagar Project (Andhra), Chambal Project, Stage I (Madhya Pradesh and Rajasthan).

The following are the different measures, which are envisaged and the extent to which, on the first estimates which have been framed, additional production may be secured from each of them.

	Area (Acres).	Additional Production (Tons).
Major Irrigation Projects .. ..	8,500,000	2,272,000
Minor Irrigation Schemes .. ..	7,621,000	1,932,000
Land Improvement & Reclamation Scheme .. ..	7,405,000	1,524,000
Manure and Fertilizer Schemes, Seed Distribution Schemes, other Sources .. ..	..	1,474,000

The table below shows the expenditure (in Rs. lakhs) on irrigation, power and multi-purpose projects for the years 1951 to 1954:

	Expenditure	Provision under First Plan
1951-52 (actual)	81.71	85.00
1952-53 (actual)	97.79	1.21,00
1953-54 (revised)	1,20.59	1.27,00
1954-55 (budget)	1,67.51	1.07,00

Classing a year in which the deficiency is 25 per cent. as a dry year and one in which it is 40 per cent. as a year of severe drought the examination of past statistics shows that, over the precarious area, one year in five may be expected to be a dry year and one in ten a year of severe drought. It is largely in order to remove the menace of these years that the great irrigation systems in parts of the country have been constructed.

In the arid tracts where the annual rainfall is less than 15 inches, no cultivation is normally possible without irrigation.

In India today we have a vast network of canals in Uttar Pradesh, the Punjab, the deltaic area of Madras and some parts of Bihar. There are about 120 high dams distributed mainly in Bombay, Uttar Pradesh, Madhya Pradesh and southern India. It is interesting to note that the number of all storage works mainly earthen

works, big or small, exceeds, 35,000 in Madras and 25,000 in Mysore State.

### PROJECTS

Two hundred and twenty-nine schemes costing Rs. 720 crores were included in the First Five Year Plan. Good progress has been made on these schemes and a good number of them have been completed, the total expenditure incurred to the end of the First Five Year Plan being about Rs. 420 crores. These projects were expected to bring under irrigation an area of 6.3 million acres by March 1956, and are expected to irrigate 22.28 million acres on full development.

In the Second Five Year Plan, about 200 schemes costing about Rs 410 crores will be taken up. These are expected to irrigate about 14.5 million acres of land on full development.

A provision of Rs 486 crores has been made in the Second Plan for irrigation and flood control.

The projects are mostly being executed by the State Governments.

The most important of these under actual construction include:—

**Bhakra-Nangal Project (Punjab):** The Bhakra-Nangal project in the Punjab comprises two big dams—The Bhakra Dam and the Nangal Dam—a vast network of canals, four power houses and a large number of transmission lines with scores of sub-stations.

The project is expected to irrigate over nine million acres and build up a power potential of 594,000 kW. The States that will benefit are the Punjab, Rajasthan, Himachal Pradesh and Delhi. According to estimates made in 1956 the project is estimated to cost Rs. 174 crores, and will be completed some time in 1960. According to the estimates made in 1948 it was to cost Rs 75 crores.

The project will irrigate 4.8 mln. acres in the Punjab, and nine lakh acres in Rajasthan. It will also improve irrigation in another 3.5 mln. acres.

The Nangal Dam, the Canal Regulator, the Nangal Hydel Channel, two power houses Ganguwal and Kotla, and the Bhakra canals have been completed.

The Ganguwal Power House with a capacity of 48,000 kW was opened on 2nd Jan 1955. The Kotla Power House also with a capacity of 48,000 kW was opened on 9th June 1956.

The increase in foodgrains as a result of the extra irrigation facilities is expected to be 1.13 million tons a year. Other gains will be cotton 8 lakh tons, sugarcane 5 lakh tons, pulses and oilseeds one lakh tons.

The Bhakra-Nangal is the biggest of the multi-purpose projects in India.

Some details are given below:

The principal feature of the project is the construction of a dam about 700 feet high on the river Sutlej near the village of Bhakra about 50 miles upstream of Rupar Town in the Ambala District. The total storage capacity of the reservoir is estimated to be 7.40 million acre feet, of which 5.7 million acre feet will be available for use. The reservoir will extend to about 56 miles above the dam.

The dam will be of the straight gravity type in concrete.

**Bhakra Dam:** Height 700 feet; Length at bottom 325 feet; Width at top 30 feet; Length at top 1,700 feet; Width of dam at bottom including apron 670 feet; Width at bottom including apron and heel claystone 1,310 feet. **Bhakra Reservoir:** Total storage capacity 7.4 million acre feet; Live storage capacity 5.72 million acre feet; Length of reservoir 56 miles; Area submerged 42,500 acres; Population to be displaced 30,000; No. of villages to be submerged or partly submerged 366; Total quantity of excavation for dam and appurtenant works

5.16 million cubic yard; Total quantity of excavation for construction plant 2.25 million cubic yard; Total quantity of concrete for Dam and appurtenant works 5.11 million cubic yard; Cost of Dam Rs. 626.8 million.

During the construction of the dam, the waters of the Sutlej are being diverted through two 50-foot diameter tunnels, one on each side. The length of the two tunnels is about one mile. Cofferdams upstream and downstream of the working area have been completed and the river has been diverted through the tunnels.

About eight miles downstream of Bhakra Dam site, Nangal Dam on the river Sutlej has been completed.

**Nangal Dam:** Height 95 feet; No. of bays 26 of 30 feet span each; Distance between abutments 955 feet; Nangal-Bhakra Canal System; Length of Main Line and Branches 690 miles; Length of Distributaries 2,100 miles.

This dam will serve firstly to divert the requisite supplies from the river for the Nangal Hydel Canal, secondly to provide storage to smoothen the fluctuations in supplies due to load variations in Bhakra Power Plant. The Nangal Canal will take off from the left bank of the river Sutlej at Nangal Headworks. It will be a lined canal about 40 miles long with a maximum capacity of about 14,500 cusecs, for the first 9,700 feet of its length and 12,000 cusecs thereafter.

The Bhakra Canal system, which was inaugurated by the Prime Minister on July 8, 1954, consists of 690 miles of Main Canals and Branches and 2,100 miles distributaries. The Nangal Hydel Canal, passes through a sub-mountainous terrain full of deep ravines and hill torrents. The work on it involved construction of 58 cross drainages and 34 bridges. It is lined with concrete and tiles throughout its length of 40 miles and has cost Rs. 11 crores.

The Bhakra electricity transmission system would consist of 2,267 miles of high tension lines ranging from 33 K.V.s to 220 K.V.s. Apart from this, there will be 800 miles of 11 K.V. lines. Greater stress would be laid on rural electrification as it would step up agricultural production by energising tube-wells.

Full benefits of the Project will be available on its completion in 1960. However, schedules have been so arranged as to bring some measure of these benefits as each step of construction is completed. Kharif irrigation was provided to over 3 lakh acres in the Punjab with effect from July 1954; 24,000 kW. of additional electricity became available with the commissioning of the Ganguwal Power House in January 1955.

Up to 1955 March Rs 8,829 lakhs were spent on the Bhakra-Nangal project.

**Damodar Valley Project (Bihar and West Bengal).—**The Damodar Valley Project which is one of the most important multi-purpose schemes and is to benefit the States of Bihar and West Bengal, has as its main features the construction of (a) Multi-purpose storage dams with hydro-electric plants, (b) an irrigation project with a network of irrigation canals and distribution measuring 1,465 miles, (c) an 85 miles long irrigation-navigation canal, (d) a power transmission grid and (e) thermal power stations to supplement the hydro power.

The ultimate benefits that will accrue from this scheme include (a) effective flood control of the Damodar River, (b) perennial irrigation of 10,26,762 acres including 185,000 acres now irrigated in the kharif season and 300,000 acres in the rabi season resulting in an additional yield of rice and rabi crop valued at Rs. 23 crores a year, (c) the generating of 479,000 kW. of electric power, which will promote the growth of industry, lead to the electrification of railways, etc., (d) cheap transport facilities through the navigation canal (e) annual traffic through

the canal of coal, paddy, etc. to the extent of nearly 2 million tons and (f) efficient drainage of about 700 sq. miles of water-logged area in the lower valley in W. Bengal.

Of the electric power generated 375,000 kW will be thermal and 104,000 kW will be hydro-electric.

The estimated cost of the scheme is Rs. 95.28 crores. The construction of some of the dams was started in 1948 and others in 1949.

The Project as included in the original plan comprises (1) a thermal power station of 150,000 kW capacity at Bokaro, 7 miles by road from the Bermo railway station, in the district of Hazaribagh, Bihar, (2) Tilaiya dam with a power station of 40,000 kW in the same district, 14 miles south of Kodarma railway station on the Grand Chord line of the Eastern Railway, (3) the Konar dam, 24 miles from Hazaribagh, (4) the Malihon dam with a power station of 60,000 kW in the district of Manbhum (Bihar), 3 miles from Kumardhul railway station in the Grand Chord line, (5) the Panchet Hill dam with a power station of 40,000 kW in the district of Manbhum (Bihar), about 13 miles south of Malihon, (6) the Durgapur Barrage and Canals in the district of Burdwan (West Bengal) and (7) the transmission line system.

The construction of the first dam was started in 1948.

The Bokaro Thermal Power Station was commissioned in 1953 with an installed capacity of 150,000 kW and will ultimately have a capacity of 225,000 kW.

The Tilaiya Hydro Station was put into commercial operation in February 1953, with two 2,000 kW sets. Work on the transmission system is actively in progress and 430 miles of 132 kV (out of a total of 720 route-miles) and 91 miles of 33 kV lines with most of their associated sub-stations have been completed.

The Konar Dam in the district of Hazaribagh was completed in 1954 and was formally opened by the Prime Minister of India on October 15, 1955.

The Malihon Dam on the Barakar River is one of the two key dams on which flood control and irrigation in the lower Damodar Valley will largely depend. This dam is nearly complete and construction of attached power station is now in progress.

Work on the Panchet Hill Dam has been completed to the extent of about 50 per cent of the earth dam and about 48 per cent of the concrete dam.

The Durgapur Barrage has been completed and was opened by the Vice-President of India on August 9, 1955. Through some reaches of the completed canals, irrigation water was made available for an area of one lakh acres during 1955-56 and 1.6 lakh acres during 1956-57. The work on the remaining canals is in progress.

As the next stage of development, work has been started on (1) expansion of the Bokaro Thermal Power Station by the addition of a 75,000 kW generating set, thus raising the ultimate capacity of generation to 225,000 kW, (2) the construction of a second Thermal Station at Oyaris near Durgapur in the district of Burdwan (West Bengal) and (3) the necessary strengthening of the transmission system.

These extension works are programmed to be completed in time to meet the additional demands for power and new industrial development, such as, the expansion of the steel industry, undertaken by the Government as a part of the Second Five Year Plan.

The estimated cost of the project excluding the new schemes to be taken up during the period of the Second Five Year Plan is Rs. 108.88 crores. The aggregate expenditure on the various projects upto the end of August 1956 works out to Rs. 89.36 crores.

#### Budget for 1956-57.

Original estimates	Rs. 16.38 crores.
Revised estimates	Rs. 16.48 crores.

It may be mentioned here that the Damodar Valley Corporation Act was passed in March 1948, and the Corporation itself came into existence on July 7, 1948.

The whole project was originally divided into two phases. A description of the first phase is already given.

Four other dams at Balpahari, Bokaro, Aliyar and Bermo with hydro-electric stations, forming part of the original programme, have been deferred to a later date till the needs of flood control, power generation and water supply justify these additional works.

Extensive land reclamation, soil conservation, rehabilitation of displaced persons, malaria control, promotion of small-scale industries and development of fisheries are some of the miscellaneous activities of the DVC.

The manner in which the costs are shared among the participating Governments is as follows:

The total amount of capital allocated to irrigation is shared between the State Governments of West Bengal and Bihar in the following way:

- (i) The Government concerned is responsible for the capital cost of the works constructed exclusively for irrigation in its province;
- (ii) the balance of the capital cost under irrigation for both the States of West Bengal and Bihar is shared by the State Governments in proportion to their guaranteed annual off-takes of water for agricultural purposes.

The expenditure allocated to power is shared equally by the three participating Governments. (The Central Government, West Bengal, Bihar).

The share of expenditure allocable to flood control is equally divided between the Centre and West Bengal up to Rs. 14 crores, and any amount in excess thereof is the liability of the Government of West Bengal.

It may be added here that the reorganisation of the States of Bihar and West Bengal does not involve any change in the irrigable areas in these States. In regard to power also, no appreciable change is involved as the benefit from the DVC power system will be shared almost equally by the States of Bihar and West Bengal.

**Gangapur Storage Project (Bombay).—**This Project comprises a 12,500 foot earthen dam with a reservoir of 126,500 acre feet capacity on the river Godavari at Gangapur in Nasik District. This will supplement the existing supplies to the Godavari Canals and also provide water supply to Nasik City.

It is also proposed to harness falls below the dam, if possible, for generation of power. The work on the project is in hand and is expected to be completed by 1957-58. The additional area to be brought under irrigation is 45,000 acres and the increase in food production will be 7,500 tons. The estimated cost of the project is Rs. 396 lakhs.

**Ghataprabha Left Bank Canal Project (Mysore).—**The Project involves the construction of the Left Bank Canal 44 miles long, taking off from an existing pick up weir across the Ghataprabha at Dhurdhal. The canal system will command an area of 250,000 acres in Belgaum and Bijapur districts of Mysore State, and the scheme on completion is expected to irrigate an area of 100,000 acres.

The total cost of the Left Bank Canal Scheme has been estimated at Rs. 5.45 crores. Irrigation over the first 32 miles has already started, and the Project was expected to be completed by the middle of 1956.

**Godavari Project, Stage I (Andhra).—**The first phase of the Godavari Project involves the construction of the Kaddam dam, 5,495 feet long across the river Kaddam a tributary of the Godavari, and 48 miles of canal from the dam. This Project will irrigate 67,000 acres in the Adilabad District. The Project is estimated to cost Rs. 441.0 lakhs. The scheme is expected to be completed by 1957 and it is programmed to irrigate 25,000 acres in 1955-56.

**Harikie Barrage.**—Work on the Harikie Barrage has been completed. The Ferozepur Feeder has also been completed. Work on the Bakhu Canal is nearing completion. The expenditure in the first four years of the Plan was estimated to be Rs. 4.92 crores.

**Hirakud Dam Project (Orissa).—**The Hirakud project was formally opened by the Prime Minister on 13th Jan. 1957. Water from the dam now completed flowed into the Baragarh Canal, the central arterial canal, in July 1956 and water was available for irrigation in Sept. 1956.

By April 1957 it is expected that the project will irrigate 672,000 acres of land in Sambalpur and Bolangir Districts, and 1,867,000 acres in Cuttack and Puri Districts.

The main power house with four generating units was also ready for operation in the middle of January 1957. This made available 118,155 kW of power.

Upto March 1956 Rs. 54 crores had been spent on the project. The revised estimates for Stage I are Rs. 70.78 crores.

The project was started in 1948. The full project envisages the construction of three dams and two power houses, the first at the dam sight (already in operation) and the second at Chilplim, sixteen miles below the Hirakud Dam.

The full project is designed to irrigate 2.5 mln. acres of land and provide ultimately 232,500 kW of electric power. The second stage of the project is expected to be completed by 1960.

The power will be utilized in the northern part of the State in the following Districts: Sambalpur, Sundargarh, Keonjhar, Mayurbhanj, Dhenkanal, Cuttack, Puri, Bolangir and Kalahandi.

More details are given below.

The Hirakud Dam which is now complete is three miles in length and is located at Hirakud near Sambalpur across the main channel of the River Mahanadi. There are also 13 miles of low dykes on the two sides.

The dam is a concrete-cum-masonry-cum earth dam. The maximum height of the concrete dam is about 200 ft. of the earth dam 195 ft.

The reservoir created by the dam and dykes will have a capacity of 6.6 million acre ft. of water covering an area of 288 sq. miles. Three flow canals (one from the right dyke and two from the left) will irrigate 6.72 lakh acres in the districts of Sambalpur and Bolangir-Patina. The length of the main canals will be 92 miles with 460 miles of distributaries and minors, and 9,500 miles of water courses.

The power from the project will be utilised for giving power not only to the various towns but also to rural areas for which purpose a large system of 33 and 11 K.V. lines are being constructed; power will also be given for small industries and for pumping of water for irrigation.

The total estimated cost of the Hirakud Power Utilisation Scheme is Rs. 155.85 lakhs. This does not include the cost of Hydro-Electric works and machinery at Hirakud Dam and also the transmission of energy at 132 K.V. and 66 K.V.

As already mentioned, the whole project has three stages. The first stage consists of the main dam (so-called Hirakud Dam) with its power house for 123,000 kW installed capacity and canal systems at either flank. This stage is complete. The second stage consists of the Chilplima power scheme to develop 72,000 kW,

sixteen miles below the main dam and a 37,500 kW unit at the main power house. This is expected to be completed in 1960. The third stage aims at the construction of a weir across the Mahanadi above Naraj with canal systems in Puri and Cuttack districts.

The immediate benefit from the completion of the first stage will be an additional quantity of 5.6 lakh tons of foodgrains and 2.4 lakh tons of other commodities.

Ultimately the whole of the protected area in the Mahanadi delta will be immune to flooding, the new embankments will provide means of communication for many villages and improve navigation on the existing canals.

**Kakrapar Weir and Canals Project (Bombay).**—This Project has been taken up by the C.W.I.N.C. on behalf of the Government of Bombay and was inaugurated on November 1, 1949. It was handed over to the Bombay Government in June 1954.

The project is proposed to be developed in two stages. The weir across the Tapi about 2,038 feet long and 45 feet high above the deepest river bed was completed in the middle of 1953. Canals which aggregate 850 miles are intended to irrigate 6.5 lakh acres of land in the Surat District, increasing food production by 1.6 lakh tons and cotton by 18,000 tons. Work on the left bank canal and the main tributaries was completed in 1956 April and about 30,000 acres in south Surat became open to irrigation.

The project will cost about Rs. 11 crores.

It is also proposed to construct a storage dam at Ukai, 18 miles upstream of Kakrapar.

In stage II the height of the dam will be raised for increasing the gross storage capacity to 3.55 million acre feet.

There will be two power houses, one at the dam site and the other at the end of a 18 mile power canal with a total installed capacity of 200,000 kW. The firm power available at 60 per cent load factor will be 133,000 kW. There will be in addition high level canals commanding a gross area of 100,000 acres.

Stage II will cost Rs. 31 crores and is expected to be completed by 1956-57. The scheme will ensure partial flood control of the river.

**Lower Bhavani Project (Madras).**—This involved the construction of a dam, 208 feet high and 1,520 feet long with earthen flanks across the river Bhavani, a tributary of the Cavery. The site is at Sathyamangalam, about 20 miles from the Mettupalayam railway station. A canal on the right side, 124 miles long, irrigates about 207,000 acres of cotton, cholam and rice crops in Coimbatore District.

The cost of the scheme was Rs. 9.4 crores. A start on the construction was made in 1949 and it is now completed. Water has been allowed in the canal to irrigate 167,000 acres from September 1955.

About 10,000 kW of seasonal power is also obtained.

**Mayurakshi Reservoir Project (West Bengal).**—This project involved the construction of a low masonry dam at Messanjore in Bihar, 123 feet high to store 0.5 million acre feet of water, a weir at Tilpara and a canal system extending over 1,240 square miles on both sides of the river Mayurakshi.

The scheme brings under irrigation an area of 595,000 acres for kharif and 120,000 for rabi crops. In addition 4,000 kW hydro-power is also generated. The estimated cost of the scheme was Rs. 16.11 crores. The project is now completed. The Messanjore Dam which is named Canada Dam was opened on November 1, 1956.

**Tungabhadra Project (Andhra, Mysore).**—This Project was originally sanctioned by the Governments of Madras and Hyderabad which had territorial jurisdiction over this area at that time, primarily as a famine relief measure. Work on the Project was commenced in 1945 by the Governments of these two States.

It is now being executed by the Governments of Andhra Pradesh and Mysore States which have become successors to the Governments of Madras

and Hyderabad in respect of this area on account of the re-organisation of States in India.

The Government of Mysore is solely in charge of the execution of the Project on the northern side of the Tungabhadra River.

On the southern side the Tungabhadra Board constituted under the directive of the President of the Indian Union, is in charge of all common works relating to Mysore State and Andhra Pradesh, and the respective States are in charge of other works in which only the concerned States are interested.

The Tungabhadra Reservoir is 146 square miles in extent and has a capacity of nearly 3.1 million acre feet at the full Reservoir level of plus 1633.

The Tungabhadra Dam across the river Tungabhadra at Mallapuram in Bellary District (Mysore) is 7,942 feet long and 160 feet high at the deepest foundation. There is only one canal on the northern side. This is expected to irrigate about 5,80,000 acres in Mysore State.

There are two canals on the southern side of the river—the Low Level Canal and the High Level Canal.

The former has already been executed and the latter is now under construction.

The area irrigated on the southern side is as follows: From the Low Level Canal, Andhra 1,57,000 acres and Mysore 92,000 acres. From the High Level Canal (it is calculated) Andhra 2,53,500 acres, Mysore 1,36,500 acres.

The areas irrigated from the Low Level Canal in Mysore are in Bellary, and in Andhra in Kurnool. The areas irrigated from the High Level Canal in Mysore are in Bellary, and in Andhra in Kurnool, Anantapur and Cuddapah.

Only areas in Mysore are irrigated by the Northern Canal and these are in Raichur Dt.

When completed, the Hydro Electric Scheme on the southern side will consist of 2 Power Houses with 4 Generators, each of 9,000 kW capacity making an aggregate of 72,000 kW. The first station is near the Dam and the second about 13 miles along Canal.

The first generator at the Dam Power House was commissioned in December, 1956. The Second Generator at the Dam Power House, and the first and second generators at the Canal Power House were expected to be commissioned in April 1957.

The balance of four generators in the two Power Houses will be installed later.

On the northern side of the Project, it is initially proposed to have one Power House near the Dam with 4 Generators of 9,000 kW capacity each. It is also proposed to develop later Power Houses along the Canal.

The expenditure on the northern side of the river will be borne solely by the Government of Mysore.

The expenditure on the southern side for the works executed by the Tungabhadra Board, will be shared between the Governments of Andhra Pradesh and Mysore State in the following ratio.

	ANDHRA PRADESH.	MYNORE STATE.
Headworks and Low Level Canal.	5	4
High Level Canal.	65	85
Hydro Electric Scheme	80	20

The expenditure on the works which are being executed by the Board is as indicated below:

Headworks and Low Level Canal: Rs. 21.5 Crores. Hydro Electric Scheme: Rs. 7.5 Crores. High Level Canal: Rs. 10 Crores (Approx.).

The Tungabhadra Dam proper was completed early in 1953 except for the installation of split-way gates in outflow section which work was nearing completion early in 1957.

The water for irrigation on the northern side Canal, and on the Low Level Canal on the southern side has been supplied from 1st July, 1953.

Work on the northern side Canal in its length of 125 miles is in progress, about 50% of the work having been completed; the balance is expected to be completed by 1959.

Work on the Low Level Canal with entire length of 223 miles, is as already mentioned fully completed.

Work on the Power Houses on the southern side is in progress and will be completed before the first half of 1957. The transmission system on the northern side is completed, while work has commenced on the construction of the Power House at dam-site.

Work on the High Level Canal was expected to be started early in 1957.

The Dam will help in raising food production by 140,000 tons.

**Kosi Project (Bihar).**—The Kosi project envisages the construction of a dam of the unprecedented height of 785 feet above rock foundations on the Kosi River, a mile upstream of Barakhshetra temple in Nepal where the Kosi leaves the hills, for flood control, power, irrigation, navigation, soil conservation, silt control, fish culture and recreation, etc. The total scheme was to cost Rs. 177 crores.

The present scheme estimated to cost Rs. 45.95 crores was prepared by the Central Water & Power Commission in November 1953. It consists of a barrage in Nepal, three miles above Hanumanagar, two flood embankments on either side of the river, both upstream and downstream of the barrage, training of the river by spurs and dredging wherever required, works to divert 75,000 cusecs of flood water into old courses of the Kosi, and an eastern Kosi canal to irrigate annually an area of 13.97 lakh acres, and a western canal to irrigate 29,000 acres in Nepal.

There is a proposal for power development of 21,000 kW but this is not finally approved.

The schemes were considered by an *ad hoc* Technical Advisory Committee which recommended execution of the project. The work is to be implemented by the Government of Bihar. The Central Government will render necessary technical assistance.

The work on the embankment which was done by the local villagers and the Bharat Sewak Samaj was completed upto about 60 per cent towards the end of 1956.

**Koyna Hydro-electric Project (Bombay).**—The Koyna Project contemplates the construction of a dam across the Koyna River at Jalkwadi near Helwak in North Satara Dt. The scheme is ultimately capable of generating 580,000 kW of firm power at about 75 per cent load factor. The scheme is estimated to cost Rs. 92 crores.

In the first stage four units of 60,000 kW will be erected at a cost of Rs. 33.32 crores.

The dam will be 208 ft. to start with. Later it will be raised to 268 ft. The power house will be built under-ground on the western slope of the ghats.

The project was part of the First Five-Year Plan, and generation of power is expected to start in October, 1960.

**Rihand (Pipri) Dam and Power Station Project (Uttar Pradesh).**—This Project is proposed to impound 8.6 million acre feet of water by a 296 feet high dam across the river Rihand, a tributary of the Son, near the village of Pipri in Mirzapur Dt. The power house will have an installed capacity of 250,000 kW and it will also bring under irrigation about 14 lakh acres of land in U.P. and about 5 lakh acres in Bihar.

The estimated cost of the scheme including transmission and transformation, is about Rs. 45.27 crores.

The project is under construction and is expected to be completed in 1961.

**Nagarjuna Sagar Project (Andhra).**—The project in its first stage comprises the construction of a masonry dam 302 feet high above the foundation level, across the Krishna river near Nandikonda about 90

miles below Siddeswaram, and two canals taking off from the reservoir, known as the left and the right bank canals. The dam is situated about ten miles from Machera railway station. Large areas extending between the Krishna and the Godavari in the north and the Krishna and the Pennar in the south can be commanded by the reservoir.

The right bank canal which will be 140 miles long will carry a discharge of 14,000 cusecs in the first stage. The left Bank Canal will be 108 miles long and will lead up to the river Muneru in the first stage.

Work was started in Dec. 1956, and the project will take nine years to complete.

The cost of the first Stage of the project, namely, construction of the dam and the two canals is estimated to be about Rs. 88.18 crores. The present scheme which forms the first Stage of the project will irrigate about 23.6 lakh acres of land spread over the districts of Guntur, Kurnool, Nellore, Warangal and Nalgonda.

The first stage will irrigate about 23.6 lakh acres, and the full scheme about 34.02 lakh acres.

The second Stage of the project which will be taken up later on will provide for the generation of electric power of 75,000 kW capacity.

#### Chambal Project, Stage I (Madhya Pradesh and Rajasthan).

The full development consists of:—

- Three dams across the Chambal River with a power-station at each dam site.
- High tension transmission lines for power transmission to various sub-stations in Madhya Pradesh and Rajasthan.
- A barrage across the river near Kota city to divert the water from the storage and power dams into irrigation canals.

- A network of irrigation channels on either bank of river fed from the Kota barrage.

The original estimated cost of the whole scheme was Rs. 73.40 crores and the scheme was expected to generate 2,10,000 kW. of hydro-electric power, and irrigate 14 lakh acres of land annually in Madhya Pradesh and Rajasthan.

The scheme was proposed to be taken up in three stages, keeping in view the immediate demand for irrigation and a gradual development of power demand. The details of the stages are as under:—

#### STAGE I.

- The construction of the Gandhisagar Dam in Madhya Pradesh with a power station capable of generating 75,000 kW of hydro-electric power at 60% load factor, and 540 miles of transmission system for transmitting this power.
- The construction of a Barrage above Kota City with irrigation channels to serve the proposed area of 14 lakh acres.

This stage is estimated to cost Rs. 49.49 crores, but the estimate is under revision.

The works are already in progress and are expected to be completed by 1962-63.

The works are so planned as to enable irrigation to start in 1959-60 and to reach the designed figure of 11 lakh acres in 1964-65 from the storage of Gandhisagar.

#### STAGE II.

- Construction of the Rana Pratap Sagar Dam and a power-station below it to generate 90,000 kW. of power at 60% load factor, and suitable extension of transmission lines and sub-stations at an estimated cost of Rs. 17.66 crores.

These works are expected to be started in 1957-58 and completed in 1963-64. This will enable irrigation of a further 3 lakh acres in addition to the generation of extra power.

#### STAGE III.

This caters for a further development of hydro-electric power by building the Kota Dam about 10 miles up-stream of the Kota Barrage with a power station to generate 45,000 kW of power at 60% load factor, and a further extension of transmission lines, etc., at an estimated cost of about Rs. 10 crores. Details are yet to be finalised.

Some details are given about the projects in the first stage.

The Gandhisagar dam, the foundation of which has been laid, is located about 19 miles north-west of Ahanpura near the Madhya Pradesh-Rajasthan boundary. The nearest railway station is Jhalawar Road on the Bombay-Delhi line of the Western Railway. The maximum height is 207 ft. The length of the dam is 1,680 ft. with a gross storage capacity of 6.85 M.A. ft. The dam is of stone masonry in red cement mortar and cement concrete around openings.

The Gandhisagar Power Station will have four units of 23,000 kW with a provision for a sixth unit at a later stage. The power generated will be 45,000 kW at 100 per cent load factor, and 75,000 kW at 60 per cent load factor.

The Kota Barrage will stand half a mile up-stream of Kota city. It will be 120 ft. high and its structure will be earthen in the pool portion and masonry dam on the left flank. The length of the dam at the top will be 1,970 ft. It will irrigate 11 lakh acres. The length of the right main canal will be 235.4 miles and of the left 1.75 miles.

#### Progress of Multi-Purpose Projects

Project	Progress of Expenditure (Rs. lakhs)					Irrigated (Additional) ('000 acres)		
	1951-52	1952-53	1953-54	1954-55	1951-55	1951-56 Plan	1951-55 Achievement	Five years (Target)
Bhakra-Nangal . . . . .	987	1,884	2,983	2,975	8,829	707	499	1,361
Damodar Valley Project . . . . .	1,258	1,488	1,443	1,624	5,813	135	100	595
Hirakud . . . . .	863	715	812	1,200	3,590	..	..	261
Additional Provision for Revised Estimates . . . . .	..	..	..	..	5,000	..	..	..
New Projects . . . . .	37	48	67	850	1,002	..	..	..

† Includes Harike.

#### MINOR IRRIGATION

During the first plan period the Central Government sanctioned 72 crores of rupees for minor irrigation schemes such as the construction and repairs of wells and tanks, the installation of pumps and the construction and improvements of dams and channels, out of which the State Governments utilised Rs. 32.45 crores during the first four years of the Plan.

As a result of the schemes executed during the First Five-Year Plan, about 9.4 million acres have been or are being brought under irrigation against the five-year programme of 11.2 million acres.

Details of benefits accruing from the various irrigation schemes are outlined in the following table (figures in million acres):—

Name of scheme	Target for five years.	Achievement (1951-56).
Construction & repair of wells . . . . .	1.65	0.90
G. M. F. Tubewells . . . . .	0.66	0.63
Special Tubewells . . . . .	—	0.80
Pumping installations including Persian wheels, etc. . . . .	0.70	0.75
Dams, channels, tanks etc. . . . .	5.22	4.00
Additional minor irrigation . . . . .	3.00	2.35
Total (programme) . . . . .	11.23	9.43

The target of area proposed to be brought under irrigation by minor irrigation works completed during 1955-56 was fixed at 2.9 million acres. It is expected that most of the minor irrigation works executed or undertaken during the second half of the year 1955-56 will benefit the crops during 1956-57. Only a small proportion of works constructed before 1st Oct. 1955 would provide irrigation facilities for the rabi crops of 1955-56. It has been estimated that about 0.6 million acres may be benefited during 1955-56.

About 0.8 million acres are expected to be benefited under special tubewells programme up to the end of 1955-56.

Minor irrigation projects like dams, channels, etc. brought under irrigation 4.00 million acres

of new land during the five years of the Plan. About 0.90 million acres were benefited by the well schemes during this period.

The Government of India have a programme for the construction of 2,050 special tube-wells in the States of Punjab, PEPSU, U.P., and Bihar. Up to June, 1956, the number of tube-wells completed was 2,504.

Each tube-well will irrigate 300 acres of land and give an additional production of 60 tons of food grains.

Besides this, there is another programme for the construction of 700 tube-wells which was proposed to be completed by 1956-57. It is reported that up to August, 1956, 324 tube-wells had been completed.

It will be seen that the present tube-well programme is more or less confined to the alluvial soil of Punjab, PEPSU, U.P. and Bihar. In order to ensure uniform development of the country, it was considered necessary to start a programme for the construction of 350 exploratory tube-wells in other States under the Operational Agreement signed with the T.C.M. on 27th March, 1953. Up to the end of March, 1956, an amount equal to 10 per cent of the Plan provision was spent on this programme and 29 exploratory tube-wells

were drilled in the Narbada basin (Madhya Pradesh) out of which 15 bores turned out to be successful.

### SECOND FIVE-YEAR PLAN

The total cost of the new irrigation projects in the Second Plan is Rs. 380 crores of which about Rs. 172 crores is expected to be spent during the Plan period.

The total provision for major and medium works is Rs. 416 crores (Rs. 172 crores for new schemes, Rs. 209 crores for continuing the projects of the First Plan, Rs. 35 crores for commencing projects to share Indus Valley and other projects).

The Plan provides for 195 new medium irrigation projects.

About tube-wells, prior to the First Plan, 2,500 tube-wells irrigated about one million acres in the country. The First Plan provided for the construction of an additional 5,830 tube-wells to irrigate about 2 million acres. The Second Plan provides for the construction of another 3,581 tube-wells to irrigate 10,000 acres. The First Plan project for digging 350 exploratory tube-wells will be continued during the Second Plan.

### AREA IRRIGATED, 1953-54.

(Thousand acres)

STATE	Food grains	Non-food grains	Total
Andhra Pradesh	6,788	616	7,404
Assam	1,326	48	1,374
Bihar	3,827	370	4,197

## THE CURRENCY SYSTEM

**T**HE rising trend in currency circulation, which has been a characteristic feature since 1953-54 became more marked during 1955-56. Over the year, money supply with the public, excluding State Governments' deposits with the Reserve Bank, increased by Rs. 264 crores to Rs. 2,184 crores as against a rise of Rs. 127 crores in 1954-55. During the Five-Year period 1951-56 as a whole, the rise in money supply was Rs. 206 crores or 10.4 per cent.

The two tables give the details of the course of money supply with the public and the factors contributing to it.

(Rs. in crores)

	Year ended March 31		
	1953-54	1954-55	1955-56
<b>Currency with the Public (a).</b>			
1. Note Circulation (b) .. .. .	1,150.17	1,230.44	1,424.23

**NOTE:** Figures have been revised to take into account the circulation of *Hali Sica* currency.

**CIRCULATION OF NOTES:** The rising trend in currency circulation noticed since 1953-54 became more marked in 1955-56. But whereas in the previous two years notes alone accounted for the currency expansion, in the year under review, rupee coins and small coin accounted for 5 per cent. of the expansion. Active notes rose during the year by Rs. 190 crores, as against Rs. 91 crores in 1954-55 and Rs. 53 crores in 1953-54. Total Notes in circulation at the end of 1955-56 amounted to Rs. 1,423 crores.

Notes in Circulation .. .. .	1,113.76	1,148.10	1,228.72	1,372.99

\* See also separate article which follows.

**Reintroduction of High Denomination Notes:** The Reserve Bank of India commenced issuing new notes of the denominations of Rs. 1,000, Rs. 5,000 and Rs. 10,000 with effect from April 1954. The new notes are completely different in design, water-mark and colour scheme from the old high denomination notes.

**Changes in the Form of Notes:** Reserve Bank of India notes of the denomination of Rs. 100, with the numbers printed in red (instead of in black) were first issued from the Bank's offices at Calcutta and Madras in August 1953. The Government of India one rupee notes printed in purple, instead of the earlier grey colour, were first issued from the Bank's Bombay office in November 1953.

**Hyderabad State Currency:** According to the Hyderabad Coinage and Paper Currency (Miscellaneous Provisions) Act, 1953, the Hyderabad currency (*Hali Sica* currency) ceased to be legal tender with effect from April 1, 1955. But to enable the public exchange their holdings of Hyderabad currency for Indian currency, the Union Government had provided conversion facilities, first till March 31, 1956, and then extended them by a notification dated March 24, 1956, up to September 30, 1956. At the end of March 1956, the circulation of *Hali Sica* currency amounted to about *Hali Sica* Rs. 4.07 crores (or India Rs. 3.49 crores), as against *Hali Sica* Rs. 48 crores (or India Rs. 41 crores) on January 20, 1950.

**Replacement of French Indian currency by Indian currency:** As from November 1, 1954, the provisions of the Indian Coinage Act, 1906, the Reserve Bank of India Act, 1934 and the Currency Ordinance of 1940 were extended to the French establishments in India, consequent on the merger of these establishments with the Indian Union. Although the French currency ceased to be legal tender on April 30, 1955, the facilities for its exchange into Indian currency were available up to October 15, 1955. The total value of Indian currency issued in exchange for French currency amounted to Rs. 37 lakhs.

**Decimalisation of Coinage:** With a view to adopting the decimal system of coinage, a Bill to amend the Indian Coinage Act, 1906 was introduced in the Lok Sabha on May 7, 1955 and was passed on July 27, 1955. It came into force from April 1, 1957. As from that date, the rupee coin was divided into 100 equal units and the unit coin was designated as *Naya Paisa*. Thus 100 *naya paisa* will make one rupee. The old coins will continue to be legal tender for about three years after the introduction of the new coins.

The details regarding the denominations, dimensions, designs and metal composition of the new series of coins were given by the Government of India in a notification issued on May 14, 1956. The new series will have the following units: 1 *naya paisa*; 2 *naya paisa*; 5 *naya paisa*; 10 *naya paisa*; 25 *naya paisa*; 50 *naya paisa*; and 100 *naya paisa*.

### CURRENCY CIRCULATION

During 1955-56, the total circulation of all forms of legal tender currency (notes, rupee coin and small coin) recorded an increase of about Rs. 200 crores against a rise of Rs. 85 crores in the preceding year.

The following table shows the circulation of currency:—

	At the end of		
	1953-54	1954-55	1955-56
Circulation—			
Notes .. .. .	1,142.75	1,233.92	1,423.47
Rupee Coin .. .. .	117.92	112.98	122.13
Total .. .. .	1,260.67	1,346.90	1,545.60

**NOTE:** Figures are exclusive of *Hali Sica* currency.

**Rupee Coin.**—Since June 7, 1947, when all standard silver rupee coin had ceased to be legal tender, the 'rupee coin' in circulation in India has comprised (1) the Government of India one rupee notes issued from July 1940, (2) the quaternary silver rupees (of one-half fineness) issued between December 1940 and June 1946, and (3) the nickel rupees issued from June 1947.

During 1955-56 rupee coin in circulation advanced by Rs. 9.2 crores to Rs. 122.13 crores and was the net result of a fall of Rs. 5.5 crores in July-September and an increase of

Rs. 14.7 crores in the remaining months. On April 7, 1955, the Reserve Bank received from the Government of India one rupee notes of the value of Rs. 5 crores, in terms of Section 30(2) of the Reserve Bank of India Act, against payment of legal tender value.

**Small Coin.**—The circulation of small coin also recorded an increase of Rs. 1.5 crores in 1955-56 as compared with a decline of Rs. 1.1 crores in 1954-55. The increase was shared by coins of almost all denominations. The following are the details:

#### MOVEMENTS IN CIRCULATION OF SMALL COIN DENOMINATION-WISE ABSORPTION (+) OR RETURN (—)

	(Rupees in 000)		
	1953-54	1954-55	1955-56
Half rupees *	— 1,16.18	— 56.39	+ 35.13

#### EXCHANGE CONTROL

During 1955-56, the policy of gradual liberalisation of exchange restrictions, initiated in 1953-54, was continued: (1) On June 7, 1955, general permission was given for the transfer of Indian securities to persons resident in Nepal, though the export of such securities to Nepal was made subject to a licence from the Reserve Bank of India. (2) From June 15, 1955, authorised dealers were permitted to deal in foreign exchanges other than U.S. dollars, Canadian dollars, pound sterling and Pakistan rupee. (3) Owing to the changes in the U.K. Control, the transferable account area was further extended to include Turkey. (4) From August 22, 1955, the Italian lira was included in the list of specified currencies and became a permissible medium for payments between India and the Italian Monetary Area. (5) All operations on the non-resident accounts of persons and firms, including banks, resident in Portuguese territories in India, were made subject, with effect from October 25, 1955, to the prior approval of the Reserve Bank of India; and on November 10, 1955, a ban was imposed on the taking of Indian currency notes by travellers to Portuguese territories in India. (6) From November 25, 1955, travellers to Pakistan were permitted to take with them Pakistan currency notes up to Pakistan Rs. 100 per person per day. (7) In regard to invisible payments, the setting-in allowance was raised to Rs. 75,000 per family in the case of emigration to the dollar area and to Rs. 1.25 lakhs per family to any other non-sterling area country. The limit of jewellery which travellers could take was stepped up to Rs. 25,000 per person.

The trends in the balance of payments position for 1955-56 and 1954-55 are summarised in the following table:—

	(Crores of Rupees.)	
	1955-56	1954-55

## DECIMAL COINAGE

**D**ECIMAL coins were introduced in India with effect from 1st April 1957.

Current coins will continue to be legal tender for about three years after the introduction of the new coins.

During this period they will be gradually withdrawn from circulation.

The rupee coin is divided into 100 equal units and the unit designated Naya Paisa. Thus 100 naye paise make one rupee.

The new series have the following units: one naya paise, two naye paise, five naye paise and ten naye paise.

Later twenty-five naye paise, fifty naye paise and the new rupee coins will be issued.

The new coins are issued to the public through the Reserve Bank, the State Bank offices, treasuries and sub-treasuries.

### GOVERNMENT ACCOUNTS

Government accounting with effect from 1st April, 1957 was in terms of rupees and naye paise.

The State Bank and joint stock and co-operative banks also switched over to decimal accounting from 1st April 1957.

All chalangis in support of money tendered in payment of Government dues are, therefore, to be expressed in new coinage. Similarly, all bills for withdrawals also are to be expressed in terms of rupees and naye paise.

The forms of bills, chalangis and other books of account used by Government Departments are revised to provide only two columns to show rupees and naye paise separately. Until, however, the new forms and bills are printed, the existing ones will be suitably adapted for use.

A sum of Rupees 25 and five naye paise is to be written as Rs. 25.05 (and not Rs. 25.5); Rupees 25 and 50 naye paise as Rs. 25.50 (not Rs. 25.5); and Rupees 55 and 83 naye paise is to be written as Rs. 55.83.

For entering an amount of Rupees 25 and five naye paise, in forms providing for separate columns for rupees and naye paise, 25 will be entered in the Rs. column and 05 in the naye paise column.

Amounts expressed in annas and pies will be converted into whole numbers of naye paise according to the conversion table before they are entered in the books. The abbreviated form to be used for naye paise/paisa will be N.P.

Rounding off is to be made only at the stage when payment or tender of money takes place. In agreements, enactments, etc., where rates are specified, the rounding off should be made only in respect of the total amount payable, or receivable in a single transaction, and the amounts specified in rupees, annas and pies in financial sanctions, rules, orders, notifications, contracts, deeds or other enactments will be automatically construed as expressed in terms of equivalent value under the decimal system without any rounding off.

While payment of Government dues will be accepted in whatever currency it is made, every endeavour will be made to make payment of Government dues only in new coins.

In order to enable the public to understand rightly the relationship of each new coin to the rupee the number of such coins required to make one rupee is indicated on the coins themselves. Thus the coin representing one naya paise will have a legend, "rupae ka sauwan bhag" (hundredth part of a rupee), embodied on it.

Similarly, 2, 5, 10, 25 and 50 naye paise units indicate that they represent 1/50th, 1/20th, 1/10th, 1/4th and one-half parts respectively of the rupee.

The design and composition of the new currency units are as follows:

The obverse sides of all the new coins have the design of the lion capital of the Asoka pillar with the terms "Bharat" in Hindi and "India" in English inscribed on them.

The reverse sides of all the new coins indicate the year in which the coins are produced and their value in naye paise specified in international numerals.

The 100 naye paise, 50 naye paise and 25 naye paise are of pure nickel while 10, 5 and 2 naye paise coins are of cupro-nickel alloy (75 per cent copper and 25 per cent nickel). The one naya paise coin is of bronze.

After the people have got accustomed to the use of the new coinage and sufficient quantities of new coins have been put into circulation, the existing coins which continue to be legal tender after April 1, 1957, will be withdrawn.

The process of withdrawal is expected to extend over a period of about three years and there is no need for anyone to get panicky about the status of the existing coins when the new coins are put into circulation.

Coins of the denominations of two annas and under will be withdrawn first, as decimal coins of ten naye paise and below will be put in

circulation in sufficient quantities at the initial stages.

According to the rate of exchange prescribed in the Indian Coinage (Amendment) Act 1955, there is no exact equivalent in naye paise in respect of coins of two annas and below and their change individually, or in combination with other coins, will result in a small profit or loss in the aggregate to either of the parties exchanging the coins.

This element of profit or loss will occur so long as the existing coins continue to circulate, but it will diminish progressively as increasing quantities of new coins enter into circulation.

The public can, however, keep down to the minimum the element of profit or loss in exchange of coins by having their holdings of existing coins exchanged for new ones by tendering amounts in terms of four annas and multiples thereof, for which exact equivalents in terms of new coinage exist.

The treasuries, have instructions to give new coins in exchange for existing coins only on this basis.

### CONVERSION TABLE

The conversion table gives the exchange value in Naye Paise (rounded off in the manner prescribed in section 14 (2) of the Indian Coinage Act, 1955 as recently amended) for amount tendered in annas/pies coins. The exact Naya Paise equivalent of the total amount to be converted is rounded off by ignoring fractions of  $\frac{1}{2}$  Naya Paise and below, and treating more than  $\frac{1}{2}$  Naya Paise as 1 Naya Paise.

OLD COINS			NEW COINS		
Annas	Pies	Naye Paise	Annas	Pies	Naye Paise
0	3	2	8	3	52
0	6	3	8	6	53
0	9	5	8	9	55
1 Anna		6	9 Annas		56
1	3	8	9	3	58
1	6	9	9	6	59
1	9	11	9	9	61
2 Annas		12	10 Annas		62
2	3	14	10	3	64
2	6	16	10	6	66
2	9	17	10	9	67
3 Annas		19	11 Annas		69
3	3	20	11	3	70
3	6	22	11	6	72
3	9	23	11	9	73
4 Annas		25	12 Annas		75
4	3	27	12	3	77
4	6	28	12	6	78
4	9	30	12	9	80
5 Annas		31	13 Annas		81
5	3	33	13	3	83
5	6	34	13	6	84
5	9	36	13	9	86
6 Annas		37	14 Annas		87
6	3	39	14	3	89
6	6	41	14	6	91
6	9	42	14	9	92
7 Annas		44	15 Annas		94
7	3	45	15	3	95
7	6	47	15	6	97
7	9	48	15	9	98
8 Annas		50	16 Annas		100

Rounding off as has been done in the conversion table is necessary only at the end of a transaction when any amount due in annas and pies is to be converted into Naye Paise.

You can make payment either in new coins or in old coins or by a combination of both according to the coins available with you.

The conversion table is, therefore, to be used only at the end of a transaction when payment has to be made or change has to be given.

## BANKING

**M**ODERN banking in India owes its origin to the British agency houses operating in Bombay and Calcutta in the eighteenth century. Then followed the Presidency banks in the latter half of the nineteenth century; as a result of their amalgamation, the Imperial Bank of India was brought into being in 1921 by a special Act. The next stage was marked by the establishment of the Reserve Bank of India on April 1, 1935. Fourteen years later on January 1, 1949, the Reserve Bank was nationalised. Its functions are now being broadened gradually: from the role of a "lender in the last resort" it has assumed the responsibility of being "the purveyor of credit" and is charged with the responsibility of developing the banking system on sound lines. On July 1, 1955, the State Bank of India came into being and the undertaking of the Imperial Bank of India was transferred to the new institution with the exception of the assets and liabilities of its foreign branches.

At the base of the banking system is the Reserve Bank with the State Bank as its agent. The edifice is made up of Indian joint stock banks other than the State Bank, foreign banks and co-operative banks.

The Banking Companies Act was enacted in 1949 with the object of improving the efficiency and the tone of the banking system. The main provisions relate to licensing of branches, requirements of minimum capital and reserves and maintenance of cash reserves. During 1952 the Banking Companies Rules were extended to more States and now apply to the entire country.

The policy of systematic inspections of banking companies irrespective of their size and stand-

ing, has been an aspect important of the Reserve Bank's supervisory activities. In pursuance of this, 227 banks were inspected during 1954, of which 15 were scheduled banks. Since March 1950, when inspections were commenced, 741 inspections have been carried out for various purposes.

The Reserve Bank of India (Amendment and Miscellaneous Provisions) Act, 1952, has enlarged the scope of financial accommodation by the Reserve Bank for productive purposes and enabled the Bank to reintroduce high denomination notes.

In pursuance of a press note issued on December 20, 1954, the Government of India nationalized the Imperial Bank as a first step towards the establishment of a State Bank of India by amalgamating the Imperial Bank of India with a number of other banks already associated with some State Governments. The branches would be spread over the whole country thus improving remittance and rural credit supplies. The State Bank came into being on July 1, 1955. Another development was the establishment of a Bankers Training College in Bombay.

### TRENDS

In 1955, the deposits of scheduled banks increased by Rs. 91 crores to Rs. 1,013 crores, passing the Rs. 1,000 crore level for the first time in seven years. Out of this deposit expansion, Indian scheduled banks accounted for Rs. 74 crores. In the context of the sustained rise in deposits, the velocity of deposit money was 13.1, which was more or less equal to the levels for 1954 and 1951 of 13.0. But for the suspension of clearings in Calcutta, towards

the year-end, the figure should have been slightly higher.

The 'own' funds of the scheduled banks in the shape of capital and reserves increased by Rs. 1 crore. Though this was ten times the increase that took place in 1954, it still represented a less than proportionate rise compared to deposits. There was also a higher level of bank credit over the year as a whole. It showed an expansion of Rs. 80 crores. Generally speaking, the resources position of the Indian banking system was fairly comfortable in 1955.

However, there were many occasions in the early part of the year and again towards the year-end when seasonal financing pressed on their resources. On such occasions, they generally borrowed from the Reserve Bank. At the end of 1955, the outstanding of scheduled bank borrowings from the Reserve Bank were Rs. 20 crores to Rs. 30 crores higher than those at the end of 1954.

An interesting feature as regards the Bank's lending has been that while hitherto the Indian banks had been the main borrowers under the Bill Market Scheme, in 1955, exchange banks exhibited considerable interest in the scheme. It is a reflection of the belief that the Indian money market is acquiring a greater degree of autonomy. Here, it will be of interest to note that some changes were made in the Scheme. With effect from March 1, 1956, the rate chargeable on advances under the Scheme was raised from 3 per cent to 3½ per cent and the concession so far granted to banks whereby the Reserve Bank shared the cost of the stamp duty involved in converting demand bills into usance bills was also withdrawn.

**RESERVE BANK**

In pursuance of federal financial integration, the Reserve Bank entered in 1952 into agreements with three former 'B' States, Madhya Bharat, Travancore-Cochin and Mysore, whereby it became their sole banker.

In 1953, it concluded agreements with two more (all former States before reorganization)

Part 'B' States, namely, Hyderabad and Saurashtra whereby it became ultimately the sole banker to these States as it already was to all the Part 'A' and Part 'C' States.

The Bank advanced to scheduled banks a gross amount of Rs. 425 crores in 1955 against Rs. 386 crores in 1954 and Rs. 195 crores in

1953. A total amount of Rs. 200 crores was advanced in 1955 by the Reserve Bank for general banking purposes at the Bank rate against Government securities as compared with Rs. 189 crores in 1954. Loans under the Bill market scheme at  $\frac{1}{4}$  per cent below the Bank rate aggregated Rs. 225 crores in 1955 against Rs. 148 crores in 1954.

The following table gives the position of the Reserve Bank over a period of years :—

**ISSUE DEPARTMENT**

**EXCHANGE BANKS**

The banks carrying on exchange business in India are merely branch agencies of banks having their head offices in London, on the Continent, in the Far East or the U. S. A. Originally their business was confined almost exclusively to the financing of the external trade of India; but now, most of them,

while continuing to play their main role, have also taken an active part in the financing of internal trade. Following the increase in the British bank rate to four per cent in March 1952, exchange banks found it more profitable to tap Indian deposits than to get funds from London. Over the year 1955 the deposits with

these Banks amounted to Rs. 196.5 crores as against Rs. 180.50 crores in 1954.

The earlier progress of Exchange Banks was tabulated in the previous editions. The more recent trends are summed up below :—

**Liabilities and Assets of Foreign Banks in India**

## MONEY RATES IN INDIA

	1954	1955
Bank Rate* .. ..	3½	3½
State Bank (former Imperial Bank) Rates:		
Hundi Rate** .. ..	4½	4½
Advances Rate .. ..	4	4
Call Loan Rate—		
Rs. 5 lakhs and over	3½	3½
Below Rs. 5 lakhs ..	3½	3½
Bazaar Bill Rates †:		
Calcutta .. ..	10-12	10-12
Bombay .. ..	9½	9½
Call Money Rates:		
Calcutta .. ..	3-1½	3½-2½
Bombay—		
Larger Banks ..	3-½	3 1½
Smaller Banks ..	3-1½	3½-1½

\* Bank rate raised to 3½ per cent on November 15, 1951. This is the standard rate at which the Reserve Bank is prepared to buy or re-discount bills of exchange or other commercial paper eligible for purchase under the Reserve Bank of India Act.

\*\* The rate at which the State Bank discounts first class three months' commercial bills.

† Rates at which bills of small traders are discounted by shroffs. The quotations are unofficial.

**Clearing Houses.**—The Principal Clearing Houses in India are those of Calcutta, Bombay and Madras and of these the first two are by far the most important. In 1951-52 Clearing Houses were opened at Bareilly and Jaipur and are being managed by the State Bank of India. This brought the total number of Clearing Houses under the management of the State Bank to 35. In Bombay, a Metropolitan Clearing

Association was formed and registered in October 1946 to arrange for clearing for non-scheduled banks as the Bombay Bankers' Clearing House decided to restrict its membership and sub-membership only to scheduled banks.

The total number of cheques cleared has progressively risen since 1950, the amount which has shown a declining trend in 1952 and 1953, has been higher in 1954 and 1955.

The figures from 1951 onwards are shown in the table given below :

## CLEARING HOUSE STATISTICS

(In lakhs of rupees)

Year	Velocity of Circulation	Calcutta	Bombay	Madras	Kanpur	Delhi	Other Centres	Total
1951	13.0	3,118.84	3,180.57	487.07	145.18	167.58	778.75	7,877.99
1952	12.3	2,703.95	2,679.52	432.57	136.94	157.95	742.47	6,853.40
1953	12.5	2,494.36	2,645.05	397.03	146.47	176.22	743.52	6,003.25
1954	13.0	2,754.28	2,758.75	361.94	141.90	204.70	842.69	7,064.27
1955	13.1	3,056.31	2,995.53	412.21	146.11	233.03	975.82	7,819.01

## ORGANISATION

During 1955-56, the number of scheduled banks increased by 1 to 89 and the number of offices from 2,807 in the previous year to 2,898.

It was stated that a landmark in Indian banking was the inauguration of the State Bank of India. An important statutory function assigned to the State Bank is the promotion of banking development through the establishment of an effective machinery of branches spread over the whole country, the number of branches to be opened within a period of five years or such extended period as the Central Government might fix, being 400. Accordingly a list of 100 centres has been finalised and between July 1, 1955 and March 31, 1956, 21 branches were established.

To stimulate banking development, remittance facilities for co-operative and other banks were extended, according to the General Report of the Committee of Director of the All-India Rural Credit Survey. Until October 31, 1955, a scheduled or a State Co-operative bank could remit only once a week, an amount of Rs. 5,000 or a multiple thereof, from any place at which there was an agency of the Reserve Bank to any account which it maintained with the Bank,

free of charge. But it was liberalised from November 1 onwards by permitting the remittance twice a week.

Under the Reserve Bank of India (Amendment) Act, 1955, the Bank set up, on February 3, 1956, the National Agricultural Credit (Long-Term Operations) Fund with an initial sum of Rs. 10 crores. An annual contribution of not less than Rs. 5 crores for the five years commencing from June 30, 1956, is to be made towards this Fund. This Fund will make loans and advances to State Governments for subscribing to the share capital of co-operative credit institutions and to central land mortgage banks. The first loans of Rs. 8 lakhs was made by the Fund to the Government of Madras.

Another development of the year was the Bank Award and the Industrial Disputes (Banking Companies) Decision Act, 1955. It was in July 1955, the Bank Award Commission submitted its recommendations. The main recommendations were that (1) the Labour Appellate Tribunal's Award be restored with certain modifications in the case of all 'A' Class banks (Indian and foreign) all 'B' class banks, except the Bank of Bikaner and the

United Bank of India, and certain 'C' class banks; and (2) the total exemption from the application of the Award to places with 30,000 or less population in the former Part B and Part C States (other than Delhi, Ajmer and Coorg) allowed in the Government's modified decision be altered and the exemption limited to such places in former Travancore-Cochin only and that too in respect of banks registered in that State, except the Travancore Bank for a period of two years from the date of announcement of Government's final decision on the Commission's Report. The Government accepted the recommendations and accordingly the Industrial Disputes (Banking Companies) Decision Act, 1955, was passed in September, enforcing the Award for a period of five years from April 1, 1954.

In view of the special problems of banking in the former Travancore-Cochin State, Government appointed a Commission of Inquiry with Mr. K. Ramunni Menon as Chairman to examine the financial position of banks in the State, suggest measures for their integration and make recommendations in regard to the terms and conditions of services of their employees.

## STOCK EXCHANGE

**T**HE earliest reference to stock broking in India dates back to the end of the 18th century when transactions in Government securities and the shares of the East India Company used to take place in Calcutta under a *neem tree*. Similar references are also available about business in shares in Bombay before 1840. The boom following the American Civil war gave a great impetus to this business.

The Native Share and Stock Brokers' Association of Bombay was formally constituted by an indenture dated December 3, 1887 and was recognised by the Government of Bombay for forward trading in shares under the Bombay Securities Contracts Control Act, 1925. Since then several attempts were made to start rival stock markets in Bombay, the latest one being the Indian Stock Exchange started in 1938.

**Calcutta Association.**—The Calcutta Stock Exchange Association was founded at No. 2, New China Bazar Road (now known as 2, Royal Exchange Place), Calcutta, with 150 founder members in 1908. Fifteen years later, it was registered as a limited liability concern. The Association is controlled and managed by a Committee and has a membership of 232 brokers.

The only registered institution in south India of brokers dealing in shares and securities is the Madras Stock Exchange Association, Ltd., registered in 1937.

During the boom period several stock markets were started at other industrial centres. These include Delhi and Kanpur.

The Ahmedabad Stock Exchange is also a registered body and recognised by the Government of Bombay under the Bombay Securities Contract Control Act.

There are also organised stock markets in Hyderabad and Indore.

### SECURITIES ACT

The Securities Contracts (Regulation) Act, 1956, is the first All-India legislation seeking to control transactions on securities and to regulate stock exchange practices. Prior to this Act, there was no legislation for the purpose except in the old State of Bombay.

The Bombay Securities Contracts Control Act, 1925, was not, however, particularly effective because of two main shortcomings: (1) The Act made transactions outside a recognised stock exchange merely void but not illegal. (2) While the Act purported to control only forward business, it did not make a clear distinction between ready and forward transactions. To remedy these and other defects, the former Bombay Government enacted in 1947, the Bombay Forward Contracts Control Act; but this Act was not applied to securities presumably because Central legislation of this subject has been in contemplation.

But the outbreak of World War II came in the way of immediate legislation and it was only after the end of hostilities effective steps were taken in this direction, which resulted in the Securities Contracts (Regulation) Bill, introduced in the Lok Sabha on December 24, 1954. It was largely based on the recommendations of the Gorwa Committee appointed in June 1951. The Bill was referred to a Joint Committee of the Houses of Parliament towards the end of 1955. It submitted its report to Parliament on February 29, 1956. The Bill, as revised by the Joint Committee, was passed by the Lok Sabha, with some amendments, on July 16 and by the Rajya Sabha on August 6. It received the assent of the President on September 4, 1956.

### Main Provisions

Broadly speaking, the Act applies to transactions other than spot delivery contracts. But power has been taken in the Act to regulate

spot delivery contracts also, if the Government regards it as desirable in the interest of trade or in the public interest.

As regards contracts other than those for spot delivery, the regulation takes the form of either controlling the activities of stock exchanges in those areas or States where stock exchanges operate, or through a system of licensing of persons who deal in stocks and shares. In those areas where the stock exchanges operate and to which Section 13 of the Act will be applied, every contract which is entered into otherwise than between members of a recognised stock exchange in such State or area or through or with such members is illegal.

The Act permits only those stock exchanges to function which are recognised by the Central Government. For this purpose, each stock exchange is required to make an application in the prescribed manner to the Central Government, who will grant recognition if the Government is satisfied in regard to certain conditions. Every recognised stock exchange is required to furnish to the Central Government such periodical returns relating to its affairs as may be prescribed.

Subject to the previous approval of the Central Government, any recognised stock exchange may make bye-laws for the regulation and control of contracts. But the Government has the power to make or amend these bye-laws.

Important provisions relating to the listing of securities on a stock exchange are also contained in the Act. In regard to the licensing of dealers and brokers in securities, there are no detailed provisions.

So also no direct provisions are contained in the Act to restrict the prevalence of black transfers, but there is a provision to discourage black transfers indirectly.

### MARKET TRENDS

Throughout the war period, the stock market was fed on a veritable boom caused by cheap money and inflation. The index of Government securities moved up from 107.6 in August 1939 to 120.4 in 1946-47 and that of fixed yield industrial securities from 137.7 to 197.8 on the basis of 1927-28 quotations equal to 100. In the same period, the index of variable yield indus-

trial securities advanced from 98.5 to 288.6. In the following four years the economic uncertainty, post-partition riots and the general thinning of investment demand had an adverse effect on the stock markets and the capital values registered a marked depreciation. Thereafter a feeble recovery was noticeable but the volume of business continued to be at a low ebb

and even the Korean War in mid-1951 did not stimulate speculative excesses in industrial shares.

The table below based on the data collected by the Reserve Bank broadly indicates the trend in regard to paid-up capital of variable yield industrial shares quoted on the stock exchanges of Bombay, Calcutta and Madras and their market value in the post-war years 1948-51:—

(Rupees in lakhs)

	October 1948	31-3-1949	31-3-1950	31-3-1951
No. of Companies .. .. .	779	833	829	827
Paid-up Capital .. .. .	20,596	22,714	23,015	23,806
Market Value .. .. .	40,563	37,933	35,400	43,367

(See also table on next page).

During 1951-52 the Stock Exchange turned downward following the evaporation of inflationary pressures and the debacle reached its nadir in March 1952 when the crash on the market, preceded by a heavy slump in commodities, resulted in the temporary closing down of the market.

The behaviour of the stock market during the financial year 1952-53 fitted the customary pattern of disinflation. With the general rise in interest rates, ideas of equity yields were revised in an upward direction and buyers turned more exacting in their demands for safety and liquidity of capital.

The equities market ruled buoyant during most of the years 1953-54 and 1954-55 in contrast to the weakness evinced during the previous year. The annual average index of variable dividend securities rose by about

20 per cent between 1953-54 and 1954-55. The Reserve Bank Index for industrials rose from 102.6 in March 1954 to 120.9 in September, and after declining to 113.7 in December, moved up to 115.4 in March 1955. On November 29, it touched the highest of the year at 131.9, but declined to 113.6 on January 1, 1956.

For the share market, however, 1955-56 was a memorable year. Buoyancy on a wide scale prevailed all through the year, and the index for industrials touched the highest at 131.9 on November 26. But the boom ended with 1955, for January 1956 witnessed a heavy landslide in prices, in fact wiping out all the gains which the market made in 1955. The downward trend continued till the end of May. The slump was mainly due to the fact that the technical position was vulnerable. This was precipitated by the controversy over the States reorganisation and the violence that accompanied it, by the Ordinance nationalising

life insurance, by the fears of further heavy taxation in the next budget including a ceiling on income and by the stock exchange legislation before Lok Sabha. It also reflected, in part, the markets' reaction to the enactment in April 1955 of the Constitution (Fourth Amendment) Bill, which made the issue of compensation for nationalisation non-judicial.

The Reserve Bank's weekly index number of variable dividend securities declined from 115.6 for the week ended April 2, 1955, to 111.9 for the week ended June 4.

Thereafter, however, the market resumed its previous upward march to continue upto the end of November. The weekly index touched the peak of 131.9. Encouraging trends in company profits and dividends and expectations of large-scale deficit financing in the closing year of the First Plan as well as in the Second Plan period, appeared to be the main bullish factors. But

there was an element of unhealthy speculation in this period of buoyancy and so there was a subsequent sharp reaction. During the period from December 1955 to February 1956, share prices declined and the index fell to 120.1 for the week ended February 25. It was partly in the nature of a technical correction. But there were other depressing factors also such as apprehensions of heavy taxation in the 1956-57 budget; the Ordinance of January 19, 1956, nationalising life insurance; rumours that the new issue by the Tata Iron and Steel Co. would be permitted only at a substantial premium; and reports of a move to revise the Industrial Policy Resolution of 1948. However, a recovery

set in from early March. At the close of 1955-56, the index recovered to 124.6.

For the year as a whole, the market registered an appreciable net rise for the third year in succession. The Reserve Bank's all-India index of variable dividend industrial securities (base: 1949-50 = 100) for March 1956 showed a net increase of 6.1 per cent over March 1955. The annual average for 1955-56 also worked out higher at 121.6 as compared with 112.9 for 1954-55.

The gilt-edged market displayed a marked resilience during 1955-56. From the latter half of April 1955, the market firmed up with the revival of institutional support. In May, the

Reserve Bank successively revised upwards its selling rates for the 3½ per cent. National Plan Loan 1964 and the 3 per cent. Loans 1966-68 and 1970-75. The market also reacted favourably to the terms of the 3½ per cent 1965 Loan and the 4 per cent 1967 State issues. But, the raising of the Bank of England rate, cried a halt to this upswing and from mid-February, 1956, the securities turned slightly easy. However, from about the second week of March, most of the loans resumed their earlier uptrend. Over the year, most of the dated loans showed net gains, which ranged up to Rs. 2 as. 5 in the case of the 3 per cent Loan 1970-75 as against the range up to only Rs. 1.4 in 1954-55.

From December 1946, the Reserve Bank of India started constructing indices of security prices. These indices (all-India) reveal the following trend:—

Average of Weeks	Government & Semi-Government Securities	Industrial Securities		Banks	Insurance	Investment Trusts	Electricity Tramways	Shipping and other Transport	Railways	Plantations	Cotton, Woollen and Silk Mills	Jute Mills	Coal	Mining and Oil	Iron and Steel	General Engineering	Sugar	Breweries	Chemicals	Paper	Cement

## CAPITAL MARKET

Until the beginning of the Second World War the capital market had made a slow but steady progress; but its pace quickly accelerated during the War period when the monetary inflation and the rising trend of industrial profits served as a first class stimulant to its growth which was spectacular. The post-war period has, however, served mainly towards consolidating the early gains. A broad idea of the expansion of the market can be had from the fact that between 1938-39 and 1946-47, the interest-bearing obligations of the Government of India increased by Rs. 1,176 crores, while consent for the issue of capital was granted to the tune of Rs. 640½ crores from May 17, 1943 to March 31, 1947.

## CAPITAL ISSUES

The previous year's brisk activity in the new issue market continued during 1955. The total amount of issues sanctioned by the Controller of Capital Issues increased from Rs. 411 crores in 1954 to Rs. 125 crores in 1955, the highest since 1948. There was also a larger rise in the total amount asked for in respect of applications decided, from Rs. 117 crores to Rs. 151 crores. Of this, Industrial issues sanctioned were Rs. 98

crores while non-Industrial issues obtained only Rs. 28 crores. Industry-wise, the largest amounts were sanctioned in respect of water transport (Rs. 19 crores), rayon manufacture (Rs. 13 crores) and petroleum refineries (Rs. 12 crores), followed by electricity (Rs. 9 crores) and cotton spinning and weaving mills and cement (Rs. 8 crores each). State-wise, Bombay\* accounted for Rs. 57 crores and West Bengal Rs. 31 crores.

Of the amounts sanctioned, those for initial issues declined from Rs. 58 crores in 1954 to 47 crores in 1955; but those for further issues rose from Rs. 53 crores to Rs. 78 crores. On the other hand, the amount sanctioned for debentures declined from Rs. 20 crores to Rs. 17 crores, and that for bonus issues from Rs. 10 crores to Rs. 6 crores. One noteworthy feature of 1955 was the shift from ordinary shares and debentures to preference shares and miscellaneous issues. Ordinary shares declined from Rs. 77 crores in 1954 to Rs. 57 crores in 1955 and debentures from Rs. 20 crores to Rs. 17 crores, while preference shares rose from Rs. 8 crores to Rs. 24 crores and miscellaneous issues from Rs. 6 crores to Rs. 27 crores.

Foreign participation was in evidence in respect of 123 companies for Rs. 22.5 crores as

against 108 companies for Rs. 20 crores. Out of this, 20 initial issues accounted for Rs. 7 crores, 43 further new issues for Rs. 14.4 crores and 60 bonus issues for Rs. 1 crore. The share of residents in the U.K. was Rs. 7 crores and in the U.S. Rs. 5 crores.

The important issues of 1955 included: Debenture issues by the Caltex Oil Refinery (Rs. 2 crores); National Rayon Corporation (Rs. 1.5 crores); Delhi Cloth and General Mills (Rs. 1 crore); Tata Locomotive and Engineering Co. (Rs. 1.5 crores); Preference issues by the Jayalalao Cotton Mills (Rs. 1 crore); Stanvac Oil Refinery (Rs. 75 lakhs); Birla Jute Manufacturing Co. (Rs. 75 lakhs); Orient Paper Mills (Rs. 60 lakhs); Ordinary issues by the Industrial Credit and Investment Corporation (Rs. 3.5 crores); Sirpur Paper Mills (Rs. 1.21 crores); and the Rohas Industries and the 6 per cent preference and ordinary shares of the West Coast Paper Mills for Rs. 60 lakhs and Rs. 1 crore, respectively.

A significant development during the year was the enactment in February 1956 of a bill to extend indefinitely the Capital Issues (Continuance of Control) Act, 1947.

## COMPANY LAW

In 1951 the Government of India appointed an expert committee, with Mr. C. H. Bhabha as Chairman, to suggest an overhaul of the Company Law. But trafficking in managing rights and cornering of shares in the open market with a view to acquiring control over the management of well-established and reputable companies for anti-social purposes had reached such proportions that Government decided to promulgate an Ordinance on July 21, 1951. On September 14, the Indian Companies Act was amended.

The Companies Bill, based largely on the recommendations of the Company Law Committee was introduced in Parliament on September 2, 1953 and was approved by Parliament on November 22, 1955. The Act came into operation on April 1, 1956.

The main features of the Act are :

- (1) Equity shares with differential rights regarding voting, dividend, participation in capital on dissolution, are prohibited.
- (2) It puts restrictions on inter-company loans and investments.
- (3) There is a ceiling on overall managerial remuneration.
- (4) Most decisions of the management and even of the Shareholders of a Company require the approval of the Government before they are put into effect.
- (5) The appointment of a managing agent or an associate as a selling or buying agent outside India requires approval by a special resolution.

## INDUSTRIAL FINANCE CORPORATION

Under the Industrial Finance Corporation Act, a Corporation was established on July 1, 1948 to provide medium and long-term finance to public limited companies and co-operative societies registered in India, including the acceding States, and engaged in the manufacture or processing of goods or in mining or in the generation or distribution of electricity or any other form of power. Individuals, partnership firms or private limited companies are thus excluded from the purview of the Corporation's operations. With the setting up of a number of State Financial Corporations, it was agreed that applicants for loans upto Rs. 10 lakhs or 10 per cent of the paid-up capital of the State Financial Corporation of the State in which they are situated, if that was lower than Rs. 10 lakhs, should be advised to apply not to the Industrial Finance Corporation but to the State Financial Corporation concerned. The authorised share capital is Rs. 10 crores, divided into 20,000 shares of Rs. 5,000 each, the paid-up capital being Rs. 5 crores in respect of 10,000 shares

issued. To this issue, the Central Government and the Reserve Bank of India subscribed Rupees one crore each, the scheduled banks and financial institutions like insurance companies and investment trusts, Rs. 1½ crores each, and co-operative banks Rs. 1½ crore. The paid-up value of the share capital and dividends on it at the minimum rate of 2½ per cent. per annum are guaranteed by the Government. The Board of Directors consists of twelve members, of whom four are nominated by the Central Government and two by the Reserve Bank of India, and six are representatives of scheduled banks, insurance companies, investment trusts and other financial institutions.

The Corporation is authorised to borrow up to five times the amount of its paid-up capital and reserve fund. When the Reserve Fund equals the authorised capital of Rs. 10 crores the borrowing capacity of the Corporation will be Rs. 100 crores. The Corporation may also accept deposits for periods of not less than five years, but the total deposits accepted may not exceed Rs. 10 crores. It is empowered to provide financial assistance in the following ways :

- (i) grant loans or subscribe to debentures of industrial concerns repayable within a period of 25 years secured by sufficient pledge, hypothecation or mortgage of tangible assets;
- (ii) underwrite the issue of stocks, shares and debentures; and
- (iii) guarantee loans floated in the market repayable within a period not exceeding 25 years.

The Corporation is prohibited from subscribing directly to the shares or stocks of companies and is primarily a lender and not a partner in industry. Its policy is to finance the acquisition of fixed assets and thereby supplement rather than compete with the activities of commercial banks.

The Industrial Finance Corporation Act, 1948 and the State Financial Corporations Act, 1951 were amended by the Industrial and State Financial Corporations (Amendment) Act, 1955, which came into force on September 18, 1955. The amending Act provided, among other things, for a 'Central Committee' instead of an Executive Committee of the Board of Directors, and the appointment of a stipendiary Chairman to be assisted by a General Manager in place of the honorary Chairman and a paid whole-time Managing Director; for the grant of right to the Corporation to borrow from the Central Government, and to lease any property pledged or mortgaged to the Corporation; and for the removal, with the permission of the Central Government, of the seven-year limit in respect of the period up to which the Corporation may hold any stocks, shares, bonds or debentures in fulfilment of its underwriting liabilities. It also enabled industrial concerns, formed with the object of engaging in the manufacture or processing of goods, to become eligible for financial assistance even before they start production.

In September 1948 the Corporation started functioning with Mr. Shri Ram as Chairman and Mr. Ram Nath as Managing Director. In August 1949 the Corporation decided to augment its resources by issuing 3½ per cent. bonds repayable in 1964. The Act was amended with effect from December 29, 1952 in order to enable the Central Government to guarantee loans in foreign currencies and in certain other respects, e.g., shipping companies are now eligible for loan from the Corporation.

Up to the end of June 1956 the Corporation sanctioned over Rs. 43 crores by way of loans. Amount sanctioned in 1955-56 alone exceeded Rs. 15 crores.

The break-up of the loans sanctioned by the Corporation from June 30, 1949 to June 30, 1956 is as follows (Rs. in lakhs):

Textile Machinery 74; Mechanical Engineering 168; Electrical Engineering 156; Cotton Textiles 610; Woollen Textiles 35; Rayon Industry 110; Chemicals 587; Cement 340; Ceramics and Glass 150; Oil Mills 7; Electrical Power 43; Non-ferrous Metals 35; Light Engineering 134; Aluminium 50; Sugar 1,159; Mining 37; Paper 422; Automobile and Tractor 134; Unclassified 73; Total 4,321.

During the year the rate of interest charged by the Corporation on its loans and advances remained unchanged at 6½ per cent, as also the rate at ½ per cent. on prompt payments.

Net profit for year ending June 30, 1956, Rs. 10,18,430.

The Central Committee of the Board of Directors of the Corporation consists of the Chairman of the Board (who shall be the Chairman of the Committee), two Directors elected by the nominated Directors and two Directors elected by the elected Directors. The present composition of the Central Committee is : K. R. K. Menon (Chairman); S. C. Roy and vacant (elected by the elected Directors), S. P. Virmant and L. K. Jha (elected by the nominated Directors).

The present Board of Directors consists of : K. R. K. Menon (Chairman), V. P. Varde, S. V. Ramamurti, G. D. Ambekar, S. P. Virmant, I. S. Vaidyanathan, S. C. Roy, M. C. Muthiah, S. K. Pasu, B. Venkatasubbiah, M. R. Bhide and L. K. Jha.

General Manager, H. V. Venkatasubbiah, Secretary, Dalip Singh.

## STATE FINANCIAL CORPORATIONS

An Act to provide for the establishment of State Financial Corporations was passed in October 1951. The Act enables the State Governments to establish a Financial Corporation for the State under a name to be specified by notification; and the State Government concerned, the Reserve Bank, scheduled banks, insurance companies, investment trusts, co-operative

banks and other financial institutions will be entitled to subscribe to the share capital. Parties other than these can also be shareholders; but their aggregate holding will not exceed one fourth of the total capital. The shares allocated will not be transferable except to the State Government, the Reserve Bank or any other recognised financial institution.

The shares of the Corporation will be a trustee security under the Indian Trusts Act and an approved security under the Insurance and Banking Acts. The shares shall be guaranteed by the State Government in regard to the repayment of principal and the payment of annual dividend at such minimum rate as the State Government may, with the approval of the Central Government, fix by notification. The Corporation may issue bonds and debentures for increasing its working capital and accept deposits of not less than five years' maturity.

The management of the Corporation will vest in a Board of Directors composed of three nominated by the State Government, one by the Central Board of the Reserve Bank, one by the Industrial Finance Corporation of India, one each by scheduled banks, co-operative banks and other financial institutions and one to represent other shareholders. The Managing Director will be an ex-officio member of the Board. The first Board will be constituted by nominating the representatives of the various interests by the State Government.

The Corporation may transact the following business:—(a) the guaranteeing of loans raised by industrial concerns in the public market for not more than 20 years; (b) the underwriting of the issue of stocks, shares, bonds or debentures by industrial concerns; (c) the granting of loans or subscribing to debentures of industrial concerns repayable within 20 years; and (d)

other business arising or ancillary to the above. The limit of accommodation to any industrial concern will be up to a maximum of one-tenth of the Corporation's share capital subject to a maximum of Rs. 10 lakhs.

Up to the end of March 1956, 14 States\* had established State Finance Corporations—Punjab, Bombay, West Bengal, Saurashtra, Travancore-Cochin, Hyderabad, U.P., Rajasthan, Madras, Assam, Bihar, Madhya Bharat, Andhra and Orissa. Each Corporation has an authorised capital of Rs. 2 crores and issued capital of Rs. one crore, excepting U.P. which has an authorised capital of Rs. 3 crores and issued capital of Rs. 50 lakhs and Bihar an issued capital of Rs. 50 lakhs but the distribution of the Capital as between the State Government, Reserve Bank, financial institutions and others varies from one State to the other.

For other Corporations see under 'Late Particulars'.

\* After reorganization there are twelve: Punjab, Bombay, West Bengal, Kerala, Andhra, U.P., Rajasthan, Madras, Assam, Bihar, Madhya Pradesh and Orissa.

### JOINT STOCK COMPANIES

Some facts and figures relating to joint stock companies are given in the following tables:—

#### Consents for Issue of Capital

(Rupees in crores)

Year	No. of consents	Total of Issues		Total
		Indus- trial	Non- Indus- trial	
		(Rs.)	(Rs.)	(Rs.)
1952 .. .. .	254	32.7	7.1	39.8
1953 .. .. .	232	71.4	10.0	81.4
1954 .. .. .	220	93.9	16.7	110.6
1955 .. .. .	289	97.5	27.0	125.4

## BULLION

**P**RECIOUS metals have always held a great place in the Indian economy. Even though gold and silver standard currencies are no more in the world, both the metals determine Government's policies. The price policies in respect of these two metals are governed by American attitude because the U.S.A. is the most important consumer. The U. S. official price of gold at \$ 35 per five ounces has been accepted as the official price by all member countries of the International Monetary Fund.

### SILVER\*

The following table gives details about the trend of silver production from 1952 to 1955:—  
(In millions of ounces)

Countries	1952	1953	1954	1955
United States of America .. .. .	39.8	37.7	38.1	35.0
Mexico .. .. .	50.4	47.9	39.9	45.0
Canada .. .. .	25.2	28.3	30.7	27.7

India .. .. .	0.018	0.015	0.161	0.111*

\* Figures up to September 1955 only.

Following the expiry of the Green Act on December 31, 1945, a Silver Bill was enacted on July 31, 1946, authorising the Treasury to sell or lease for manufacturing use any silver, not pledged as monetary backing for silver certificates, at not less than 90¢ cents per fine ounce and also to purchase all domestic silver mined after that day, if offered within one year after being mined, at a net price of 90½ cents. In December 1953, it was officially announced that the U.K. Government stocks of silver would not, in future, be held available to supply the essential needs of industry and that permission would be granted for purchases of silver to be made in the cheapest market, including the dollar area, to satisfy essential trade needs.

The recent trend of silver consumption (partial data) is given in the following table\* :—  
(In millions of ounces)

	1952	1953	1954
<b>ARTS AND INDUSTRIES</b>			
United States .. .. .	95.0	105.0	85.0
Germany .. .. .	11.3	17.5	24.2

Belgium .. .. .	—	2.3	1.5
China .. .. .	—	—	—
Other Countries .. .. .	6.5	11.7	10.0
Total Coinage .. .. .	108.1	74.8	67.3
Total Consumption .. .. .	250.2	238.6	219.4

Note: The 1954 consumption estimates are by Handy and Harman in their review of the Silver Market of 1954.

World silver market was firm in 1955. In contrast to the rigid price stability witnessed in the preceding two years, the year under review was marked by a general upswing in prices. The main reason was the high level of demand in the face of fall in supplies. While the estimated world silver production declined to 203.7 million oz. from 208.7 million oz. in 1954, estimated consumption was more or less steady at 218 million oz.

The New York price of foreign silver, which had closed at 88½ cents per oz. on March 31, 1955, developed an upward trend to touch the level of 92 cents on October 11, the highest recorded price in New York for 35 years, and to close at 91½ cents. The London price moved in sympathy with that of New York.

Silver production in India during the first nine months of 1955 amounted to 111,003 oz. valued at Rs. 4.81 lakhs as against 161,185 oz. valued at Rs. 6.68 lakhs in 1954. Besides, the floating stocks in the country grew smaller owing to higher consumption.

Some silver, however, started flowing in, towards the close of the year, from Tibet, in

the form of coins, consequent upon the licences issued by the Government to those who had export trade with Tibet. But on May 3, 1956, the Government decided to license freely the import from Tibet of any silver coin current in the Tibet region of China. The Government also raised the import duty on silver bullion and coins from 4 1/5 annas per oz. to 8 2/5 annas per oz. (i.e., from Rs. 9-13-6 to Rs. 19-11-0 per 100 tolas).

The following table gives the average silver quotations in New York and London from 1949 to 1955:

	New York Average	London Spot
	Cents	Pence
1949 .. .. .	71.93	49.24
1950 .. .. .	74.17	64.77
1951 .. .. .	80.37	77.86
1952 .. .. .	84.94	74.36
1953 .. .. .	85.19	73.94
1954 .. .. .	85.25	73.48
1955 .. .. .	89.10	77.53

### GOLD

Gold has played a key role in shaping the life and history of the world. Between 1493 and 1600, world's production of gold was placed at 24.2 million ounces. It steadily rose to 38 million ounces during the 50 years ended 1850. Since then, however, the production has risen rather spectacularly. The annual average output mounted from 3.5 million ounces in 1850 to 19.6 million ounces in 1929 and then to 35.2 million ounces in 1930, reaching the peak figure of 41 million ounces in 1940. The greatest part of this enormous increase came since the U. S. Administration raised its price of gold from \$ 20.67 per ounce to \$ 35 an ounce which made the U. S. A. a sort of magnet strongly attracting the world's entire gold production.

While the international demand for hoarding was reduced in 1954 supplies were augmented by larger South African output and by sizable Russian gold sales. In consequence the free market prices of gold moved close to the world parity of \$ 35 per fine ounce. The re-opening of the London market in November 1954 had also a stabilizing influence on prices.

But in 1955, free market prices fell to levels lower than the official parity of \$ 35 per ounce. It is true that there was marked rise in private hoarding demand, at over nine million oz., mainly due to the resurgence of inflation. But it was counterbalanced by a sizable increase in supplies and large Russian sales of gold. During the year, the world production was estimated at 27.3 million oz. as against 25.9 million oz. in 1954. Moreover, there was a shortage of dollars in the case of countries whose central banks had hitherto been regular buyers of gold. Price variations, however, were narrow in 1955.

### World Gold Consumption

(In millions of fine ounces).

	1951	1952	1953

† Excluding U.S.S.R.

**Production, Imports and Exports**

The output of gold in India which had suffered a setback during 1953, owing mainly to the closure of the Oorgaum gold mine in Mysore rose slightly from 223,376 ounces valued at Rs. 5.07 crores in 1953 to 239,168

ounces valued at Rs. 5.62 crores, but was still below the 1952 level of 253,264 ounces. But the output in 1955 was the lowest with 211,462 oz. valued at Rs. 5.20 crores. The decline has been ascribed to the closure of operations owing to labour troubles and to the low grade of the ore crushed.

Imports and exports of gold continued to be negligible in view of the continuance of the restrictions under the Foreign Exchange Regulation Act, 1947, and Imports and Exports (Control) Act, 1947. The inflow of contraband gold into India was on a smaller scale after 1947 as compared with the previous years. Among the factors which contributed to this result were the vigilant action taken by the Union Government to check smuggling and the political developments, towards the close of the year, in the French and Portuguese possessions in India, which were the main centres of the contraband trade in bullion.

A major step taken during the year to check smuggling still further was the Sea Customs (Amendments) Bill of September 1954. In November 1954 the French possessions were transferred to India with the result that the ban on the import and export of gold was extended to that area too.

In 1955-56, the anti-smuggling drive of the authorities seems to have been more effective. The political developments in Goa also discouraged smuggling activity. On April 18, the Lok Sabha passed the Sea Customs Amendment Act, which provided, *inter alia*, for the shifting of the burden of proof that the goods are not smuggled, to the persons from whom the goods are seized.

**Assaying and Refining of Gold and Silver**

Some relevant statistical data are given below:—

(Thousands of tolas)

Year	Melting and Assaying		Refining	
	Gold	Silver	Gold	Silver
1950-51	2,59	97.56	18.04	16.50
1951-52	60	64.19	27.43	44.46
1952-53	28	62.55	24.11	28.92
1953-54	80	73.07	17.21	13.41
1954-55	75	73.67	18.39	8.19
1955-56	20	45.38	10.42	17

The following table gives details of imports and exports of gold and silver:—

Yearly Average	Imports		Exports		Net Imports (+) Net Exports (—)	
	Ounces in thousands	Rs. in lakhs	Ounces in thousands	Rs. in lakhs	Ounces in thousands	Rs. in lakhs

**INDIAN MARKET**

Virtually isolated from world markets with the continuing ban on imports and exports of gold and silver, bullion prices in India during 1955-56 were mainly influenced by domestic factors. Futures trading in bullion under the auspices of the Bombay Bullion Association, the only recognised association for forward trading in gold and silver in Bombay State under the Bombay Forward Contracts Control Act, 1947, was much less smooth in 1955-56 than in the preceding three years. It may be noted here that the forward market was closed during the period July 12 to 21 and early August to October 23, 1955.

Consequently, certain changes were made in the by-laws of the Association, with the permission of the State Government. The emergency by-laws were amended reducing the number of votes required for declaration of

"a state of emergency." Besides, three new by-laws were added: (1) 30A provides that, under no circumstances, a non-member shall enjoy, directly or indirectly, any rights, privileges or facilities more than those available to a member; (2) 72A and (3) 88A provides that, during the last seven days of a contract period, no fresh business will be permitted in the current contract except transactions of only squaring-up nature. By-law 141 was also amended providing that the prices realised in an auction should not exceed the highest closing level touched during the currency of the contract, and, if the available metal falls short of the outstanding transactions, the Board shall suspend the auctions for 48 hours and make a full report to the Government regarding the conditions in the market and Government may extend the period of auction for such period or periods as it deems necessary.

During the year, the Forward Markets Commission took the first step towards bringing under their purview the futures trading in bullion. On February 16, 1956, the Commission issued a press note stating that they were examining the utility of forward trading in bullion. It also invited, at the same time, applications from Bullion Associations for the purpose of recognition under Sections 5 and 6 of the Forward Contracts (Regulation) Act, 1952.

In the Bombay market, prices of both metals showed substantial increases over the year, though movements were two-sided. Gold closed the year with a net gain of Rs. 13.7 at Rs. 105.14 and silver with a net gain of Rs. 15.10 at Rs. 181.5. The causal factors were more or less the same for the upward trend in both the metals. Rising incomes as a result of the acceleration of the tempo of economic activity

†† For later particulars see under 'Latest Particulars'.

in the country seemed to be the main reason for increased demand. Other factors were the upturn in commodity prices since early June 1955, the prospects of further rapid growth

of the economy, the possibility of large-scale deficit financing in the public sector and talks of the imposition of a tax on total wealth.

But the volume of futures business in both the metals was very low, about 48 million tolas in gold and 1.4 million bars in silver, compared to 88 million tolas and 3.4 million bars in 1954-55.

The following statement gives the highest and lowest spot prices of gold and silver in Bombay with import duties from 1948 to 1955:—  
Gold (per fine tola). Silver (per 100 tolas gross).

Year.	Highest.	Lowest.	Average.	Import Duty.	Highest.	Lowest.	Average.	Import Duty.

## NATIONAL INCOME

NATIONAL income in 1953-54 (at current prices): Rs. 10,600 crores; in 1952-53: Rs. 9,860 crores; in 1951-52: Rs. 9,990 crores; in 1950-51: Rs. 9,530 crores; in 1949-50: Rs. 9,010 crores; in 1948-49: Rs. 8,650 crores.

Per capita income in Rs. in 1953-54: 283.9; in 1952-53: 267.4; in 1951-52: 274.5; in 1950-51: 265.2; in 1949-50: 253.9; in 1948-49: 246.9.

According to the final report of the National Income Committee, February 1954, agriculture, animal husbandry, and ancillary activities contributed 51.3 per cent of the national income in 1950-51. Commerce,

transport and communications accounted for 17.7 per cent. Commodity production taken roughly as the total value contributed by agriculture, mining, manufacturing and hand-trades amounted to Rs. 64.2 abja (abja = Rs. 100 crores) or 67.4 per cent of the total national income.

The estimated national income for 1950-51 was Rs. 95.3 abja against Rs. 90.1 abja in 1949-50 and Rs. 86.5 abja in 1948-49.

According to the National Income Committee and the Central Statistical Organisation, National Income of India, at current prices, rose from Rs. 8,650 crores in 1948-49 (revised) to Rs. 9,990

crores in 1951-52, and to Rs. 10,600 crores in 1953-54.

The population in 1951 was taken as 361.2 million and consequently the *per capita* national income worked out at Rs. 265.2. This *per capita* income, at current prices, rose to Rs. 274.5 in 1951-52 and to Rs. 283.9 in 1953-54. This increase should be viewed in the context of a rise in population by 1.3 per cent to an estimated total of 373.37 millions.

The following tables give a broad picture of the distribution of national income though the Committee itself is aware of the limitations of the second table: The first column gives the output in Rs. Abja.

## PRICE MOVEMENTS

THE year 1955-56 was one of mounting inflationary pressures in many countries of the world. But their extent and sources varied from country to country, though there were some common features. In countries like Canada, France, Western Germany, the U.K. and the U.S.A., the rise in the general index was about two per cent only; but in France the index of raw material prices rose by six per cent and in the U.K. basic material prices rose by seven per cent. In the U.S.A., farm prices declined substantially, while prices of non-farm products rose.

In India, during 1955, there was hardly any net change in the wholesale price index; but the trends in the first and second halves of the year were different. In the financial year 1955-56, however, there was a substantial rise of about 2 per cent in marked contrast to the sharp decline in commodity prices in 1954-55. While the rise to a substantial extent was a correction of the sharp fall in the previous year, it also reflected the decline in output of some primary commodities and the rise in exports in particular of raw cotton and oils and seeds. It also appeared that the higher rate of invest-

ment outlay in the economy and rising consumption expenditure also contributed to the rise in prices.

Over the year 1955-56 the general index of wholesale prices (base: year ended August 1939=100) rose by 11.6 per cent. At the end of March 1956 the index stood at 390.3 which was close to the level which prevailed two years before. However, the average for the year at 360.3 was 4.6 per cent lower than that for 1954-55. But in April and May 1956, a substantial measure of price stability prevailed.

INDEX NUMBERS OF WHOLESALE PRICES (1939)

Aug. 1939 = 100

Year.	Food.	Industrial raw materials.	Semi-manufactures.	Manufactures.	Miscellaneous.	All commodities.

1955-56 .. .. .	313.2	419.7	338.2	372.9	546.4	360.3

### REVIEW OF PRICES FROM 1939

The outbreak of the Second World War in September 1939 introduced a new chapter in the history of Indian commodity prices. After an initial rise, the prices received a sharp setback following the loss of export markets; but the entry of Japan into the war made heavy calls on India's resources from the Allies and the resultant rise in note circulation aggravated inflationary pressures and the pace of the rise. The index number of wholesale prices, with the week ended August 19, 1939 equal to 100, rose to 125.6 in 1939-40, but receded in the following year by 10.8 to 114.8. Then it advanced by 19 per cent to 137.0 in 1941-42, again by 25 per cent to 171.0 in 1942-43 and recorded the highest rise of 38 per cent in any one year during 1943-44 when it touched 236.4.

During 1944-45 the price index advanced by only 7.8 to 244.2 and reached 244.9 in the following year.

It was during 1946-47 that the policy of decontrol sent up the general price index by about 11 per cent to 275.4 and further to 307.0 in 1947-48.

Price-trends during 1948-49 fell into two distinct phases—a continued rise from April to July and a comparative stability during the rest of the year, with signs of a downward trend in the last quarter of the year.

The latter phase was associated with the reimposition of controls, and a net contraction of Rs. 18 crores in money supply during the last eight months of the year. The general index number, with the year ended August 1939 as the base,

shot up from 347.9 to 389.6 by July and then tapered off to 370.2, the average for the year being 376.2 revealing a rise of 22 per cent over the year.

With the opening of the financial year of 1949, the prices began to advance upward till the Economic Adviser's general index, which stood at 370.2 in March 1949, touched 389.8 in September 1949 which exceeded the post-decontrol peak level reached in July 1948 and climbed to 393.3 in October 1949. The jump resulted in part from a sharp rise in the prices of certain export goods, in particular, tea, black pepper, oils and oil-seeds.

Following the devaluation of the rupee, the Government of India adopted an eight-point anti-inflationary programme including a voluntary cut in the prices of manufactured goods and brought down the price index from 393.3 in October to 381.3 in December 1949. These efforts, however, proved temporary and practically the whole of the improvement of the preceding two months was lost by the close of March 1950, the general index moving up to 392.4 in March. The average for the year worked out at 386.4 as against 376.2 in 1948-49.

The uptrend in the general price level noticed during the closing quarter of 1949-50 gathered further momentum in the following year, particularly in the latter half.

The continuation of the gradual rise in prices since devaluation was accelerated with the outbreak of the Korean war and prices reached a peak at 438.6 in March 1951

recording a rise of 11.8 per cent over the year as against a rise of 6.0 per cent in 1949-50. The rise was, however, less marked than that in the U.K. and the U.S. where the increase was as much as 27.4 per cent and 20.3 per cent respectively.

To meet the situation, the Finance Minister enunciated in August 1950 an eight-point programme outlining the major objectives of Government's economic and financial policy, which envisaged measures to hold the price line and to ensure, through increased production, economies and larger supplies, that the inflationary pressures did not get out of hand. Steps were taken to relax import controls and prevent hoarding of foodgrains through an amendment of the Essential Supplies (Temporary Powers) Act, 1946. The Centre also assumed powers to legislate for one year from August 15, 1950 in respect of trade and commerce and production, supply and distribution of goods and these were extended later by another year.

This was followed by the promulgation of the Supply and Price of Goods Ordinance. As an anti-inflation measure and in view of the wide disparity between the internal and external prices, fresh export duties on certain commodities were levied or the rates of existing duties were raised as in the case of hessian, sackings, raw cotton, cotton waste and raw wool.

These measures had in part a steadying effect on the general trend of prices, the months of October and November registering a decline.

Thereafter the prices resumed an upward trend which became pronounced following the Chinese intervention in the Korean war and touched a

high level at 438.6 in March 1951. The prolongation of the Korean war, rising import prices, heavy export commitments and higher prices granted by Government in a number of controlled commodities like sugar, sugarcane, gur, food-grains, cotton textiles and rubber, contributed to the uptrend in prices; it also embodied the result of the decontrol of prices of raw jute and jute manufactures on March 9, 1951.

In December 1950 Government increased the prices of sugarcane and sugar from Rs. 1-10 and Rs. 28-8 per maund respectively fixed earlier in October at the preceding season's level to Rs. 1-12 and Rs. 29-12. Gur prices were raised further and the pool price of imported food was raised in January because of a rise in overseas prices and freight charges.

The rise in import prices of raw cotton and the grant of an increase of Rs. 150 per candy for indigenous cotton for the 1950-51 cotton season was announced on June 16, 1950 but its effect by way of higher prices for cotton manufactures was noted only in the closing stages of the year under review.

During the first quarter of 1951, the prices of coarse, medium, fine and superfine cloth were raised by anything between 6 per cent in the case of superfine and 17½ per cent in the case of coarse varieties. The voluntary cut of four per cent in yarn prices was restored on March 5. An interim increase in the price of raw rubber from Rs. 90-8 to Rs. 122-8 per 100 lb. was granted with effect from March 7, 1951.

The fight against inflation in the financial year 1951-52 was greatly assisted by three factors. The first was the budget which aimed at a substantial revenue surplus and sought to finance the railway development by raising passenger fares. Later, the surplus estimated at Rs. 26.1 crores in the budget was revised upward to Rs. 92.61 crores. This substantial transfer of purchasing power from the hands of the public to the exchequer helped to hold inflation in check. Secondly, the sale proceeds of the wheat obtained from the American loan also had the same effect of reducing the money supply in the hands of the public.

Another important step was taken in the middle of November 1951 by the raising of the Bank Rate from three per cent at which it stood from November 1935 to 3½ per cent. The third factor was of an international character. Following the economic difficulties caused by the burden of the re-armament drive, country after country led by the United Kingdom imposed import restrictions, while the United States had to prune defence expenditure because of the danger of inflation.

As a result of the above factors, the general price index steadily sagged from 457.5, the all

time peak level touched in April 1951, to 433.1 in the last month of 1951. Though overseas food prices ruled remarkably firm, the Indian food prices dropped by 2½ per cent and those of industrial raw materials dropped by more than 12 per cent. By the time the new year opened, exports proved difficult owing to buyers' resistance, while the monetary squeeze had rendered hoarding difficult despite credit expansion. Conditions deteriorated in February when the crop movement was in full swing and the general price index fell further to 415.9 thereby wiping out the advance of the past 13 months.

In July 1954, the Union Government decided to support prices of foodgrains if they fell below certain levels, and were uneconomic for growers. In pursuance of this policy, Uttar Pradesh, Punjab, and Rajasthan decided to purchase wheat in case prices fell below Rs. 10 per maund.

In December 1954, the Union Government decided to purchase from cultivators jowar and maize at Rs. 5-8 per maund and bajra at Rs. 6 per maund.

In Madras, the Government constituted an *ad hoc* committee to watch the prices of rice, bajra and other commodities and to take prompt measures to stabilize them when necessary.

Export incentives were also given by the grant of additional export quotas for a number of agricultural and industrial products, and export duties in commodities such as cotton, oils, oilseeds, pepper and rice were either reduced or abolished.

Within the overall declining trend during 1954-55, price movements showed three broad phases. In the first phase from mid-April to the end of June, prices fell by 6 per cent to 378.4. The second phase from July to September was one of relative steadiness; the index moved narrowly and rose by 1.6 per cent to 384.3. In the last phase, covering the second part of the year, the downward trend was resumed, and the index fell sharply by 9.1 per cent to 349.3.

The progressive policy of decontrol was carried a stage further. In July 1954 controls in respect of rice were lifted and in March 1955, restrictions on zonal movement of wheat were removed. The control over movement of cotton was removed in July 1954 while on distribution was lifted in February 1955. Although price control was retained, the "floor" for 1954-55 was reduced by Rs. 55 to Rs. 495 per candy. Issue prices of imported wheat and rice were reduced but in the case of raw rubber, the minimum price was raised by Rs. 12 to Rs. 150 per 100 lbs.

As regards sugar, the Government announced in November 1954 that there would not be any statutory control on the price or distribution of sugar, but that 25 per cent of the sugar output

would continue to be at the disposal of Government. The minimum price of sugarcane was left unchanged at Rs. 1-7 per maund, but a formula for linking the price of sugarcane to the price of sugar was applied to the 1953-54 crop.

In view of the marked change in the price trend in 1955-56, Government's price policy was switched on towards a policy of arresting the upward trend. In January-February 1956, Government imposed a ban on exports of food grains, namely, jawar, maize, pulses, including grass and gram flour, rice and wheat products. Further, stocks of wheat and rice with the Government were released for sale in the open market and fair price shops for food grains were opened in various centres. In April 1956 it was decided to import during 1956 one million tons each of wheat and rice. Accordingly negotiations were conducted with the Government of Burma for the import of 2 million tons of rice over a period of five years commencing from June 1, 1956. It was also decided that the Government would participate in the new International Wheat Agreement tenable for three years from August 1, 1956.

Credit policy has also been geared towards the same objective. In April 1956, the Reserve Bank asked for more detailed and frequent data from banks regarding their advances, with a view to taking suitable action if credit was being extended for speculative purposes. Again on May 17, 1956, the Bank issued a directive to banks asking them to refrain from excessive lending against commodities and in particular against paddy and rice; the margin maintained by banks in respect of advances against rice and paddy was to be uniformly raised. Banks were also asked to endeavour to achieve a reduction in their aggregate advances against paddy and rice to a level which would not be more than 25 per cent. above that of the corresponding week of the previous year.

In regard to oils and oilseeds, the Government's chief measure was the stepping up of export duties. In April 1956, the export duty on castor oil was raised from Rs. 125 to Rs. 175 per ton and fresh export duties were imposed on linseed oil at Rs. 250 per ton and on kerdised oil and nigerseed oil at Rs. 200 per ton.

In order to check the sharp rise in cotton prices, Government had to intervene in the Bombay futures market. Forward trading was suspended for two weeks from December 24, 1955, to January 7, 1956 and again from January 25, after squaring up compulsorily all transactions at Rs. 700 per candy for February contract and Rs. 686-8 for May contract.

[The account is brought up-to-date in Late Particulars.]

## INDUSTRIAL STRUCTURE AND POLICY

**I**NDUSTRIAL production in India has been maintaining an upward trend in many directions since independence in August 1947.

The Interim Index of Industrial production, with 1945 as the base, advanced from 97.2 in 1947 to 108.4 in 1949, slightly receded to 106.1 in the following year and further to 105.0 in 1950 mainly because of the heavy fall in the output of cotton textiles, but it advanced sharply to 128.9 in 1952. In 1953 it stood at 135.2 and increased further to 146.6 in 1954. During the first ten months of 1955, the general index averaged 159.4.

An elaborate census of Indian manufactures covering 29 groups of industries has been in

progress since 1949; of these the producer gas industry no longer exists. There was no factory in this industry in 1952. The industries covered by the census are wheat flour, rice milling, biscuit making, fruit and vegetable processing, sugar and gur, distilleries and breweries, starch, oil-seed crushing and extraction and processing of vegetable oils and manufacture of edible hydrogenated oils; paints and varnishes, soap, tanning, cement, glassware, ceramics, plywood, paper and paperboard, matches, cotton textiles, woollen textiles, jute textiles, chemicals, drugs and pharmaceuticals, non-ferrous metals, iron and steel, bicycles, sewing machines, producer gas plants, electric pumps, electric fans and general and electrical engineering.

The latest report covers these industries for 1953. The following picture has emerged:—

	1952	1953
No. of Factories ..	7,155	7,104
Fixed Capital (Rs. crores) ..	300.94	324.92
No. of employees (million) ..	1.648	1.628
Wages and Salaries (Rs. crores) ..	200.75	205.21
Materials Consumed (Rs. crores) ..	865.94	788.52
Value of Products (Rs. crores) ..	11,83.97	11,22.78
Value added by manufacture (Rs. crores) ..	315.08	334.25

### INDUSTRIAL POLICY RESOLUTION

#### THREE CATEGORIES

After considering all aspects of the problem, in consultation with the Planning Commission, the Government of India have decided to classify industries into three categories having regard to the part which the State should play in each of them. It should also be remembered that it is always open to the State to undertake any type of industrial production.

In the first category will be industries, the future development of which will be the exclusive responsibility of the State. The second category will consist of industries, which will be progressively State-owned and in which the State will, therefore, generally take the initiative in establishing new undertakings, but in which private enterprise will also be expected to supplement the efforts of the State. The third category will include all the remaining industries, and their future development will, in general, be left to the initiative and enterprise of the private sector.

Industries in the first category have been listed in Schedule A of this resolution. All new units in these industries, save where their establishment in the private sector has already been approved, will be set up only by the State. This does not preclude the expansion of the existing privately owned units, or the possibility of the State securing the co-operation of private enterprise in the establishment of new units when the national interests so require.

Railways and air transport, arms and ammunition and atomic energy will, however, be developed as Central Government monopolies. Whenever co-operation with private enterprise is necessary, the State will ensure, either through majority participation in the capital, or otherwise, that it has the requisite powers to guide the policy and control the operations of the undertakings.

Industries in the second category will be those listed in Schedule B. With a view to accelerating their future development, the State will increasingly establish new undertakings in these industries. At the same time private enterprise will also have the opportunity to develop in this field, either on its own or with State participation.

All the remaining industries will fall in the third category and it is expected that their development will be undertaken ordinarily through the initiative and enterprise of the private sector, though it will be open to the State to start any industry even in this category. It will be the policy of the State to facilitate and encourage the development of these industries in the private sector, in accordance with the programme formulated in successive Five-Year Plans, by ensuring the development of transport, power and other services, and by appropriate fiscal and other measures.

The State will continue to foster institutions to provide financial aid to these industries, and special assistance will be given to enterprises

organised on co-operative lines for industrial and agricultural purposes. In suitable cases, the State may also grant financial assistance to the private sector. Such assistance, especially when the amount involved is substantial, will preferably be in the form of participation in equity capital, though it may also be in part in the form of debenture capital.

Industrial undertakings in the private sector have necessarily to fit into a framework of the social and economic policy of the State and will be subject to control and regulation in terms of the Industries (Development and Regulation) Act and other relevant legislation. The Government of India, however, recognise that it would, in general, be desirable to allow such undertakings to develop with as much freedom as possible, consistent with the targets and objectives of the national plan. When there exist in the same industry both privately and publicly owned units, it would continue to be the policy of the State to give fair and non-discriminatory treatment to both of them.

In appropriate cases, privately owned units may be permitted to produce an item falling within Schedule A for meeting their own requirements or as by-products. There will be ordinarily no bar to small privately owned units undertaking production, such as the making of launches and other light-craft, generation of power for local needs and small scale mining. Further, heavy industries in the public sector may obtain some of their requirements of lighter components from the private sector, while the private sector in turn would rely for many of its needs on the public sector. The same principle would apply with even greater force to the relationship between large-scale and small-scale industries.

#### COTTAGE INDUSTRIES

In relation to some of the problems that need urgent solutions, these offer some distinct advantages. They provide immediately large-scale employment; they offer a method of ensuring a more equitable distribution of the national income and they facilitate an effective mobilisation of resources of capital and skill which might otherwise remain unutilised. Some of the problems that unplanned urbanisation tends to create will be avoided by the establishment of small centres of industrial production all over the country.

The State has been following a policy of supporting cottage and village and small scale industries by restricting the volume of production in the large-scale sector, by differential taxation, or by direct subsidies. While such measures will continue to be taken, whenever necessary, the aim of State policy will be to ensure that the decentralised sector acquires sufficient vitality to be self-supporting and its development is integrated with that of large-scale industry.

The State will, therefore, concentrate on measures designed to improve the competitive

The Government of India's industrial policy resolution was presented to the Lok Sabha on 30th April, 1956.

The following is a summary of the text:

Eight years have passed since the first declaration on industrial policy.\* These eight years have witnessed many important changes and developments in India. The Constitution of India has been enacted, guaranteeing certain fundamental rights and enunciating directive principles of State policy. Planning has proceeded on an organised basis, and the first Five-Year Plan has recently been completed. Parliament has accepted the socialist pattern of society as the objective of social and economic policy.

These important developments necessitate a fresh statement of industrial policy, more particularly as the Second Five-Year Plan will soon be placed before the country. This policy must be governed by the principles laid down in the Constitution, the objective of socialism, and the experience gained during these years.

These basic and general principles were given a more precise direction when Parliament accepted in December, 1954, the socialist pattern of society as the objective of social and economic policy. Industrial policy, as other policies, must, therefore, be governed by these principles and directions.

In order to realise this objective, it is essential to accelerate the rate of economic growth and to speed up industrialisation and, in particular, to develop heavy industries and machine making industries, to expand the public sector, and to build up a large and growing co-operative sector.

Equally, it is urgent, to reduce disparities in income and wealth which exist today, to prevent private monopolies and the concentration of economic power in different fields in the hands of small numbers of individuals. Accordingly, the State will progressively assume a predominant and direct responsibility for setting up new industrial undertakings and for developing transport facilities.

It will also undertake State trading on an increasing scale. At the same time, as an agency for planned national development, in the context of the country's expanding economy, the private sector will have the opportunity to develop and expand. The principle of co-operation should be applied wherever possible and a steadily increasing proportion of the activities of the private sector developed along co-operative lines.

The adoption of the socialist pattern of society as the national objective, as well as the need for planned and rapid development, require that all industries of basic and strategic importance, or in the nature of public utility services, should be in the public sector. Other industries which are essential and require investment on a scale which only the State, in the present circumstances, could provide, have also to be in the public sector. The State has, therefore, to assume direct responsibility for the future development of industries over a wider area.

\* See next page for the declaration.

strength of the small-scale producer. For this it is essential that the technique of production should be constantly improved and modernised, the pace of transformation being regulated so as to avoid, as far as possible, technological unemployment.

Lack of technical and financial assistance, of suitable working accommodation and inadequacy of facilities for repair and maintenance are among the serious handicaps of small-scale producers. A start has been made with the establishment of industrial estates and rural community workshops to make good these deficiencies. The extension of rural electrification and the availability of power at prices which the workers can afford will also be of considerable help.

Many of the activities relating to small-scale production will be greatly helped by the organisation of industrial co-operatives. Such co-operatives should be encouraged in every way and the State should give constant attention to the development of cottage and village and small-scale industries.

### REGIONAL DEVELOPMENT

In order that industrialisation may benefit the economy of the country as a whole, it is important that disparities in levels of development between different regions should be progressively reduced. The lack of industries in different parts of the country is very often determined by factors such as availability of the necessary mineral and other natural resources. A concentration of industries in certain areas has been due to the ready availability of power, water supply and transport facilities which have been developed there. It is one of the aims of national planning to ensure that these facilities are steadily made available to areas which are at present lagging behind industrially or where there is greater need for providing opportunities for employment, provided the location, is otherwise suitable.

This programme of industrial development will make large demands on the country's resources of technical and managerial personnel. To meet these rapidly growing needs for the expansion of the public sector and for the development of village and small-scale industries, proper managerial and technical cadres in the public services are being established.

Steps are also being taken to meet shortages at supervisory levels, to organise apprenticeship schemes of training on a large-scale both in public and in private enterprises, and to extend training facilities in business management in universities and other institutions.

The living and working conditions of workers should be improved and their standard of efficiency raised. The maintenance of industrial peace is one of the prime requisites of industrial progress. In a socialist democracy labour is a partner in the common task of development and should participate in it with enthusiasm.

Some laws governing industrial relations have been enacted and a broad common approach has developed. With the growing recognition of the obligations of both management and labour there should be joint consultation and workers and technicians should, wherever possible, be associated progressively in management. Enterprises in the public sector have to set an example in this respect.

With the growing participation of the State in industry and trade, the manner in which these activities should be conducted and managed assumes considerable importance. Speedy decisions and a willingness to assume responsibility are essential if these enterprises are to succeed. For this, wherever possible, there should be decentralisation of authority and their management should be along business lines. It is to be expected that public enterprises will augment the resources of the State and provide resources for further development in fresh fields. But such enterprises may sometimes incur losses. Public enterprises have to be judged by their total results and in their working they should have the largest possible measure of freedom.

The Industrial policy resolution of 1948 dealt with a number of other subjects which have since been covered by suitable legislation or by authoritative statements of policy. The division of responsibility between the Central Government and the State Governments in regard to industries has been set out in the Industries (Development and Regulation) Act. The Prime Minister, in his statement in Parliament on April 6, 1949, has enunciated the policy of the State in regard to foreign capital. It is, therefore, not necessary to deal with these subjects in this resolution.

### SCHEDULE A

The future development of the following industries will be the exclusive responsibility of the State:

1. Arms and ammunition and allied items of defence equipment.
2. Atomic energy.
3. Iron and steel.
4. Heavy castings and forgings of iron and steel.
5. Heavy plant and machinery required for iron and steel production, for mining, for machine tool manufacture and for such other basic industries as may be specified by the Central Government.
6. Heavy electrical plant including large hydraulic and steam turbines.
7. Coal and lignite.
8. Mineral oils.
9. Mining of iron ore, manganese ore, chrome ore, gypsum, sulphur, gold and diamond.
10. Mining and processing of copper, lead, zinc, tin, molybdenum and wolfram.
11. Minerals specified in the schedule to the Atomic Energy (Control of Production and Use) Order, 1953.
12. Aircraft.
13. Air transport.
14. Railway transport.
15. Shipbuilding.
16. Telephones and telephone cables, telegraph and wireless apparatus (excluding radio receiving sets).
17. Generation and distribution of electricity.

### SCHEDULE B

The following industries will be progressively State-owned. The State will generally take the initiative in establishing new undertakings but private enterprise will not be excluded.

1. All other minerals except "minor minerals" as defined in section 8 of the Minerals Concession Rules, 1949.
2. Aluminium and other non-ferrous metals not included in Schedule "A".
3. Machine tools.
4. Ferro alloys and tool steels.
5. Basic and intermediate products required by chemical industries such as the manufacture of drugs, dyestuffs and plastics.
6. Antibiotics and other essential drugs.
7. Fertilizers.
8. Synthetic rubber.
9. Carbonisation of coal.
10. Chemical pulp.
11. Road transport.
12. Sea transport.

### ORIGINAL RESOLUTION

The original declaration of industrial policy was made on April 6, 1948 by the Government of India and is given below for purposes of record. This has been superseded by the one given at the top.

(1) The manufacture of arms and ammunition, the production and control of atomic energy, and the ownership and management of railway transport should be the exclusive monopoly of the Central Government.

(2) The State will be responsible for the establishment of new undertakings in the field of coal, iron and steel, aircraft manufacture, shipbuilding, manufacture of telephone, telegraph and wireless apparatus excluding radio receiving sets and mineral oils. Existing undertakings will be allowed to develop for a period of ten years and Government will give all assistance for such development. At the end of the period their position will be reviewed.

(3) Control by the State over the generation and distribution of electric power will continue.

(4) Rest of the industries will normally be open to private enterprise with varying degrees of control over location.

(5) The Central Government would investigate the extent to, and the manner in which cottage and small scale industries could be co-ordinated and integrated with large scale industries.

This policy was re-affirmed in the course of a debate in December 1954, though Government had set a new goal for the country—the establishment of a socialistic pattern of society.

### INDUSTRIES DEVELOPMENT & REGULATION ACT

Towards the end of 1951 Parliament passed the Industries (Development and Regulation) Bill. The Act applies to 37 industries listed in the First Schedule to the Act.

The most important provision is the establishment of Development Councils which will deal with the problem of productivity and service to the community.

At the top will be the Central Advisory Council for Industries which will advise Government on rules, directions to industrial undertakings and taking over the management of industrial concerns.

The Act provides for the registration of existing industrial undertakings and licensing of new ones.

It also empowers Government to investigate into the causes of any possible fall in the production of any concern or any deterioration in the quality of the product, and to take action.

The Act contains provisions for direct control by the Central Government in certain cases.

In the middle of 1952 a Central Advisory Council of Industries was established, consisting of 27 representatives of industry, labour, consumers and primary producers pertaining to the scheduled industries.

Upto November 1, 1952, which was the last date prescribed for registration under the Act, 3,562 undertakings had applied for registration. Of these 2,209 were found to be eligible for registration.

A Licensing Committee has also been set up consisting of representatives of the Ministries of Commerce and Industry, Finance, Railways, Production and of the Planning Commission to examine application for licences. Between October 1953 and November 1954, 502 applications for licences were received. Licences were granted in 422 cases, refused in 84, and 26 cases were referred back to the parties.

During 1955, the Licensing Committee examined 756 applications for licences and granted licences in 563 cases, rejecting 119 cases. Of the remaining applications, a few were withdrawn and the rest were deferred for consideration at a later date. Out of the schemes approved, 164 were for the establishment of new undertakings; 319 for effecting substantial expansion and for manufacture of new articles; five for change of location of factories and 75 for carrying on the business of existing undertakings.

There was only one case up to 1953 August in which Government ordered an investigation into the circumstances of an undertaking.

The scope of the Act was enlarged in 1953.

The Government, by a notification issued in the Gazette of India Extraordinary, dated March 1, 1957, brought the Industries (Development and Regulation) Amendment Act, 1956, into force with immediate effect.

The following are among the new industries\* listed in this Act: Ferro-alloys and special steels, lignite, television sets, teleprinters, amplifying and public address equipment, electrical furnaces, X-ray equipment, abrasives and grinding wheels, commercial, office and household equipment, refrigerators, medical and surgical appliances, plastics moulding industries, industrial instruments, fine chemicals including photographic chemicals, synthetic resins and plastics, paints, varnishes and enamels, man-made fibres including regenerated cellulose rayon, nylon and the like, explosives including gunpowder and safety fuses, insecticides, fungicides, weedicides, textile accessories and auxiliaries, textile processing, photographic raw films and printing paper, pulp-wood pulp, mechanical, technical including dissolving pulp, fermentation industries, food processing industries, organic fertilisers, hard-board and chipboard, asbestos cement, insulating boards, gypsum boards, wall boards, matches, cigarettes, fire fighting equipment and appliances, including fire engines, and sizing materials including starch.

All undertakings pertaining to these industries, employing 50 or more workers with the aid of power, or 100 or more workers without the aid of power, would now fall within the purview of the Industries (Development and Regulation) Act, 1951, as amended.

### DEVELOPMENT COUNCILS

In addition to the Development Councils for Heavy Chemicals (Acids and Fertilisers), Internal Combustion Engines and Power-driven Pumps and Sugar, which were set up earlier, Development Councils for Light Electrical and Heavy Electrical Industries, Pharmaceuticals and Drugs, Heavy Chemicals (Alkalies), Woolen Textiles and Art Silk Textiles were set up during 1955. In 1956, two more Development Councils were formed, one for Machine Tools and one for Bicycles. Altogether there were 12 Councils at the end of 1956.

Besides, a number of Panels or Expert Committees for inquiring into and studying the development of a number of important industries were set up. The following is the list of the Panels and Committees thus set up: Agricultural Tractors; Aluminium; Earth Moving and Allied Equipment; Electronics and Wireless Equipment; Paper and Pulp; X-Ray Equipment; Surgical Appliances; Power Alcohol; and Sago

### STATE AID TO INDUSTRIES

For the development of more important industries for which sufficient capital is not likely to be forthcoming from private resources, Government has been giving financial assistance to the promoters of the schemes by granting loans on special terms or by participating in equity capital. The industries to which such assistance is being rendered include the manufacture of explosives for civilian purposes, intermediates for certain types of dyestuffs and textile machinery, besides steel production.

With regard to foreign assistance, each case is considered on its merits subject to the provisions in the Industrial Policy Statement. Generally permission is not granted for investment of foreign capital in purely commercial or trading concerns unless technical know-how is an essential aspect of the trading activities. During 1955, efforts were made to secure technical help for the development of our industries under the International Technical Assistance Schemes such as Point Four Programme, Colombo Plan, etc.

In order to assist exports, Export Promotion Councils for various industries are also being set up. Two such Councils were formed in 1954—Cotton Textiles Export Promotion Council; and Silk and Rayon Textiles Export Promotion Council; and three in 1955—the Plastics, Engineering and Cashew and Pepper Promotion Councils.

### REGULATED INDUSTRIES

The Industries (Development and Regulation) Bill which received the assent of the President on Oct. 31, 1951 and came into force on May 8, 1952 applies to the following 37 industries:

Aircraft; arms and ammunition; automobiles including tractors; agricultural implements; batteries, dry cells and storage; bicycles; coal, coke and their derivatives; cement; electric lamps and fans; electric motors; glass and ceramics; heavy chemicals including fertilizers; heavy machinery including ball and roller bearing, gear wheels, steam generator equipment; hurricane lanterns; iron and steel; internal combustion engines; locomotives and rolling stock; leather and leather goods; mathematical and scientific instruments; motor and aviation fuel, kerosene, crude oils and synthetic oils; machine tools; machinery and equipment for the generation, transmission and distribution of electric energy; non-ferrous metals including alloys; paper including newspaper and paper-board; pharmaceuticals and drugs; power and industrial alcohol; power-driven pumps; rubber goods; radio receivers; ships and other vessels propelled by mechanical power; sugar; sewing and knitting machines; small tools and hand tools; telephones, telegraph apparatus and wireless communication apparatus; textiles made wholly or partly by cotton and jute; textiles made of wool; vanaspathi and vegetable oils.

### FIVE-YEAR PLANS

The First Five-Year Plan provided for completion of the various industrial projects already under implementation by the Central Government or by the State Governments.

In addition, the Central Government has had a special responsibility for establishing certain defence industries.

The progress of industry during the First Five-Year Plan appears satisfactory, as much spade-work has been done with regard to many projects, though the targets have not been achieved by the end of the Plan. As against Rs. 101 crores proposed to be spent in the public sector on industrial projects, the actual outlay was only Rs. 57 crores, while the total gross investment in fixed capital in the private sector during the Plan period was about Rs. 340 crores as against Rs. 463 envisaged. But the first plan was regarded essentially as a period of preparation for large-scale industrial development in the country.

In the context of industrialisation, there are two important problems—the industrial policy and industrial priorities. With regard to the first, the Government made a fresh statement of policy on April 30, 1956.† Within the framework of this policy, the following priorities are listed: (a) increased production of iron and steel and of heavy chemicals, including nitrogenous fertilizers and development of the heavy engineering and machine building industries; (b) expansion of capacity in respect of other developmental commodities and producer goods; (c) modernisation and re-equipment of important national industries which have already come into existence; (d) fuller utilisation of existing installed capacity; and (e) expansion of capacity for consumer goods.

In conformity with this order of priorities, the Second Five-Year Plan envisages the construction of three steel plants of one million tons ingot capacity each in the public sector and the provision of facilities in one of these for the production of 350,000 tons of foundry grade pig iron. Provision has also been made for the expansion of steel production by the Mysore Iron and Steel Works to 100,000 tons by 1960-61.

Other schemes include manufacture of electrical equipment; expansion of Hindustan Machine Tools; manufacture of industrial machinery and machine tools; expansion of the Government Electric Factory, Bangalore; development of the South Arcot Lignite Project at Neyveli; establishment of two more fertilizer factories in the Punjab and at Rourkela; expansion of Hindustan Shipyard and the Chittaranjan Locomotive Factory; expansion of the existing D.D.T. and antibiotic factories and establishment in Kerala of a second D. D. T. plant; establishment of a security paper mill.

Industrial projects of State Governments include (1) expansion of Mysore Iron and Steel Works, Government Porcelain Factory, Mysore Implements Factory, Govt. Electric Factory, Govt. Soap Factory, and Central Industrial Workshop in Mysore State; (2) Expansion of U.P. Govt. Cement Factory and Precision Instrument Factory; (3) Bihar Superphosphate Factory, expansion of Spun Silk Mill and Porcelain Factory; (4) Expansion of Praga Tools Factory and Govt. Tannery in Hyderabad; (5) Expansion of Travancore Rubber Works, China Clay Scheme, Travancore Minerals and Hard Sand Bricks Factory; (6) Expansion of Sri Venkateswara Board Mills, Andhra Paper Mills and Andhra Ceramic Factory; (7) Cotton Spinning Mill, Distillery, Solvent Extraction Plant, Gwalior Leather and Tannery Factory, and expansion of Gwalior Potteries by the Madhya Pradesh Government; (8) the Textile Mill, Spun Silk Mill and Sugar Mill of Assam; (9) Silk Spinning Plant and expansion of Govt. Woolen Factory, Drug Factory and Silk Weaving Plant in Kashmir; (10) Sandalwood Oil Factory, timber seasoning kiln and creosoting plant in Coorg; (11) a Sugar Mill and a Spinning Mill in Pondicherry.

New investment on the industrial projects of the Central Government (excluding the provision for the National Industrial Development Corporation of Rs. 55 crores) is expected to be about Rs. 502 crores during the Second Plan period and of the States about Rs. 32 crores. The programme of overall development under the private sector and the NIDC will cost about Rs. 720 crores, comprising Rs. 570 crores of new investments and Rs. 150 crores on replacements and modernisation.

\* For the original list of industries see next page.

† Given at the beginning of the article.

## NEW METRIC SYSTEM OF WEIGHTS AND MEASURES

THE Government of India have now decided to adopt the metric system as the sole system of weights and measures in India, thus bringing about uniformity throughout the country. It will come into usage by stages probably spread over 10 to 15 years. As a corollary to this the decimalization of coinage, the new system of coinage, has come into use with the financial year 1957-58.

Various Government departments have been asked to draw up schemes for a change-over to the metric system. It is likely that in order to familiarize the public with the new units the system may be introduced first in some public utility departments such as Railways, Posts and Telegraphs and Airways.

The decision to adopt the metric system was not made in a hurry. It was preceded by nearly a century of study and discussion.

Even in the 19th Century the question of standardizing weights and measures in India received much attention from successive Governments, Central and Provincial. The work of a Committee appointed by the Government of India in 1867-68 is worthy of special mention. Though it recommended the adoption of the British system of weights and measures there was a strong note of dissent by Col. Richard Strachey, himself an engineer and administrator, which led the Government to decide in favour of the metric system. The Indian Weights and Measures Act of 1870 was passed which defined the kilogram as the standard of weight and equated the seer with kilogram and the seer capacity measure with litre. This Act however did not receive the sanction of the Secretary of State who raised some objections. A modified Act which met the Secretary of State's objections—Act XXXI of 1871—also remained a dead letter. Thereafter, the metric system went out of favour. The Measures of Length Act was passed in 1889 fixing the Imperial Yard and its subdivisions as the primary units of length. This Act is still current.

In 1914, another Committee, after an extensive survey of the diversity of weights and measures in the country, recommended that a uniform system should be adopted throughout India. As regards the system itself, two members recommended a combination of the British and Indian systems, while the third member presented a strong note of dissent, advocating the adoption of the metric system. No legislative action was taken following this report, and it was only in 1929 that the Indian Standards of Weights Act (Act IX) of 1939 was passed repealing the Act of 1871. This Act prescribed the weights in terms of the tola-seer-maund series and the grain-pound-ton series. The enforcement of the Act was in the discretion of the States; some of them therefore passed the necessary Acts incorporating the provisions of the Central Act. These States included Assam, Bihar, Bombay, Madras, Orissa, Punjab and Uttar Pradesh from the former Part A States, Hyderabad, Madhya Bharat, Mysore, Rajasthan and Travancore-Cochin from the former Part B States, and Bhopal and Coorg from the former Part C States. Actual enforcement does not appear to have been particularly effective except in Bombay State. For, the local weights and measures still continue to be used in most of the States, with variations from village to village and market to market, causing a lot of confusion in the day to day trade of the country.

Since 1939, opinion in favour of the metric system has been steadily growing. The Manufacturing Subcommittee of the National Planning Committee of 1940 and the Indian Science Congress of 1946, the latter under the presidency of Mr. Nehru favoured the adoption of the metric system.

In 1946 a Decimal Coinage Bill was introduced by Government in the Central Legislature but the political conditions then prevailing made it impossible to proceed with it.

To investigate the question of weights and measures thoroughly and to make specific recommendations to the Government, the Indian Standards Institution (ISI) appointed a Special Committee in May 1948 with the concurrence of the Government of India. This Special Committee consulted all the various Industrial, commercial and trade interests as well as Government departments and others affected by the problem, and finally recommended that the best solution was the metric system of weights and measures the introduction of which could be spread over a period of 11 to 15 years, preceded by the adoption of decimal coinage.

It recommended that the reform should be carried out in three stages, a preparatory stage of three to five years in which no extensive changes would be made but large scale propaganda would be undertaken; a change-over stage of about five years in which the change-over would be effected in the agencies under the control of Central and State administrations and in public life; and a final stage of three to five years when the whole country would come under the metric system entirely, and after which no other system would be regarded as legal.

The report gave rise to much public discussion, and the pros and the cons were thoroughly argued. Those in favour of the metric system have urged that now that India is embarking upon a heavy programme of industrial development, the country has to choose between the two major international systems of weights and measures. The metric system is more widely prevalent and used in scientific and technical research all over the world. It is simpler and has therefore advantages in mass education. The decimal system was invented in India.

In order to make a proper assessment of the whole problem the Planning Commission decided on the 30th August, 1954 that Mr. Pitambar Pant (Private Secretary to Chairman, Planning Commission) should prepare a memorandum.

Further investigations were, therefore, undertaken by Mr. Pant in consultation with the Indian Standards Institution, the Ministry of Commerce and Industry and other Ministries of the Government of India to ascertain opinion in business and industry and the extra cost that the adoption of the metric system might entail in the public and private sectors. The Ministry of Commerce and Industry also sent round circulars to a large number of industrial units to obtain the views of organized industry. The general conclusion reached on the basis of the replies was that the metric system could be adopted without much difficulty provided the transition was spread over a period of 10 to 15 years. As regards the cost of conversion, it was estimated that this would be of the order of one crore of rupees per year over a transition period of 10 years.

After considering Mr. Pant's Report, the Planning Commission came to the conclusion that the metric system should be accepted in

principle and necessary steps taken to introduce it throughout the country. For this purpose, it recommended the setting up of a Central Metric Committee to consider: the form in which legislation should be introduced, the phasing of the actual change-over, and education and propaganda.

After the Planning Commission's decision was endorsed by the Cabinet, it was put before Parliament for discussion on an unofficial resolution about the subject. The decision of the Government of India was widely supported and the resolution was accepted.

The Coinage Act of 1906 has now been amended to provide for the introduction of a decimal system of subsidiary coinage. Further information about coinage is given in the section on Decimal Coinage.

A Standing Metric Committee, recommended by the Planning Commission, has now been formed with Mr. N. Kanungo, Minister of State in the Ministry of Commerce and Industry as Chairman. This Committee has already made some recommendations including one which says that all new plants and equipment to be used in industries, whether in the private sector or the public, should be based on the metric system and new lines of production should follow metric system.

Metric system is to be introduced in the country from 1 January 1958 or 1 April 1958 depending upon whether the calendar year or the financial year is suitable. Indian Standards Institution are preparing standards for the new metric weights and measures and the production of new weights and measures would start in early 1957 so that sufficient stocks would be built up by January 1958, the earlier deadline for introduction of metric system. In the meanwhile, suitable propaganda will be carried on to acquaint the country with the significance and use of the reform.

One suggestion put forward is that industrial and trade associations should work out plans for the introduction of the metric system in their own spheres so that by dovetailing all the separate plans it would be possible to arrive at an overall plan for the adoption of the metric system. The I.S.I. has already put into operation a 10-year plan of conversion of all its standards into the metric system. The industries can, therefore, look forward to considerable help in switching over their production to the new system. The plans which the industries prepare, will have to take into consideration this important aspect of standardization.

### Standards of Weight

The Select Committee of Parliament on the Bill to establish standard weights and measures based on the metric system worked out the following table:

1 grain	= 0.000064799 kilogram.
1 ounce	= 0.0283495 "
1 pound	= 0.4535924 "
1 cwt.	= 50.802 "
1 ton	= 1016.05 "
1 tola	= 0.0118638 "
1 seer	= 0.93310 "
1 maund	= 37.3242 "

### Standards of Length and Capacity

1 inch	= 0.0254	metre (exact).
1 foot	= 0.3048	" { " }.
1 yard	= 0.9144	" { " }.
1 mile	= 1,609.344	" { " }.
1 imperial gallon	= 4.54596	litres.

## IMPORT AND EXPORT TRADE

Total foreign trade (1955-56)	Ra. 1,240.87 lakhs.
Imports (total)	.. .. Ra. 649.64 "
Exports (total)	.. .. Ra. 591.23 "
Re-exports	.. .. Ra. 6.52 "
Imports across land frontier only	.. .. Ra. 29.35 "
Exports across land frontier only	.. .. Ra. 6.14 "

India is essentially an agricultural country with farming regarded by the people as a tradition rather than as business. During the past 30 years the tendency has been, towards rapid industrialisation. This change has been noticeable in the matter of foreign trade especially in the post-partition period. In 1920-21 finished goods represented 84 per cent of imports, while exports of raw materials accounted for 45 per cent of the total shipments. In the quinquennium ended 1929-30 imports of raw materials hardly represented 9.3 per cent of the total, while exports of raw materials were as high as 49.5 per cent of the shipments. By 1950-51 the share of raw

materials under imports rose to 35.1 per cent while that under exports dropped to 20.8 per cent. The emphasis on higher industrial production during the intervening period was responsible for reducing the import of manufactured goods from 72.6 per cent of the total imports in the five years ended 1929-30 to 45.7 per cent in 1950-51, while the share of finished goods in the export trade rose from 26.6 per cent to 55 per cent.

India's foreign trade (sea-borne, air-borne and land-borne) amounted to Rs. 1,240.87 crores in 1955-56, as compared with Rs. 1,221.29 crores in 1954-55 and Rs. 1,111.20 crores in 1953-54.

Imports in 1951-52 included about Rs. 100 crores worth of foodgrains from the U.S.A. by way of loan and did not raise any payments problem and there was consequently no need to draw on sterling balances for the period July 1951 to June 1952. In the subsequent two years also, the releases made from sterling balances were not drawn.

### Trade from 1952-56

The following table shows the values in Rs. lakhs of the total import and export trade of India from 1951 to 1956. The total includes trade across the land frontiers too :

	Imports	Exports	Balance
1951-52	943.20	742.70	— 59
1952-53	664.04	577.66	—86.38
1953-54	580.67	530.62	—50.05
1954-55	633.05	588.24	—44.81†
1955-56	649.64	591.23	—58.41

† Excludes adverse balance of Rs. 8 lakhs on trade in gold and silver.

The following table shows the values in Rs. lakhs of the import and export trade of India across the land frontiers only from 1952 to 1956 :

	Imports	Exports	Balance
1951-52	80.45	27.14	—53.31
1952-53	25.16	18.84	— 6.32
1953-54	22.93	7.46	—15.47
1954-55	23.39	5.73	—17.66
1955-56	29.35	6.14	—23.21

### General Indices of Exports and Imports (1952-53 = 100)

	1953-54	1954-55	1955-56
Quantity Index :			
Exports	100	103	—
Imports	93	106	—
Price Index :			
Exports	92	98	—
Imports	92	89	—

### COMPOSITION OF TRADE

The table below gives the composition of India's imports and exports (including re-exports) according to the main commodity groups since 1951-52 :-

#### Imports

	1951-52	1952-53	1953-54	1954-55	1955-56
	Ra. crores	Ra. crores	Ra. crores	Ra. crores	Ra. crores
Food, etc.	262.07	178.10	93.75	131.97	54.83
Raw materials	256.07	183.27	176.62	187.32	163.96
Manufactured Goods	351.43	279.24	274.77	311.06	427.50

#### Exports

	1951-52	1952-53	1953-54	1954-55	1955-56
	Ra. crores	Ra. crores	Ra. crores	Ra. crores	Ra. crores
Food, etc.	158.52	148.30	152.49	203.22	165.64
Raw materials	148.97	146.89	107.23	121.17	167.11
Manufactured Goods	404.32	280.07	253.98	253.53	247.78

## TRADE IN PRINCIPAL COMMODITIES DURING 1955-56\*

(Rupees in lakhs)

## DIRECTION OF FOREIGN TRADE

Country-wise the United Kingdom enjoyed a key position till the First Great War when three-fifths of the imports and one-third of the exports originated from that country. By the time the world depression set in, her share in imports was reduced to 38 per cent but that under exports remained almost unchanged. In the five years preceding the outbreak of the Second World War, Britain's over-all share in India's foreign trade dropped to 32 per cent and this trend gained a fresh momentum in the post-war period during which the United Kingdom was pre-occupied with problems of rehabilitation. In 1950-51 Britain supplied only one-fifth of India's total imports.

The broad pattern of the direction of trade in 1953-54 remained

more or less the same as in the previous year, with the U.S. and the U.K. as the principal customers as well as sources of supply.

During 1955-56, the expansion in India's external trade was more or less of the same order as the increase in world trade. Imports reached a record level since the Korean boom, especially owing to heavy imports of machinery and iron and steel manufactures. Exports also reached a record level since 1951-52, though they increased at a lower rate than imports. Exports to the O.E.E.C. countries, the rest of the non-sterling area and the dollar area recorded considerable expansion. There was a small decline in exports to Pakistan while imports were higher. The following are the details:

(Rupees)

Countries	1953-54		1954-55		1955-56

**IMPORT AND EXPORT CONTROL**

(For later particulars see under 'Finance')

Import trade control was first instituted in May 1940 for conserving the limited tonnage and the hard currency. In the post-war period, currency difficulties, the prospects of release of sterling balances and the Government's view on inflation were the guiding principles. In July 1950 following the recommendations of the Import Control Inquiry Committee, the Government decided that from the beginning of 1951 (i) commercial imports should be annually around Rs. 400 crores, (ii) the O.G.L. should cover basic raw materials in short supply and exclude commodities sufficiently available in the country at a reasonable price, (iii) the actual licensing should be decentralised and the period should be half-year, and that (iv) the order of priorities for imports should be (a) raw materials and spares for industries essential for the life of the community, (b) other raw materials and capital goods, (c) other essential goods and (d) non-essential goods.

The more recent changes in the policy are detailed below:—

Broad features of the import policy for July-December 1952 were unchanged but 50 items were transferred from the Dollar O.G.L. to soft currency O.G.L. and import quotas for the dollar area were cut. On September 5, 1952 certain imports from Pakistan were placed on O.G.L. up to March 1953. The policy for the first half of 1953 remained unchanged for 70 per cent of the items. Efforts were also made to bring all the essential items under one O.G.L. Imports of a few items such as ball-bearings and textile stores were placed on a quota basis. Where stocks were higher import quotas were cut. Small quotas were given for biscuits, confectionary, playing cards, metal buttons, etc. to provide healthy competition. Where indigenous production was higher, quotas were cut. This applied to iron and steel structures, bolts, nuts and rivets, leather belting, tea chests, linings and umbrella fittings among others. Procedure remained substantially unchanged; but the list of items susceptible to actual users was enlarged and a greater scope was given to newcomers.

On March 16, 1953 a few changes were made and certain items including non-ferrous metal manufactures and semi-manufactures were removed from the then existing O.G.Ls. Imports from Persian Gulf Sheikdoms and Portuguese possessions in India were extended upto September 30, 1953. During June 1953, the import policy was announced for the second half of 1953. The salient features were: (1) liberalisation of imports of machinery not indigenously manufactured, industrial raw materials such as art silk yarn and cotton yarn above 80s, and consumer goods like spices, fruits, breakfast foods, etc. and (2) simplification of the licensing procedure. Other measures included the introduction of free licensing for cotton stapling 1/16" and above from the soft currency countries and the extension to 1953-end of the validity of import licences already issued for U.S. cotton. Import of sugar was also arranged and import quotas of sewing machines, machine screws, etc. were slightly lowered owing to improved domestic supply.

The emphasis of the policy shifted from reduced quotas to higher tariff values with a view to regulating imports to meet the more important needs. In pursuance of this objective, import duties were reduced on sugar from Rs. 14-14 to Rs. 7 per cwt., on copra from non-preferred sources from 25 per cent to 15 per cent *ad valorem* and from other sources from 15 per cent to 5 per cent *ad valorem*.

**EXPORT POLICY**

In pre-war years the Government's policy was to encourage exports. Immediately after the war, export control was relaxed, but the aggravation of inflationary pressures rendered its tightening in 1949. Following the devaluation of the rupee, export duties were put up on commodities for which India was at an advantage. Simultaneously, quality control was gradually introduced and a network of Trade Commissioners' offices was set up. Following the end of the Korean war boom and the fall in demand, the Government was obliged to reduce the export duties gradually. The process started early in 1952 and continued till the end of 1954.

The export policy for 1955 and 1956 was also liberal as there was a desire to safeguard the balance of payments position by encouraging exports, adopting a number of constructive measures. The Government continued to broaden the scope of bilateral trade pacts with a number of European countries. With Pakistan also, the trade pact was ratified.

Another constructive measure was the continued encouragement provided by Government for the establishment of Export Promotion Councils for providing stimulus to a number of individual commodities. Export Promotion Councils were set up for cotton textiles, silk and rayon textiles, and plastics in 1951 and for engineering products, pepper, cashew nuts, tobacco and shellac in 1955-56.

Trade delegations to promote India's exports, were sent to China, Africa and Middle East countries. The Government also lent its support to the Indian Industries Fair at New Delhi.

**Important changes in 1955-56:** (1) Export duty was reduced or abolished for a number of items like raw cotton, sesamum oil, jute manufactures, black pepper and coffee. (2) A number of commodities such as cotton textiles, groundnut oil cakes, cotton seed oil and chrome ore were placed on the free licensing list. (3) Additional quotas were granted for raw wool, certain varieties of short staple cotton, groundnut oil, groundnuts and tea.

**IMPORT POLICY**

The import policy for the first half of 1954 was much the same as before; some restrictions were, however, imposed on imports of goods which were available from indigenous sources or through the utilisation of idle engineering capacity existing within the country.

During June 1954, the import policy for the period July-December 1954 was announced, scaling down import quotas for about 35 items and stepping up those for about 60 items.

Pursuant to the Government's negotiations with the contracting parties to the General Agreement on Tariffs and Trade, import duties

previously bound on coal tar dyes, razor blades, glass beads, etc. were raised against a reduction in import duties on some items, including certain plastic raw materials, specific categories of special alloy steel and high-speed steel, etc. Further, the Government also agreed to bind the import duties on antibiotics, milk foods, etc. at the existing levels.

In September 1954, the Government announced major modifications in the import policy for July-December 1954, with a view to (a) liberalising imports of a number of commodities and (b) augmenting the customs revenue through increased import duties. The liberalisation was effected by: (1) increased facilities for imports of certain goods from the hard currency areas, (2) increase in import quota for safety-razor blades, woollen fabrics, etc., (3) removal of some of the restrictions on the use of import licences for some items (4) extension of liberal licensing for a number of items including cotton fabrics, and (5) extension of the basic period to include 1952-53 for some commodities.

The following paragraphs show the present position about the trade agreements which India has entered into with some countries. The information given within brackets relates to the dates on which the agreements were signed and the duration of the agreements respectively.

**Austria.**—(9th December 1952); (1st July 1952 to 30th June 1957). *Imports:* Woollen piecegoods, cotton threads, newsprint, rubber threads (permissible types), chemicals chiefly bichromates, chromic acid and magnesium chloride, admissible types of textile machines etc. *Exports:* Castor oil, coir, coir yarn, fibres for brushes and brooms, handcraft, manufactures of ivory, brass, horn and brocade, iron ore, linseed oil, manganese ore, mica, myrobalans, shellac, spices, cashewnuts and tanned leather, etc.

**Bulgaria.**—18th April 1956 (up to the end of 1959). *Imports:* Fruits, tiles, electrometers (fractional), 4. H.P. Motors, D.C. and others of over 50 H.P., thrashing machines, milling machines, -planing machines and concrete machines and concrete mixers, etc. *Exports:* Tea, spices, lac, essential oils, castor oil, raw wool, raw cotton, coir yarn, drugs and medicines, electric ware and cables, electric lamps, etc.

**Burma.**—(29th September 1951); (1st January 1951 to 4th Sept. 1951—Extension under consideration). *Imports:* Rice, dyeing and tanning substances, gram and pulses, lead, teakwood, hardware and cutlery, hides and skins—raw, tobacco, machineries, tea, vehicles, wood and timber, metals and ores, etc. *Exports:* Groundnut oil, fish, coal, cotton piecegoods, coir manufactures, cotton yarns, drugs and medicines, books printed and printed matter, coffee, cotton manufactures, jute manufactures.

On July 14, 1956 another agreement was signed. India would export to Burma cotton textiles worth about Rs. 185 lakhs, against payment by Burma in U.S. surplus cotton.

**Ceylon.**—(15th July 1953); (1st September, 1953 to August 31 1957). *Imports:* Import of Jaffna Tobacco would be permitted through Alleppey, at special rate of duty. *Exports:* Bids and handloom towels.

**Chile.**—(16th October 1956); (up to 31st December 1959).

**China.**—(14th October 1954); (14th October 1954 to 13th October 1956). *Imports:* Gypsum, graphite, ornament, silk and silk piecegoods, hides and skins, wool raw, wool yarn and manufactures, paper and stationery, chemicals, oils, drugs and medicines. *Exports:* Gram, rice and pulses, spices (including chillies and pepper), tobacco unmanufactured, manganese ore, vegetable oils, essential oils, cotton raw, wool raw, sandalwood, hides and skins, mica, shellac, jute manufactures, etc.

**Czechoslovakia.**—(17th November 1958); (17 November 1953 to 31st March 1957).

Some major changes in tariffs, announced in the budget for 1955-56 are referred to under that heading elsewhere in this article. With a view to helping the pearl processing industry, the Government decided to abolish the 20 per cent *ad valorem* import duty on raw pearls (other than cultured) with effect from February 23, 1954.

The liberal import policy introduced from 1953 was continued in 1955 also. The important features of the policy for January-June 1955 were liberalisation in respect of several items, greater accommodation for small importers and wider scope for newcomers. Traders' demand to extend the basic period was met to a large extent. Monopoly imports in respect of raw silk, caustic soda, soda ash, etc., were, however, continued. The Government was anxious to maintain the policy of progressive and controlled liberalisation.

The policy during 1955-56 continued to be one of progressive but controlled liberalisation. Thus, in July-December 1955 import quotas of a few commodities like antimony ingots,

drills and reamers, house service metres, textile preservatives, etc. were increased. At the same time, discrimination against dollar imports was relaxed in the case of 65 items and permit was granted to utilise a portion of the soft currency licences for imports from the dollar area. With a view to conserving foreign exchange resources, import quotas were reduced for items such as hack-saw blades, certain varieties of iron and steel chains, torch bulbs, certain chemicals, polishes and polishing compositions, etc. Eighteen new items were thrown open to actual users, which included white metal, fabricated iron and steel road rollers, etc. The basic period was extended to include 1953-54 for 92 items. In January-June 1956, quotas were enhanced in the case of small tools like milling and gear-cutters, reamers, twist drills and carbide tipped drills while quotas for items such as buttons, pruning knives, textile preservatives, etc. reduced. The basic period for 135 items was extended to include 1954-55. Dollar imports were permitted in respect of milk foods, electrodes, diesel engines above 30 H.P., etc.

## TRADE AGREEMENTS

**Imports:** Certain types of machineries, sheet glass, certain types of dyes and colours, agriculture tractors and parts, leather and rubber belting, sewing machines, refrigerators, equipment for thermal and hydro-power stations and mining, ore dressing, iron and steel industries, rolling stock, wagons and trucks, etc. *Exports:* Tea, spices, tobacco, cashewnut, vegetable oil, cotton raw and cotton waste, shellac, mica, manganese ore, crushed bones, raw wool, Indian handicrafts, cotton, rayon and woollen textile; cotton and rayon knitted goods, plastic goods, sports goods, carpets, coir products, etc.

**Egypt.**—(8th July 1953); (Effective from the date of signature and will remain in force till it is modified and terminated by either party on giving 3 months notice). *Imports:* Raw cotton, cotton yarn, gypsum, rock phosphates, flax, dry dates, goat skins raw, essential oils, perfumes and essence of geranium, etc. *Exports:* Unmanufactured tobacco, jute goods, coal, oils and oilseeds, cotton piecegoods, iron and steel manufactures, certain types of machinery, Indian handicrafts, etc.

**Finland.**—(12th January 1951); (1st January 1953 to 31st December 1956). *Imports:* Sawn and planed timber of coniferous, spices, newsprint, paper and paper products excluding newsprint, wallboard of wood fibre (soft and hard), tea, chests, etc. *Exports:* Cashewnut, tobacco, spices, jute goods, tea, shellac, cotton waste, linseed oil, coir yarn and manufactures, etc.

**Germany, Eastern.**—(16th October 1954); (Effective from the date of signature and will remain in force for one year and in case either party does not declare its intention to modify the arrangement will remain in force for one more year). *Imports:* Chemicals, drugs and medicines including sera and vaccines, newsprint, writing and printing paper, films raw, textile machinery, certain types of machineries, wall tiles, certain types of electric goods etc. *Exports:* Tea, coffee, tobacco, and tobacco manufactures, pepper, spices, fruit dried, essential oils, mica, hides and skins, cinematographic films (exposed), etc.

**Germany, Western.**—(31st March 1955); (1st April 1955 to 31st March 1957). *Imports:* Building and engineering materials, drugs and medicines, dyeing and tanning substances, machinery and millwork, manures, metals and ores, paper and pasteboard, stationery, artificial silk, vehicles & parts, essential & mineral oils certain types of machinery, etc. *Exports:* Tea, cardamoms, turmeric, coffee, shellac, mica, groundnut oil, iron ore, manganese ore, essential oils, raw hides & skins, wood & timbers, cotton, cotton waste, coir yarn, jute manufactures, cotton piecegoods, woollen carpets, ivory goods.

**Hungary.**—(17th June 1954); (17th June 1954 to 31st December 1956). *Imports:* Certain types of electric goods, certain types of machines, rubber goods, motor cycles and parts, cotton

piecegoods, cotton sewing thread, vegetable seeds, pharmaceuticals, laboratory equipment, film projectors, instruments for watch industry, etc. *Exports:* Tea, jute goods, tobacco, spices, cashew-kernel, shellac, linseed oil, essential oils, iron ore, manganese ore, raw goat and sheep skins, tanned hides and skins, myrobalans and extracts, hemp other than manila, coir and coir manufactures, castor oil and hydrogenated oil, etc.

**Indonesia.**—(30th January 1953); (30th June 1953 to 31st December 1956). *Imports:* Copra, Coconut oil, palm oils, essential oils, spices and betel-nuts, timber, tin, rubber, raw hides and skins, canes and rattans, gums and resin, sisal fibre, tobacco wrappers, palm kernels, fresh and dried fruits, etc. *Exports:* Jute goods, tobacco, woollen piecegoods, cotton piecegoods, handloom goods, cotton yarn, vegetable oils, coal, cement, soap, paints & varnishes, pharmaceutical products, chemicals & chemical preparations, lac (including shellac), rubber tyre and tubes, paper and pasteboard and stationery, machinery, motor bicycle batteries and dry cells, machine tools and handicrafts and cottage industry products.

**Iraq.**—(6th May 1953); (6th May 1953 to 31st December 1956). *Imports:* Horses, mules, cotton (long staple), dates, barley, millets, pulses, rice, wheat and other food grains including beans, etc., gallnuts, hides and skins (light weight). *Exports:* Fruits fresh including mangoes and bananas, fruits preserved and tinned, and fruit juice, spices, turbine, tea, wood and timber, plywood, coir and coir manufactures, cotton manufactures, cotton piecegoods, raw cotton, jute manufactures, leather manufactures, tiles, cottage industry products, handloom products, etc.

**Italy.**—(20th July 1954); (20th July 1954 to 31st December 1957). *Imports:* Dairy products, dried fruits, cotton yarn, cotton fabrics, wool raw, hand knitting wool, raw silk, artificial silk, certain types of electric goods, rubber shoes, vehicles and parts thereof, stationery, drugs and medicines, certain types of machinery, etc. *Exports:* Tea, tobacco, spices, jute goods, cigarette & cigars, coal, lac & shellac, hides & skins, essential oils, oilseeds, cotton raw, wool raw, coir yarn and coir manufactures, certain types of wood and timber, etc.

**Norway.**—(24th June 1955); (1st January 1955 to 31st December 1956—Extension under consideration). *Imports:* Mechanical and chemical pulp, fatty alcohols, newsprint, galvanised and black steel pipes, hydraulic, brake fluids, testing machines, welding equipment, marine type diesel engines, machine tools, etc. *Exports:* Tobacco, jute goods, tea, shellac, coir products, hydrogenated oils, mica, iron and manganese ore, woollen carpets, tanned hides and skins, cotton and woollen textiles, light engineering goods and plastic manufactures.

<sup>1</sup> With modifications extended upto 31st Dec. 1957.

**Malta.**—(22nd January, 1957): (1st January, 1957 to 31st January 1960). *Imports*: Raw jute, hides and skins, fish, poultry and betel nuts, spices, honey, cinema films, tools, bicycles and spare parts, Surgical instruments and sports goods. *Exports*: Coal, chemicals, drugs and medicines, mill board and straw-board, machinery and mill work, work-shops equipment, electrical instruments, cinema films, sugar, tea for blending, Coffee, betel leaves, bidis and hooka tobacco and bidi leaves.

**Poland.**—(3rd April 1956); (3rd April 1956 to 31st March 1957).<sup>1</sup>

*Imports*: plant for sugar production, alcohol, rolling stock, electrical apparatus, textiles and drilling, milling and welding machinery, iron and steel structures, diesel engines, electric motors, optical and medical instruments, industrial chemicals, cement.

*Exports*: iron ore, manganese ore, mica, shellac, myrobalan, tea, coffee, spices, hides and skins, cotton textiles, raw cotton, raw wool, wool waste, jute goods, handicrafts, cottage industry products.

**Roumania.**—(23rd March 1954); (23rd March 1954 to 31st December 1956). *Imports*: Food grains (wheat and rye), petroleum products,

chemicals, timber, wooden products, cement, machine tools for metal, textile machinery, mustard, certain types of electric goods, handicrafts and cottage industry products, etc. *Exports*: Iron ore, tea, coffee raw, spices, including pepper, vegetable oils (linseed, castor, etc.), essential oils, shellac, mica, hides and skins, raw cotton, wool waste, wool raw, jute yarn and jute manufactures, chemicals, fish oils, myrobalans and extracts, etc.

**Sweden.**—(31st May 1955); (1st January 1955 to 31st December 1956—Extension under consideration). *Imports*: Condensed milk, cement, wood tar, hides and skins raw, waste paper, rayon silk, glassware, newsprint, iron & steel, hinges, bolts and nuts, cutlery, diesel engines and spare parts, printing presses, certain types of machinery, motor cycles, staple fibre, etc. *Exports*: Cotton textiles, silk fabrics, rayon fabrics, jute goods, shawls, sarees, coal and coal products, cotton waste, certain types of oils, hydrogenated oil, spices including pepper; chillies, ginger, turmeric, cardamoms, pickles; chutneys, condiments, tea, coffee, tobacco, shellac, manganese ore and magnesite, cashew kernels, raw cotton, etc.

**U.S.S.R.**—(2nd December 1953); (31st December 1957). *Imports*: Food grains (wheat and barley), certain types of machinery, dyestuffs,

chemicals, iron and steel manufactures, paper of different kinds including newspapers, printed matters including books and periodicals, etc. *Exports*: Raw wool, tobacco unmanufactured, spices, black pepper, cardamoms and others, shellac, goat skins tanned, hides & skins tanned, Indian handicrafts and cottage industry products, cinematographic films (exposed), etc.

Another agreement was signed on April 23, 1956 for the export by India of coffee at a cost of about Rs. 41·22 lakhs.

**Viet-Nam.**—(22nd September 1956); (up to 21st September, 1959).

**Yugoslavia.**—(March 31, 1956): (1st April 1956 to 31st December 1959). *Imports*: Dyeing and tanning substances, iron and steel products, rolling stock, wagons, rails, metal products, steam boilers, diesel and steam locomotives, tractors, electrical apparatus, etc. *Exports*: Iron ore, manganese ore, mica, shellac, tea, coffee, tobacco, spices, cotton textiles, raw cotton, raw wool, jute goods, handicrafts and cottage industry products, etc.

N.B.—Negotiations for the renewal of trade agreements regarding the following six countries are under consideration:—Finland<sup>2</sup>, Norway, Roumania, Burma, Indonesia and Sweden.

### IMPORTS OF MERCHANDISE, 1953-56

Table shows imports by sea and air by groups.

<b>Total value of imports .. ..</b>	—	6,49,64,00,581

## COMMODITIES EXPORTED

Below are given the exact quantity and value of the commodities exported during 1955-56. Generally speaking those commodities the export value of which is less than one lakh are omitted.

	Quantity	Value
		Rs.
<b>Animal :</b>		
Cattle .. .. .	1,168 nos.	9,67,384
Sheep and goats .. .. .	34,424 „	19,08,224
Other kinds (excluding cattle, sheep, horses, monkeys and goats) .. .. .	350,995 „	10,24,539
<b>Total animals .. .. .</b>	511,888 „	67,76,954
Apparel (excluding hosiery, boots, shoes) .. .. .	—	1,09,59,161
Arms, ammunition, military stores .. .. .	—	948
Art, works of .. .. .	—	64,43,068
Asbestos, raw .. .. .	6,334 cwts.	2,03,718
Asbestos, manufactures .. .. .	—	4,78,954
<b>Total of asbestos .. .. .</b>	—	6,82,672
Belting for machinery .. .. .	—	85,010
Bones crushed and bonegrists ..	79,536 tons.	2,74,02,611
Bones, other sorts .. .. .	44 „	22,967
<b>Total of bones for manufacture ..</b>	79,580 cwts.	2,74,25,578
Books, including maps, charts ..	20,095 „	55,12,546
<b>Boots and shoes :</b>		
All leather .. .. .	1,577,754 Pairs.	90,56,600
All rubber .. .. .	300,301 „	5,87,277
Rubber soled with canvas uppers .. .. .	1,800,895 „	43,92,005
Others .. .. .	214,521 „	9,62,528
<b>Total of boots and shoes .. ..</b>	4,046,841 „	1,52,25,607
Bristles .. .. .	4,218 cwts.	93,05,640
<b>Building and engineering material other than iron, steel or wood :</b>		
Bricks .. .. .	72,013 nos.	67,524
Cement .. .. .	46,804 tons.	41,26,836
Magnesite .. .. .	529,576 cwts.	41,68,416
Tiles .. .. .	31,509,208 nos.	42,06,488
Other kinds (excluding those mentioned above and chalk and lime) .. .. .	27,442 cwts.	3,41,617
<b>Total of building and engineering material .. .. .</b>	—	1,33,94,462
Buttons .. .. .	14,334 gross	1,13,937
<b>Chemicals and chemical preparations :</b>		
Glycerine .. .. .	54,191 cwts.	53,94,763
Magnesium chloride .. .. .	10,351 „	1,02,205
<b>Total of chemicals and chemical compounds .. .. .</b>	—	90,95,941
Coal .. .. .	713,464 tons.	2,11,62,618
Coke .. .. .	19,600 „	6,46,734
<b>Total of coal and coke .. ..</b>	733,064 „	2,18,09,352
Coffee .. .. .	55,605 cwts.	1,49,51,719
Coir, unmanufactured .. .. .	666 tons.	5,62,024
Coir yarn .. .. .	1,083,249 cwts.	5,71,80,665
Coir mats and matings .. .. .	278,729 „	2,21,20,513
<b>Total of coir manufactured ..</b>	1,483,656 „	8,93,74,912
Cordage and rope of vegetable fibre (other than jute and cotton) .. .. .	101,108 „	61,48,440
<b>Drugs and medicines :</b>		
Asafoetida .. .. .	996 cwts.	2,53,720
Strychnia .. .. .	8,955 „	1,00,933
Proprietary and patent medicines .. .. .	—	5,02,958
Senna .. .. .	38,231 „	12,02,762
<b>Total of drugs and medicines ..</b>	—	1,77,71,668

## Commodities Exported—(Contd.)

—	Quantity	Value
		Rs.
<b>Dyeing and tanning substances :</b>		
Cutch and gambler .. ..	13,443 cwts.	8,46,804
Indigo .. ..	2 "	741

## ALCOHOL INDUSTRY

**A**LCOHOL has three uses. It can be used as a drink. That is the use for which it is best known. Second, it can be used for industrial purposes, for instance in the manufacture of a number of chemicals. Third, it can be used as a motor fuel, for the production of mechanical power, when we call it power alcohol.

**Potable Alcohol.**—Three types of potable alcohol are produced in the country, beer, toddy, arrack and certain varieties of 'foreign liquors.' A great number of old pot, and coffee stills have always been in use but the major part of potable liquor is made in proper distilleries. There are also 24 big distilleries producing industrial and potable alcohol.

## INDUSTRIAL ALCOHOL

Industrial alcohol is a very valuable material in the manufacture of chemicals like acetone, acetic acid, ether, chloroform, ethyl acetate, etc. It is also necessary as a solvent in the manufacture of fine chemicals, medical preparations, toilet, etc. Since the last war its importance if at all has increased. It is now essential in the manufacture of ammunition and of artificial rubber.

In 1950-51 there were as many as 19 power alcohol distilleries capable of producing over 2.9 million gallons of industrial alcohol. In addition, there were 24 distilleries producing potable and industrial alcohol. The capacity of these units for industrial alcohol is estimated at 9.3 million gallons. The present the capacity for industrial alcohol is estimated at 12.2 million gallons per annum (47 producing units). The trend of production has been as follows :

Year.	Rectified spirit (000 gals.).	Denatured spirit (000 gals.).
1948 .. .. .	2,349	1,401
1949 .. .. .	1,950	1,095
1950 .. .. .	3,435	1,477
1951 .. .. .	5,019	1,967
1952 .. .. .	4,668	2,178
1953 .. .. .	4,376	2,493
1954 .. .. .	4,630.8	2,835.6
1955 (Jan.-June) ..	2,776.5	1,475.5

The undivided Government of India's Panel on Fine Chemicals, Drugs and Pharmaceuticals estimated that the medical requirements of the sub-continent were a million gallons annually and industrial requirements 10 millions, a target which they said ought to be reached in 15 years time.

To make this possible, it is argued, the first essential is to abolish the present excise duty on industrial alcohol and the second is to have a uniform policy for the country as a whole. Industrial alcohol should not cost more than a few annas a gallon. As it is it costs the distiller about eight annas to make it. When the producer's and middleman's profit is added the price will increase to a point where it becomes uneconomic to use it.

Consumption of industrial alcohol is estimated to have gone up from 3.4 million gallons in 1950 to 5.2 million gallons by 1955. In addition about 0.6 million gallons of alcohol are at present used in the manufacture of acetate rayon and are met from the production of power alcohol grade spirits.

## POWER ALCOHOL

The importance of the power alcohol industry lies in its supplying a product which can replace an equivalent quantity of imported petrol. The rapid development of the sugar industry since 1931 has rendered large quantities of molasses available for its production.

Consumption of power alcohol in 1955-56 was expected to be only about 10 million gallons as against 18 million gallons envisaged because of difficulties in providing facilities for mixed petrol with alcohol and of comparatively high cost of production of alcohol in certain areas.

Actual production in the post-war period is given below :—

Year.	Production (000 bulk gallons).
1946 .. .. .	2,397
1947 .. .. .	2,736
1948 .. .. .	3,776
1949 .. .. .	4,230
1950 .. .. .	4,498
1951 .. .. .	5,809
1952 .. .. .	7,742
1953 .. .. .	8,120
1954 .. .. .	8,007.6
1955 (Jan.-June) ..	5,733.8

According to the Census of Manufacturing Industries, 1953, the fixed capital investment in the 47 distilleries and breweries (including power alcohol manufacturers) in the country was the order of Rs. 2.47 lakhs in 1953. The number of persons employed in the industry in 1953 was estimated at about 4,750.

Imports of alcohol are banned, but small quantities are imported along with drugs and perfumed spirits or in the form of liquors. Exports of alcohol are confined to despatches of denatured spirit to Burma and Ceylon and small quantities of rum.

The principal raw material required is molasses. Out of a total production of six lakh tons of molasses in 1954 (estimated), Uttar Pradesh and Bihar account for about 90%. Other raw materials required in small quantities are sulphuric acid, ammonium sulphate and entertaining agents.

Difficulties in the supply of molasses and off take and the unremunerative price of power alcohol have kept production at a low level compared to the installed capacity. With a view to overcoming these difficulties and ensuring a steady growth of the industry, a Committee was set up by the Ministry of Commerce and Industry in October 1955.

Based on the anticipated requirements during the Second Plan period, a combined production of 36 million gallons of power and industrial alcohol is fixed as a target to be achieved by 1960-61, while a combined capacity of 36 million gallons per annum by 1960-61 is suggested. It is estimated that a sum of about Rs. 1 crore will have to be invested during the Second Plan to achieve this capacity. This is exclusive of the outlay on the modernization and improvement of existing units. About 2,000 additional persons are estimated to be employed in the industry during the Second Plan.

# AUTOMOBILE INDUSTRY

IT appears that the first motor car was imported into India in 1898. The practice up to the end of the first world war was to purchase complete motor vehicles directly from abroad or through agents or dealers in India.

It was in 1920 that two automobile manufacturers, one from the U.S.A. and the other from Canada, set up local companies to do business in motor cars and trucks.

General Motors India Ltd. commenced assembling trucks and cars from components and parts imported from the U.S.A. in c.k.d. condition in their factory at Bombay in 1928, while Ford Motor Company of India Ltd. commenced c.k.d. assembly of automobiles at Madras in 1930, and at Bombay and Calcutta in 1931. All these plants of General Motors and Ford Motors have now, of course, shut down.

It is claimed by Peninsular Motor Corporation Ltd., Calcutta, that one of its sister companies was the first to start assembling cars and trucks from c.k.d. components and parts in its workshop at Calcutta in 1926.

Addison and Co., Ltd., commenced c.k.d. assembly of cars and trucks at Madras in 1936.

In 1944, two companies, Hindustan Motors Ltd., Calcutta, and Premier Automobiles Ltd., Bombay, with an authorised capital of Rs. 20 crores and Rs. 10 crores respectively, were established with a programme for progressive manufacture of complete automobiles.

In addition to the above, other firms in the field were: Standard Motor Products of India Ltd., Madras; Automobile Products of India Ltd., Bombay; Ashok Motors Ltd., Madras; Dewar's Garage and Engineering Works, Calcutta; Peninsular Motor Corporation Ltd., Calcutta; French Motor Car Co., Ltd., Bombay; Mahindra and Mahindra Ltd., Bombay and Addison and Co. Ltd., Madras.

The total annual assembling capacity of the 12 firms mentioned above was estimated around 84,014 cars and commercial vehicles. The total output of the 12 firms of both cars and commercial vehicles and the sales during 1951 and 1952 were as shown below:

	Production	Sales
1951 .. ..	21,577	22,393
1952 .. ..	14,873	15,723

It is evident that only a small part of the total capacity of the industry was being utilised. The Tariff Commission estimated that the average annual imports in the three pre-war years 1935-36 to 1937-38 were of the order of 25,000 motor vehicles. In the post-partition years, the average annual imports up to 1951-52 were 21,500 vehicles. Taking the whole period of 30 years, it is noteworthy that the volume of imports has remained more or less static in India while it has shown a striking increase in many other countries.

Import of cars has been as follows: 1950: 8,433 (Rs. 3.24 crores), 1953: 5,811 (Rs. 2.82 crores); import of commercial vehicles: 1951: 4,903; 1953: 4,189.

The total number of passenger cars and commercial vehicles on roads in 1951 was 283,000 comprising about 180,000 passenger cars and 123,000 commercial vehicles. If the average life of a passenger car is taken to be 12 years and a commercial vehicle 10 years, about 13,000 passenger cars and 12,000 commercial vehicles would be needed to be replaced every year to maintain the number of vehicles on the roads. These annual needs for replenishment of 25,000 vehicles do not, however, take into account the development of roads and road transport envisaged in the two Five-Year Plans.

## MANUFACTURE

In accordance with the recommendations of the Tariff Commission report of 1953 Government have decided to concentrate production only in those firms which have a manufacturing programme. The type of vehicle, the scale of manufacture, etc. are also fixed in the way shown below:

Firm.	Nos.
Hindustan Motors Ltd., Calcutta ..	18,000
Premier Automobiles Ltd., Bombay	12,000
Standard Motor Products of India Ltd., Madras .. ..	2,950
Ashok Motors Ltd., Madras ..	7,540

Hindustan Motors will manufacture baby cars, light cars, big cars and medium trucks (Morris Minor, Hindustan 14, Studebaker car and truck).

Premier Automobiles will manufacture baby cars, big cars and medium trucks (Flat 1100, Dodge, De Soto, Plymouth cars, and Dodge, De Soto and Fargo trucks).

Standard Motor Products of India will manufacture baby cars and medium cars (Standard Ten and Standard Vanguard).

Ashok Motors will manufacture heavy trucks (Leyland 5 ton Diesel trucks).

Two other manufacturing operations sanctioned are the Tata Locomotive and Engineering Co. Ltd. which will produce Tata-Mercedes Benz diesel trucks, and Mahindra and Mahindra Ltd. which will produce Willy's Jeep.

The actual production and sale in the country from 1953 onwards is as follows:

	1953	1954	1955
<b>Production :</b>			
Cars	4,936	5,435	10,297
Trucks	8,990	9,027	12,787
Total	13,926	14,462	23,084
<b>Sale :</b>			
Cars	5,000	5,806	10,166
Trucks	4,400	8,007	12,899
Total	9,400	13,813	23,065

At the end of 1951 Hindustan 14 car had attained 60 per cent completion in terms of value regarding indigenous production of parts. The Standard Vanguard car had attained 26 per cent. At the same time Dodge-Desoto-Plymouth car had reached 20.34 per cent, Dodge-Desoto-Fargo 42 per cent, Flat car 14.75 per cent, Mercedes Benz truck 12½ per cent.

A considerable number of the parts for Willy's Jeeps are also manufactured while certain minor parts required for the Studebaker car and truck are locally made.

## IMPORTS

Though production has gone up in the country, imports have not been reduced as expected. In fact they follow broadly the pattern of indigenous production, recording a substantial decline in 1952-53 and 1953-54 and a progressive increase since then. Except for a very limited number of motor cars imported complete, all the vehicles imported are in c.k.d. condition.

Year	Motor cars including taxi cars (Numbers)	Motor omnibuses, motor vans and lorries (Numbers)	Total	Value (Rs. lakhs)
1950-51	8,433	4,903	13,336	6.37
1951-52	9,063	4,712	14,675	7.76
1952-53	5,164	3,637	8,801	5.93
1953-54	5,810	4,189	10,005	6.08
1954-55	10,592	4,516	15,108	10.29
1955-56	10,562	8,891	19,453	13.46

Items like tyres, tubes, battery, all rubber parts, upholstery materials and paints are all obtained from indigenous sources for all the vehicles in the manufacturing programme.

There are 20 important firms licensed for making automobile ancillaries excluding garage and service tools and 10 have already gone into production. The total number of ancillary factories is, however, estimated at 140.

The total paid up capital invested in the industry as on December 31, 1954 was over Rs. 13.22 crores (foreign a little over Rs. 14 lakhs); working capital: Rs. 6.05 crores (excluding Tata Locomotive and Engineering Co. Ltd.). The industry employs over 7,080 people including 3,443 skilled and semi-skilled employees.

The following manufacturing industries are more or less well established: pistons and piston rings, cylinder liners (dry), fan belts, radiators, propeller shafts, bodies for automobiles, seat bench assembly, upholstery material, batteries, electric lamps and bulbs, ball bearings, tyres and tubes, paints, non-genuine components and parts. To the list are added gudgeon pins, electric horns and new ranges of piston.

Manufactures started during 1952 and 1953 are: sparking plugs, fuel injection equipment, electric horns. Schemes for manufacture which are under implementation are: shock absorbers, wheels and rims, spanners, and brake lining, clutch facings, piston rings, cylinder liners, oil seals, metal gaskets, scammell semi-trailers, brake lining, clutch discs and friction materials.

Over Rs. 4.4 crores are invested in ancillary industries. The working capital of this sector is Rs. 51 lakhs.

## SECOND FIVE YEAR PLAN

The target of production for the industry is 57,000 automobiles by 1960-61. An overall investment of about Rs. 16 crores is estimated to be necessary during the Second Plan period. Regarding ancillary industries, ten firms are expected to commence production early in the period and an additional investment of Rs. 2 crores is likely to be invested.

Summary of the development programme during the Second Plan

	1955-56	1960-61
No. of manufacturing units	6	6
Annual rated capacity on single shift (No.)	29,000	29,000
Estimated production (No.)	25,000	57,000
Consumption (No.)	23,000	57,000

Both automobile and tractor drawn trailers are being manufactured in India. Six firms with a total capacity of 5,232 trailers per year on single shift basis are in the field. The Government of India is keen on developing the automobile industry. Among the steps taken by the Government are the reduction of average import duty on motor vehicles and parts and restriction of manufacture to a limited number of types and models.

## MOTOR CYCLES AND SCOOTERS

There is also a fair demand for motorcycles, scooters, motor cycles and auto-rickshaws. The demand for motor cycles at the end of the First Plan was estimated at 5,000 per annum and it is expected to rise to about 11,000 by 1960-61 inclusive of scooters.

The Ma Inax Motors, Ma Inax (since renamed Enfield (India) Ltd.) was granted a licence in 1954 to manufacture "Royal Enfield" motor cycles and it started production in May 1955 and by December 1955 turned out 419 motor cycles. The firm has also been licensed for the manufacture of 1,800 three-wheeled motor cycle chassis per annum. The Automobile Products of India, Bombay, has been permitted to manufacture annually 6,000 "Lambretta" scooters and went into production in August 1955. Up to December 1955, it turned out 536 scooters.

## CEMENT INDUSTRY

**T**HE first venture in the manufacture of Portland Cement in India took place in 1904, in a small factory just outside Madras, but it quickly went out of business.

A few years later three new companies came into existence and laid the foundation of the industry as it exists today.

In 1925, following the result of an enquiry by the Tariff Commission, the necessity for co-operation among the manufacturing units was clearly emphasised and as a result, an Association known as the Indian Cement Manufacturers' Association was formed.

Inspired with a certain measure of confidence they took yet another step which was the formation of the Cement Marketing Company of India, Ltd.

The next step was the fusion of all the Indian cement manufacturing companies then in operation (with the exception of the Sone Valley Cement Co. Ltd.) into one unit known as the Associated Cement Companies Ltd., in 1936 whose Managing Agents are Cement Agencies Ltd.

By March 1952, there were 23 cement factories with an annual rated capacity of about 3.88 million tons.

During 1951-54, three new cement plants went into production and the expansion and modernisation programme of seven of the existing factories were completed with the result that the total annual capacity rose to about 4.4 million tons by the end of 1953-54 as against 3.28 million tons in 1950-51. Including the three new ones the number of cement factories was 27 in March 1956 as compared with 21 at the beginning of the Plan.\*

The production in million tons is as follows: 1948, 1.553; 1949, 2.102; 1950, 2.613; 1951, 3.196; 1952, 3.538; 1953, 3.780; 1954, 4.398; 1955, 4.416.

A sum of about Rs. 29 crores had been invested in the industry up to 1950-51 of which the A.C.C. accounted for Rs. 15.5 crores and the Dalmia Group Rs. 7 crores. Some 33,000 persons were employed by the industry in 1950-51. Excluding Rs. 2.92 crores spent on the 2 lakh tons cement factory of the U.P. Government at Churk, about Rs. 15 crores are estimated to have been invested in new units and expansions in the cement industry during 1951-56. The investment incurred by the Associated Cement Companies on their projects is estimated to amount to Rs. 11.76 crores during this period.

For the expansion of capacity in the private sector to 15.5 million tons by 1960-61 from 4.6 million tons in March 1956 (the capacity in the public sector in the two plan periods will be 5 lakh tons and 3 lakh tons respectively), an investment of about Rs. 80 crores is likely to be required. The development programme of the A.C.C. envisages an investment of Rs. 35 crores for stepping up the capacity of their factories from 2.782 million tons in March 1956 to 5.288 million tons by the end of the Second Plan.

Altogether the capacity of the industry is envisaged to be stepped up to 16.0 million tons per annum by the end of the Second Plan and a production target of 13.0 million tons.

Among the new units completed special mention may be made of the U.P. Government's factory at Churk which went into production in 1954 and that of the ACC at Sindri, designed for operation on the calcium carbonate sludge of the fertilizer factory, which went into production in September 1955.

The progress in the expansion of capacity and production in the different years of the First Five-Year Plan is given below:

Year	Installed capacity	Actual production
	(million tons)	
1950-51 .. ..	3.28	2.70
1951-52 .. ..	3.71	3.28
1952-53 .. ..	3.80	3.51
1953-54 .. ..	4.24	4.03
1954-55 .. ..	4.44	4.42
1955-56 .. ..	4.93	4.60

The Government, after due consideration of a report submitted by the Tariff Commission, fixed the standard ceiling price of cement at Rs. 67 per ton *f.o.r.* destination. It also allowed a further Rs. 2 per ton, which the companies are required to hold in a separate fund for being used with the consent of the Government exclusively for rehabilitation and expansion purposes.

### IMPORTS & EXPORTS

Imports of cement before the outbreak of the Second World War were small and generally the cement was of special quality. During the post-war period imports by sea totalled about 150,000 tons in 1948-49 and 300,000 tons in 1949-50. In addition, about 25,000 tons and 100,000 tons were imported from Pakistan by land routes in the two respective years. Since 1950 imports were restricted to quantities included in trade agreements as well as to those in respect of which prior commitments had been made and were only about 17,000 tons in 1950-51. The quantity imported in the following four years was negligible.

There have been no exports except of very limited quantities to Pakistan under the trade agreements and to the Middle East, Ceylon and East Africa. With the contemplated increase in productive capacity, the industry should be in a position to export 200,000 tons to 300,000 tons per annum by 1955-56.

The imports and exports of cement by land and sea during the period of the First Plan were as follows:

Year	Imports	Exports
	(Tons)	
1951-52 .. ..	10,312	67,758
1952-53 .. ..	3,652	57,441
1953-54 .. ..	6,694	86,116
1954-55 .. ..	6,000	101,429
1955-56 .. ..	10,717	51,351

State*	1950-51		1955-56	
	No. of Units	Rated Capacity (000 tons)	No. of Units	Rated Capacity (000 tons)
Bihar .. ..	5	922	6	1,122
Orissa .. ..	1	165	1	165
Uttar Pradesh .. ..	1	200	1	200
Madhya Pradesh .. ..	1	350	1	350
Madhya Bharat .. ..	1	60	1	60
Rajasthan .. ..	1	225	2	525
PEPSU .. ..	2	242	2	370

Hyderabad .. ..	1	240	1	380
Total .. ..	21	3,282	27	4,931

\* Pre-reorganization.

### DEVELOPMENT PLAN

The annual consumption of cement was 3 million tons per annum during the war years and rose to about 2.6 million tons during the post-war years, 1949-50 and 1950-51. In 1951 about 3.17 million tons of cement were delivered, while 1.714 million tons were supplied in the first half of 1952. The future demand for cement, exclusive of the needs of the multi-purpose projects should be around 3.8 million tons by 1955-56. Including the demand of the projects and roads, the total should reach 4.5 million tons by the end of the first Plan period. By 1960-61, the demand will substantially increase and the consumption is estimated to reach 12.5 million tons at the end of the Second Plan period.

To meet this increased demand, the Government has approved various expansion schemes which are expected to increase the rated capacity from 4.931 million tons in 1955-56 to 12.3 million tons by 1960-61. On the basis of these approved schemes, the Statewise distribution of the industry in 1960-61 is expected to be as follows:

State†	Number of Units	Rated Capacity (000 tons)
Bihar .. ..	7	2,324
Orissa .. ..	1	725
Uttar Pradesh .. ..	2	631
Madhya Pradesh .. ..	3	1,168
Madhya Bharat .. ..	1	60
Rajasthan .. ..	2	1,284
PEPSU .. ..	2	635
Saurashtra .. ..	5	1,470
Bombay .. ..	4	565
Madras .. ..	4	949
Mysore .. ..	1	104
Travancore-Cochin .. ..	1	55
Hyderabad .. ..	2	645
Andhra .. ..	5	898
Assam .. ..	2	231
Vindhya Pradesh .. ..	2	550
Total .. ..	44	12,294

† Pre-reorganization.

The State-wise distribution of the industry during 1950-51 and towards the end of the period of the First Plan is indicated below:—

\* In March 1957 there were 28 cement factories, of which one was owned by the U.P. Government and one by the Mysore Government. Of the rest, all privately owned, seven were in Bihar, four in Bombay, three in Madras, two each in Mysore, Andhra, Madhya Pradesh, Rajasthan and the Punjab, and one each in Orissa and Kerala. The total capacity was about 6 million tons a year and the total production about 5 million tons.

## CHEMICAL INDUSTRY

FOR purposes of industrial production, chemicals fall easily into one of two major groups: (a) Heavy Chemicals; and (b) Fine Chemicals.

The term "Heavy Chemicals" is applied usually to substances such as the common acids, alkalies, fertilizer, etc., which are the foundation of the entire chemical industry.

Fine chemicals, on the other hand, are manufactured generally in relatively small amounts since purity is important; their production requires great skill and care in each operation under accurately controlled conditions. In this category are included photographic materials, drugs and pharmaceutical products, paints, varnishes and pigments, dyestuffs, etc.

According to the latest data, there are over 250 factories with a capital investment of nearly Rs. 33 crores and providing employment for about 35,000 workers.

During the year 1953, the chemical industries as a class, as well as the many other industries closely allied to them, made fairly good progress. A new up-to-date plant for the manufacture of 30 tons of aluminium sulphate per day was set up by a Bengal company. A new unit for calcium centride (3,000 tons per annum) and another for ammonium chloride (8,000 tons per annum) were expected to go into production in 1954-55. Major industrial schemes recommended for approval by the Licensing Committee relate to production of industrial explosives (5,000 tons per annum), sodium hydro-sulphite (2,300 tons per annum) and hydrogen peroxide (1,440 tons per annum).

During 1954, the chemical industries made further progress. Out of 134 items at present manufactured in the country, production of all but 37 recorded an increase during the year. Among new products manufactured for the first time in the country during the year are: Sheet glass of 10-12 oz. gauge; penicillin, chloromycetin; glacial acetic acid and acetic anhydride; and bismuth salts.

The year 1955 continued the progress made in the previous year. In some cases, the record was improved. Substantial increase was registered in the production of soda ash, calcium chloride, benzene, sulphur black, chloramphenicol, sodium salicylate, phosphoric acid, benzene hexachloride, naphthalene and sulphur drugs. Penicillin, ammonium chloride and bismuth salts were manufactured for the first time and steps have been taken for the production of vat dyes, naphthols and bases, hydrogen peroxide and stabilised bleaching powder.

### SULPHURIC ACID

The regionwise distribution of the capacity at the end of the First Plan as compared to June 1952 was as follows:

	Annual Rated Capacity in Tons	
	June, 1952	April, 1956
Assam .. .. .	6,000	6,000
West Bengal & Bihar .. .. .	56,500	79,770
Bombay* .. .. .	35,013	57,025
Punjab* & Delhi .. .. .	14,955	12,380
Uttar Pradesh .. .. .	5,775	5,445
Madhya Pradesh* .. .. .	825	1,650
Madras* .. .. .	13,530	15,180
Travancore-Cochin* .. .. .		43,500
Rest of the Indian Union .. .. .	56,183	20,395
Total .. .. .	189,441	242,005

\* Pre-reorganization.

During 1955, the output of sulphuric acid increased by 4 per cent. over that of 1954. Six schemes for its increased production with a total capacity of 136,000 tons, were sanctioned during the year. This raised the total capacity to 436,820 tons per annum. It may be mentioned here that one of the schemes was intended to use pyrites as a raw material.

The trend of production in tons is as follows:

1948, 80,004; 1949, 99,456; 1950, 102,480; 1951, 106,932; 1952, 96,084; 1953, 109,091; 1954, 150,871; 1955, 156,000.

The Government fixed a ceiling price for sulphuric acid at Rs. 175 per ton ex-works, linking it to a price of Rs. 275 per ton for sulphur delivered to the works. Variations in the price of sulphuric acid have been provided for to allow for fluctuations in the price of sulphur.

The annual consumption of sulphuric acid in different industries in 1955-56 was estimated at 160,000 tons and was estimated to rise to 470,000 tons by 1960-61. The following picture is expected to emerge at the end of 1960-61:—

	1955-56	1960-61
Number of units .. .. .	51	..
Annual rated capacity (tons of 100 per cent. acid) .. .. .	242,000	500,000
Actual production (tons of 100 per cent. acid) .. .. .	170,000	470,000

### ALKALI INDUSTRY

The alkali industry comprises the manufacture of soda ash and caustic soda, sodium bicarbonate, bleaching powder, benzene hexachloride, liquid chlorine and zinc chloride.

As against the rated capacity of 90,000 tons per annum, the production of soda ash in tons was as under:—

1948, 29,148; 1949, 17,916; 1950, 43,788; 1951, 47,532; 1952, 44,328; 1953, 56,869; 1954, 48,293; 1955, 77,272.

The production of soda ash increased from 48,293 tons in 1954 to 77,272 tons in 1955, representing more than 85 per cent. utilisation of present installed capacity. Three new licences for the production of soda ash were issued during 1955 and expansion of one of the existing plants was approved. With the implementation of the new schemes, the installed capacity would rise to 283,000 tons a year.

On the basis of the Tariff Board's report in 1951 the estimated consumption of soda ash was placed at 115,000 tons. This was expected to rise to 155,000 tons by 1955-56 and to 230,000 tons by 1960-61.

The import policy and the high prices since 1951 gave an impetus to this nascent industry though the heavy imports allowed in the first two years of the First Plan caused some temporary difficulties to indigenous producers owing to accumulation of stocks. Actual imports were —82,312 tons in 1951-52; 81,288 in 1952-53; 40,617 in 1953-54; 67,710 in 1954-55; 59,673 in 1955-56 (April-January).

The tariff protection to this industry has been extended to the end of 1958.

The following table summarises the programme of development of the soda ash industry:—

	1955-56	1960-61
Number of units .. .. .	2	5
Annual rated capacity (tons) .. .. .	90,000	253,000
Actual production (tons) .. .. .	80,000	230,000

**Caustic Soda.**—The industry made considerable progress during the First Plan. There were only 9 factories in operation in 1951 with an installed capacity of 27,552 tons. By 1955, the factories rose to 12 with a capacity of 44,300 tons.

Actual indigenous production of caustic soda and the associated chemicals in the post-war period was as under:—

Year	Caustic soda in Tons	Liquid chlorine in Tons	Bleaching powder in Tons
1950 .. .. .	10,846	3,970	3,309
1951 .. .. .	14,722	5,298	3,583
1952 .. .. .	17,084	6,240	792
1953 .. .. .	22,908	8,136	1,944
1954 .. .. .	29,307	9,782	2,325
1955 .. .. .	33,320	11,561	2,659

Imports of caustic soda were 62,750 tons in 1951-52, 25,540 tons in 1952-53, 49,360 tons in 1953-54, 49,257 tons in 1954-55 and 45,670 tons in 1955-56 (April-Jan.).

The Second Five-Year Plan envisages that the installed capacity of the industry will rise from 44,300 tons in 1955-56 to 150,400 tons in 1960-61 and actual production from 36,000 tons to 135,400 tons.

### MISCELLANEOUS CHEMICALS

The present position of some of the important products is as follows:—

	No. of units.	Annual rated capacity in tons.	Actual production in tons.	
			1954	1955
Alum .. .. .	18	12,210	3,000	3,850
Aluminium sulphate .. .. .	18	57,441	25,000	23,200
Ferrous sulphate .. .. .	9	1,387	581	500
Copper sulphate .. .. .	10	2,013	844	900
Sodium thiosulphate .. .. .	5	2,120	613	976
Sodium sulphite .. .. .	4	750	193	269
Sodium bisulphite .. .. .	5	900	429	515
Bichromates .. .. .	7	5,379	3,239	3,300
Sodium bicarbonate .. .. .	2	4,620	2,057	4,125
Potassium chlorate .. .. .	2	2,200	..	..
Zinc chloride .. .. .	5	1,410	986	700
Calcium chloride .. .. .	3	2,867	401	786
Magnesium chloride .. .. .	4	34,650	6,593	6,111

### FERTILISERS

So far in India the inorganic nitrogenous fertiliser almost universally employed has been ammonium sulphate. There are at present eight units in West Bengal and Bihar with a rated capacity of about 425,900 tons of ammonium

sulphate per annum. The Sindri factory went into production in November 1951.

The output of ammonium sulphate has progressively risen from 45,395 tons in 1949 to 319,620 tons in 1953, to 340,222 tons in 1954 and to 393,095 tons in 1955.

Assuming country-wide application of nitrogenous fertilizers the annual needs would be about 12 million tons of ammonium sulphate.

In spite of the full utilisation of the capacity of the Sindri Factory, it has been necessary to import large quantities of nitrogenous fertilizers because of increasing demand.

The Fertilizer Production Committee submitted its report in 1955 and suggested suitable location for the establishment of new plants. After the implementation of the schemes both in the public and private sectors, it is expected that the annual installed capacity will be 382,000 tons of fixed nitrogen and the production 290,000 tons by 1960-61.

The annual rated capacity for the production of superphosphates was 210,870 tons by the end of 1954. The factories are small and have suffered because of import restrictions.

The production and consumption of superphosphates received a setback in 1955 due to the fall in agricultural prices and rail transport difficulties. Production was: 105,056 tons in 1954 and 75,345 tons in 1955.

But in view of the importance of this fertilizer and that of ammonium phosphate the target of consumption is put at about 120,000 tons by 1960-61, when the production is expected to be 83,300 tons of superphosphate and 3,700 tons of ammonium phosphate.

The estimated needs of potassic fertilizers is roughly 30,000 tons by 1960-61 and it may be possible to recover about 52,700 tons from all the salt works in the country. In 1955, the Indian Potash Supply Agency was formed with the approval of Government, which is expected to assist the development of the production of potassic salts from the bitterns of salt works.

#### FINE CHEMICALS

The term "fine chemicals" is applied usually to substances such as photographic materials, drugs and pharmaceutical products, paints, pigments and varnishes, and dyestuffs. All the figures given below are in tons per annum except where otherwise stated.

Chemical.	Production.			Main uses.
	1953	1954	1955	
Acetic acid (tons) .. ..	275	1,000	2,375	Rayon, white lead, lead acetate, dyeing, rubber
Acetone (tons) .. ..	..	150	423	Solvent, explosives
Benzene (gals.) .. ..	4,99,000	6,88,000	25,46,000	Solvent
Creosote oil (gals.) .. ..	2,60,600	4,32,700	4,15,800	Insecticide
Naphthalene (tons) .. ..	5,84,000	6,71,000	7,90,000	Disinfectant, etc.

#### DRUGS AND PHARMACEUTICALS

Drugs and pharmaceuticals cover a large variety of products from simple extracts of vegetable drugs and glandular preparations to highly complex synthetic drugs and antibiotics.

In the field of antibiotics, a penicillin factory was established in the public sector. The Hindustan Antibiotics, located at Pimpri near Poona went into production in August 1955 with a capacity to produce 3.6 million to 9 million mega units of penicillin per annum. Chloromycetin is being produced by the Parke Davis & Co. from the penultimate levobase which is imported. Their plant has a capacity of 3,600 kgs. Aureomycin is produced by the Atul Products from imported crude chlortetracycline. They have also taken up the manufacture of tetracycline.

The manufacture of sulpha drugs has made substantial progress in the country. Twelve units, which are engaged in their production, are stated to have a combined capacity of 22,000 kgs. per annum, although their actual production has been far below this capacity.

Among the new drugs recently developed for the treatment of tuberculosis are para-amino salicylic-acid (PAS) and isonicotinic hydrazide (INH). But their production has been very erratic.

Two manufacturers produce at present antileprosy drugs such as DDS and its derivatives. They have a total capacity for 2,920 Kgs. of DDS.

The average annual demand has been estimated at 60 tons for calcium lactate, 80 tons for iron-ammonium citrate, 200 tons for potassium citrate and 50 tons for sodium citrate. Government have, on the Board's recommendation, converted the 36 per cent. standard and 26 per cent. preferential revenue duty on calcium lactate into a protective duty.

Production of bromine and bromides at one of the alkali works has been attempted and an annual output of 75 tons bromine, 36 tons potassium bromide and 14 tons sodium bromide has been recorded.

Coal, tar and wood distillation products are not sufficiently exploited to manufacture fine chemicals and even the war-time production of methanol and formaldehyde has been recently curtailed. Synthetic fine chemicals are yet to be turned out in India on a commercial scale.

**Photographic Materials.**—The basic chemicals required for the photographic industry are: (i) gelatin, silver halides and sensitizers in the coating of film, plate and paper base, and (ii) hypo sodium sulphite metal, hydroquinone and chrome alum in the processing stages.

Borax, boric acid, acetic acid and metal and photographic-grade sodium sulphite are still imported. The present capacity of sodium sulphite is 800 tons and output 300 tons which meets the full demand. Production capacity of 30 tons for potash chrome alum has been established. Hydroquinone is being manufactured in India since 1950 and the annual output is 25 tons. X-ray developing and fixing salts have been placed on the market since 1949.

Pre-war imports of raw film base into India were enormous, the film industry alone consuming some 80 million ft. per annum. The Celluloid Industries Panel has recommended the installation of a factory for manufacturing 50 million sq. ft. of all types of raw film, and this should synchronize with the manufacture of gelatin, silver halides, sensitizers and other photographic materials in adequate quantities.

Quinine, the most extensively used anti-malarial drug, has been produced in the country in the factories established by the West Bengal and Madras Governments. During the First Plan period the Madras Government established a new factory at Anamalai with a capacity of 80,000 to 10,000 lb. of quinine salt. Besides, some synthetic anti-malarials such as chloroquin and its salts are produced in India. There are three units engaged in their manufacture, with an estimated capacity of 1,890 kgs. per annum.

There are three manufacturers of anaesthetics with a total capacity of 712,352 kgs. of ether, 54,370 kgs. of chloral-hydrate and 32,800 kgs. of ethylchloride.

Among insecticides, DDT is produced on a commercial scale. The factory of the Hindustan Insecticides in Delhi went into production in March 1955. Two factories manufacture benzene hexachloride with an annual capacity of 2,500 tons.

No substantial development in vitamin manufacture has taken place during the First Plan period. Shark liver oil is produced in factories set up by the Governments of Bombay\*, Madras\* and Travancore-Cochin\*. The existing factories have an estimated capacity of 70,000 gallons per annum of 8,000 I.U. of vitamin 'A'.

Still imports of drugs and pharmaceuticals continue to be considerable, particularly penicillin and other antibiotics, sulpha drugs, anti-malarials, vitamin preparations and proprietary

and patent medicines. The total value of imports stood at about Rs. 10 crores in 1950-51, Rs. 15 crores in 1951-52, Rs. 11 crores in 1952-53, Rs. 12 crores in 1953-54 and Rs. 13 crores in 1954-55. But exports, which are mainly confined to certain, crude drugs of vegetable origin, have been of the value of about Rs. 2 crores per annum.

The Ministry of Commerce and Industry appointed a Committee in February 1953 and the Committee submitted its report in June 1954, making a number of recommendations to improve the existing conditions in the pharmaceutical industry. In 1955, the Government set up a Developmental Council for the industry.

The requirements of drugs and pharmaceuticals are very large in India. Hence, schemes are included in the Second Plan for the expansion of the production of various drugs and medicines.

Some of the important schemes are listed below:

The factory at Pimpri proposes to expand its capacity for penicillin manufacture to 24 million mega units per year at a cost of Rs. 42-35 lakhs. Besides, this concern has under consideration the manufacture of certain other antibiotics like streptomycin. In the private sector, the Alembic Chemicals, Baroda, have a scheme for the establishment of a penicillin factory with a capacity of 4.8 million mega units per annum and the Standard Pharmaceutical Works, Calcutta, for the production of 1.8 million mega units of penicillin and 180 kg. of streptomycin. Besides, the Rambaxy & Co., Faridabad, have also been given a licence to set up a plant for the manufacture of 3,000 kgs. of chloromphenicol as also the Muc Laboratories, Bombay for the manufacture of 500 kgs per annum.

Two firms, Fedco, Bombay and Sarabhai Chemicals, Baroda, have been granted licences for the manufacture of procaine hydrochloride with an annual capacity of 60,650 kgs.

The capacity for DDT in the public sector is planned to be stepped up substantially during the Second Plan. The annual capacity of the existing factory is to be expanded from 700 tons to 1,400 tons and a new plant will be set up with an annual capacity of 1,400 tons at Alwaye in Kerala.

There are at least 20 factories manufacturing paints and varnishes, but nearly 150 of them are very small in size. The bigger ones are concentrated in Bombay and Calcutta. Eighteen units with a capacity of 36,360 tons are in Calcutta, and 16 with an annual capacity of 18,360 tons are in Bombay. According to the Census of Manufacturing Industries (1953), the total capital invested in 46 units amounted to about Rs. 4.18 crores and the number of persons employed was about 4,980.

An excise duty was imposed on paints and varnishes at 10 per cent. *ad valorem* with effect from March 1, 1955.

It is estimated that the consumption of paints, varnishes and enamels may go up from about 40,000 tons in 1955-56 to 60,000 tons in 1960-61. The demand for nitrocellulose lacquers may rise from about 3,00,000 gallons to 5,00,000 gallons. The existing capacity for ready-mixed paints and varnishes, i.e., 65,000 tons, is considered sufficient to meet the demand during the Second Plan; so also the present capacity of 8,00,000 gallons for nitrocellulose lacquers.

The following table summarises the development programme of the industry during the Second Plan:

	1955-56	1960-61
(a) Ready-mixed paints, varnishes, etc.:		
Capacity (tons) ..	65,000	65,000
Production (tons) .. (est.)	39,000	60,000
(b) Nitrocellulose lacquers:		
Capacity (gals.) ..	800,000	800,000
Production (gals.) .. (est.)	390,000	500,000

\* Pre-reorganization.

† Now produces about 16-18 million mega units.

## COFFEE INDUSTRY

**C**OFFEE cultivation is mainly confined to the hilly tracts of south India, from one thousand to six thousand feet above the mean sea level, and is centred in the Malnad area of Mysore, Madras, and the newly-formed State of Kerala. In the lower elevations, which have a higher rainfall, the more delicate but better quality Arabica coffee has given place to the harder but coarser Robusta coffee.

The capital investment in the industry is estimated to be over Rs. 15 crores and the average annual value of the crop is about Rs. 8 crores. Nearly 200,000 people drawn chiefly from Malabar, and parts of Mysore are employed in the industry. Many of the coffee estates are inter-planted with orange trees, cardamom and pepper vines. There are about 50 species and sub-species of coffee plant in the country, the one most extensively cultivated being Coffee Arabica, the best in quality, with Robusta coming next in importance.

The area and production, of the two varieties of coffee from 1951 are as under:

### AREA IN THOUSAND ACRES \*

Year	Arabica	Robusta	Total
1951-52 ..	168	67	235
1952-53 ..	167	72	240
1953-54 ..	167	75	242
1954-55 ..	167	85	252

### PRODUCTION IN TONS

Year	Arabica	Robusta	Total
1951-52 ..	14,270	6,765	21,041
1952-53 ..	12,775	10,725	23,500
1953-54 ..	22,630	6,780	29,400
1954-55 ..	16,300	8,800	25,100
1955-56 ..	22,300*	11,800*	34,100*
1956-57 ..	24,100*	13,270*	37,370*

Increase in production has been followed by a rise in exports and internal consumption.

The following table gives the trend of exports :

Year	Exports in Tons
1950-51 ..	2,677
1951-52 ..	803
1952-53 ..	2,218
1953-54 ..	2,793
1954-55 ..	9,430
1955-56 ..	7,780
1956-57 ..	11,500

\* Estimates

A later estimate put the total production at 38,500 tons. The amount reserved for home consumption was 25,810 tons (1956-57).

The export duty on coffee imposed in October 1953 was reduced from Rs. 82-8 to Rs. 21 per cwt. in January 1955.

The possibility of further expansion of the coffee industry has been receiving Government's active consideration. An Officer on Special Duty has been appointed to conduct a field survey of the vast undeveloped areas in the South.

A Committee was appointed in 1954 for the purpose of making a comprehensive inquiry into the economic conditions and problems of tea, coffee and rubber industries.

The average Pool sale prices per cwt. for 1951 to 1956 years were as follows:—

Year	Plantation 'A'	Arabica cherry Flats	Robusta cherry Flats
	Rs. a.	Rs. a.	Rs. a.
1951	218 11	197 14	190 6
1952	251 11	220 5	200 11
1953	219 4	189 0	150 1
1954	205 3	161 2	146 5
1955	217 5	180 11	158 14
1956	213 7	182 10	157 4

### INDIAN COFFEE BOARD

To stimulate internal consumption and to regulate exports a statutory body, now known as the Indian Coffee Board, was set up under the Coffee Market Expansion Board. One of the serious problems the Board had to contend with in 1952 was the growing rise in the prices of coffee which advanced from Rs. 207 per cwt. of plantation type in April 1952 to a record level of Rs. 316 per cwt. in the following September. The Board effected increased sales of coffee and banned exports. In December 1952 a Bill was introduced in Parliament to amend the Act of 1942 for the purpose of ensuring better co-ordination between the Board and the Central Government and of providing adequate representation of consumer interests on the Board.

The Coffee Market Expansion (Amendment) Bill, 1954, was passed in November 1954. The bill provided for greater control by the Union Government over the Coffee Board and the industry as a whole.

### AVERAGE INDEX NUMBERS OF WHOLESALE PRICES OF COFFEE (Price for week ended August 19, 1939 = 100).

Year	Index
1950 .. .. .	476
1951 .. .. .	567
1952, August 16 .. .. .	758
1953, August 15 .. .. .	614
1954 .. .. .	546.8
1955 .. .. .	618.0

### MARKETING

Under the existing scheme of Coffee Control, all coffee estates in the country, big or small, are required to get themselves registered and to deliver the entire production, except quantities allowed for domestic consumption and seed purpose, to a Common Pool administered by The Indian Coffee Board. Growers are paid in proportion to the value of coffee delivered to the Pool after deducting the cost.

The quantities of coffee released from the Coffee Pool for the internal market were 22,288 tons in 1955, 23,807 tons in 1956 and 25,810 in 1957.

### Plantation Enquiry Commission

The Report of the Plantation Inquiry Commission (as the Committee was called) on coffee was published in the last week of November 1956. It observes that, although the total production of coffee in the country has increased considerably during the past 15 years, production per acre has not made any marked increase. The average yield is still just about 60 per cent. of the average yield in most of the coffee-growing countries of the world. Therefore, the Commission recommends that the yield from existing acres must be intensified at economic cost by the use of better strains of seeds, more manures and sufficient spraying against pests and diseases. With a view to regulating the internal distributive trade, the Commission has suggested the formation of a separate organisation under the aegis of the Board for manufacturing and marketing coffee powder. It may be stated here that the Board is already manufacturing and selling coffee in powder form. On the question of extension of acreages, the Commission recommends extension upto the minimum necessary to meet the growing internal demand and to maintain and develop the export markets. Statutory regulation of licensing of cultivation and production has been suggested in this connection. Another recommendation is that a coffee replanting fund should be instituted and that estates should be required to contribute a fixed sum annually to this fund.

## COIR INDUSTRY

**COIR** is the trade name given to the fibre obtained from the husk of the coconut fruit. This golden coloured fibre is also known in Europe as "Cocos Fibre". India and Ceylon have a virtual monopoly in the production of this by-product of the coconut industry.

In India the coir industry is practically confined to the coastal strip of Kerala State. It accounts for over one million acres of the coconut growing areas out of a total of 1·526 million acres in India. The distribution of the area under cultivation and production of coconuts in respect of India is roughly as follows:—

	Area in acres.	Production Percentage.
Madras* .. ..	605,765	41·3
Travancore .. ..	584,736	37·8
Cochin .. ..	67,058	4·3
Mysore* .. ..	170,180	11·3
W. Bengal .. ..	31,300	1·4
Orissa .. ..	30,021	1·8
Bombay* .. ..	29,197	1·8
Other States .. ..	7,592	0·3
	<u>1,525,759</u>	<u>100·0</u>

\* Pre-reorganization.

The coir industry is organised partly on cottage basis and partly in factories. The production of coir fibre, yarn and ropes is essentially a cottage industry, while coir mats, mattings, rugs, carpets, bags, etc. are manufactured in factories. About 300,000 people

earn their living from this industry in Travancore alone and 50,000 in Cochin and about one lakh in Malabar.

There are two principal types of coir fibre—mat fibre and curled fibre. The bulk of the output consists of mat fibre. The yarn spun by hand is soft and even twist, while that spun on wheels is hard twist and not so even as hand spun. Wheel spinning is gradually displacing hand spinning. Spinning is mainly done by women, boys and girls. Over 100,000 families are employed in this trade in Travancore alone.

Coir yarn has certain well-known trade descriptions. They are: (1) Angengo-Superior and Ordinary; (2) Mangadan; (3) Carruva; (4) Alapat-Real and Imitation (Ashtamudy); (5) Vycome; (6) Beach; (7) Roping; (8) Qullandy; (9) Beypore; and (10) Unsoaked—Fine unsoaked and unsoaked.

The yarn produced in the spinning districts is marketed chiefly in Alleppey where there are a large number of factories for the manufacture of mats, mattings, rugs and carpets and also exporters of yarn.

Out of the 130,000 tons of coir fibre produced in India, only 600 tons are exported; the rest is spun into coir yarn. On an average, 23,000 tons of coir yarn are utilised in the manufacture of coir floor coverings such as mats and mattings; 45,000 tons are exported as coir yarn; and about 52,000 tons are consumed in India itself for various purposes including manufacture of ropes and cordages.

In 1948 there were about 525 factories of which 474 were small ones with less than 20 looms and the rest large factories with more than 50 looms, having in all about 10,000 looms on mats and mattings.

About 15,000 workers were engaged by these factories.

Following are the estimates of coir-manufactured and unmanufactured:—

State.*	Production (Tons).
Madras .. ..	25,038
Travancore-Cochin .. ..	97,000
Mysore .. ..	Not available
W. Bengal .. ..	225
Bombay .. ..	63
Total .. ..	<u>132,326</u>

\* Pre-reorganization.

The coir industry in India is subject to violent fluctuations in prices and exports, causing often hardship to a large section of the population. This induced the Government of India to set up a Coir Board by special legislation called the Coir Industry Act, 1953. The Act also provides for the control of the industry by the Union Government and for the levy of a customs duty on coir fibre, coir yarn and coir products. At present, the duty is levied on coir fibre and coir yarn only at the rate of eight annas per cwt. The annual revenue on this account comes to about Rs. 5 lakhs.

The Coir Board was established on July 6, 1951. Its chief function is the improvement of markets at home and abroad, thereby establishing a balance between internal consumption and exports so as to give the industry the required economic stability. The Board shall discharge its functions in accordance with the rules framed by the Central Government, which are under active consideration now. Meanwhile a delegation of the Board toured the country to find out how far the 50 per cent of the husk now used as fuel could be put to industrial use.

In the Second Five-Year Plan, the Board has schemes worth about Rs. 30 lakhs. They relate to the establishment of Research Institutes, sending out foreign delegations for market survey and study the uses of yarn in importing countries, opening of show-rooms and sales-depots, and propaganda.

### EXPORTS

Export of coir yarn, mats and mattings, ropes and other sorts of coir are detailed below:—

(Tons)

Year.	Coir yarn.	Coir mats and mattings.	Coir ropes.	Other sorts.
1951-52 .. ..	45,269	11,510	5,869*	4,790
1952-53 .. ..	48,446	12,408	4,422*	4,087
1953-54 .. ..	55,570	13,486	3,930	7,031
1954-55 .. ..	53,428	11,505	4,290	8,532
1955-56 .. ..	54,162	13,936	5,055	6,117

\* Includes export to Pakistan by land.

## COTTAGE INDUSTRIES

**TOTAL** allotment for small-scale and cottage industries under the First Five-Year Plan: Rs. 81.2 crores. The financial provision made in the Second Five-Year Plan is Rs. 200 crores. This does not include expenditure on the Ambar Charkha Programme and other Working Capital requirements. The Village and Small Scale Industries Committee (Karve Committee) had, however, recommended programmes and allocations involving a total outlay of Rs. 280 crores.

It is customary to refer to industries which are not required to be registered under the Factory Act as cottage and small-scale industries. There is no accepted line of distinction between cottage and small-scale industries but the use of electric power is one of the popular tests. A rough and ready definition now provided is that all those industries which employ up to 5 workers and use power or those which employ 100 workers and do not use power, are called small-scale industries.

The data about their strength is extremely meagre. It is, however, very roughly estimated that at least 22 million persons are gainfully employed in these industries classified as under:—

Name of Industry	Persons employed in lakhs.
Textiles .. .. .	58
Leather .. .. .	24
Wood .. .. .	21
Metals .. .. .	42
Pottery, Ceramics, Tiles, Bricks, etc.	20
Vegetable Oils, Chemical Products, etc. .. .. .	10
Food including Hand-pounding .. .. .	20
Dress and Toilet .. .. .	11
Miscellaneous including Jewellery and toy making .. .. .	17
<b>TOTAL ..</b>	<b>220</b>
	(Estimated)

In order to encourage more effectively the development of cottage and small-scale industries, the All-India Cottage Industries Board, constituted in 1948, was replaced by two Boards, viz., The All-India Handicrafts Board and The All-India Khadi and Village Industries Board. The former was constituted in November 1952, and the latter in February 1953. Other organisations are (i) Small-Scale Industries Board, (ii) The Coir Board and (iii) The Central Silk Board. The Coir Board and the Central Silk Board are statutory bodies.

Towards the end of 1952 the Government also constituted the All-India Handloom Board to deal specifically with problems affecting the handloom industry. A cess of three pias per yard has been levied on all mill-made cloth consumed within the country and is expected to yield every year about Rs. 6 crores. Schemes for the development of khadi and handlooms are to be financed out of this resource, though finances for khadi development programmes are not entirely dependent on the Cess Fund.

The Cottage Industries Directorate has been merged as a part of the Development Wing and is responsible, generally, for all small-scale industries.

The primary objective of the policy laid down under the First Five-Year Plan is to provide a field within which each cottage industry may be able to organise itself. Wherever a large-scale industry competes with a cottage industry, a common production programme should be evolved.

The programme may cover (a) reservation of spheres of production, (b) non-expansion of the capacity of a large-scale industry, (c) imposition of a cess on products of a large-scale industry, (d) arrangements for the supply of raw materials and (e) co-ordination for research, training, etc.

To carry out research, the establishment of an Institute for village technology has been recommended by the Planning Commission.

Finance for the development of village industries has to be viewed as a problem inseparable from finance for agriculture. The formation of industrial co-operatives is, therefore, considered essential. Meantime, the responsibility for revitalising village industries has devolved on the Government.

In the States the First Five-Year Plan provided Rs. 12 crores for cottage and small-scale industries. The responsibility for organising industrial co-operatives lies on the State Governments.

The question of training the artisans has received considerable emphasis in the First Five-Year Plan. The training centres maintained by the Central Government under the Directorate-General of Resettlement and Re-employment have trained during the past few years 144,000 persons.

The Ministry of Rehabilitation has arranged for the technical training of 52,000 persons from West Pakistan.

The plans of the State Governments provided for the following training programmes:—

	1950-51	1955-56
No. of Industrial Schools	365	456
No. of pupils trained ..	14,750	21,797
No. of technical and vocational institutions ..	260	407
No. of persons trained ..	26,708	42,997

In February 1955, a Small Industries Corporation, designed to assist small industries, was registered as a private limited company under the auspices of the Government of India. The Corporation will accept contracts for supplying orders to Government and issue sub-contracts for these goods to small-scale industries. The Corporation also undertakes and guarantees loans to such units from banks and has an authorised capital of Rs. 10 lakhs subscribed entirely by the Government of India.

### TEXTILES

In the main, these are composed of two units—handlooms and khadi.

The details about the handloom industry have been given in the article on the cotton textile industry. Suffice it to say that there are about 2.0 million handlooms, working 200 days a year with an annual output of 1,200 million yards. The production in 1954-55 was about 1,300 million yards compared to 1,208 million yards in 1953-54. This was proposed to be stepped up to 1,700 million yards by 1955-56.

The problem in 1953 as in the previous year was of finding an adequate market for handloom cloth. In January 1953 the Government restricted production by mills of bordered dhoties to 60 per cent of their production during 1951-52. This measure succeeded in bringing down the overall production of dhoties to within the required quota, i.e., to about 30,000 bales.

But there were difficulties in the way of enforcing this measure and it was, therefore, decided that a more effective way of enforcing compliance with the objective would be to levy an additional excise duty on the production of dhoties over and above this percentage.

Financial assistance to the handloom and Khadi industries is being provided by Government out of a cess of 3 pias per yard on mill-made cloth. This is expected to bring in a sum of Rs. 6 crores every year. During 1953-54, the actual expenditure on khadi from the cess fund amounted to Rs. 1.88 crores. As regards village industries the All-India Khadi and Village Industries Board spent Rs. 131.85 lakhs during 1953-54.

The handloom industry had a better time in 1954. Adequate supplies of yarn were made available. A net work of sales depots had also been opened at various places. On the recommendations of the Board, the Government sanctioned a sum of Rs. 544.11 lakhs to the States from the cess fund upto the end of September 1954 for the implementation of various schemes.

On the question of reservations of the fields of production, the Textile Enquiry Committee has come to the conclusion that the existing reservations in favour of the handlooms or improved handlooms and the domestic powerlooms industry must continue. At the same time, the Committee expresses the opinion that there should be, during the first conversion period, that is to say, upto 1960, no further extension of these reservations.

While the Committee agrees that the reservations should also extend to the large-scale powerlooms, i.e., units containing five or more powerlooms, this sector of the industry should be definitely warned that after 1960 it will be considered to be on the same footing as the large-scale organised mill industry and that it can expect no concessions. As there is a concentration of the powerloom industry in the State of Bombay, the Committee recommends that the Government of Bombay should conduct such enquiry as it may deem fit into all matters affecting the industry and take steps to facilitate an increase in the economic efficiency of the powerloom industry by a change in the character of its production, if necessary, and by the provision of centralised warping, winding, yarn supplies on beams, dye-houses, finishing plants, etc.

The Committee is of the opinion that there should be no prohibition on handlooms from producing plain cloths like mullis, voiles, etc. The recommendations of the Committee are under consideration.

The main emphasis of khadi is to minimise the pressure of the problem of under-employment. It is hoped that about a million persons willing to devote four hours every day can have a supplementary income of Rs. 75 per month.

Calico printing is an old industry in Farukhabad and Ahmedabad and is now extended to most of the other cities. Over 25,000 people practise this art. In Farukhabad alone there are over 2,000 printers. The industry's products have a wide export market. During 1952 the cotton mills printed about 30 million yards. The question of reducing mechanised printing is under examination, and it has been decided that no more expansion of the mill industry for garment-making and printing of cloth should be permitted.

Silk weavers are found in nearly every State. Assam and W. Bengal are, however, the largest producers of silk accounting for two lakh looms and 15,000 looms respectively.

India is the only country where tussar, eri and muga silk is produced.\* The industry produces about 2 million lb. of silk and employs about a lakh of people. The annual consumption is about 3 million lb. with the result that a considerable quantity of raw silk is imported from abroad. The industry is now heavily protected and a Silk Board has been constituted to promote its growth. The progress made by the Board was, however, not appreciable. The constitution of the Board was amended so as to bring in wider representation and also to bring in the entire silk-industry in its purview. For the year 1953-54 an allotment of Rs. 18 lakhs was made by the Centre against an average of Rs. 3½ lakhs in the preceding years.

The Government placed a sum of Rs. 30 lakhs in 1954-55 at the disposal of the Central Silk Board for financing various State Government schemes. Besides the old schemes, new schemes costing Rs. 20 lakhs for the promotion of the industry were launched in January 1955.

\* There are no reliable statistics.

### KHADI & VILLAGE INDUSTRIES

**Khadi.**—Cotton Khadi which has so far been woven from traditional charkha yarn will be produced in future in greater measures from Ambar Charkha yarn. Besides, the Textile Policy announced recently has allotted a production of 300 million yards of cloth for the decentralised sector during the Second Five Year Plan period. Production of traditional khadi is proposed to be raised from 34 million yards to 60 million yards in the course of the Second Plan at a total expenditure of Rs. 21 crores including working capital, but this programme may have to be revised so as to fit in Ambar Khadi programme.

Government sanctioned to the Khadi Board Rs. 3.96 crores for the manufacture and introduction of 75,000 Ambar Charkhas during 1956-57. Substantial progress has so far been made in every direction. The Government has tentatively accepted the Khadi Board's programme for the introduction of 150,000 Ambar Charkhas during the second year of the Second Five Year Plan. To produce the allocated 300 million yards by the end of 1960-61, it is estimated by the Board, that at least 800,000 Ambar Charkhas will have to be introduced. This programme is estimated to cost about Rs. 60 crores. The programme, if implemented will provide over the Plan period employment to 1,200,000 spinners, 166,700 weavers and about 50,000 persons in other ancillary processes.

**Khadi, Woollen.**—Spinning and weaving of wool are easier than that of cotton. At present the cottage industry has confined its activities to the production of carpets and kamblies.

The development programme for Woollen Khadi aims at increasing the production of blanketing cloth from about 250,000 yards in 1956-57 to one million yards in 1960-61, all sub standard cloth from 5 lakh yards to 15 lakh yards. These targets are to be achieved by organizing nine production centres in the principal woollen producing areas by the establishment of five finishing centres and two dyeing plants at an estimated total outlay of Rs. 1 crore. The programme when implemented will provide employment to 28,639 persons and distribute Rs. 5 lakhs as wages over the Plan period.

### AMBAR CHARKHA

The Ambar Charkha programme for 1957-58 is as follows : Rs. 10.5 crores would be given as loan and Rs. 4 crores as grants. About 175,000 machines would be manufactured and disbursed.

The position at the end of January, 1957 was as follows :

No. of Charkhas manufactured 50,026 ; Production of Ambar yarn 320,008 lb. ; Production of cloth at the training centres 781,687 sq. yards.

Estimates which were, however, incomplete, indicated that commercial production of Ambar cloth till the end of January, 1957, was of the order of 4,481 sq. yards.

The greater part of the manufacture of Ambar Charkha was done in the 74 decentralised Saranjam Karayulayas established by the All-India Khadi and Village Industries Board.

Out of the 35 vidyalayas set up for training instructors, 30 were actually functioning and the number of trainees was 1,506.

By the end of January, 1957, Rs. 1.78 crores had been disbursed in connection with the Ambar Charkha programme.

The following is a description of the Ambar Charkha :

The Ambar Charkha is a four-spindle, hand-operated wooden spinning wheel, 21 inches long, 18 inches broad and 21 inches high, weighing 26 lbs. Apart from the frame made of seasoned wood, there are three wooden multi-grooved pulleys, one with four grooves, another with three and the third with two each of which is connected with the main hand-operated wheel by cotton bands.

The iron parts of the Charkha consist of four-spindle rings, four fluted rollers, one pair of gear wheels, harwar boss, travellers and springs. Besides these, there are four pairs of rubber rollers over the metal-fluted rollers, about 1½ inches broad.

The specially made tubular slivers, which are kept in a bundle on the off-side of the Charkha, are delivered through the fluted rollers into a small wire ring, and get twisted due to the fast revolving spindles. The winding of the yarn is made automatic through the traveller and the spinning ring.

The revolutions of the spindles average 7,000 to 9,000 per minute depending on the number of revolutions of the main wheel, which is linked to the spindles through cotton bands. The counts of yarn can be varied by shifting the band from one groove to another of the grooved pulleys and also by variations in the size of the tubular slivers used for spinning.

The present rated capacity of the Ambar Charkha is to spin counts of yarn from 12s to 40s, although counts of 40s and above can be spun, depending on the types of cotton and slivers made therefrom. In fact counts of 130s have been spun on the Charkha as an experimental measure. Though high count yarns have thus been spun on it, the Ambar Charkha is mainly directed to produce coarse and medium counts of yarn.

The rated or average capacity of the Charkha is taken at 8 hanks per day of 8 hours from cotton to spinning, or 16 hanks of yarn taking only spinning. Winding of yarn in each case is separate.

The Ambar Charkha, as it has been evolved, is simple in structure and mechanism, and all its parts, except the traveller, are either locally available or can be easily made locally. Experience in its manufacture shows that after initial training the village carpenters are capable of assembling the Charkha and servicing it efficiently. While the wooden frame can be easily made to standard size, all iron and rubber parts need to be made at factories.

An Ambar Charkha set consists of a carding and a drawing machine besides the Charkha, collectively estimated to cost Rs. 100. The arrangements to manufacture replaceable parts at selected central factories are expected to bring down the cost by Rs. 10/20 to Rs. 90/80 per Charkha set. Thus, the present four-spindle wooden Ambar Charkha evolved from the original model of it constructed by Mr. Ekambaranathan, satisfies almost all the criteria prescribed by Gandhiji.

Comparative analysis of the yarn spun on the Ambar and ordinary charkhas shows that the yarn on the Ambar Charkha has a tensile strength of 70 to 100 per cent as against an average of 60 to 70 per cent of the yarn on the ordinary charkha.

Government had a Rs. 3.96 crores scheme for the Ambar Charkha during 1956-57; manufacture of 75,000 Charkha sets, establishment of 15 additional vidyalayas, 100 more parishramalayas, 50 more workshops, five main production centres, 10 sub-centres. At the time there were 15 vidyalayas and 100 parishramalayas.

### OTHER INDUSTRIES

**Coir-Making.**—The aggregate production of the coir industry is approximately 1.3 lakh tons and supports about 4½ lakh persons. Exports of coir products including coir yarn in 1954 were 14.8 lakh cwt. as against 14.5 lakh cwt. in 1953. A Coir Board has been set up to tackle the difficulties of the industry which is an important contributor to export earnings. The industry is mainly concentrated in Kerala and the State's plan lays down an elaborate programme for its development. The Coir Industry Act was brought into force from February, 9, 1954. During the year, the Government had sanctioned Rs. one lakh to the Board

for its various activities. In addition, the Government had given a loan of Rs. 4 lakhs and a grant of Rs. one lakh to the Travancore-Cochin Government for the organisation of Coir Co-operative Societies.

**Village Oil Industry.**—The Indian Central Oilseeds Committee has decided to start demonstration centres of improved ghanis in each of the Community Project areas and has recommended to the Government of India to levy an additional cess of one anna per maund for the first five years, and two annas per maund thereafter for financing the development of the village oil crushing industry. An attempt has been made to improve the efficiency of ghanis and several models of improved ghanis have been introduced.

Under the Essential Supplies Act, the Government of India has delegated powers to State Governments to check the indiscriminate growth of oil mills. Under the Industries (Development and Regulation) Act the Union Government is competent to prevent further growth of the large-scale industry.

The All-India Khadi and Village Industries Board has recommended that the crushing of sesamum oilseeds should be completely reserved for the ghanis. It has also suggested the allocation of quantities of different oilseeds to mills and to ghanis. The Oilseeds Crushing Enquiry Committee was set up in January 1955.

During the First Five Year Plan period the total amount allocated to the Khadi Board for the development of this industry was Rs. 43.93 lakhs. Production of oil during this period amounted to 69,495 B. Maunds which provided employment to 8,807 teils. 104 Model Production Centres have been set up and 1,493 improved ghanis introduced. 7,067 old and 1,540 new ghanis have been registered with the Khadi Board during the period.

The Village and Small Scale Industries (Second Five Year Plan) Committee examined the programme for the development of this industry under the Second Five Year Plan and proposed that measures should be adopted for discouraging and, wherever necessary, regulating on a regional basis the crushing of sesamum, nigar and karadi seeds by the mills. In view of the difficulty experienced by ghani owners even when organised co-operatively to secure supply of oil seeds in a highly competitive market, it will be necessary to organise marketing arrangements with a view to ensuring requisite supplies of oil seeds from season to season. It has also been suggested that no new oil mills should be allowed to be set up except in areas where it is not possible to adopt alternative methods of crushing oil seeds and that the proceeds of cess levied on existing mills should be utilised for improving the technical equipment and marketing facilities of the ghani industry. It is also proposed that interest-free loan should be given to village oil men so that they can become shareholders of co-operative societies.

The development of the vegetable oil industry depends in part on the possibilities of diverting larger supplies of edible oil seeds to ghanis for crushing and on the possibilities of inducing oil mills to utilise greater quantities of cotton seeds. In the Second Five Year Plan, the Board has proposed extension of assistance to one lakh teils on ordinary ghanis and fifty thousand teils on improved ghanis to purchase shares of co-operative societies with a view to improving their operative conditions. 400 Model Centres are proposed to be organised and 400 filter presses will be distributed among these centres. The total cost of the programme is estimated at Rs. 6.7 crores excluding working capital.

The development programme when implemented will provide employment to 1.5 lakh teils and distribute Rs. 26.70 crores as wages over the Plan period. Total production of oil over the Plan period is estimated at 3.3 lakh tons of oil, 13.93 lakh tons of oil-cake, collectively valued at Rs. 200.63 lakhs.

† The final programme as decided is for 175,000 machines. See below under 'Ambar Charkha'.

\* Pre-reorganization.

The implementation of the programme depends on the provision of direct assistance for marketing of oil. To encourage mills working on the improved ghani to form themselves into co-operative societies and to market their oil through them and also to offer partly the price differential between mill and ghani oil, the Board has proposed a subsidy of Rs. 1-14-0 per B. Maund of oil sold.

Besides providing direct employment to mills, the industry will provide employment to 5,000 people and many other artisans like carpenters, blacksmiths, etc.

**Paddy Husking.**—Hand pounding of rice is an important village industry. It processes about 65 per cent of the paddy. The First Five-Year Plan aimed at improving the hand process for increased recovery of rice and production of bran in a pure form by introducing paddy husking stone chakkis in place of the pounding method.

The Food Ministry has declared that the huller type mills are a destructive type of equipment for milling, particularly raw rice. Under the Essential Supplies Act, the Union Government is competent to prohibit the establishment of rice mills. At present there are 15,000 huller mills in the country. The All-India Khadi and Village Industries Board has urged the Central Government that there should be no further increase in the number and capacity of the sheller mills and that the use of the huller type for pounding rice should be banned.

Problems of development of this industry have been reviewed by an expert committee known as the Rice Milling Inquiry Committee (1954). The Village and Small-Scale Industries (Second Five Year Plan) Committee also made recommendation regarding the programme for this industry. It is proposed in the Second Five Year Plan that all power driven rice mills should be licensed and that no new mills should be allowed to be set up nor expansion of the capacity of the existing mills allowed, except where it is considered absolutely essential in the public interest in special circumstances.

During the First Five Year Plan period the total expenditure on the development of this industry amounted to Rs. 39.61 lakhs. 12.70 lakh B. Maunds of paddy have been dehulled providing seasonal employment to 13,050 hand-pounders. 1,224 chakkis, 198 Dhankis and 181 winnowing fans have been distributed among various production centres.

The Second Five Year Plan envisages the processing of 4 million tons of paddy through the manufacture and distribution of 43,000 chakkis-dhenki units, 143,000 improved (Assam) dhankis and 1,500 winnowing fans over the Plan period. The implementation of the Rs. 5 crores development programme will provide seasonal employment for 5.78 lakh persons and distribute Rs. 28.06 crores as wages over the Plan period.

The programme also envisages the training of 600 supervisors and 1,000 mistries to meet the requirements of trained personnel for the implementation of the programme.

The popularisation of hand-pounded rice and the organisation for its regular supply to urban areas constitute important parts of the programme. Over the Plan period the programme provides for the constitution of 200 nutrition committees to carry on intensive propaganda through trained nutritional guides, and the organisation of 200 city and 300 town depots.

The Karve Committee recommended the imposition of an excise duty on the output of mills and the payment of a subsidy to hand-pounding to reduce the price differential between hand processed and mill processed rice. A subsidy of annas 6 per B. Maund is paid on production through co-operative societies and/or registered, recognised institutions.

**Beekeeping.**—Bee-keeping is a cottage industry which has not to compete with any machine. The industry is not, however, well developed. The total yield of honey in the country

does not exceed 12 million lb. a year and hardly a third gets into commercial channels. Consequently there have been heavy imports of honey.

The First Five-Year Plan contemplated an intensive development of bee-keeping in selected areas in which the industry had already made some progress. For instance, Madras, Bombay, Uttar Pradesh, Punjab, Mysore, Travancore-Cochin\* and Coorg\* offer scope for intensive development. In each selected area there would be a sub-station serving a group of 20 to 30 villages. The scheme provided for training of staff and bee-keepers and for supply at subsidised rates of beehives and other appliances. Co-operatives of bee-keepers were envisaged for collecting and marketing of the honey.

Government sanctioned Rs. 16.25 lakhs to the Khadi Board for the development of the bee-keeping industry during 1953-54 to 1955-56. 67,680 lbs. of honey have been produced during the First Plan period. 15 area offices, 140 sub-stations, 25 model apiaries and 5 model production centres have been organised. Seasonal employment was provided to 4,700 persons. 29,770 hives have been distributed to farmers at subsidised rates.

During the Second Five Year Plan period, the All India Khadi and Village Industries Board have proposed to establish 25 area offices, 500 sub-stations and 100 model apiaries. The development is estimated to cost Rs. 1.45 crores.

The implementation of the programme may result in the output of 119.5 lakh lbs. of honey valued at Rs. 23.8 lakhs over the Plan period. 80,000 beekeepers may get part-time seasonal employment and earn Rs. 1.20 crores over the Plan period.

A separate provision for the training of 1,000 school children is a special feature of the development programme.

**Paper Making.**—The All-India Village Industries Association has a separate department for hand-made paper which mainly imparts training and carries on research in paper industry. The Association has encouraged the paper industry throughout the country. The methods of production are fairly satisfactory and the processes and implements are being improved year after year. Cotton rags, jute waste, paddy straw and grass of any kind that grows to a height of two feet, plantain stalks, sugarcane waste and waste paper are the chief raw materials. Hand-made paper is generally used for documentary purposes.

The five-year programme, therefore, suggests the production of high-grade hand-made paper at all existing centres. These centres will receive assistance in respect of equipment, training and research. Pulp-making is proposed to be done by power-operated machines, while other processes will be done by hand. It hopes to support 1,000 paper makers and turn out annually 1,400 tons of high-grade paper.

The total outlay for the development of the Handmade Paper Industry amounts to Rs. 15.98 lakhs over the First Five Year Plan period. The industry provided full-time employment to 2,347 paper makers, 1,261 tons of handmade paper was produced in 31 units established during the period.

The development programme for handmade paper industry proposed by the Khadi Board in the Second Five Year Plan visualises the establishment of 80 factory units and 400 cottage units for commercial production of 4,000 tons of handmade paper for sale in the open market by 1960-51 and 400 school units, which will be largely self-sufficient. The programme is estimated to cost Rs. 1.09 crores excluding working capital.

The production programme envisaged in the Plan may provide employment to 12,000 workers and distribute Rs. 72.05 lakhs as wages over the Plan period.

To provide trained personnel required to implement the programme, the programme provides for the establishment of one Research-cum-Training Centre with an annual capacity for training 100 persons.

The bulk of production envisaged in the programme is high grade handmade paper. As the prices of comparable varieties of mill-made paper at home and imported from abroad are relatively lower, the programme provides a subsidy of Rs. 250 per ton or Rs. 0.1-9 per lb. on production to narrow down the existing price differential.

**Soap Making.**—In the village industry programme has been included a small scheme the main object of which is to utilise material now going waste. The scheme aims at establishing production-cum-demonstration centres in different States where neem oil will be produced and utilised in soap manufacture. It provides for 11 neem units, each one consisting of one soapery and 7 neem pressing centres producing a total of 1,280 maunds of neem oil and utilising it for the production of about 78 tons of soap every year.

Neem oil is at present produced in small quantities in Madras, Uttar Pradesh and Bombay. Neem trees are, however, in abundance all over the country and a survey recently conducted in Madras has shown that about 72,000 tons can be collected annually in that State alone. Actually however 20,000 tons of seed are crushed to yield 1,650 tons of neem oil. The neem oilcake is also a valuable manure.

Washing soap can be manufactured very easily on cottage scale provided caustic soda, oils, tallow, etc. can be made available at reasonable prices.

The question of encouraging this industry in rural areas by levying a cess on large-scale production and reserving a portion of the market is under investigation. In the case of washing soap, a differential excise duty has been imposed and a subsidy of one anna per seer of neem and non-edible oils used in making soap is given.

Government has sanctioned Rs. 52.77 lakhs to the Khadi Board for the development of Soap Making from non-edible oils during 1953-54 to 1955-56 0.492 B. Maunds of soap and 8,904 B. Maunds of cakes have been produced during the First Plan period in about 114 different types of units. The industry has provided seasonal employment to nearly 1,900 persons over the Plan period.

In the Second Five Year Plan, the All India Khadi and Village Industries Board has proposed the establishment of 90 oil production centres, 340 oil-cum-production units in the Intensive Areas with a collective productive capacity of 14,300 tons of non-edible oil and 8,400 tons of soap during the last year of the Plan. The programme is estimated to cost Rs. 2.99 crores excluding working capital. 39,110 tons of oil, 25,990 tons of oilcakes and 22,420 tons of soap collectively valued Rs. 8.68 crores are expected to be produced over the Plan period. The development programme may provide full-time employment to 10,340 persons and seasonal employment to 89,400 persons, distribute Rs. 179 lakhs and Rs. 147 lakhs as wages respectively to each category of workers.

Special provision has been made for the training of the supervisory staff in this industry also.

**Palm Gur.**—According to a recent estimate India has 50 million palm and corresponding varieties of trees. At present some four million trees are tapped and yield 55,000 tons of palm gur. It is estimated that about 3.3 lakh persons are engaged in this industry.

The All India Khadi and Village Industries Board had been sanctioned a total amount of Rs. 18.89 lakhs for the development of palm gur industry during the first Five Year Plan. The development of the industry resulted in the production of 39.41 lakh B. Maunds of Palm Gur and 6,051 B. Maunds of other products. The industry provided seasonal employment to 3.98 lakh persons during the period.

During the Second Five Year Plan the All India Khadi and Village Industries Board proposes to establish 105 special units, 1,180 each of A and B units over the Plan period to organise production. 50 Palm Gur Co-operative Federations and 72,000 small co-operative units of individuals will be assisted. Among other schemes, mention may be made of the colonization units, propaganda units and training units. The total estimated cost of the programme is Rs. 8.43 crores. The programme when implemented will produce 15.73 lakh B. Maunds of Palm Gur valued at Rs. 3.14 crores, besides many other subsidiary products. The programme will provide seasonal employment to 105,000 tappers and distribute Rs. 235.80 lakhs as wages over the Plan period. About 150,000 people will also be employed as pan boilers and auxiliary workers and about Rs. 3 crores will be distributed to them as wages.

**Gur and Khandasari.**—Gur and khandasari are well established in areas where there is not enough cane to start a sugar factory. Because the operations are near the field, the industry is carried on even in factory areas. The object of the programme is to extend the use of improved types of cane crushers to obtain a higher percentage of extraction.

In the First Five Year Plan, the Government spent Rs. 11.48 lakhs on the development of Gur and Khandasari Industry. The programme was implemented through the All India Khadi and Village Industries Board. 1.69 lakh tons of ordinary Gur, 46,000 tons of quality Gur and 1,000 tons of Khandasari totally valued at Rs. 6.7 crores were produced. The industry provided perennial full-time employment to 920 persons and seasonal part-time employment to 5,847 persons. 40 Multipurpose Co-operative Societies were also organised among which 1,154 improved crushers, 46 centrifugals and many other improved implements were distributed.

The development programme of the Second Plan for the Gur and Khandasari Industry aims primarily at improving the level of technical efficiency through the introduction of better equipment and processes. The possibility of adopting the vacuum pan process on a decentralised basis for the manufacture of Khandasari will be investigated. For the Gur Industry efforts will be focussed on the technical side, on the introduction of power driven crushers and the improvement of pans and furnaces and the formation of gur producers' co-operatives with a view to dealing with the problems of improving the keeping capacity of gur, proper storage, packing and standardisation of gur.

The All-India Khadi and Village Industries Board proposed (i) the establishment of 23 production units in the sugar-cane growing States and of 143 co-operative societies to organise production, distribution of improved implements and sale of products in selected areas; (ii) manufacture and distribution of 65,000 Kolhus and an equal number of pans, 241,000 gur moulds, 19,000 each of cube frames and percolators, 51,200 stocking drums for gur and 90,000 crystallisers and 4,000 centrifugals for the Khandasari Industry and (iii) the erection of 10 carbon factories for ensuring adequate supplies of improved juice clarificants. The programme is estimated to cost Rs. 7.6 crores excluding the working capital required.

The implementation of the development programme will result in the production of qualitatively improved gur at the annual rate of 8.45 lakh tons in the last year of the Plan. The development programme will cover 260,000 artisans in the Gur Industry and about 16,000 artisans in the Khandasari Industry, besides providing employment to 21,667 persons, in the ancillary process of the industry. About Rs. 9.55 crores would be distributed as wages over the Plan period. A Central Training Institute is also proposed to train supervisory staff for the implementation of the programme. About 231 persons will be trained over the Plan period.

**Leather.**—According to a livestock census there are over 21.2 crores big animals and 9.52 crores sheep and goats. About one-tenth of them die every year and if the dead bodies are properly disposed of, commercial products worth Rs. 80 per big animal can be recovered. The gross income from this source is about Rs. 40 crores per annum. An attempt has been made to organise the small cottage units into co-operative societies for the purchase of raw materials and marketing of finished goods.

The object of the scheme is to minimise waste due to the incomplete utilisation of dead animals. The programme provides for recovery work, tanning, leather craft and organisation of co-operatives of village leather workers.

The First Five Year Plan had provided an outlay of Rs. 40.31 lakhs on the various development programmes to be implemented through the All India Khadi and Village Industries Board. 155 tanning centres, 21 training-cum-production centres, 56 model tanneries and 40 bone crushing units were organised during this period, besides having distributed 156 bone digestors among various centres of production. The Second Five Year Plan has proposed the continuance of the policy of not allowing expansion of the capacity of large-scale units in the cottage leather footwear and tanning industry so that a substantial part of the increased demand is met by Small Scale and Cottage Units. The development programme for the industry will aim primarily at raising the present extremely low level of technical efficiency of these small units by providing common services, facilities for improved tanning, finishing, etc. at well equipped centres. Large factories are to be encouraged to purchase to take up as much production of producer goods as possible. It is also proposed that financial assistance should be extended by Government in the form of loans to workers to enable them to become shareholders of co-operative societies and also for producing improved equipment and for working capital.

The Khadi Board has proposed a development programme for this industry under the Second Five Year Plan which envisages the establishment of 3,500 tanning centres, 350 tanning centres and an extension programme for 35,000 shoemakers to bring them within the folds of co-operative societies. A scheme for the housing of tanners and layers is also an improvement part of the programme.

Besides the production centres, the Plan proposes to have many training-centres to train the required personnel for implementing the programme.

The implementation of the development programme will help to produce 8.44 lakhs of pieces of tanned hides, 2.70 lakh lbs. of glue and 7 million pairs of footwear, besides other by-products valued collectively at Rs. 7.5 crores over the Plan period. Over the Plan period the value of production is estimated at Rs. 20.78 crores. The programme may provide employment to 7,000 persons in tanning, 2,450 in tanning and 150 persons in the manufacture of glue, in 3,500 tanning centres, 350 tanning centres and 75 glue making centres respectively. Besides, the programme envisages to extend finance to 35,000 shoe makers. About Rs. 4.9 crores will be distributed as wages among the various categories of artisans over the Plan period. The total outlay on the programme is estimated at Rs. 5.0 crores, which is exclusive of working capital required.

50 Marketing depots for the disposal of the various goods produced at the production centres will be organised over the Plan period.

**Matches.**—Eighty per cent of the production of matches is at present controlled by one international combine, and several Indian factories are partially lying idle. In addition it is estimated that about 0.6 million gross is the output of the cottage industry.

The All-India Village Industries Board has recommended to the Union Government that a cess be levied on large-scale production and the proceeds be used for subsidising the manufacture by cottage industry and other small-scale manufactures. It has been decided to create a new category of match factories called class "D" producing upto 25 gross boxes a day and to subsidise them by an enhanced rebate on the excise duty.

The First Five Year Plan provided an expenditure of Rs. 21.83 lakhs on the development of cottage match industry through the All-India Khadi and Village Industries Board.

The development programme of the Second Five Year Plan period, for the Cottage Match Industry aims at the establishment of 1,000 'D' Class factories over the Plan period with a productive capacity of 29.25 million gross boxes at a total estimated cost of Rs. 1.1 crore over the Plan period.

The output of Cottage Match is likely to amount to 28.25 million gross boxes of 60's valued at Rs. 17.72 crores. The implementation of the programme will result in providing full-time employment to 10,000 persons and part-time employment to one lakh persons and distribute Rs. 3.41 lakhs as wages over the Plan period.

The programme makes a provision for the establishment of Research Laboratories for carrying on research as well as for intensive propaganda to influence the consumer preference for Cottage Matches.

To market the matches produced in various units the programme visualises a network of Marketing depots under two categories, Central and Divisional. A separate provision is also made for training the required personnel to implement the programme.

**Pottery and Earthenware.**—The village potter has been gradually eliminated by new tastes and requirements. On the other hand, the demand for bricks, tiles, earthen pipes and crockery has been fast rising.

The Bengal Ceramic Institute established in 1941 has been engaged in solving the problems of the cottage workers in the pottery trades and also functions as a training centre. It has successfully introduced the production of Rockingham pottery. The problem of standardising cheap, durable, and easily cleanable cooking earthenware has been taken up.

The Government Ceramic Factory at Gudur, in Andhra State has been running an artisan course since 1947 for training students in improved methods of pottery making.

In Mysore State experiments on production of low temperature vitrified ware, of glass pots for bangle making and of single fired red clay glazed articles—all from local materials—are being made at the Government demonstration centre in Belgaum district.

Rs. 5.79 lakhs have been sanctioned to the All-India Khadi and Village Industries Board for the development of the Village Pottery Industry for introducing improved equipment. During the Second Five Year Plan period assistance to pottery industry will be continued through the provision of improved wheels, moulds for pipes and special tiles, etc. and improved furnaces.

#### INTENSIVE AREAS SCHEME AND MARKETING SCHEME

Among the general schemes of the All-India Khadi and Village Industries Board, reference may be made to the Intensive Area Scheme. This scheme aims at the integrated economic development of selected contiguous areas with a population ranging between 20 to 30 thousands with a view to developing village industries as an integral part of rural economy. The Board's programme for the Second Five Year Plan proposes to increase the number of Intensive Areas from 35 in 1955-56 to 200 at the end of the Second Plan, at a cost of Rs. 2.77 crores.

The Khadi and Village Industries Board proposes to set up a comprehensive marketing organisation to assist village artisans in obtaining raw materials, tools of production and facilities for the sale of their products. It is proposed to have a three tier organisation consisting of regional marketing depots, sub-depots operating under each regional marketing depot and retail shops each operating under the sub-depot. To co-ordinate the activities of the regional depots and to assist with advice regarding the advance purchase of raw materials, tools of production, etc., it is proposed to set up a Central Marketing Intelligence Bureau for depots with the Central Office of the Board.

**Government Purchases.**—The Central Government has decided that every effort should be made to increase purchases for Government

purposes from cottage and small-scale industries by giving preferential rates and relaxation, where necessary. A Conference to popularise the use of Khadi was convened in August 1953 and following this meeting, Government departments have placed inquiries for Rs. 62 lakhs worth of Khadi and so far Rs. 1.06 crore worth has been purchased by the Government. Purchases of coir products for various Government departments came to more than Rs. 8 lakhs in 1953. A Stores Purchase Committee was appointed by the Government to examine *inter alia* the question of meeting Government requirements for the products of cottage and small scale industries.

The details of the progress of expenditure for the development of small and cottage industries in the First Four Years of the First Plan period are given below :—

Progress of Expenditure  
(Rs. lakhs)

	1951-52	1952-53	1953-54	1954-55
Khadi .. .. .	2	9	110.00	408.00
Handloom .. .. .	0.14	6.33	181.44	488.8
Village Industries .. .. .	0.59	0.73	21.00	70.00
Handicrafts .. .. .	4.5	2.6	14	30
Sericulture .. .. .	1.4	2.7	12.8	30
Small-scale Industries .. .. .	5.6	7.9	33.2	153.4

The development expenditure on khadi and handloom is being met out of the Cess Fund since 1953-54.

#### STATE-WISE SURVEY

The more important of the industries have been discussed above. There are, however, a good many industries in which one or the other State has specialised.

The hand-loom industry is the most important and by far the best organised cottage industry in Bombay State.

The manufacture of woollen textiles on a cottage basis has not developed but good progress has been made in art silk weaving and hosiery manufacture.

A new industry which has sprung up lately produces personal requisites such as purses, wallets, spectacle cases and brief cases out of plastic sheets.

The gold and silver thread industry consists of a large number of small factories and cottage units using electric power.

The industry has a good export market.

The paper and board industry received a stimulus from the Second World War.

The bulk of leather is vegetable tanned. In manufacturing leather goods machinery is being slowly introduced.

Gur and jaggery manufacture ranks next to power-loom industry. Most of the manufacturers, unlike their counterparts in Uttar Pradesh, grow their own cane.

The engineering industry has made considerable headway in the State.

Production ranges from consumer goods and steel wire products to machinery spares and automobile parts.

**Madras.**—Industrial Co-operatives have been accepted as the basis for promoting cottage industries in Madras. The State itself has got a well-knit organisation to look after cottage industries. The Gandhiniketan Co-operative Village Industries Ltd., Kalupatti, meets, for instance, the important needs of the surrounding villages and is looked upon as a model for reorganising village industries.

In Vallure basket making and metal industry have been built on a co-operative basis.

Rope making at Madura, pottery production in Tirunelveli district, fabrication of goods in Madurai district, bee colonies in Madras, metal works in Salem district, production of toys by women in Madras have also to be mentioned.

The research institute is concentrating mainly on the development of more important cottage industries. Prior to the war there was no pottery factory in the State; but Khurja potters are today producing a variety of products.

**Uttar Pradesh.**—Our manufacture is the biggest cottage industry in Uttar Pradesh. The State has initiated a scheme for raising the output by introducing superior types of Kolhus.

The manufacture of essential oils and scents is a traditional cottage enterprise in the State. Experimental plantation of palma rosa, peppermint and camphor bearing octinum and lemon grass plants as well as coriander, dill and aniseed has been started and an improved type of still has been designed.

Chemical gold thread manufacture is thriving at Banaras.

The glass bead industry has also made considerable headway.

**Madhya Pradesh.**—The handloom industry is the principal cottage industry in Madhya Pradesh.

The plentiful supply of raw materials in the former Chhattisgarh States prompted the Government to develop cottage industries through Lokshalas.

**Punjab.**—Industrial co-operatives have been well developed in the Punjab.

Punjab has been traditionally noted for several types of artware products.

Carpet making has been carried on in the State since early Moghul period. Practically all the carpets intended for export are made in factories or in cottages controlled by factory owners.

**Orissa.**—Fillgree and horn industries, are two of the cottage industries of the State having a large export potential date from ancient times. The industries languished after the Moghul period but are now being revived. Maninghpaina specialises in decorative and furniture works, Muhammadia Bazar is famous for flowery work and Dagarpura specialises in fillgree ornaments.

The industry is generally run individually but co-operative effort is once again being made.

Typical of the organisation in the State is the "Orissa Poor Industries Cottage" a private institute, started in 1926. It carries out experiments on processes of producing articles, utilisation of materials available in villages without much cost and on tools and demonstrates the production of useful articles of handicrafts practically out of waste. A scheme to run a cotton spinning mill by handloom co-operatives has been implemented. The Damodar Valley Corporation has sanctioned a sum of Rs. 3.19 lakhs on schemes for the promotion of lock manufacturing and cold storage.

**Bihar.**—This is the only State which produces shell buttons from the mother-of-pearl. Started in 1908, almost the whole population of Mehsi is engaged in this industry.

**Assam.**—The Cottage Industries Department has confined its activities to cottage industries like soap manufacture, bee-keeping, handmade paper and shellac. The Government Paper Training Institute, Shillong, produces large quantities of file-boards, envelopes, and a variety of handmade paper. Industrial loans are granted at 5 per cent interest. The traditional crafts of the State are hushai rugs dyed in different colours, dinner mats, Manipuri articles and shoulder bags.

**Manipur.**—Cottage industries such as handloom cotton and silk weaving, gold smithy, carpentry, pottery and tailoring collectively constitute the basis of the economic life of the people. The Government has drawn up a scheme of development for most of the industries. Out of a total population of six lakhs, 1½ lakhs are weavers.

**Mysore.**—Wood carving is an ancient industry in the State. In villages hand-driven lathes are used. In Sri Chamarajendra Technical Institute a five-year course has been introduced.

Inlaying work is an art practised in Mysore since the 17th century.

The drugget industry is about 200 years old and provides employment for over 800 persons. To develop it, the Centre has set up an All-India Drugget Board.

Coorg is a good honey producing area. Co-operatives have been well developed and have marketing organisations all over the State.

**Rajasthan.**—Calico printing is done all over the State but die and dye printing requiring high dexterity and skill is a speciality. In handloom weaving yarn of even 120s is used. Khadi industry gives work to thousands of people. Coir and rope making is practised in almost every village. Niwar manufacture is another allied industry. Jaipur and Khandela are famous for *Gota Kinari*.

Rajasthan is the biggest wool producing State in India. And spinning of wool gives employment to a large number. Weaving is done on ordinary looms and produces are coarse. Jodhpur and Jaipur are famous for the manufacture of embroidered shoes.

Jaipur produces the best type of brass work in the whole of India. Enamelling on metals with the help of shellac soluble colours is done at Jaipur and Nathdwara.

Hand-made paper is produced at Sanganer, Gosunda and Kotah.

Other lines include marble idols, lac, bangles, stone polishing and carving, bamboo baskets, chicks, lacquered toys and scents. The cutting of synthetic stones and precious stones alone supports many families in Jaipur.

Ajmer is one of the biggest wool exporting centres. Low quality woollen goods are produced in the area. Handloom weaving is an important industry accounting for nearly 2,000 weavers, 2,500 handlooms and over 25 Weavers' Societies. Tobacco and sup making industries give employment to over 4,000 persons. Botton manufacture is a new industry. The two factories at Beawar use domants as raw material.

**Saurashtra.**††—The former State Cottage Industries Board was concerned with putting the cottage industries in the State on a sound footing.

Handloom industry is, next to agriculture, the major industry. It was proposed to open a handloom centre where weavers would be called to work and learn on a wage basis.

Leather tanning has been organised and supply of implements and tanning materials is subsidised. Efforts are being made to popularise palm-gur.

Beekeeping is still in an experimental stage.

The rest of the industries are scattered. These include wooden toys, ornaments, wood-working, button manufacture, clay and plaster modelling, carpet weaving, stoneware articles and basket making.

An Industrial Co-operative Association has been fostered by the State Government with substantial capital for organising artisans on co-operative basis and to supply them with raw materials at controlled prices.

**Kerala.**—Besides the coir industry, the State specialises in palm gur, handloom weaving, pottery, wood carving and beekeeping. A Cottage Industries Board has been set up to ensure an orderly development of industries.

**Himachal Pradesh.**—The main cottage industries are wool spinning and weaving, manufacture of leather goods, paints and varnishes, phenyle and sealing wax. There are over 2,600 hand-loom and over 25 industrial co-operatives. Expansion of sericulture, textiles, wood working, sports, basket-ware, pottery and matches is contemplated.

The sericulture industry exists in all districts. There are also training institutes. A spinning mill for woollen yarn was to be established at Jogindernagar. Schemes were also under way for starting hand-weaving.

Clays in Mandi district are suitable for manufacturing stoneware, small containers and cheap crockery.

The plan provides for the manufacture of Mangalore tiles at Paonta and of slates in Mandi and Chamba.

#### FORD FOUNDATION

The Ford Foundation International Planning Team on Small Industries which was invited to formulate plans for the development of village and small-scale industries with a view to creating more opportunities for remunerative work, arrived in India in November 1953 and submitted their report in March 1954. The Government of India has implemented some recommendations. They are:

(1) Four Regional Institutes of Technology for small industries are established—which would act as service agencies and would assist small industries in improving their technique of production and management; in obtaining credit and finance; in securing proper raw materials; in marketing their goods to the best possible advantage; and in promoting patterns of development calculated to make small-scale industries ancillary to large-scale industries by bringing about co-ordination of production programmes.

(2) A Small-Industries Corporation to organise production for meeting Government orders has been established.

Village and Small-Scale Industries (Second Five-Year Plan) Committee\* submitted its report to the Government of India in October 1955. It suggested that (a) The six† All-India Boards in the village and small-scale industries should be put under one and the same Central Ministry; (b) There should be adequate funds for the promotion of these industries. Undue economy will lower the chances of success; (c) There should be a definite programme for development.

The Committee suggested that the expenditure would come up to Rs. 260 crores. Out of this allocations proposed for the Centre are about Rs. 25 crores and for the States over Rs. 234 crores. The Committee suggested several ways and means to promote the small-scale industries in the Second Five-Year Plan.

\* Also called the Karve Committee.

†† Now part of Bombay State.

† The six Boards are: Small Scale Industries Board, the All-India Handloom Board, All-India Handicrafts Board, All-India Khadi and Village Industries Board, All-India Silk Board, All-India Coir Board.

## FILM INDUSTRY

**D**URING 1956 the industry as a whole passed through a grave financial crisis with rising costs and falling income. There was a feeling in the industry that the production of documentaries should be entrusted to the private sector.

The industry celebrated the silver jubilee of the 'talkie' during the year 1956. Two important publications which came out during the year were the report of the proceedings of the Film Seminar and the Indian Talkie Silver Jubilee Souvenir. Between the two they give a good summing up of the present position of the industry and the problems with which it is faced.

The Children's Film Society located in New Delhi is making good progress. It is now preparing to produce full-length films for children.

### AWARDS

The Awards for best films instituted in the name of the President and the Prime Minister for 1954 were as follows:

Minerva Movietone's *Mirza Ghalib* won the President's Gold and Silver Medals while Mr. Atre, secured Silver Medal for his biographical film *Mahatma Phule*. No film qualified for the Prime Minister's Gold Medal, which is for the best Children's film. There were other awards—Silver Medals and Certificates of Merit for Films in regional languages. The President's Gold Medal for the best documentary went again to Films Division's *Spirit of the Loom*, depicting the long story of the handloom in India.

The 1955 awards (made in December 1956) were as follows:

President's Gold Medal: *Pather Pancholi* (Bengali, Government of W. Bengal. Director: Sanyal Roy). The Best Documentary: *Magic of the Mountains* (Films Division, Director: Mushir Ahmed). The Silver Medal: *Jhanak Jhanak Payel Baje* (Rajkamal, Bombay). This was also the choice for the all-India Certificate of Merit. All-India Certificates of Merit: *Shirdiche Shri Sai Baba* (Marathi, Keshavnagar Sathe); *Wonder of Work*, a documentary (Films Division); *Education for Life*, a documentary (Ama Ltd).

### FEATURE FILMS

The production of the Films Division showed an improvement in the number of reels produced as well as in the quality of the work.

The pride of place among the 55 documentaries (125 reels) must go to the full length portrayal of the life of Buddha, utilising much sculptural and monumental wealth.

Folk dances of India is the subject matter of another full length film in colour which was in preparation at the time of writing. Lokamanya Tilak's biography as a documentary was nearing completion.

The Films Division takes over 150 prints each of the news-reels and documentaries produced. The number of 16-mm prints is unusually large i.e. over 340. A release print can stand about 250 shows in the normal handling and a protective coating gives an additional 50 per cent showing capacity. Under the present processing conditions, an effective check for quality on the number of prints produced seems called for.

During the year 1955-56, the Films Division produced 55 documentaries (125 reels); and 14 documentaries (20 reels) were purchased from outside producers. The rate of production was speeded up; about 30 more documentaries were in various stages of completion at the end of the year.

In addition to the two full length documentaries—the Prime Minister's visit to USSR and the Russian leaders' visit to India—four-reel records were made of many distinguished visitors from abroad for presentation.

*Muslims of India* was a two-reeler film showing the treatment of minorities here. *Their Silent World* described the efforts made to educate the deaf and the dumb while *Wonder of Work* was a film showing occupational therapy in action. Human Rights Charter with special emphasis on its application to Indian conditions was portrayed in *Rights of Man*.

Three films on the rivers, the Tungbhadra, the Godavari and the Tista were produced, the last in colour, portraying the role they play in the life of the community. A two-reeler showed what India was doing in furthering the objects of the United Nations. But by far the most attractive film was *Little Ambassadors* in colour (2 reels) in which dolls from many nations were shown. It was a great success with children as with their elders.

### CENTRAL BOARD OF FILM CENSORS

The censoring of all imported films is now done in Bombay and the change is welcomed by Indian producers as this is the first step in judging both the types of films, those imported and those produced here, by a uniform yardstick.

The total number of imported films (35 mm) during 1955-56 was 1,048. A country-wise breakdown would be as follows:

USA 610; UK 184; USSR 112; China 36; Italy 20; Czechoslovakia 16; Rumania 10; Germany 9; others 46.

As regards the censoring of imported feature films in 1955-56 the position is as in next column. The first figure shows the number censored and the second the number granted 'A' certificate:

Particulars about censorship (1952-55) are given below:

Year	Footage cut	"A" Certificates	Educational films	Refused Certificates
Apr. 1952-Jan. 1953 .. .. .	46,005	23	711	21
Feb. 1953-Jan. 1954 .. .. .	92,180	27	747	7
1954 .. .. .	96,569	34	686	44
1955 .. .. .	104,605	75	477	50

**Note.**—There is some confusion about the years. Most of the official reports mention varying dates: some times it is the calendar year; at others the financial year. In the case of Reports of the censor's work, sometimes it is for 11 months at others for 13. For 1952-53, it is for 10 months only.

### 16 MM. FILMS

The 16 mm. film has not received the attention it deserves. Its potentialities have not yet been adequately explored.

Economy of cost and storage are two main factors in favour of the 16 mm. film (1,000 ft. of 35 mm = 400 ft. of 16 mm). Colour is also easily available and the film can be processed and copies made in India itself.

About 120 full length Indian features, mainly in Hindi, Marathi and Gujarati, are available in 16 mm. The layout for the 16 mm. film theatre is small and the whole equipment is portable (about the size of two portable typewriters in all). There is therefore a vast scope for the development of the 16 mm. theatre on commercial lines. The general practice in this matter is, however, very strange. Whenever features are reduced to 16 mm., the new versions are released only after the exploitation of the standard size is complete.

For popularising children's films, special theatres will be required in many places and for such new theatres for juvenile audiences 16 mm. is the right solution. A casual show at a normal adult theatre will not be helpful, and with the

USA 189, 52; U.K. 26, 16; USSR 29; China 12; Italy 8, 4; Germany 5; Rumania 6, 1; Japan 4; Czechoslovakia 4; France 4, 5; Others 14, 2; total 291, 80.

### Imported Films

Year.	Features.	Shorts.	Total.
1951 ..	510	1,266	1,782
1952 ..	549	1,864	2,413
1953 ..	463	1,700	2,172

1955*	265	1,050	1,315
1956 ..	246	438	684
Total ..	1,747	5,187	6,934

\* For three quarters only.

The figures for films censored do not represent total production; they also include films re-censored. Under the present rules, a censor certificate being valid for five years only, popular films which run for many more years, have to be re-censored at the end of the term of the censor certificate. An Indian production is complete only when the film is censored.

production of special films for children in hand, provision for showing them must be similarly specially provided.

There are 16 mm. libraries of films suitable for non-theatrical audiences maintained by the British Information Services, the British Council and the U.S. Information Services through their regional offices. These offices also maintain trucks equipped with projecting machinery, and shows are arranged free of cost wherever wanted. Many industrial houses have also made good films, some in colour, of great value for education or information and they are easily available for showing through schools and institutions.

In the Defence Forces, 16 mm. films have been extensively used for training and entertainment. There are Inspectors of Visual Education under Directors of Public Instruction in the States who do valuable service by using 16 mm. projectors in educational institutions. They are, however, mainly dependent on imported films. The biggest single 16 mm. library of films in India is maintained by the Inspector of Visual Education in Bombay who makes the films available regularly to schools under him. The Ministry of Education in Delhi has recently started building up a library of 16 mm. educational films.

### FILM DISTRIBUTION

Distribution as a distinct unit is a relatively recent development. In 1929 there were 11 film distributing agencies all dealing in foreign films. In 1938 their number rose to 214 and, ten years

later, to 887. On the other hand, distributors of foreign films dropped from 27 in 1938 to 10 in 1948. The table relating to distributors is given below :—

	1938	1948
Eastern Circuit (Bengal, Bihar and Assam) ..	25	184
Central Circuit (Madhya Pradesh, Rajasthan) ..	5	49
Northern Circuit (Uttar Pradesh, Punjab and Delhi) ..	84	168
Western Circuit (Bombay and part of Mysore) ..	32	153
Southern Circuit (Madras, part of Mysore and Andhra) ..	118	383
Distributors of Foreign Films ..	27	10
Features ..	—	27
Total ..	241	924

The main export market for Indian films is Pakistan; but Indian exporters are now put to considerable difficulty. Other markets are countries which have large concentrations of Indians such as Malaya, Indo-China, Burma, Ceylon and Africa. Imports of exposed cinematograph films have been fairly heavy. Until 1938-37 imports remained below 10·8 million feet, touched the peak at 28 million feet in 1938-39 and dropped to 6·9 million feet in 1942-43 owing to wartime conditions. In the post-war period imports recovered to 16·2 million in 1945-46 and thereafter fluctuated between 15 million feet and 12 million feet. Under the import control regulations, import of foreign films is subject to a monetary ceiling and distributors are authorised to remit up to 70 per cent. of the gross proceeds.

The years 1952 and 1953 marked a period of acute depression for distributors and exhibitors. In Sholapur (Bombay State) the competition became so intense that five cinemas reduced the rates of admission to a flat rate of one anna for all classes. The Government of Bombay imposed additional restrictions on touring cinemas precluding them from visiting an area declared as the Sarvodaya area or a place with a population of less than 2,000. No touring cinema can visit a place in Bombay State within a year from the date another one was operating in that State nor can it return to the same place for a period of three years.

The Film Enquiry Committee pleaded for many more cinema houses. A study of the relevant statistics however does not support the demand. According to the 1951 census there are 75 cities each with a population of 100,000 or more. They constitute together about 7 per cent of the total population of India as a whole while the number of cinema theatres in them is 30 per cent of the total for all India.

The average for all India is taken to be 600 persons per cinema per day and for such audience to be available the population must be in the vicinity of 30,000, as is seen from the figures of the 75 cities. Even here the minimum and maximum proportions of population per theatre are very striking. Jaipur with a population of nearly 300,000 has only four cinema houses while Kolhapur with a population of 137,000 has ten. It seems therefore safe to take the proportion of population for each theatre as 30,000.

Coming to towns of 10,000 and over we have the following figures :

Size of Town	Number of Towns
10,000 to 20,000 ..	856
20,000 to 50,000 ..	401
50,000 to 100,000 ..	111

Instead of raising a general cry for more theatres it would be desirable to find out where exactly they are needed.

The Censorship Rules as amended in 1953 provide for a deposit of a 35 mm. or 16 mm. version of the certified film or its shooting script as a

condition precedent to the issue of a certificate. Such a certificate is valid for five years from the date of issue and old films once censored have to be recensored if the previous certificate has been in effect for five years or more.

### CINEMATOGRAPH ACT

The regulations of films for exhibition and of the cinemas take place under the Indian Cinematograph Act. The power of certifying films was until the amendment of the Act in 1949 vested in the State Governments. Since production was concentrated in the three States of Bombay, Bengal and Madras and imports also mainly took place through the three ports in those States, the first examination of films for certification was done mainly by the Boards at these three cities. The Act as amended in 1949 made a distinction between films considered suitable for exhibition to adults only and those suitable for general exhibition.

A Bill was introduced in Parliament in November 1952 to amend the Act with a view to removing certain defects noticed in the course of actual administration. Under it the responsibility for deciding whether a film is or is not suitable for public exhibition is entrusted to the Central Board of Film Censors; but powers are vested in the Central Government to declare that any film already certified as uncertified and notice has to be given to the person who has been granted certificate to show cause why the film should not be uncertified. This delay is sought to be avoided by the amendment. Provision has also been made in the Bill making it obligatory on persons delivering a certified film to a distributor or exhibitor to transmit information and documents relating to the certificate which would enable punishment of the exhibitor if he shows the film with portions cut out by the Board before certification. The difficulties encountered in proceedings against persons for interpolation and exhibition of unauthorised scenes in certified films are sought to be encountered by the Bill. Enhancement of the penalty has also been suggested. The Bill was passed in April 1953.

It was expected that a Bill would be introduced in the Lok Sabha for setting up a National Film Board and a Film Finance Corporation with a capital of Rs. 25 lakhs. The Board would be a comprehensive body and a Film Production Bureau, a Film Institute and the Central Bureau of film Censors would be parts of that Board.

### FEATURE FILMS

Feature film production from 1946 to 1956 : The first figure indicates the year and the figure within brackets gives the number of films produced during that year: 1946 (200); 1947 (283); 1948 (265); 1949 (289); 1950 (241); 1951 (221); 1952 (233); 1953 (260); 1954 (274); 1955 (285); 1956 (246).

### PRODUCTION OF FEATURE FILMS. (By LANGUAGE)

Malayalam ..	7	8	7	2
Others ..	14	18	20	9
Total ..	260	274	285	246

### INDIAN PRODUCERS

The total number of Indian feature films produced from 1931 to 1956 was 4,909. A language-wise break-up is as follows :

Hindi 2,712; Tamil 666; Bengali 656; Telugu 302; Marathi 265; Gujarati 92; Kannada 72; Malayalam 52; Punjabi 44; Assamese 13; English 12; Oriya 8; Persian 6; Arabic 2; Others 7.

The total number of Indian film producers from 1931 to 1956 was 2,444. Of these 1,580 were single picture producers. The language break-up is as follows :

Hindi 1,040 (708); Tamil 334 (228); Bengali 322 (230); Telugu 187 (139); Marathi 143 (90); Gujarati 80 (49); Kannada 50 (40); Malayalam 35 (27); Others 73 (60).

### REVENUE

(Collection of rentals on documentary and newsreels compulsorily shown in all Cinemas).

\* In April 1957, there were 3,577 cinemas in the circuit of the Films Division.

## GLASS INDUSTRY

THE more commonly used raw materials are: sand, borax, soda ash and salt cake, dolomite, lime or limestone, salt petre and sulphur, manganese dioxide and colouring materials. Though supplies of sand are in plenty, its quality is not uniform. Nearly all the glass factories of northern India and West Bengal obtain their requirements of sand from the Allahabad district. Subsequent to the Tariff Board's inquiry in 1932, little progress has been made in the installation of grading and washing equipment for sand. Borax is mostly obtained from abroad, while soda ash is received from indigenous manufacturers and importers. Sufficient quantities of lime or limestone are available. Coal is the commonest fuel. The bulk of refractories is obtained from indigenous sources. The demand for refractories by the glass industry is estimated at about 10,000 tons per year.

The industry comprises the manufacture of sheet glass, blown and pressedware and bangles. The industry has developed mainly under the private sector with reported capital investment of Rs. 9 crores in 1955.

Some 30,000 workers excluding those engaged in cottage industries are employed in the industry. Government protection to the sheet glass section was granted in 1960 and has now been extended upto the end of 1957. The rate of protective duty was fixed at 45 per cent ad valorem in 1950, but was raised to 70 per cent in January 1955.

In 1951, there were 142 glass factories in India with an installed capacity of about 218,250 tons per annum. Of these, 35 units with a capacity of about 30,000 tons had been closed for over three years. There were in 1956 131 glass factories registered under the Industries (Development and Regulation) Act, 1951, with an installed capacity of about 314,500 tons. Of these, 84 units with a capacity of about 247,000 tons are actually working; 25 factories (about 44,000 tons) are temporarily closed; and 22 (with about 23,000 tons) are, more or less, permanently closed. The effective capacity of the industry may, therefore, be taken at about 291,020 tons per annum. Their regional distribution is as under:—

State.*	No. of units.	Installed capacity.
		Tons.
West Bengal .. ..	28	90,800
Bombay .. ..	18	49,100
Uttar Pradesh .. ..	24	63,900
Madras .. ..	9	10,800
Bihar .. ..	8	39,800
Madhya Pradesh .. ..	5	3,660
Punjab .. ..	3	9,300
Delhi .. ..	3	4,400
Rajasthan .. ..	2	2,700
Hyderabad .. ..	2	4,800
Mysore .. ..	2	1,160
Other States .. ..	5	10,800
Total ..	109	291,020

The manufacture of bangles was undertaken by about 100 units, mostly established on a cottage industry basis and localised in the Ferozabad district in Uttar Pradesh and Belgaum district in Mysore. The rated capacity of these factories is placed at 35,000 tons.

Besides, penicillin vials, sheet glass of sizes less than 16 oz. and over 32 oz., glass tubing by automatic drawing, narrow-mouth thermos flasks and decorated aerated water bottles are some of the items newly manufactured in the country during the First Plan.

### OUTPUT

Actual output of glass and glassware is shown by the following table:

—	1952	1953	1954	1955
Bottles & Phials (tons) .. ..	50,220	40,750	47,840	55,270
Sheet Glass (million sq. ft.) .. ..	9.5	22.7	33.0	38.9
Laboratory Glass (tons) .. ..	1,476	1,320	1,510	2,500
Glass Shells for electric lamps (lakh pieces) .. ..	166.8	169.2	225	261
Table & Pressedware (tons) .. ..	17,920	17,620	22,050	25,460
Lampware .. ..	15,580	12,400	12,060	16,090
Thermos flasks .. ..	110	290	180	315
Miscellaneous glassware .. ..	1,230	963	2,450	2,270

The annual rated capacity of the glass industry (excluding bangles, in regard to which there has been no significant change) has increased from 213,250 tons in 1950 to 291,020 tons in 1956. In the case of sheet glass, where substantial expansion was envisaged in the First Plan, the capacity and production have both gone up from 11,700 tons and 5,850 tons, respectively in 1950 to 50,400 tons and 20,540 tons in 1955.

On the basis of production plus imports minus exports, the internal demand for various types of glass and glassware in 1955-56 may be roughly estimated at 135,500 tons. Of this, the estimated production is only 125,000 tons, which is lower than the production target of 168,510 tons. The production of glass bangles has been running, more or less, steady at about 16,000 tons per annum during the Plan period. It is estimated that a gross fixed capital of Rs. 2.5 crores was invested in the glass industry during the First Plan.

But the annual demand for glass and glassware is likely to increase to about 200,000 tons by 1960-61. By that period, the effective capacity of the industry will be raised to 338,000 tons per annum. It is estimated that the capital requirements of the glass industry inclusive of replacements and modernisation will amount to about Rs. 3 crores during the Second Plan period. The industry in the organised sector is expected to employ about 25,000 persons in 1960-61 as against 18,500 persons in 1955-56 if the production target of 200,000 tons is achieved.

It is expected that at the end of the Second Plan, exports and imports will balance each other at about Rs 50 lakhs per annum. The Government have during the past few years been helping the industry in a number of ways; they have granted rebate of duty on heavy soda ash, provided technical help, set up a Central Glass and Ceramic Research Institute and the National Instruments Factory.

Imports and exports are as follows:

(Rupees in lakhs)

—	1951-52	1952-53	1953-54	1954-55	1955-56
Imports .. ..	214.73	128.05	135.64	139.02	163.70
Exports .. ..	21.42	24.23	21.40	20.76	17.49

The following table summarises the programme of development during the period of the First Plan:—

—	1950-51		1955-56	
	Annual rated capacity.	Actual production.	Annual rated capacity.	Actual production.
	Tons.	Tons.	Tons.	Tons.
Bangles .. ..	35,000	16,000	35,000	16,000
Sheet glass .. ..	11,700	5,850	52,200	26,000

Optical glass .. ..	..	..	12	10
Total (excluding bangles) ..	213,250	91,950	290,012	168,510

\* Pre-reorganization.

## HIDES, SKINS AND LEATHER

**T**HE Republic is regarded as a surplus area in respect of its resources of raw hides and skins. It is estimated that normally it produces 16.2 million cow hides, 5.5 million buffalo hides, 23.2 million goat and 15.1 million sheep skins a year. Only a portion of the cattle and buffalo hides is obtained from slaughtered animals and the bulk, about 75 to 80 per cent, is derived from animals that die a natural death.

The bulk of the production is carried on in small towns and villages.

The tanning industry comprises four sections, viz., 1. organised tanneries producing finished vegetable tanned buffalo leather and chrome tanned upper leather; 2. tanneries producing vegetable tanned leather known to the trade as E. I. kips and E. I. tanned skins; 3. small-scale chrome tanneries producing chrome tanned upper leather; and 4. village tanneries producing vegetable tanned cow and buffalo leather and vegetable tanned leather from goat and sheep skins.

At the commencement of the First National Plan, there were 26 organised tanneries producing vegetable tanned buffalo and cow leather, of which 16 also produced chrome tanned upper leather. Their annual rated capacity in terms of cow hides (one buffalo hide = 2 cow hides) was

3.184 million hides for vegetable tanning and 1.976 million hides for chrome tanning. Early in 1956, there were 24 such tanneries on the active list of the Development Wing of the Ministry of Commerce and Industry with an installed capacity of 3.304 million hides for vegetable tanning; 13 of them produce chrome leather with a capacity of 1.679 million hides.

The number of factories and annual rated capacity in 1956 of each of these sections was as follows:—

	Number of factories.	Capacity in million.
1.	24 (13 produce chrome)	3.304 (hides for vegetable tanning) 1.679 (hides for chrome tanning)
2.	500	8-9 (tanned hides) 20-22 (tanned skins)
3.	250	3 (hides)
4.	..	8 to 9 (raw hides) 3 to 4 (raw goat and sheep skins)

The second section is mainly concentrated in South India, while the third is located in Calcutta and worked by the Chinese.

### PRODUCTION

The following is the trend of production:—

Year.	Chrome and tanned hides.	Vegetable tanned buffalo and cow hides (in terms of cow hides).	Leather cloth (000 yards).
	(thousands)	(thousands)	
1951 .. ..	879.6	1,704.0	1,918
1952 .. ..	850.4	1,478.4	954.0
1953 .. ..	700.8	1,298.4	986.2
1954 .. ..	668.4	1,370.4	1,263.4
1955 .. ..	676.7	1,635.6	....

According to the census of manufactures, 1952, the total fixed investment in 94 tanning factories giving employment to 8,180 workers was Rs. 83.21 lakhs and the working capital Rs. 258 lakhs.

According to the information supplied by the manufacturers registered under the Industries (Development and Regulation) Act, the total capital invested in the large-scale units manufacturing leather and leather goods in 1956 was about Rs. 9.37 crores and the number of persons employed was about 9,400. The number of persons employed in the small-scale leather and leather manufacturing industry, as per the National Income Committee's Report (1954), was 793,000 in 1950-51.

When the position of the industry was reviewed in May 1954, it was observed that more than 50 per cent of the installed capacity of the organised tanneries was lying unutilised. In order to assist the industry to raise its production, the Government banned totally the export of raw hides and skins in short supply; allowed the import of raw hides and skins under O.G.L. from soft currency areas; imposed severe restrictions on import of leather and leather goods; and decontrolled completely the export of leather and leather goods.

To meet the internal requirements, a large quantity of raw hides and skins are imported, mostly overland from Pakistan. In addition a small quantity of tanned hides and skins and of unwrought leather is also being imported.

The following table gives the position:—

Year	Raw hides	Raw skins	Hides, skins, tanned or dressed	Unwrought leather
(In lakhs of Rs.)				
<b>Imports:</b>				
1950-51 .. ..	1.25.1	1.23.1	1.8	4.6
1951-52 .. ..	79.1	44.0	..	6.6
1952-53 .. ..	50.8	28.4	..	6.9
1953-54 .. ..	56.5	54.7	..	8.8
1954-55 .. ..	25.9	17.3	0.7	6.8
1955-56 .. ..	66.5	23.3	..	6.7
<b>Exports:</b>				
1950-51 .. ..	68.5	8.73.9	25.36.4	38.0
1951-52 .. ..	61.8	7.62.2	25.02.2	39.2
1952-53 .. ..	2.3	5.53.5	20.11.5	15.7
1953-54 .. ..	..	6.06.7	24.97.2	22.4
1954-55 .. ..	..	7.13.0	20.54.3	18.0
1955-56 .. ..	..	6.52.7	22.52.3	20.6

The main problems about raw material relate to the supply of hides and skins and wattle bark. Supplies of hides have to be arranged from Pakistan. As for wattle bark, the Government of Madras has taken steps for bringing 21,000 acres under wattle plantation. Up to the end of 1953-54, about 18,310 acres had been planted.

Nursery and small-scale field tests are being carried out in Assam, Bombay, Orissa, Punjab, Uttar Pradesh and West Bengal for locating

suitable areas for the planting of wattle trees. The indigenously available *Karada* bark is stated to be a potential substitute for wattle bark.

It is estimated that the demand in 1960-61 may come to 23 million tanned hides and 28 million tanned skins. The quantities of the principal raw materials required for this target are: Raw hides 23.5 million pieces; raw skins 28.5 million pieces; lime 28,000 to 33,000 tons;

wattle bark and extract, 35,000 tons; other barks 330,000 tons; myrobalans 28,000 to 33,000 tons.

### FOOTWEAR INDUSTRY

The principal use of leather is for the production of footwear. In 1951, there were nine large-scale footwear factories with an annual rated capacity of 4.724 million pairs of Western type footwear. In 1956, there were 12 such units with an annual rated capacity of 5.975 million pairs. There has been no real increase in the capacity, only some units already in existence came within the purview of the Industries (Development and Regulation) Act, 1951 and were registered. The capacity of these factories for Indian type footwear fluctuates with demand.

The following table gives the regional distribution of the capacity for Western type footwear early in 1956:—

State	Unit No.	Annual Capacity (Pairs)
Uttar Pradesh ..	7	2,277,000
West Bengal ..	1	3,442,000
Bihar .. ..	1	174,200
Madras* .. ..	1	75,000
PKPSU* .. ..	1	4,800
Mysore* .. ..	1	1,200
Total .. ..	12	5,974,800

\* Pre-reorganization.

The output of the large-scale factories since 1950 is given below:—

	Western type (million pairs).	Indian type (million pairs).
1950 .. ..	2.837	1.997
1951 .. ..	3.641	2.074
1952 .. ..	3.367	1.806
1953 .. ..	3.848	2.204
1954 .. ..	3.263	2.083
1955 .. ..	3.243	2.303

Reliable production figures for the small-scale and cottage units, which are responsible for manufacturing more than 90 per cent of the total output, are not available. The present output is estimated at 12 to 13 million pairs of Western type footwear and 65 to 70 million pairs of Indian type footwear.

Imports of leather footwear during the First Plan period were very small while exports were much higher. The following table gives the trend in exports and imports from 1950-51:—

Year	Imports (in pairs)	Exports (in pairs)
1950-51 .. ..	1,460	667,500
1951-52 .. ..	2,280	1,465,500
1952-53 .. ..	225	1,027,100
1953-54 .. ..	465	1,218,600
1954-55 .. ..	1,490	1,569,819
1955-56 .. ..	1,816	1,577,754

An excise duty of 10 per cent *ad valorem* has been imposed on footwear since March 1, 1954. Only power-operated factories employing 60 or more workers and using more than two H.P. come under this levy.

It is estimated that the total requirements of leather footwear in 1960-61 would be 100 million pairs for domestic consumption and 2 million pairs for export purposes. This would be an increase of 13.5 million pairs thus over the 1955 level. This additional demand is proposed to be met by a fuller utilisation of the existing capacity in the organised sector and by developments in the cottage and small-scale sector and no expansion of capacity is envisaged during the Second Plan period in the large-scale sector of the industry.

For achieving the target of 102 million pairs in 1960-61, the following quantities of raw materials will be required: 12.25 million tanned hides and 4.75 million tanned skins; 5.4 million rems of thread for uppers and 360 tons for others; and 285 million pieces of eyelets.

## JUTE INDUSTRY

The following table gives the details of the production trends of raw jute in the Indian Union:—

Year	Lakh acres	000 bales
<b>Average</b>		
1946-47 .. ..	5.3	1,320
1947-48 .. ..	6.5	1,695
1948-49 .. ..	8.3	2,055
1949-50 .. ..	11.6	3,089
1950-51 .. ..	14.5	3,301
1951-52 .. ..	19.5	4,678
1952-53 .. ..	18.2	4,805
1953-54 .. ..	11.96	3,129
1954-55 .. ..	12.43	2,928
1955-56 .. ..	17.39	4,197
1956-57 .. ..	18.83	4,221

Following the partition India has not only ceased to be an exporter of raw jute but depends for quality jute imports from Pakistan. These are arranged under bilateral trade pacts concluded periodically for a short duration.

Supply and distribution of jute 1955-56 and 1956-57:

	1955-56 (lakh bales)	1956-57 (lakh bales)

\* Actual. † Revised.

(I.J.M.A. Statistics, Monthly Summary).

Though India has achieved self-sufficiency, she still depends on Pakistan for quality jute.

The following table gives the trend of I.J.M.A. mill consumption of raw jute:—

Year ended June	Lakh bales
1949-50	49.64
1950-51	52.52
1951-52	56.85
1952-53	52.53
1953-54	50.24
1954-55	58.63
1955-56	64.28

### JUTE MILLS

In 1955 there were 112 registered jute mills with a total number of 68,837 looms; of these 101 were located in West Bengal. The loomage on June 30, 1955 was 69,000 capable of producing

100,000 tons of jute goods per month.

104 mills had a fixed capital of Rs. 29.71 crores and a working capital of Rs. 37.15 crores in 1953. In the same year, 271,000 workers found employment in the industry.

The progress of the industry during the past few years is summed up in the following table:—

(in thousand tons)

Year (July-June)	Production*				Exports from India	Stocks*
	Hessian	Sacking	Others	Total		
1941-42 .. ..	591	588	46	1,225	825	252
1942-43 .. ..	484	662	59	1,205	689	276
1943-44 .. ..	393	522	39	954	635	196
1944-45 .. ..	415	545	40	1,000	683	177
1945-46 .. ..	464	591	40	1,085	709	188
1946-47 .. ..	418	510	34	962	750	176

1955-56 .. ..	403	623	69	1,095	875	127

\* Represents I.J.M.A. mills and Gagalbhai.

In order, however, to have a correct perspective on the prices of raw jute and jute manufactures, the following index number of prices will be interesting:—

### INDEX NUMBER OF PRICES

(Base July 1914=100)

Period	Raw Jute	Manu- factured Jute
<b>Average of 1929-33 .. ..</b>	<b>59</b>	<b>88</b>
.. .. 1934-38 .. ..	49	69
.. .. 1939-43 .. ..	87	134
.. .. 1944-48 .. ..	188	274
.. .. 1949-53 .. ..	322	431
1950 .. ..	301	424
1951 .. ..	517	645
1952 .. ..	277	886
1953 .. ..	227	307
1954 .. ..	248	331
1955 .. ..	293	328

Ever since the devaluation of the Indian rupee and non-devaluation of the Pakistan rupee, supplies of raw jute from Pakistan badly needed by Indian jute mills became difficult and while there was a boom in the demand for jute goods due to outbreak of hostilities in Korea in mid-1950, the production of jute goods outside India considerably increased. This competition became intense following Pakistan's decision to charge a higher price for supplies meant for India and, consequently, the Government reduced the export duty on jute goods by substantial amounts. In August 1955, immediately after the devaluation of the Pakistan rupee export duties were abolished.

Jute mills increased their working hours from a reduced level of 42½ hours to 45 hours a week from July 1954 and further to 48 hours a week from October 1954.

The main problems facing the industry, observes the Planning Commission, are shortage of raw material, modernisation of equipment and possible competition in the foreign markets from substitutes and other products. Lack of finance is a major factor deterring the industry from undertaking modernisation. The task, therefore, is to utilise the existing capacity more fully by procuring greater supplies of raw jute. On this basis, it was expected that the output of the mills could be stepped up from 1,150,000 tons in 1955-56 to 1,200,000 tons in 1960-61 and exports from 875,000 tons to 9,00,000 tons.

The figures of exports in the financial years 1953-54 to 1955-56 are as follows:—

	1953-54	1954-55	1955-56
<b>Twist and Yarn (lb.) .. ..</b>	<b>10,402,843</b>	<b>6,684,919</b>	<b>5,082,518</b>

<b>Total of Jute Manufactures including</b>			
<b>twist and yarn (tons) .. ..</b>	<b>776,804</b>	<b>850,869</b>	<b>863,961</b>

## LAC INDUSTRY

**L**AC is a resin which finds extensive application in industries. It is a resinous protective secretion of an insect which lives by sucking the sap of certain trees and shrubs called lac hosts.

There are four crops of sticklac, named after the Hindu months in which the collection of each crop commences. These are 'Baisakhi' and 'Katki' from one strain of the insect (Bangeeni) and 'Jethwi' and 'Aghani' from another strain (Kusumi). The first processed product, after the crushing and washing of sticklac is known as 'seedlac'. From this shellac is manufactured either by melting it (seedlac) manually in cloth bags held near a fire place called 'bhattas' or by the mechanised process of extraction with suitable solvents.

India is the chief source of supply of sticklac and till 1950 accounted for nearly 85 per cent of the world production. But since then production in Thailand has rapidly increased and now accounts for about 30 per cent of the world production. The average production of sticklac in different States from 1946-50 is as follows:—

States*	Average Crop (in maunds)
Bihar .. .. .	4,56,698
Madhya Pradesh .. .. .	2,88,111
West Bengal .. .. .	2,36,985
Assam .. .. .	17,065
Orissa .. .. .	10,194
Bombay .. .. .	67,382
Uttar Pradesh .. .. .	12,544
Other States .. .. .	23,284
	11,18,263

There are no regulated markets for trading in sticklac. The manufacture of shellac is a Cottage Industry and the number of shellac factories varies from season to season. According to the latest information there are about 366 factories in the country, only two of these which are located in Calcutta are fully mechanised.

Yield from sticklac varies from year to year and locality to locality.

Roughly the yield of seedlac and shellac is 65 per cent and 55 per cent of sticklac.

The cost of manufacturing one maund of shellac from seedlac is about Rs. 16 and of converting sticklac into seedlac is Rs. 3. In 1939 these were roughly Rs. 3-8 and as. 8 respectively.

### PRICE TRENDS

Prices of shellac and seedlac have been subject to wide fluctuations.

During the First World War, the price of T.N. Shellac at Calcutta ranged between Rs. 32 and Rs. 50 per maund but the upward movement initiated in 1917-18 lifted it beyond Rs. 200 in October 1920. Then followed a downward trend except for a slight recovery in 1927-28 and 1934-35, and the rate touched the bottom at Rs. 18 in 1933-34 and sought a fresh lower level at Rs. 13 per maund by April-June 1939.

During the Second World War—July 1942 to April 1946—the prices were controlled on T. N. basis at Rs. 64 and later at Rs. 71.

After decontrol, the prices started rising, but in March 1950 they fell to Rs. 95 on T. N. basis as compared with an average price of Rs. 130 in December 1949.

Following the outbreak of the Korean war, the price touched Rs. 190 in January 1951 but declined by the end of March 1952 to Rs. 92 per maund.

During 1952-53 the market was subdued with pure T. N. Shellac fluctuating between Rs. 84 and Rs. 66. There has been a firm trend since 1953 April and in November the rate was around Rs. 107 per maund.

In 1954 the prices went down to about Rs. 90 per maund in March but started rising and reached Rs. 178 in January 1955. But due to a very good crop it started falling and reached Rs. 136 by September 1955. It rose to about Rs. 163 in November 1955 but started falling due to a very good crop in Thailand and reached Rs. 111 by April 1956. Between May and September 1956 the prices rose to about Rs. 130 per maund but again due to a very good Katki crop in the country and a good crop in Thailand and the prospect of a good Baisakhi crop the prices came down to Rs. 95 per maund on T. N. basis by the end of January 1957.

### EXPORTS

About 90 per cent of the total quantity of processed goods is exported.

The U.S. is the best customer, followed by the U.K. and Germany. Since 1953 the U.S.S.R. has also been buying a sizable quantity.

The data relating to exports during 1954-55 and 1955-56 are given below (in cwt.):—

	1954-55	1955-56
<b>BUTTON LAC</b>		
U.K. .. .. .	6,521	6,408
U.S.A. .. .. .	2,874	4,833

<b>OTHER KINDS</b>	<b>58,628</b>	<b>60,471</b>
<b>TOTAL .. .. .</b>	<b>5,32,325</b>	<b>5,68,554</b>

Lac has made significant contributions to the development of art and industry.

Shellac is consumed chiefly by five industries.

The gramophone industry consumes about 11 to 13 thousand tons.

The varnishes and paint industry absorbs something like 4 to 6 thousand tons.

The total demand from the electrical industry is estimated at 3,000 tons as against 6,000 tons in pre-war years.

Nearly 3,000 tons are used in the hat industry as a stiffening material.

The manufacture of sealing wax requires about 1,500 tons.

For the promotion of the improvement of methods of cultivation and manufacture of lac in India the Indian Lac Association for Research was formed by traders in Calcutta in 1921 and the Government found the funds by levying a cess on all exports of lac other than refuse lac at annas four per maund and for refuse lac annas two per maund. This association set up the Indian Lac Research Institute at Namkum (Ranchi).

At the suggestion of the Royal Commission of Agriculture in 1927 this association was succeeded by the Indian Lac Cess Committee which was established under the Lac Cess Act of 1930 formed "for the improvement and development of the cultivation, manufacture and marketing of Indian lac". By this Act the cess was raised to annas seven and annas five respectively. With effect from April 1948 this cess was doubled. In order to associate the members of Parliament with the Committee and also to provide adequate representation to all the lac growing States the Indian Lac Cess Act has recently been amended. This amended act was expected to come into effect on 1st April 1957.

On 19th September 1956, the Committee celebrated its Silver Jubilee and to mark the occasion brought out a Souvenir publication containing an exhaustive survey of research and statistics on lac and a detailed directory of lac trade. This publication is available from the Secretary, Indian Lac Cess Committee, Circular Road, Ranchi.

The Indian Lac Cess Committee works under the control of the Ministry of Agriculture, Government of India.

An Export Promotion Council for shellac has also been formed under the Central Ministry of Commerce and Industry to promote exports of shellac.

At the suggestion of the Bihar Shellac Enquiry Committee and the Indian Lac Cess Committee the Government of India banned futures trading in shellac and seedlac.

Under the Second Five Year Plan it is proposed to spend Rs. 50 lakhs for the development of the industry. The more important of the schemes are (i) 50 broodlac farms to increase the production of lac to 16 lakh maunds; (ii) Seven regional testing laboratories for testing shellac and (iii) A number of storage godowns in order to provide better marketing and credit facilities.

\* Pre-reorganization States.

## MISCELLANEOUS INDUSTRIES

The particulars generally relate to the year 1955-56, and the Plan referred to is the Second Five-Year Plan.

**Agricultural Implements:** There are 62 factories manufacturing the implements, with a productive capacity of 26,880 tons in terms of steel. The Tata (Agrico) Jamshedpur is the largest unit with an annual capacity of 12,000 tons. They also include two units in the public sector, viz., the Nahan Foundry and the Mysore Implements Factory. Actual production by the organised sector was 18,195 tons in 1952, 8,040 tons in 1953, 12,728 tons in 1954 and 13,875 tons in 1955. In addition there were 350 small units registered with State Governments.

**Agricultural Machinery:** In 1950 there were eight organised units manufacturing power-driven pumps with a capacity of 33,460 pumps per annum. At the end of 1955, the number was 27 with an annual installed capacity of 67,492 pumps.

The actual production was 34,000 in 1950-51; 48,000 in 1951-52; 25,000 in 1952-53; 28,000 in 1953-54; 29,500 in 1954-55; and 38,000 in 1955-56.

Imports of centrifugal pumps including turbine pumps were worth in 1950-51 Rs. 57 lakhs; 1951-52 Rs. 95.6 lakhs; 1952-53 Rs. 80.6 lakhs; 1953-54 Rs. 60.4 lakhs; 1954-55 Rs. 59.3 lakhs and 1955-56 Rs. 51.6 lakhs.

Total demand in 1955-56 was about 40,000 pumps, and it is expected to rise to 85,000 to 86,000 pumps by 1960-61. To meet this increased demand, some schemes have been recommended under the Second Five-Year Plan. With their implementation, the capacity will increase to 74,700 pumps per annum.

For the first time, pumps above 6" in diameter, multi-stage pumps (up to 10 stages), axial flow pumps, screw pumps, sewage disposal pumps and self-priming pumps were manufactured.

There is a Development Council for power-driven pumps and diesel engines.

**Diesel Engines:** At the beginning of the First Plan there were five units engaged in the manufacture of diesel engines with a combined annual rated capacity of 6,320 engines. By the end of the Plan, the number increased to 16 with a capacity of 10,769 engines per annum. In addition, three more firms with a capacity of 10,000 engines for the manufacture of road vehicular type of diesel engines were established to meet the automobile requirements.

The production of diesel engines of different horse power was: 5,540 in 1950-51; 7,263 in 1951-52; 2,909 in 1952-53; 5,244 in 1953-54; 9,273 in 1954-55; and 10,000 in 1955-56.

The total demand by 1960-61 is estimated at between 20,000 and 21,000 engines upto 50 H.P.

The Jaymes Beechey & Co., Bombay have been granted a licence for the manufacture of 2,400 diesel engines ranging from 3 to 30 H.P. in collaboration with foreign concerns. Another licence has been granted to Ruston & Hornsby (India) Bombay for the manufacture of high horse power diesel engines ranging from 100 to 1,000 H.P. with a capacity of 200 engines per annum. On the basis of all these schemes, the capacity and production targets envisaged in the Second Five-Year Plan are 220,000 H.P. and 205,000 H.P. respectively.

**Agricultural Tractors:** At the beginning of the Second Plan, there was no regular tractor manufacturing plant. The requirements are met by imports. The imports were: 1950-51, 4,930; 1951-52, 7,148; 1952-53, 1,227; 1953-54, 3,195; 1954-55, 2,039.

It is estimated that about 20,000 tractors are in use at present in the country as against 10,000 in 1949-50. And the total requirements for all types of tractors by 1960-61 have been estimated by the Committee on Tractors and Tractor drawn Agricultural Implements at 5,000 per annum.

The Standard Motor Products of India, Madras, have been licensed to manufacture 4,800 tractors a year in association with the Standard Motor Co. of the U.K.

**Machine Tools:** Till 1939, the development of machine tools came largely from private enterprise. But when the war broke out, the Government of India had to take steps for the manufacture of machine tools badly needed for war supplies and so the industry developed rapidly. But the unloading of huge stocks of machine tools from war surplus and heavy imports dealt a blow to the industry. The protection recommended by the Tariff Commission did not help it much. It was the First Five-Year Plan that really pulled it up. At present, there are 17 units, two owned by the Government and 15 by private enterprise, manufacturing graded machine tools. The capital investment (private) is about Rs. 30 lakhs and the total number of persons employed exceeds 2,000.

The year 1955 saw an increase in production. About 2,800 machine tools were manufactured as against 1,500 in 1954. The production of machine tool accessories more than doubled in values.

As a result of a comprehensive census of the existing machine tools in the private sector, it has been found that there is ample scope for expansion. So the Government appointed in February 1956 a Committee to assess the overall requirements and the pattern of future development of the industry.

As a part of the overall programme, the expansion of the Hindustan Machine Tools is envisaged during the Second Plan. The production of lathes at the Jalahlali Works of this concern is expected to be worth Rs. 1.5 crores in 1960-61. The production in the private sector is currently worth about Rs. 75 lakhs per annum. A provisional target of Rs. 3 crores worth of machine tools is proposed for 1960-61 for the public and private sectors pending submission of the Report of the Expert Committee.

The following table is interesting:

(Rupees in lakhs)			
Year	Machine	Production value	Import value
1952	4,488	44	221
1953	2,901	44	312
1954	1,544	50	..
1955	3,064	68	..

According to Mr. M. Smith, U.S. Assistant Secretary of Commerce for International Affairs, the existing machine tool plants in India supplied about 20 per cent of India's present needs and that the remainder would have to be supplied from abroad. By 1960-61 at the end of its Second Five Year Plan, India hopes to increase its machine tool output ten-fold to a total value of 20 million dollars (Rs. 950 lakhs).

Mr. Smith said there were now 80,000 machine tools in operation and by 1960-61 it was estimated 170,000 would be required.

**Cotton Textile Machinery:** The principal items are carding engines, spinning ring frames and looms. The target capacity and production in the First Plan for carding engines was 600 and in the Second Plan 1,692. There was only one unit with a capacity for 600 engines. Actual production was 1951: 158; 1952: 108; 1953: 192; 1954: 436; 1955: 049. The firm exported 27 carding engines to China and Pakistan in 1952.

It is estimated that the annual demand under the Second Plan is 1,400 for new units and 600 for replacement, totalling 2,000 units. To meet this demand, the Government has approved the proposal of the private sector for

600 carding engines by the National Machinery Manufacturers and 300 by Texmaco for implementation.

About spinning ring frames, there were 2 units with a rated capacity of 396 pieces per annum. Two more units were expected to start production early in 1955 bringing the total capacity to 996 ring frames against the Plan target of 800. Actual production was 1951: 291; 1952: 255; 1953: 197; 1954: 367; 1955: 601. The production target set in the Second Plan is 1,896.

About looms, there were three units with a capacity for producing 4,320 looms per annum; the target capacity in the First Plan is 4,980. The actual production was 1951: 2,166; 1952: 1,527; 1953: 1,340; 1954: 1970; 1955: 2,636. The target production set in the Second Plan is 6,000 looms.

Protection to the industry has been extended upto the end of 1957 at the protective duty of 10 per cent, for spinning ring frames and looms.

**Ball Bearings:** There is one unit with an annual rated capacity of 600,000 ball bearings on a single shift basis. The actual production was 1951-52: 240,661; 1952-53: 496,106; 1953-54: 601,607; 1954-55: 689,680; 1955-56 (estimate): 889,500. The production includes ball bearings of 3" bore. The total demand by 1960-61 is estimated at 2.4 million bearings which the existing firm would be able to meet with its expanded capacity and by working on a multiple shift system. The production of 21 different sizes of roller bearings was undertaken for the first time.

Protection had been granted upto the end of 1956.

**Bicycles:** The number of cycles produced in 1950-51 amounted to 1.01 lakhs and in 1951-52 to 1.20 lakhs. By 1953-54 the number manufactured by the six major producers had risen to 2.89 lakhs and 1954-55, with the commencement of production by some new units, the production reached a level of four lakhs. The production in 1955-56 is estimated to be about 5.5 lakh cycles as against the target of 5.3 lakhs envisaged in the First Plan.

But the internal demand has shown a steady rise. From 4.03 lakh cycles in 1951-52 it has moved up to about 6.8 lakhs in 1955-56. It is expected that the offtake will go up to 11 lakhs at the end of the Second Plan. Besides an export of 1.5 lakh cycles is also envisaged.

This is to be achieved through the organised sector as well as the decentralised sector of the industry. In the beginning of March 1955, there were about 460 small-scale units. In view of the considerable employment potentialities of the small-scale sector, it is considered that it will be enabled to produce 2.5 lakh cycles per annum by 1960-61. The balance of 10 lakhs is expected to be produced by the organised sector which includes 13 major units.

A Development Council was constituted for this industry in December 1953.

There are 22 leading manufacturers of bicycle components and parts, besides a large number of small units. All types of bicycle components are now produced within the country though production is not always adequate in quality or in quantity. Consequently most manufacturers of complete bicycles still import some components. It was expected that by 1955 the value of components would not exceed Rs. 7 or 8 per bicycle. Production: Rs. 290.9 lakhs in 1954-55 and Rs. 311.5 lakhs in 1955-56.

Protection had been granted upto the end of 1956.

**Sewing Machines:** At the end of the First Plan there were three organised units engaged in the manufacture of complete domestic sewing machines with a total capacity of 46,500

**machines per annum.** It is estimated that the present demand for the domestic and industrial types of machines of 130,000 to 160,000 machines per year may go up to 300,000 by 1960-61. This can be met by the production from the small-scale sector as well as from the organised sector with its expanded capacity. Of this, about 30,000 machines are ear-marked for export. Production—32,965 in 1950-51; 48,116 in 1951-52; 52,206 in 1952-53; 68,417 in 1953-54; 80,776 in 1954-55; 110,000 (estimate) in 1955-56.

The protection granted to the industry has been withdrawn since January 1, 1955.

**Hurricane Lanterns:** There are 12 units with a capacity of 5 million lanterns a year. The Second Plan target is 6 million. Production was, 1950-51: 3.2 million; 1951-52: 3.9 million; 1952-53: 3.5 million; 1953-54: 4.5 million; 1954-55: 5.1 million; 1955-56: 5.4 million. Actual export was, 1950: 15,036; 1951: 14,136; 1952: 108,264; 1953: 449,734; 1954-55: 349,079 valued at Rs. 8.83 lakhs; 1955-56: 204,670 valued at Rs. 5.15 lakhs.

Protection has been withdrawn since January 1, 1955.

**Grinding Wheels:** There are four units with a rated capacity of 1,520 tons. It is expected that with the completion of the expansion schemes, this rated capacity will increase to 2,110 units which is considered to be adequate to meet the demand by 1960-61. Production—1950-51: 231 tons; 1951-52: 352 tons; 1952-53: 390 tons; 1953-54: 395 tons; 1954-55: 625 tons; 1955-56: 800 tons (estimate). Imports: 1950-51: 209 tons; 1951-52: 202 tons; 1952-53: 93 tons; 1953-54: 112 tons; 1954-55: 158 tons; 1955-56: 60 tons.

Protection has been granted upto the end of 1957.

**Dry Batteries:** There are five units with a capacity for producing 224.5 million dry cells a year. The Second Plan target is 225 million. Production—1950-51: 136.5 million; 1951-52: 146.0 million; 1952-53: 125.0 million; 1953-54: 153.0 million; 1954-55: 148.4 million; 1955-56: 161.1 million. The exports were, 1950: 85,193 valued at Rs. 0.2 lakhs; 1951: 1,445,673 valued at Rs. 2.58 lakhs; 1952: 1,114,966 valued at Rs. 2.92 lakhs.

Attempts are being made to manufacture the raw material in this country—manganese dioxide, sealing compound, carbon electrodes.

There has been no protection since January 1954.

**Storage Batteries:** There were 13 units with an annual rated capacity of 290,100. The anticipated demand in 1960-61 is 420,000. Production—1951-52: 212,836; 1952-53: 136,000; 1953-54: 179,000; 1954-55: 210,100; 1955-56: 258,086.

There is progress in the diversification of products and a greater degree of self-sufficiency about raw materials. Among the different products are aircraft batteries and railway requirements. Schemes for the manufacture of dry-charged batteries, iron-clad batteries, heavy duty and traction batteries have been approved. Raw material manufacture includes refined lead and microporous rubber separators.

Between the years 1951 and 1954 the imports averaged Rs. 27.6 lakhs. Exports were only a few thousands.

Protection to the industry has been withdrawn since January 1, 1956.

**Electric Cables and Wires:** Actual production of 1. bare copper conductors, 2. winding wires, 3. rubber insulated cables and flexibles, 4. A.C.S.R. cables is as follows:

	in tons (1)	in tons (2)	in mil. yd. (3)	in tons (4)
1952	7,522	883	36.2	2,381
1953	7,372	226	46.4	3,280
1954	7,576	118.59	62.7	5,481
1955	8,386	605	86.1	8,045

The major schemes envisaged in the Plan are the Hindustan Cable Factory in the public sector for producing different kinds of cables, (this started regular production on Sept. 1, 1954 and manufactured 112 miles of underground telephone cables upto end of March 1955), the Expansion of the Indian Cable Company at an estimated cost of Rs. 2.8 crores, the expansion of capacity for A.C.S.R. cables from 2,500 tons to 5,000 tons per annum, the creation of producing facilities for 500 tons of insulated aluminium conductors per annum.

A new rod mill of the Indian Cable Company with an installed capacity for producing 6,700 tons of black copper and aluminium rods, 100 tons of cotton and paper covered wires and 3 million yards of plastic insulated cables and flexibles per annum has been established.

About A.C.S.R. expansion of capacity is estimated to be of the order of 13,000 to 14,000 tons per annum.

**Electric Fans:** There are 19 units with an installed capacity of 401,700 fans per year. The Second Plan target capacity is 600,000 fans per year in 1960-61. There are plans for expansion which will result in a production capacity of 466,800 fans per year.

Actual production was 1950: 194,100; 1953: 199,468; 1954: 238,850; 1955: 282,212. The Plan target for 1955 was 320,000 to 350,000.

Exports of electric fans are expected to reach about 40,000 per year by 1960-61. Exports were: 1952-53: 3,655 valued at Rs. 4.9 lakhs; 1954-55: 10,869 valued at Rs. 13.6 lakhs; and 1955-56 (ten months): 14,241 valued at Rs. 17.2 lakhs.

**Electric Lamps:** There are 14 units manufacturing general lighting service lamps with an installed capacity of 86 million lamps per year. The target is 50 million by 1960-61.

Production was, 1950: 14 million; 1953: 19.8 million; 1954: 22.86 million; 1955: 23.61 million.

There is progress in the manufacture of other kinds of lamps—train lighting, coloured lamps, fluorescent tubes, torch bulbs, radio dial lamps, cycle dynamo lamps, auto bulbs, telephone switch-board lamps. Manufacture of components has also started—brass lamp caps. Glass shell production is being expanded to meet the entire requirements of the lamp industry.

**Electric Motors:** There were 12 units with a total capacity of 283,000 H.P. per year. When all the schemes for expansion are implemented the total capacity is expected to rise to about 833,700 H.P. by 1960-61.

Actual production was, 1950-51: 99,000 H.P.; 1951-52: 153,000 H.P.; 1952-53: 160,000 H.P.; 1953-54: 161,000 H.P.; 1954-55: 201,000 H.P.; 1955-56: 271,000 (estimate).

A.C. 3 phase induction motors upto 225 H.P. and motors of the slip-ring type of up to 125 H.P. are now being produced in the country.

Protection has been granted upto the end of 1958.

**Electric Transformers:** On April 1, 1956, there were 13 units with an annual rated capacity of 657,000 KVA per annum. When the present schemes for development are implemented, the capacity will go up to 1,310,000 KVA per annum—against the Second Plan target of 1.5 million KVA by 1960-61.

Production was 1950-51: 179,000 KVA; 1951-52: 202,000; 1952-53: 231,000; 1953-54: 327,000; 1954-55: 434,000; 1955-56: 629,000.

Imports were valued at Rs. 154 lakhs in 1950-51; Rs. 144.5 lakhs in 1951-52; Rs. 149.4 lakhs in 1952-53; Rs. 197.5 lakhs in 1953-54; Rs. 181.6 lakhs in 1954-55; and Rs. 143.1 lakhs in 1955-56 (10 months).

Protection was granted upto end of 1956.

**Soap:** There are 74 organised units with a capacity of 2.4 lakh tons. The Plan target is 357,000 tons by 1960-61. A large part of the existing capacity is idle.

Production by organised factories was (in tons) 1951: 86,000; 1952: 85,000; 1953: 82,200; 1954: 88,000; 1955: 99,000. The cottage industries are estimated to produce 30,000 tons annually.

Exports were (in tons) 1950: 280; 1951: 1,580; 1952-53: 1,300 tons valued at Rs. 32.56 lakhs; 1953-54: 571 tons valued at Rs. 13.57 lakhs; 1954-55: 842.6 tons valued at Rs. 14.57 lakhs; 1955-56: 413.8 tons valued at Rs. 9.67 lakhs.

**Matches:** There are 242 units with a rated capacity of 35.3 million gross boxes. The Second Plan target is 35.3 million gross boxes.

Actual production was in millions of gross boxes, 1951: 29.3; 1952: 32; 1953: 29.3; 1954: 26.6; 1955: 30.8.

Both imports and exports are negligible.

The First Five Year Plan laid great emphasis on the development of the cottage sector and a number of measures to help development are under consideration.

**Plywood:** The number of units on the approved list of DWCI is 64 with an annual installed capacity of 150 million sq. ft. Besides there are a large number of unapproved factories with an estimated capacity of about nine million sq. ft. Actual production of tea-chest plywood in million sq. ft. was 1950: 44.9; 1952: 71; 1953: 50; 1954: 62; 1955: 90.

Protection has been extended upto the end of 1957.

## NON-FERROUS INDUSTRY

**T**HE position regarding these metals is briefly described below:

(a) **Aluminium Ores**—India is rich in deposits of high grade Bauxite which are estimated at 250 million tons, but the total reserves of workable deposits are said to be around 28 million tons. These are generally located in the Jabalpur and Balaghat Districts of Madhya Pradesh; Belgaum District in Mysore; Kolhapur, Thana and Kalra Districts in Bombay; Ranchi Plateau in Bihar; and Shevaroy Hills in Salem, Madras.

(b) **Copper Ores**—Copper pyrites is the principal ore of copper. The deposits of copper pyrites in India are in Singhbhum and Baragunda in Bihar; Khetri mines in Jaipur; Sikkim State, Mysore State and in the Salem District of Madras State. Although only the Singhbhum deposits are worked at present, the copper belts of Sikkim and Khetri are very promising.

(c) **Lead Ores**—Lead ores are known to occur at a number of places in India. Special mention may be made, however, of lead deposits in Jaipur and in Jawar Mines in Udaipur, where lead is found in association with zinc; in Chhoti Udaipur in Bombay and in Hazaribagh in Bihar.

(d) **Antimony Ores**—Antimony ore deposits have been found at the Shigree Glacier in Lahaul, Kangra District, Punjab.

(e) **Zinc Ores**—At present zinc deposits are known to occur at only two places in India: Zawar mines in Udaipur and in the Riasin District in Kashmir State.

(f) **Tin Ores**—Hazaribagh, Bihar.

### PRODUCTION

The production of refined copper in tons is as follows: 1946—6,310; 1947—5,932; 1948—5,864; 1949—6,390; 1950—6,614; 1951—7,083; 1952—6,070; 1953—4,920; 1954—7,171.2; 1955—7,281. The installed capacity of the industry was 6,990 tons in 1948; grew to 7,200 in 1955.

As regards processing of semi-manufactures the only production was of brass sheets by the Indian Copper Corporation Ltd. averaging about 8,000 tons per annum, and electric copper wires and insulated cables by the Indian Cable Co. Ltd. A more recent development is the manufacture of brass and copper pipes and tubes. Their annual capacity is 360 tons but the actual production has never exceeded 11 tons and 60 tons respectively.

For antimony a smelter was set up during the war at Bombay by the Star Metal Refinery with a capacity of 300 tons per annum. This capacity has now been increased to 700 tons per annum. The ore brought from Chitral State (Pakistan) was used for smelting antimony and the plant had reached full production in 1946-47. After the partition of the sub-continent, the ore supplies from Chitral were cut off and as a result the production suffered. The production from 1949 to 1954 was 100 tons in 1949, 375 tons in 1950, 327 tons in 1951, 181 in 1952, 131 in 1953, 559 in 1954 and 504 in 1955.

There is a new Lead Smelter at Katrasgarh in Bihar with a capacity of 7,000 tons per annum. The production of lead in 1949 and 1950 was, however, only about 600 tons a year due to the difficulties of transporting ore from the Jawar mines in Udaipur to the Smelter. The company has now set up an ore dressing plant at the mines which will reduce the weight of the ore to be transported. The capacity of this plant is reported to be 9,000 to 10,000 tons of lead concentrates of 40 to 65 per cent. lead and 7,000 to 8,000 tons of zinc concentrates averaging 65 per cent. zinc. There are also lead refineries in Bombay and Calcutta, which started working in 1955. The production in tons is as follows: 1948—625; 1949—594; 1950—627; 1951—859; 1952—

1,131; 1953—1,694; 1954—1,788; 1955—2,234. The installed capacity in 1948 was 6,000 tons and has remained unchanged in 1955.

### SEMI-MANUFACTURES

The greatest progress in the non-ferrous industry made since 1939 is in regard to the semi-manufactures. Several brass and copper rolling plants were started for rolling brass and copper sheets mainly in Bombay. The combined capacity of these new plants is about 20,000 tons per annum.

Some lead sheets are also manufactured in the Calcutta area, but at present they are rolled in 8 ft. width, while the chemical industries require lead sheets of 7 to 9 ft. width. Aluminium and lead foils for tea-chests are also manufactured in the Calcutta area and the present capacity is estimated to be sufficient to meet India's requirements.

Several rolling plants for rods and bars of brass, copper, etc. were started during the war; afterwards an Extrusion Press was set up in Calcutta by National Tubes and Pipes Ltd. Arsenical copper rods which are required for railway locomotives as boiler stays were manufactured in Jaipur by the Jaipur Metal Industries Ltd. during the war and all the requirements of railways can be met by indigenous production. The present capacity for rods and tubes of brass and copper may be estimated at about 10,000 tons, which is enough to meet the present requirements of the country. The manufacture of lead pipes was started during the war at Konnanagar.

A new plant for lead pipes was also set up in Bombay during 1949. The present production is about 330 tons per annum, but this could be increased to 1,000 tons, if required.

A plant for the manufacture of electrical wires and cables was set up near Calcutta during the war by the National Insulated Cable Co. The total production of electrical bare copper wire and cables of this company and the Indian Cable Co. is estimated to be about 10,000 tons per annum.

Two plants one in Bombay and the other in Calcutta for the manufacture of enamelled copper wire required for making electric motors and fans have a total capacity of 2,000 lb. per day.

A number of concerns have been started for manufacturing different kinds of non-ferrous alloys. The refining and reconditioning of railways scrap and other industrial non-ferrous scrap is now done in this country, which was formerly largely exported. The total present alloying capacity in the country may be estimated at about 20,000 to 25,000 tons per annum.

A plant for the recovery of silver from old coins has been taken for implementation at the Alipore Mint. This plant will also be able to recover about 3,600 tons of electrolytic copper from copper scrap.

A scheme for erecting a ferro-manganese plant with an annual capacity of 100,000 tons, had been approved. This plant is proposed to be installed at the Hirakud Dam site in collaboration with an Italian firm. But the target capacity has been stepped up from 100,000 tons to 160,000 tons per annum in view of the higher target for steel production. Seven new programmes have been approved so far and the installation of further capacity is under consideration. It is expected that by the end of the Second Plan, there will be nine plants with an installed capacity of 171,800 tons. But the actual production then will reach only 180,000 tons, out of which 60,000 tons will be for internal consumption and 100,000 tons for export.

In most cases there is a protective duty of 20 per cent. In the case of zinc and lead sheets the protective duty is fixed at 20 per cent. and of arsenical copper rods, brass rods and brass wires,

a protective duty of 35 per cent. The import duty on machinery is 5 per cent. which is applicable to all industries.

### ALUMINIUM

Aluminium is the only non-ferrous metal which India can produce in large quantities because of extensive deposits of bauxite and adequate supplies of bulk power. There are two units. The Indian Aluminium Co. is working in collaboration with the Canadian Aluminium Co. The principal activities of this company are: (1) the mixing of bauxite in the Lohardaga region of Bihar; (2) the processing of bauxite ore to alumina at Murl, Bihar; (3) the electrolytic reduction of alumina to aluminium metal at Alwaye, Kerala; (4) the rolling of aluminium metals to sheets and circles at Belur, W. Bengal; and (5) the manufacture of aluminium powder and paste at Kalwa, Bombay. The Aluminium Corporation has an integrated plant near Asansol.

At the commencement of the First Five Year Plan, the total capacity of the two plants for aluminium ingots was 4,000 tons and of their rolling mills was 3,500 tons. But at the end of the Plan, the installed capacity of the industry was 7,500 tons of ingots and the fabricating capacity 25,900 tons per annum. During the period a total investment of about Rs. 2.25 crores is estimated to have been incurred.

A protective duty of 30 per cent *ad valorem* plus a surcharge of 5 per cent of the total duty was charged on imports of aluminium during the period of the First Plan. This protection will continue upto December 31, 1958.

The production of aluminium in tons since 1948 is as follows:—1948—3,369; 1949—3,438; 1950—3,596; 1951—3,848; 1952—3,566; 1953—3,758; 1954—4,880; 1955—7,225.

Except bauxite and coal, most of the other raw materials are available only partly or not at all from indigenous sources. Caustic soda and soda are not produced in enough quantities, cryolite, aluminium fluoride, carbon blocks and filter cloth have to be imported, and the possibilities of producing greenland in this country are yet to be investigated.

The demand for aluminium has been estimated at 20,000 tons. It seems that about 30,000 tons of aluminium represent the minimum requirements by 1960-61. The handicaps of the industry are the small capacity of the units, the inherent refractory nature of Indian bauxite which costs more to mine, the low alumina content of Indian bauxite, the high cost of electric power, the cost of railway freight and expensive raw materials such as petroleum coke.

To meet the increased demand, there are different schemes for the expansion of the industry under the Second Plan. Preliminary steps have already been taken for the establishment of a 10,000 tons aluminium smelter at Hirakud by the Indian Aluminium Company. It is expected to go into production in 1958. The expansion programme of the Aluminium Corporation of India, scheduled to be completed by the end of 1959, will raise the capacity of their Asansol plant to 5,000 tons per annum. Besides, it is proposed to establish a new smelter under the aegis of the National Industrial Development Corporation. An expert body is examining the question of the most suitable location for the plant. It is expected that this will go into operation by the middle of 1960.

By the end of the Second Plan, overall investment in the industry is estimated at about Rs. 22 crores and about 3,000 to 4,000 additional persons are expected to find employment in this industry. The number of smelters will increase from two to four, the installed capacity from 7,500 tons to 30,000 tons and the fabricating capacity from 25,900 tons to 32,000 tons.

## IMPORTS OF NON-FERROUS METALS

	1953-54	1954-55	1955-56
Aluminium (Cwts.)	109,086	247,605	316,108
" unwrought (Cwts.)	14,641	66,180	103,594
Brass, Bronze, etc. (Cwt.)	92,070	139,618	38,767
Copper (Cwts.)	170,841	539,551	362,445
" unwrought (Cwts.)	156,882	394,757	341,882
" old for re-manufacture (Cwts.)	4,905	39,710	2,802
Ferro Alloys (Tons)	3,551	4,588	991
German Silver (Cwts.)	82,039	29,925	28,610
Lead (Cwts.)	148,457	203,526	265,486
Tin	61,687	78,701	78,478
Zinc	544,179	827,952	528,526

## OPIUM INDUSTRY

IN addition to being a narcotic, opium is the base of many medicinal drugs. Because of its devastating effect as a dope, the Central and State Governments have adopted various measures to put an end to the evil and a very small fraction of the population is now left still making habitual use of the drug. With a view to restricting its manufacture only for medicinal and scientific purposes, the Government has taken in hand improved methods of poppy cultivation, restricted the cultivation of poppy through licences, and confined production to its factories at Ghazipur and Neemuch. Only a small percentage of opium is sold to the State Governments after processing and the balance is exported for medicinal and scientific purposes.

Poppy cultivation is confined to the States of Uttar Pradesh, Madhya Pradesh, Rajasthan and Himachal Pradesh. The entire crop has to be sold to the Central Government at a fixed price. The opium poppy grown in India is of three varieties—Banaras in U.P., Malwa in Madhya Pradesh and Rajasthan, and Himalayan in Himachal Pradesh. Cultivation starts in November and the crop is harvested in April or May. Preparation of the land for the reception of the seed is a prolonged process, the field being given 20 to 25 ploughings. Opium is derived as a juice called latex. After collection it is dried by the farmer before being delivered to the Government.

The area under poppy cultivation, which used to be 760,000 acres in 1905-06, is now barely 50,000 acres. The production fluctuates according to the overseas demand and its trend is given below :—

Year	Acreage	Production (Maunds)	Exports (Tons)
1948-49 ..	69,425	9,516	35
1949-50 ..	51,480	5,535	172
1950-51 ..	69,725	13,700	348
1951-52 ..	56,190	9,045	167

Figures later than these are not available.

At a conference of the State Governments in 1949 it was decided to reduce the supplies to

States at a progressive rate of ten per cent every year so that these supplies will cease completely by 1959. The trend of domestic consumption of excise opium is given below :—

Year	Consumption in Maunds
1948-49 ..	3,895
1949-50 ..	2,925
1950-51 ..	3,170
1951-52 ..	3,700
1952-53 ..	3,135

Figures later than these are not available.

In 1940 the Central Government erected a huge alkaloid plant at the Ghazipur factory for manufacturing medicinal preparations and India claims today the distinction of producing alkaloid products including thebaine, papaverine and cotarnine. Sales of alkaloids in the country went up from 515 lb. in 1947-48 to 1,430 lb. in 1950-51 and then declined to 1,193 lb. in 1951-52, while exports, which were insignificant in 1947-48 and only 374 lb. in 1950-51, shot up to 1,479 lb. in 1951-52, 4,858 cwts. in 1954-55 and then slightly fell to 3,932 cwts. in 1955-56 (one cwt. = 112 lbs.).

## INTERNATIONAL CONTROL

International efforts to control opium date back to the beginning of the present century, and the League of Nations and the United

Nations Organisation have, during the last three decades, been endeavouring to confine its use solely to medicinal and scientific purposes. An International Opium Commission met in Shanghai in 1909 at the initiative of President Theodore Roosevelt as a result of which the first Opium Convention was drawn up at the Hague in 1912. Several treaties on narcotics have been signed since then but all efforts at limiting production of opium have met with limited success.

The Geneva Convention of 1925 provides for measures to regulate international trade in opium and other dangerous drugs. In 1950 the United Nations proposed a draft plan for creating an international opium monopoly, but due to lack of agreement the proposal fell through. The latest International Protocol signed at New York on June 23, 1953 aims at limiting production and control of the international and wholesale trade in opium and incorporates many of the salient features of the comprehensive Indian system of control.

Until the establishment of the plant for the manufacture of alkaloids, opium as a source of revenue lost its importance because of the deliberate policy of the Government to curtail opium consumption and exports. Between 1941-42 and 1946-47 the net receipts fluctuated between a surplus of Rs. 48 lakhs and a deficit of Rs. 52 lakhs. Since then the trends have been more helpful for the Central budget. Details for more recent years are given below :—

(In lakhs of rupees)

	1955-56 (Account)	1956-57 (Revised)	1957-58 (Budget)
<b>REVENUE :</b>			
Sale of opium to State Governments ..	53.00	27.66	32.03
Sale of medical opium ..	2.00	3.10	3.25
Sale of alkaloids ..	13.00	14.44	14.50
<b>SALE ABROAD :</b>			
Sale of raw opium ..	1,36.00	1,74.66	1,05.85
Sale of medical opium ..			
Sale of alkaloids ..	4.00	3.23	3.50
Sale of miscellaneous ..	1.00	0.95	0.91
Total	2,09.00	2,24.04	2,50.04
Refunds ..	—	—0.04	—0.04
Net Revenue ..	2,09.00	2,24.00	2,50.00

## PAPER INDUSTRY

**T**HE bulk of the production comprises the more common types of paper, especially printing and writing paper. The manufacture of superior varieties is also undertaken but on a restricted scale. The following table gives the trend of production :—

(In 000 tons)

	1950-51	1951-52	1952-53	1953-54	1954-55	1955-56 (Estimates)
Printing & Writing ..	72 15	82 98	90 99	92 88	112-28	125-00
Wrapping ..	17 51	25 39	22 68	21 18	24 62	35-00
Special Varieties ..	3-55	2 70	3 04	3 41	5 53	6-00
Paper Boards ..	20 82	24 03	20 12	20 12	26-66	34-00
Total ..	114 04	135 09	136-84	136-84	169 09	200 00

Early in 1951, there were 17 paper factories with an annual rated capacity of about 136,600 tons. Since then, three new plants have gone into production. In April 1956, the annual rated capacity of the paper and paper-board industry stood at about 210,000 tons. This capacity is exclusive of the capacity of the Travancore Rayons for transparent paper estimated at 1,800 tons per annum. Newsprint was not manufactured in the country at the beginning of the First Plan. Since then, the State-aided Neja Paper Mills has been established. But the production target of 27,000 tons has not been reached and the production of newsprint in 1955-56 is estimated to have been only about 4,200 tons. In regard to strawboards, there were in April 1951, 18 factories on the active list of the Development Wing of the Ministry of Commerce and Industry with a total capacity of 18,500 tons per annum. This number rose to 24 in April 1956 with an annual installed capacity of 59,380 tons.

The gross fixed investment in the industry during 1951-56 was estimated at about Rs 11 crores and it found employment for about 28,000 persons.

The State-wise distribution of the paper and paper-board industry in April 1956 is given below :—

State.*	No. of units.	Annual rated capacity (tons).
West Bengal ..	4	66,100
Bihar ..	1	29,000
Orissa ..	1	36,000
Uttar Pradesh ..	2	9,500
Punjab and PEPSU ..	1	15,000
Bombay ..	4	11,900
Madras ..	1	800
Madhya Pradesh ..	1	8,000
Andhra ..	1	2,000
Hyderabad ..	1	15,000
Mysore ..	2	11,000
Travancore-Cochin ..	1	6,000
	20	210,100

\* Pre-reorganization.

Imports of paper and pasteboard in the recent years are as follows :—

1952-53—21 lakh cwt.  
1953-54—25 lakh cwt.  
1954-55—27 lakh cwt.  
1955-56—30 lakh cwt.

Exports have not been appreciable in the past. There has, however, been an improvement in shipments from 31,035 cwt. in 1952-53 to 16,580 cwt. in 1954-55 but a decline again to 43,278 cwt. in 1955-56.

Certain new varieties of paper and paper-board were manufactured for the first time in the country during the First Plan period. These are cigarette tissues, coated boards, art and crono paper, sensitised cheque paper and cellulose film. The production of transparent paper by the Travancore Rayons also increased appreciably during the period.

The demand for paper and paper-board has developed at a rather faster rate than was visualised in the Plan. But the demand for strawboards has hardly risen at all. The actual consumption on the basis of domestic production plus imports is given in the table below.

(In 000 tons)

Year	Pro- duction 1	Imports 2	Consumption	
			1 + 2	Plan estimates (000 tons)
1951-52	135 0	33 0	168 0	175 0
1952-53	137 0	39 0	176 0	175 0
1953-54	137 0	42 0	179 0	
1954-55	169 0	38 0	207 0	
1955-56	200 0	38 0	238 0	200 0

The following table summarises the development of the industry during the two Plans :—

	1950-51		1955-56		1960-61	
	Annual rated capacity (000 tons)	Actual output (000 tons)	Annual rated capacity (000 tons)	Actual output (000 tons)	Annual rated capacity (000 tons)	Actual output (000 tons)
Paper and paper-board	136.6	114	210	200	450	350
Newsprint ..	..	..	30	4.20	60	60
Strawboard and other fibre boards ..	48.5	22	59.3	32.0	59.3	35 to 40

† See also under 'Government Industrial Undertakings'. A newsprint factory is also to be set up at Bodhan in Andhra before the end of the Second Plan. Capacity : 30,000 tons a year.

Sabal grass and bamboo are the chief raw materials which are available locally. The use of imported woodpulp has been gradually discouraged and hardly 10 per cent of the raw material is imported. Of late, however, the industry has been placing a greater reliance on rags, hemp, hemp ropes and wastepaper. One important mill is exclusively dependent on wastepaper and rags.

For many years the paper pulp section of the Forest Research Institute at Dehra Dun has been carrying out experimental work in connection with the development of new fibres for paper-making.

Recent enquiries show that the Kashmir and Tehri-Garhwal can supply fir and spruce in quantities sufficient for the establishment of newsprint mills in Kashmir and U.P. The two species of wood are well known raw material for the production of mechanical pulp for use in newsprint manufacture and the suitability of both the species from the two States has recently been tested at the Forest Research Institute, Dehra Dun.

### DEVELOPMENT PROGRAMME

During the First Plan period, the consumption of paper and paper-board increased on an average by about 8 per cent. per annum. It is likely it will show a progressive increase of 10 per cent. during the Second Plan. On this basis, the demand by 1960-61 may be about 350,000 tons. The demand for newsprint would go up to 120,000 tons; while that for strawboards and other boards may be placed at 40,000 tons by end of the Plan period. Plans are therefore afoot to step up the capacity. A sum of Rs. 44 crores, over and above the investment of about Rs. 4.25 crores in public sector projects, will have to be invested in the paper and paper-board industry during the Plan period, to achieve the target capacity of 450,000 tons. The investment on newsprint factories is placed at Rs. 6 crores for 60,000 tons.

The Madhya Pradesh Government Newsprint Factory went into trial production in January 1955 using imported chemical pulp to start with. The estimated total cost of the NEPA Mills in Madhya Pradesh is about Rs. 6 crores.†

The basic raw materials required by the mills, viz., bamboo and salal wood, will be available within the State of Madhya Pradesh, but the auxiliary raw materials like caustic soda, soda ash, salt cake, liquid chlorine, china clay, etc., may have to be obtained from outside the State.

## PETROLEUM INDUSTRY

**T**HE total production of petroleum in India (before the starting of the foreign petroleum refineries) was less than 70 million gallons a year while the total requirements were in the neighbourhood of 700 million gallons.

The only productive oil fields are in Assam, and the Digboi Refineries of the Assam Oil Company have a refining capacity of 5,000 barrels a day, while Indian requirements in barrels will be around 105,000 a day.

The money spent on the imports of petroleum and its products would be about Rs. 60 crores a year for importing about five million tons of crude oil.

To make good the deficiency the Government of India entered into an agreement with three foreign companies for refining oil in India—the Standard-Vacuum Company of America, Burmah-Shell of England, and the Caltex also of America. The Standard-Vacuum and the Burmah-Shell have their refineries in Trombay Island near Bombay, while the Caltex has chosen a site near Visakhapatnam in Andhra.

During the First Five-Year Plan period, the installed capacity for the refining of crude petroleum increased by 3.2 million tons with the installation of two new refineries at Trombay. The plant of the Standard-Vacuum Oil Company went into production in August 1954. This plant has an annual capacity of 1.2 million tons in terms of input of crude oil. The Burmah-Shell Refinery which has an annual capacity of 2.0 million tons of crude petroleum commenced production in January 1955.

In addition, active work on the construction of the Caltex refinery at Visakhapatnam was commenced early in 1955. Its capacity will be to refine 6,75,000 tons of crude petroleum per annum. An overall investment of Rs. 12.5 crores is expected on this project, which is to go into full production in the middle of 1957†.

The three refineries represent the biggest single foreign investment in the country. According to the agreement with the Government of India certain privileges were extended to the companies: exemption from nationalization for twenty-five years, freedom from certain provisions of the Industries Development and Regulations Act, duty-free import of crude oil\*. The companies in their turn have agreed that they will use Indian crude oil whenever available, train Indian personnel, and make the by-products of the refineries available for subsidiary manufactures such as cosmetics, disinfectants, fertilizers, fumigants, plastics, polishes.

The Assam Oil Company, which is the only producer of mineral oils making use of indigenous petroleum crude, intensified their prospecting and exploratory operations during the First Five-Year Plan\*. Between 1951 and 1954, the company spent Rs. 5.61 lakhs on new oil wells and completed 69 new wells. In 1954 a new gasoline plant and a new lubricating oil distillation unit were added to the refinery at a total cost of Rs. 58.5 lakhs. Their combined annual capacity is placed at 9.8 million gallons of gasoline and lubricating oil.

The production capacity of all the refineries by the end of 1957 would be of the order of 4.3 million tons in terms of crude processed per annum. During the First Plan period, the total fixed capital expenditure in the refining industry is estimated at Rs. 45 crores. In this connection, the promoting companies raised Rs. 12 crores by way of debenture loans in the Indian market in 1954-55.

But this capacity will be inadequate for meeting the expanding requirements of petroleum products. It is provisionally envisaged that the consumption would by 1960-61 register an increase of 45 to 50 per cent. over the level at the end of the First Plan. The establishment of additional facilities for petroleum products is, therefore, necessary.

It is, however, closely linked with the exploratory work on the occurrence of oil

that has now been vigorously taken up\*. In the opinion of geological experts, the discovery of naturally occurring crude petroleum in the eastern part of India is a possibility. The Standard-Vacuum Oil Company obtained in 1954 a licence for prospecting for oil and the Government have agreed to participate in the prospecting expenditure up to 25 per cent. on the understanding that they will have a similar share in the exploitation of any oil that may be discovered.

### IMPORTS

The imports of petroleum products during the Plan period are :

(million gals.)

	1950-51	1951-52	1952-53	1953-54	1954-55	1955-56
Kerosene .. .. .	229.4	254.5	265.8	209.1	310.2	233.8
Diesel Oil .. .. .	134.4	162.3	156.7	166.6	194.8	79.5
Other Fuel Oils .. .. .	108.2	205.8	161.0	195.4	151.2	21.5
Lubricating Oils .. .. .	40.6	48.0	61.7	37.9	50.3	39.3
Motor Spirit (including aviation spirit) .. .. .	193.5	251.0	243.4	260.6	214.4	73.1
Other Sorts .. .. .	0.7	4.3	4.9	-	1.3	2.3
Total .. .. .	706.8	926.5	893.5	968.6	937.4	774.5

### SYNTHETIC PETROL

The question of the manufacture of synthetic oil from low grade coal available in the country has been under consideration for a number of years. In May 1954, the Government appointed the Synthetic Oil Committee. In deference to the recommendation made by this Committee, the Government invited three foreign firms, Messrs. Heinrich Koppers, Messrs. Lurgi, Germany and Messrs. M. W. Kellogg, U.S.A., to prepare project reports in this connection. Simultaneously, an Experts Committee was also appointed to give guidance to the foreign firms. This Committee, after examining the project reports, recommended a project for implementation under the Second Plan. This project envisages the manufacture of soft coke from non-coking coal and utilisation of the by-products for the production of synthetic petrol. But the Plan has not made any provision for this project and a final decision can be taken after more is known of the prospects of obtaining crude petroleum from indigenous sources.

### BURMAH-SHELL REFINERIES LTD.

Burmah-Shell Refineries Ltd. was incorporated in India on 3rd November 1952, for the purpose of constructing and operating a petroleum oil refinery on a 450-acre plot of land in south-west Trombay—near Bombay.

Site clearance and construction work was first started in April 1953 and the major part of the work was completed by the end of 1954.

The Refinery commenced operations on January 30, 1955.

The crude oil intake of the Refinery is about 2,000,000 tons per annum, and crude oil comes from the Persian Gulf area.

The Refinery manufactures per year approximately 156 million gallons of Motor Spirit, 72 million gallons of Kerosene, 37 million gallons of High Speed Diesel Oil, 33 million gallons of Light Diesel Oil, 160 million gallons of Furnace Oil and one million drums of Bitumen.

The total cost of the refinery will be about Rs. 31 crores, and the total staff employed in the refinery including all categories will be about 1,600.

Residential quarters for key operating staff have been completed a short distance from the refinery, and in addition, Burmah-Shell Refineries Ltd., have paid Rs. 40 lakhs to the Bombay Government for the construction of houses for occupation by Refinery personnel. These are now complete.

Burmah-Shell Refineries Ltd., are also providing a 10-acre recreation ground for their staff and labour.

### CALTEX OIL REFINERY

The modern Caltex Oil Refinery, estimated to cost about Rs. 15 crores, will be ready in 1957 at Vishakhapatnam. Present plans allow for the production of petrol, superior and inferior kerosene, diesel oil and fuel oils from the Refinery's flexible two-stage crude oil distillation unit, the fluid catalytic cracking unit with gas recovery facilities, the polymer plant, the propane decarbonization unit, and treating and blending plants. About 6,000 construction workers are employed at the site, and when in operation the Refinery will have a permanent staff of about 500.

The Refinery will annually process 675,000 tons of crude oil which will yield 13,500 barrels a day of refined products. In terms of the very wide area it occupies (515 acres), the Refinery is the largest of its kind in the whole of India. Working 24 hours a day the Caltex Oil Refinery will make a significant contribution to the economy of India.

### STANDARD-VACUUM

The Standard-Vacuum Refining Co. of India Ltd. started construction of the refinery in December 1952 and production started in July 1954.

The refinery which is situated on Trombay Island near Bombay cost about Rs. 17.5 crores. It employs a staff of about 800, and has a designed output of 25,000 barrels a day—about 300 million gallons a year.

The refinery is designed to use crude oil from the Middle East to produce the following fuel products: gasoline—64 mln. gallons; kerosene—40 mln. gallons; diesel oils—55 mln. gallons; fuel oils—101 mln. gallons.

Generally speaking, the refinery will meet about 30 per cent of the country's needs.

\* See next page.

† The first crude distillery unit started operating on April 16, 1957.

\*\* This is now given up.

## OIL EXPLORATION AND POLICY

The problems of oil exploration, drilling and refining are under the Ministry of Steel, Mines and Fuel, Government of India.

Under the Ministry is a Commission called the Oil and Natural Gas Commission with headquarters at Dehra Dun in U.P.

The Commission has three members. The Minister for Mines and Oil is Chairman—at present Mr. K. D. Malaviya. The other two members are Mr. A. M. N. Ghosh and the Joint Secretary in the Ministry of Finance—at present Mr. C. S. Menon.

Mr. Menon also acts as Financial Adviser to the Commission.

The Planning Commission has an Adviser on oil—at present Mr. K. K. Sahni.

The Commission is the chief advisory body on oil and is also entrusted with the task of administering and implementing oil agreements between the Government and the oil companies.

The Commission has the power to inspect oil fields held by private concessionaires for ensuring full development and elimination of waste.

It can conduct geological and geo-physical surveys, drilling and prospecting independently or in conjunction with other Government or private agencies. It will organize laboratory investigations, collect and publish statistics and maintain information regarding production, trade and mining rules.

The administration of oil problems as a whole, however, was decentralized\*. The export and import programme of petroleum products was dealt with by the Ministry of Commerce and Industry. The refineries in the private sector were dealt with by the Ministry of Production. Pricing and marketing policy was looked after by the Ministry of Works, Housing and Supply; and the problems of exploration and of refineries in the public sector were dealt with by the Ministry of Natural Resources.

At present oil exploration is conducted by three agencies: The Oil and Natural Gas Commission, the Indo Stanvac Petroleum Project, and the Assam Oil Company (a subsidiary of Burma Oil Company).

The Commission is now conducting surveys either on its own or in conjunction with foreign agencies in the Punjab and Rajasthan areas, the Stanvac in West Bengal and the Assam Oil Company in Assam. The Canadians and the Russians have conducted aero-magnetic and geological surveys in the Rajasthan, Punjab, Bihar and U.P. areas.

The Stanvac exploration in West Bengal is based on an agreement between the Government of India and the Company in 1953. The area stretches from the border of East Pakistan to the west of Burdwan, and is 10,000 square miles. The preliminary surveys which cost about Rs. 125 lakhs excluding equipment the cost of which was Rs. 40 lakhs did not reveal any signs of oil.

It was expected that the first well would be dug in April 1957 at a place about 3½ miles east of Burdwan.

In Assam exploration continues in the Nahorkatiya and Moran areas. It is estimated that the proved and probable oil reserves in Nahorkatiya might ensure a production of about 24 million tons of oil and 46 million cubic feet of gas (0.6 million tons of oil) per year for a period of about 13 years. The proved oil reserves in Moran have not been estimated while there is yet a third area due for exploration—in Huglijan.

Until April 12, 1957, 25 wells had been dug in the Nahorkatiya area and two in Moran. Oil was struck in both the wells in Moran and in 18 out of the 25 in Nahorkatiya in an area which was believed might turn out to be a rich oil field.

The Government of India proposes to set up two rupee companies in collaboration with the Burma Oil Company. One of these will explore and tap oil in the four concession areas comprising 502 square miles held by the Assam Oil

Company, a subsidiary of the Burma Oil Company. The other will refine the crude oil thus produced.

The exploration in the Rajasthan and Punjab areas are conducted by the Oil Commission in collaboration with foreign agencies, Russian, Canadian and Rumanian. In Rajasthan only aero-magnetic and geo-physical explorations have been conducted so far. The area explored is in Jaisalmer District and the places are Ramgarh, Khoynala, Dewa, Tannot, Kishengarh.

In the Punjab drilling operations have started at Jwalamukhi in the Kangra valley. There will be nine locations in all, three in Jwalamukhi, one each in Bahl, Janauri, Dharmasala, Yol, Nana and Nurpur. Each operation will take about six months and the project as a whole will cover about five years.

Preliminary construction work in connection with drilling at location no. 1 in Jwalamukhi started in 1956 August. The drilling here is to be undertaken by a Rumanian company. Three more rigs (digging equipment) have been bought from Russia. Two of these will go into operation at locations 2 and 3 in Jwalamukhi and the third in Jaisalmer in Rajasthan. The first two will begin to operate in 1957 April.

### PRESENT PROGRAMME

The policy for the next two years (1957, 1958) is to confine exploration and drilling to Jwalamukhi and Jaisalmer. The Second Plan allocation for exploration, drilling and refineries is Rs. 11.5 crores, but this is subject to revision. The Oil Commission had asked for an allotment of Rs. 30 crores.

Three refineries are in the offing, one in the east in the public sector, one in Bhavnagar and the third in Madras—the last two in the private sector.

Possibilities of American and Canadian aid in executing whatever programme is finally decided on are regarded as bright.

While a Rumanian drill will work in Jwalamukhi in the Punjab, about 100 Soviet technicians will operate the three drills that have been ordered from Russia—two in Jwalamukhi and one in Jaisalmer in the first half of 1957.

The indications at the end of 1956 were that Indian refineries might draw 60 per cent of necessary crude oil from the country's own wells in the next five years (1957 to 1961).

The Oil Commission has worked out a programme for collaboration with other agencies which will cost about Rs. 11 crores: Rs. 400 lakhs for collaboration with the Assam Oil Company; Rs. 202.5 lakhs with the Standard Vacuum for the Bengal area; Rs. 500 lakhs for collaboration with other Indian or foreign firms that may prospect for oil in the next five years.

The Commission's own independent prospecting programme for the next five years would be: Jaisalmer (Rajasthan) Rs. 805.6 lakhs; U.P. and Punjab Rs. 202.4 lakhs. Prospecting will be along the Siwaliks in the Punjab and the Ganga basin in U.P.; Third, the Sunderbans in West Bengal Rs. 504.6 lakhs; Fourth, Cambay in Bombay Rs. 705 lakhs.

The Vasset Committee appointed to advise the Government on the location of the refinery in the public sector in the east has estimated that if the refinery is located in Gauhati (Assam) the profit at present retail prices would be seven annas per gallon; if it is located at Barauni in north Bihar the profit would be eight annas six pies per gallon; and if it is located in Calcutta the profit would be eight annas eight pies per gallon.

There would be very little difference in the respective costs of the refinery at the three sites. The cost would be Rs. 23.14 crores in Calcutta, Rs. 23.97 crores in Barauni and Rs. 24.97 crores in Gauhati. The overall cost (refinery, railway, pipe-lines etc.) would be Rs. 68.65 crores in Calcutta, Rs. 68.87 crores in Barauni, and Rs. 80.97 crores in Gauhati.

The cost of a twenty-inch pipe line from Nahorkatiya to Calcutta would be Rs. 46.30 crores, while the cost of additional railway facilities required to transport refined products from Gauhati to West Bengal would be Rs. 12.35 crores.

The annual recurring costs in Gauhati would be the highest. Placed at Rs. 15.23 crores, the figure compares with Rs. 11.73 crores for Barauni and Rs. 10.76 crores for Calcutta.

The cost of processing crude oil will thus be Rs. 101 per ton in Gauhati, Rs. 77.8 per ton in Barauni, and Rs. 71.8 per ton in Calcutta. This works out at six annas two pies per gallon in Gauhati, four annas eight pies per gallon in Barauni and four annas six pies per gallon in Calcutta.

### SOVIET REPORT

A group of Soviet Oil experts made a report on oil exploration to the Government of India which was made public on 21st May, 1956.

The experts recommended among other things:

1. In the next five years it would be best to concentrate on the Rajasthan and Punjab areas for exploration. Here prospects are encouraging.

2. Simultaneously, geological, geo-physical investigations as well as deep test-drilling in the Ganga valley and West Bengal, geological and geo-physical survey and core-drilling in the Cambay area and geological and geo-physical investigations on the Madras coast—all these should be carried on simultaneously.

3. The organization of research for oil geology to lay a scientific foundation for oil and gas prospecting.

The area to be covered by magnetic survey and gravity is about 176,000 square miles, and by geographical mapping 11,400 square miles.

Fourteen gravity, 10 seismic, 14 geological, five core-drilling and five deep test-drilling parties have to be organized.

An agreement was also signed with the Soviet Union on 21st May, 1956. The Soviet Union was to supply two oil drilling rigs with spares and accessories for a year's operation at a cost of Rs. 74 lakhs. They were to arrive in India before the end of 1956 and were to be erected free of charge in the Jwalamukhi and Janauri areas of Kangra District in the Punjab. A team of 44 Soviet experts would operate the drills initially and train Indian personnel for a minimum period of six months at a cost of Rs. 5.25 lakhs per drill.

Another group of 40 Soviet technicians would undertake a geo-physical survey principally of the oil bearing areas of the Kangra valley. The rest of the experts will be paleobotanists and paleo-ontologists for the geological laboratory of the Oil Commission in Dehra Dun.

In addition the Soviet Government would supply seismic equipment, together with two shot-hole drilling rigs.

### SAHNI REPORT

Mr. K. K. Sahni, Adviser on oil to the Planning Commission, submitted a report to Government chiefly on profits and remittances of foreign oil companies operating in India, but also on oil exploration in general. The report was submitted sometime in 1956 November.

On the general questions Mr. Sahni recommended the formation of a new Ministry of Oil and Fuel and concentration of exploration on Assam.

Mr. Sahni proposed a three-fold approach. Firstly, the proposed new rupee company should be formed early to invigorate oil exploration in the areas for which the Assam Oil Company presently holds concessions. Secondly, the Government should undertake departmental exploration with the help of Russian or Rumanian consultants or contractors. And, lastly,

\* Centralized under the Ministry of Steel, Mines and Fuel in April 1957.

the Government should consider the grant of mining concessions to independent foreign private companies.

The prospective oil-bearing area in Assam is large enough to permit the co-existence of all the three types of exploration units.

Simultaneously, independent foreign companies may be asked to undertake exploration of some areas in Punjab other than Jwalamukhi, where a Rumanian drill was to go into operation under the aegis of the Oil and Natural Gas Commission.

Oil exploration in the world outside the Communist orbit is substantially controlled by six or seven large companies which form a virtual cartel. Outside the cartel, there are smaller groups of independent firms in the U.S., West Germany, France and Belgium, which have the technical know-how and limited capital.

Government may enlist their co-operation with or without capital participation to execute the exploration programme in India.

It is in this context that the liberalisation of the Mining Concession Rules is contemplated. It is hoped to create conditions attractive enough for the foreign operators without infringing the latest Industrial Policy Resolution of the Government.

Government can invigorate the Stanvac explorations in West Bengal by appointing nominees to its board of directors as provided in the agreement with the company.

Efforts should be made to increase the flow of crude oil from the proved resources in Assam, presently estimated at 35 to 40 million tons.

The target annual production of 2.5 to 3 million tons in 1958 and 4 million tons by 1960 should be aimed at.

Simultaneously, the refining capacity in the country should be increased to eight or nine million tons as against the present 3.5 million tons.

The Government should set up middle distillation refineries to obviate the import of kerosene, bitumen and light and high speed Diesel oils in order to save foreign exchange.

As a first step, the scheme of a private firm to set up a refinery in Bhavnagar with the collaboration of French and Iranian interests should be sanctioned.

The Sahni report also proposes bulk handling of kerosene, lubricants and bitumen, the provision of pipelines and utilisation of waterways for transport and the acquisition of more tank wagons and a fleet of tankers to improve the distribution of crude oil and petroleum products.

It suggests co-operative distribution or nationalisation of marketing to eliminate the profits and "fat" available to foreign companies engaged in petroleum business.

#### Foreign Companies

A review of the refineries' profitability, reduction of their retail price structure to the level in the U.K., and a six months' notice to terminate the "value standard accountancy" system for determining the selling prices of petroleum products are among the steps that are recommended.

These changes may be effected without infringing the terms of the Government's existing agreements with the refining companies.

Stricter control over the remittances of the refineries and increase in the range and volume of petroleum products refined in India is suggested to conserve foreign exchange.

The companies may be asked to plough back a part of their profits for investment in the country with the same end in view.

It is estimated that the oil firms operating in India remitted Rs. 52 crores during one and a half years ending June 1956. In addition, a foreign exchange allocation of Rs. 107 crores was made for importing crude oil and petroleum products during this period.

The report illustrates the difference between the price level in India and other countries by two sets of comparative figures.

The selling price of refined products in India, exclusive of duties, taxes and port charges, is much higher than in other countries. For instance, it works out to one shilling eleven pence for every gallon of motor spirit in Bombay compared to one shilling and seven pence in London. Adjusting one pence for comparable freights and another pence for the dealers' commission, the total price differential increases to six pence per gallon.

Similarly the profitability of the refineries—their gross revenue less price of crude oil per ton—is computed at £2-7-0 (sterling) in the U.S., £2 (sterling) in the U.K., £2-17-0 in France and £1-18-0 in Italy. In India the comparable figure is £4 (sterling) per ton.

In addition, the refining companies get duty protection to the tune of Rs. 8 crores a year of which Burmah-Shell\* has voluntarily surrendered a part to give the Government an additional revenue of Rs. 2 crores annually.

It is estimated that a saving of Rs. 25 to 34 crores can be effected in 1957 by revising the oil pricing policy with the adoption of the prevailing practices in western Europe.

Progressively as the production of indigenous crude oil and refined products increases, the country would save more and, by 1959, the gain to the national exchequer or the consumer may amount to as much as Rs. 40 crores through implementation of the proposed measures.

\* Also Stanvac.

## PLASTICS INDUSTRY

**T**HE plastics industry in India was largely developed during the Second World War and is primarily concerned with turning out finished product from imported raw material. At present there are about 110 major factories and several small ones operating on a cottage industry basis.

The industry has made considerable progress since 1948. In 1956 there were more than 80 firms engaged in plastic moulding as against 40 in 1948. The industry is centred mainly in Bombay and Calcutta. About 40 moulding firms are on the active list of the Development Wing of the Ministry of Commerce and Industry. These firms possessed 187 compression moulding presses with a capacity of about 12,600 tons, 244 injection moulding machines with a capacity of about 683 oz. and 47 extruders of sizes ranging from 1" to 4½".

There are three units manufacturing polyvinyl chloride (PVC) plastic coated cables, wires and flexibles with an annual capacity of 11 million yards. Five units are manufacturing leather cloth with a capacity of 7.8 million yards per annum. There is one unit producing phenolic resin laminates, with a capacity of 150 tons per annum. Another unit is manufacturing polythene films and has a capacity of 450 tons. All told the total investment in the industry is estimated at about

Rs. 6 crores and the labour employed is around 10,000.

The processes used by the industry are: (1) Compression moulding, (2) Injection moulding, (3) Extrusion, (4) Fabrication, and (5) Coating of fabrics by plastics. Articles manufactured cover an extensive field ranging from electrical accessories and insulated electric cables to spectacle frames, artificial leather and waterproof cloth. Metal using of plastics has been successfully undertaken by a few firms.

The production increased to the highest level of 185,000 gross per month in 1955 as against the previous average of 128,700 gross in 1952. The trend of production of compression and injection moulded goods since 1950 is given below:—

Year	Production (million gross)
1950 .. .. .	2.29
1951 .. .. .	1.48
1952 .. .. .	1.54
1953 .. .. .	1.30
1954 .. .. .	1.31
1955 .. .. .	2.50

Nearly 25 per cent of utility goods comprised combs, while bottle caps made up 60 per cent of industrial goods. Production of mechanised

toys has been an important achievement in recent years.

### RAW MATERIALS

The consuming capacity of the industry in respect of raw materials is about 3,000 tons of Thermosetting moulding powders and about 6,000 tons of Thermoplastic moulding powders. A large part of the raw material is imported. Imports of raw materials were stepped up from Rs. 1.1 crores in 1950-51 to Rs. 1.9 crores in 1954-55 and to Rs. 2.31 crores in 1955-56. Phenol formaldehyde moulding powder, phenol and formaldehyde and alkyl resin are manufactured in the country out of imported basic materials. At present, three concerns, Industrial Plastics Corporation, Plastic Products of India, Satara and Indian Plastics, Kandivli, all in Bombay are manufacturing phenol formaldehyde moulding powder with a combined capacity of 1,182 tons per annum.

The machinery installed in the industry is almost wholly imported. It is estimated that about 250 moulds are used by the industry each year. In 1954-55, 210 moulds valued at about Rs. 15 lakhs were imported as against 260 in 1953. But there are two or three engineering firms in the country making some of the simple types of moulds. In addition, there are about 20 plastic moulding concerns which have set up their own tool rooms.

The imports of plastic raw materials, plastic manufactures and leather cloth are given below

(Rs. lakhs)

	1950-51	1951-52	1952-53	1953-54	1954-55	1955-56
Synthetic Resins & Moulding Powder .. .. .	113.74	158.16	140.11	148.10	187.88	231.36
Semi-fabricated Plastic materials .. .. .	46.67	97.97	87.53	88.45	87.73	96.03
Finished Plastic goods .. .. .	1.06	12.44	11.39	4.12	2.37	5.14
Leather Cloth .. .. .	2.32	53.02	3.22	5.11	5.10	1.83

The consumption of plastic goods in India before the last war was estimated at 500 tons per annum. In 1949, the Indian Tariff Board estimated the demand at 4,000 tons per annum, of which about 75 per cent, was estimated to be for domestic and utility articles and 25 per cent, for industrial goods including electrical accessories. Practically the whole of the demand is met from indigenous production.

The country is now an exporter of plastic goods at an average monthly value of Rs. one lakh.

The following is the yearly exports of plastics from India

Year	Rs. lakhs
1951-52 .. .. .	6.45
1952-53 .. .. .	13.03
1953-54 .. .. .	15.98
1954-55 .. .. .	14.15
1955-56 .. .. .	7.62

In order to encourage exports, an Export Promotion Council was set up in 1955. It has also been decided to allow rebate of import duty at specified rates on raw materials used in the manufacture of plastic goods intended for export. At present the concession is given on urea formaldehyde, cellulose acetate, cellulose acetate butyrate and polystyrene moulding powders.

Imported moulds are expensive and a central tool room for the design and production of moulds is contemplated. The present demand for P.V.C. sheets (without textile base) is estimated at 400 tons. There is, therefore, a big scope for its manufacture. Polythene film and dentures also have a big potential market. The application of cellulose plastics, nitrate and acetate is the basis for industries such as acetate rayon and photographic film. The demand for phenolic resin used by the surface coating industry is about 500 tons a year. In view of the possibility of urea becoming available in the country, the manufacture of urea plastics has a great scope. Since benzene and ethylene, the basic materials for polystyrene, are in-

digenuous, this branch of manufacture can be profitably explored. Industrial nitrocellulose is produced in an ordnance factory. This can form the basis for producing sheets, rods and tubes required by the spectacle frame and fountain pen industries. Lack of technical personnel is the industry's main handicap. The U.N.T.A.A. has, therefore, lent the services of a plastics moulding expert to India, who has prepared a blue-print for a central tool room costing about Rs. 30 lakhs. Steps are being taken by the Indian Standards Institution to formulate suitable standards for the P.F. moulding powder.

The production of P.F. moulding powder has been steadily increasing. The relevant figures are given in the next column:

### Bakelite moulding powder:

Year	Production (lbs.)
1951 .. .. .	459,600
1952 .. .. .	667,200
1953 .. .. .	837,600
1954 .. .. .	1,057,200
1955 (upto May) .. .. .	706,500

The Tariff Commission recommended in 1950 that protection should be extended to the industry till March 1953. The period was further extended to December 1953 to enable the Tariff Commission to review the position. The protection was later extended upto December 1956.

### PRESENT POSITION

The present position of the plastics goods is shown below. Figures relate to 1955.

Processes.	No. of units.	Present installed capacity	Production in 1955
Compression moulding .. .. .	40 (major units)	11,200 tons	2.3 million gross articles.
Injection moulding .. .. .	N.A.	550 oz.	N.A.
Extrusion:			
P.V.C. cables, wires and flexibles .. .. .	3	8.6 mil. yds.	6.2 mil. yds.
P.V.C. unsupported sheets .. .. .	1	1.2 mil. lbs.	0.4 mil. lbs.
Lamination .. .. .	1	1.0 mil. lbs.	0.29 mil. lbs.
Coating:			
Leather cloth P.V.C. .. .. .	6	5 mil. yds.	1.77 mil. yds.
Leather cloth nitrocellulose .. .. .			1.81 mil. yds.

### SECOND FIVE-YEAR PLAN PROGRAMME

There is no doubt that in India the potential demand for different types of plastic goods is large, although it is difficult to foresee the demand for some of the finished plastic goods consumed for non-industrial purposes. It is best, therefore, to assess the total require-

ments in terms of the demand for moulding powders. This is estimated to be about 11,600 tons in 1960-61. To meet this demand the target for capacity during the period is 12,810 tons, which will involve an investment of Rs. 4 crores.

## RAYON INDUSTRY

**WORLD'S** first rayon factory capable of producing about a hundred pounds of rayon a day was erected in France in the year 1884. Today the world production of rayon, inclusive of staple fibre, has risen to the staggering amount of over 3,000 million pounds.

It is estimated that in 1951 there were 25,980 mill looms in 476 mills, and 181,278 handlooms engaged in the manufacture of art silk fabrics in India, and the industry's needs of filament yarn, which till recently had to be imported entirely, were placed at 70 to 75 million lb.

The rayon industry is a post-war industry. There are at present three plants in operation, viz., Travancore Rayons Ltd., Perambavoor, the National Rayon Corporation Ltd., Kalyan, Bombay, with an annual production capacity of 4 million lb. and 7.2 million lb. respectively of filament yarn and the Sirlilk Ltd. in Hyderabad State with a production capacity of 4.0 million lb. based on the cellulose acetate process.

The first came into production in July 1950 and the second in February 1951. Both the factories have adopted the viscose process. The third started production in 1954.

The units operating the viscose process produce also carbon disulphide and sulphuric acid in the factory with the exception of Travancore Rayons Ltd. which purchase them from FACT Ltd. Sirlilk Ltd. has facilities for producing acetic acid, acetic anhydride and acetone to meet its needs.

At the beginning of the First Plan, there was only one unit producing rayon filament with a capacity of 4.0 million lb. per annum. With the completion and subsequent expansion of the new units of the National Rayon Corporation, and Sirlilk Ltd. the installed capacity for rayon filament increased to 22.3 million lb. by the end of 1955-56.

Progress on the cellulose acetate plant of Sirlilk Ltd. did not keep to schedule owing to financial difficulties. The factory went into production only in June 1954.

A new plant with a capacity of 10 tons of viscose rayon yarn and 10 tons of Staple fibre per day is to be set up by the Indian Viscose Corporation Ltd., a Rs. 8 crore project under the joint collaboration of the Silk and Art

Silk Mills Association, Bombay, and Snia Viscosa, Italy. The factory is scheduled to go into production early in 1957. Latest reports, however, indicate that no progress has so far been made.

The production of rayon filament has increased steadily year by year.

The following table indicates the production of rayon filament since 1950-51 :

(million lb.)			
Year	Viscose Rayon	Acetate Rayon	Total
1950-51 .. ..	0.4	—	0.4
1951-52 .. ..	0.0	—	0.0
1952-53 .. ..	8.5	—	8.5
1953-54 .. ..	10.1	—	10.1
1954-55 .. ..	11.7	1.4	13.1
1955-56 (April to January) ..	10.7	2.1	12.8

The estimated level of production is far short of the target of 22 million lb. visualised in the First Five Year Plan.

The potential needs of rayon filament is estimated at 70 to 75 million lb. per annum. The maximum consumption on the basis of import and indigenous production so far was 55.2 million lb. in the period from April to January 1956. This suggests that even after the completion of the schemes mentioned above, it will not be possible to meet fully from indigenous sources the demand for rayon.

**Staple Fibre :** Before the First Five Year Plan, there was no plant for staple fibre. The factory of the Gwalior Rayon Silk Manufacturing (Weaving) Co. went into production in February 1954 with a capacity of 15 tons per day (11.2 million lb. per annum). The firm expanded the capacity to 18 tons per day in January 1955 and to 21 tons per day in December 1955. The present annual capacity is, therefore, about 16 million lb. It produced 9.81 million lb. in 1954-55 and 10.97 million lb. in the ten-month period from April to January 1956. The First Plan envisaged that its consumption would be 14.2 million lb. in 1955-56. But it averaged a little

over 28 million lb. per annum during the Plan period and it was expected to be about 30 million lb. in 1955-56.

The investment in the rayon industry during the Plan period is estimated at Rs. 7 crores. This is inclusive of investment in ancillary plants attached to the rayon units for the manufacture of sulphuric acid, carbon disulphide, etc.

The rayon and staple fibre industry has progressed considerably during the Plan period. The dull variety of viscose rayon yarn was produced for the first time in the country in 1955. The acetate variety of rayon yarn is also produced in both qualities, bright and dull.

The First Plan recommended the establishment of a pulp plant of 100 tons per day capacity based on the soft timber resources available in the Himalayan region. But the project did not make much progress on account of the difficulties involved in the extraction of the timber.

**Art Silk Weaving Industry :** The Development Council for the art silk industry, set up in 1955, has suggested a target of 350 million yards of art silk cloth to be achieved by 1960-61. This will be an increase of about 20 per cent in the present per capita consumption of art silk fabrics.

The Tariff Commission estimated the number of powerlooms engaged in the production of art silk fabrics in 1955 at 37,727. The industry is big and largely concentrated in Bombay with over 28,000 of the powerlooms. Licences have been issued for the installation of over 3,500 powerlooms. In addition, there are a number of handlooms producing art silk fabrics, mainly mixed fabrics. Their exact number is not known, but the Tariff Commission estimates it at 150,000. The capacity of an average powerloom is considered to be 20 yards of cloth per shift and that of four handlooms is considered to be equivalent to one powerloom. Thus the total capacity of the industry amounts to about 405 million yards on the basis of a single shift.

The actual production, however, is much below the estimated capacity. The Tariff Commission has estimated that the average production during the three years 1951-53 was 245 million yards per annum. Therefore, no further expansion of the industry is envisaged during the Second Plan.

### IMPORTS

Imports consist of staple fibre, rayon yarn, yarn of rayon staple fibre and rayon piece-goods and were as follows :—

(Quantity in million lb. and value in lakhs of Rupees)

Year	Yarn		Piece-goods		Staple fibre (cut fibre and waste)		Staple fibre yarn		Total including other goods mixed
	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value	Value
1950-51 .. ..	35.3	Rs. 14.71	1.8	Rs. 41.7	12.6	Rs. 189.9	1.25	Rs. 30.9	Rs. 1739.4
1951-52 .. ..	36.5	17.29	3.0	82.4	36.5	1010.1	3.73	117.0	2953.8
1952-53 .. ..	22.24	7.85	1.15	26.34	4.14	65.60	4.31	74.68	—
1953-54 .. ..	38.39	12.04	2.43	51.96	27.22	377.67	1.89	46.04	—
1954-55 .. ..	40.85	12.69	4.12	90.59	27.32	374.63	0.51	21.75	—
1955-56 .. ..	50.78	15.44	9.84	185.12	14.50	191.67	—	—	—

Some quantities of art silk fabrics, particularly the finer varieties, are at present imported. It is expected that these imports will largely, if not entirely, cease during the Second Plan period. There has also been some export of art silk fabrics, but it is not making much headway. An Export Promotion Council has been set up to stimulate exports.

The programme of development for the rayon and staple fibre industry envisaged for the Second Plan is summarised below :

	1955-56		1960-61	
	Annual Capacity	Production	Annual Capacity	Production
Rayon Filament (Million lb.) .. ..	22.3	15.7	68.3	68.0
Staple Fibre (Million lb.) .. ..	10.0	13.2	32.0	32.0
Chemical Pulp (Tons) .. ..	..	..	30,000	30,000
Art silk cloth (export in million yards) ..	..	2.5	..	10.0

## RUBBER INDUSTRY

INDIA produces about 22,000 tons of raw rubber constituting a little over one per cent of the world output. Of an area of about 170,000 acres under rubber cultivation, nearly 75 per cent is located in the State of Kerala. Other rubber growing areas

are the districts of Coimbatore, Salem, Nilgiris, Madurai in Madras State and Coorg. Cultivation on a small scale exists in Mysore and Assam.

The following are the details :—

Year	Production (Tons)	Tapable Acreage	Average yield per acre in Lbs.
1949	15,587	123,791	282
1950	15,599	137,888	253
1951	17,148	148,739	258
1952	19,863	170,000	300
1953	20,967	172,800	300
1954	22,493	173,000	300
1955	22,481	N.A.	N.A.

The year 1952-53 was notable for a slump in the world rubber trade with London price falling by more than half. In this country, the price of indigenous raw rubber was revised in October 1952 on the recommendation of the Tariff Commission from Rs. 122-8-0 to Rs. 138 for grade I rubber per 100 lbs. with suitable differential

for other grades. In February 1955 it was raised to Rs. 150 per 100 lbs. and in September 1955 to Rs. 155-12-0.

With more factories coming into existence every year the consumption of rubber is increasing. It was 21,063 tons in 1952, 21,908

in 1953, 25,487 tons in 1954 and 27,643 in 1955. Imports of raw rubber had, therefore, to be permitted in 1954 and 1955. Imports in 1954 were 3,500 tons and in 1955 they were 4,000 tons.

### RUBBER GOODS

India has a modern manufacturing industry. The variety of goods manufactured covers almost the entire range of requirements of the country. They include tyres and tubes of all kinds, footwear, water-proof rubberised fabrics, ebonite rods and sheets, latex foam cushioning and sponge, hoses of all types, V-belts and fan belts, rubber conveyor belting, and mechanical rubber goods. Of these, the manufacture of tyres and tubes accounts for about 70 per cent of the total consumption of rubber and bulk of capital investment, followed by foot-wear with 15 per cent annual consumption. In the case of the majority of these items, with the exception of tyres and tubes, considerable surplus capacity exists in the country. The total investment in the industry is estimated at about Rs. 13 crores and the number of persons employed is about 21,800.

The progress of the manufacturing industry is given below :—

Product	1953	1954	1955
Footwear (Lakh pairs)	240.0	209.0	348.0
Toys, Balloons, etc. (Lakh Doz.)	124.8	171.0	229.3
Tyres :			
Automobile (000)	768.0	825.5	882.3
Cycle (000)	4,615.2	5,226.0	5,748.1
Tractor (No.)	961	19,154	24,526
Aero (No.)	129	3,511	4,408
Cab (ft.)	442.8	324.0	N.A.
Tubes :			
Automobile (000)	658.8	754.4	785.5
Cycle (000)	4,600.8	5,577.0	5,593.8
Tractor (No.)	813	19,881	23,110
Aero (No.)	52	1,566	2,444
Hoses :			
Radiator (000)	140.4	151.2	186.6
Vacuum Brake (000)	472.8	604.9	808.1
Other Types (000 ft.)	4,422.0	4,706.0	5,734.8
Fan Belt (000 s.)	432.0	459.1	655.3
Ebonite (000 lb.)	88.8	109.0	130.3
Waterproof (000 yds.)	2,054.4	2,399.7	2,119.0
Latex foam sponge (000 lb.)	495.6	935.4	1,480.3

While the price of raw rubber has been periodically reviewed and fixed by the Government, no control was exercised over the prices of rubber tyres and tubes. This led to frequent complaints that the prices charged for these goods by the manufacturers were excessive. An inquiry was made by the Tariff Commission in 1955. The Commission estimated the fair prices of different types of tyres and tubes and recommended that these prices should remain in force till December 31, 1957, subject to a formula for adjustment on account of variations in the cost of raw rubber, fabric and carbon black. The Government accepted these and other recommendations and the tyre companies were called upon to issue a revised price list with effect from Oct. 10, 1955.

The programme of development for the rubber goods industry envisaged for the Second Plan period is summarised below :—

	1955-56	1960-61
<b>Annual Capacity :</b>		
1. Automobile tyres ..	9,50,000	14,60,000
2. " tubes ..	9,50,000	14,60,000
3. Bicycle tyres ..	60,00,000	1,18,00,000
4. " tubes ..	81,00,000	1,18,00,000
<b>Production :</b>		
1. Automobile tyres ..	9,10,000	14,60,000
2. " tubes ..	8,10,000	14,60,000
3. Bicycle tyres ..	57,50,000	1,18,00,000
4. " tubes ..	55,90,000	1,18,00,000
<b>Exports :</b>		
1. Automobile tyres ..	60,000	1,50,000
2. " tubes ..	60,000	1,50,000
3. Bicycle tyres ..	70,000	3,00,000
4. " tubes ..	90,000	3,00,000

### IMPORTS AND EXPORTS

Before World War II, India was exporting considerable quantities of raw rubber and importing most of the rubber manufactured goods required in the country. At present, the export of raw rubber has not only been stopped but limited quantities are imported to supplement indigenous production. On the other hand, rubber manufactured goods are exported to neighbouring countries and imports are very small.

(In lakhs of Rs.)

	Imports		Exports	
	1954-55	1955-56	1954-55	1955-56

## SERICULTURE AND SILK

Sericulture is carried on mainly as a subsidiary to agriculture. The country's total production of raw silk is placed at nearly 31 lakh lbs. per annum. Of this quantity, mulberry silk accounts for about 23 lakh lbs., and non-mulberry silk for about 8 lakh lbs. The major portion of mulberry silk is produced in Mysore. This State accounts for more than 70 per cent. of the total output, the quantity actually produced in 1955 being about 17 lakh lbs. The other important producing States are Madras, West Bengal, and Jammu and Kashmir. The most important producers of non-mulberry silk are Assam, Madhya Pradesh and Bihar. An idea of the approximate annual production of raw silk—mulberry and non-mulberry—in the various States can be had from the following table:—

Mulberry Silk in thousand lbs.

States*	Charka	Filature	Total
Mysore .. ..	16.12	89	17.01
Madras .. ..	1.17	60	1.77
Jammu & Kashmir ..	..	1.65	1.65
W. Bengal .. ..	1.70	7	1.77
Punjab .. ..	21	..	21
Assam .. ..	27	..	27
Bihar .. ..	2	..	2
U.P. .. ..	2	..	2
<b>Total ..</b>	<b>19.51</b>	<b>3.21</b>	<b>22.72</b>

Non-Mulberry Silk - in thousand lbs.

States*	Tassar	Eri	Muga	Total
Assam .. ..	..	3.91	1.39	5.32
Bihar .. ..	96	11	..	1.07
Orissa .. ..	8	1	..	.9
W. Bengal .. ..	19	1	..	.20
Madhya Pradesh ..	1.40	..	..	1.40
<b>Total ..</b>	<b>2.63</b>	<b>4.08</b>	<b>1.39</b>	<b>8.08</b>

The total area under mulberry is about 80,000 acres at present. Mulberry is cultivated both as rain-fed and irrigated crop. The yield of leaf per acre per year from rain-fed garden is about 4,000 lbs. Average yield from tank irrigated gardens per acre per year is about 8,000 lbs., whereas in the case of deep well irrigated gardens it is 10,000 lbs.

In Mysore\* there are about 51,000 rearing families, who practise sericulture as a subsidiary industry. The total production of cocoons per year is about 240 lakh lbs. and the raw silk produced may be put at 17 lakh lbs. Based on the area under mulberry, the total requirement of disease-free layings is estimated to be about 400 lakhs of layings per annum. After the Government Organisation was set up, the Central Farm at Channarayana began to produce small quantities of disease-free layings on 'Pasteur System' and to educate roots to use the same. To supplement the work of the granges which produce only disease-free seed by a controlled campaign of seed cocoon production, there are now 4,000 selected seed cocoon rears to produce Mysore seed cocoons, capable of producing about 4,000 lakhs of seed cocoons, i.e., the entire requirements of the industry for seed cocoons in Mysore and Madras. About 90 per cent of the cocoons produced in the State is used for reeling and only 4 per cent for seed purposes. Sericultural education in Mysore is given in a practical manner in the Government Silk Farms, such as Channarayana, Mysore, Kolar, Mugur and Siddaghatta.

The total area under mulberry in Madras\* State is about 22,000 acres. In black cotton soils, the annual yield of mulberry leaf is about 4,000 lbs. per acre and, in red loam or sandy soils the yield is about 3,500 lbs. Under the present organisation and with the existing

acreage under mulberry cultivation, the productive capacity of reeling cocoons and silk will be 45 lakh lbs. of cocoons and about 3 lakh lbs. of raw silk of both filature and charka grades.

The sericultural industry was started in Uttar Pradesh in September 1948. The silkworm races reared are univoltine and multivoltine, Bengal, Mysore and Kashmir races of mulberry and Eri silkworms. About two dozen families have taken it up. The industry is practised as subsidiary to agriculture. The estimated annual production of Eri is 246 lbs. dry weight and that of mulberry 165 lbs. dry weight. As the industry has recently been started, the Department of Industries provides rearers with rearing appliances on a returnable basis. The cocoons are purchased by the Government farm till they instal their own reeling equipment.

In Bombay,\* roughly 700 acres were under silkworm food. The estimated annual production of cocoons was around 30,000. The estimated annual production of raw silk was around 1,500 lbs. There were 11,339 looms in weaving pure silk goods only and 25,198 looms for mixed goods.

There is one Government silk farm in Belgaum District, in addition to five Government model silk farms in Belgaum and Dharwar districts (Mysore).

Bengal's\* silk industry is said to have been carried on from time immemorial. The production of raw silk is about 2 lakh lbs. The area under mulberry is 16,000 acres. The estimated actual annual production of cocoons and raw silk are: cocoons (8,785,543 lbs.) and raw silk (177,000 lbs.).

About 1,500 persons spread over in about 435 villages conduct rearing and reeling operations in the Punjab.\* The silk industry in the Punjab has come to be considered as one of the best subsidiary industries. It gives a part time occupation to about 95 per cent of rearers. The remaining 5 per cent take up reeling on commercial lines. There are about 75,000 mulberry trees available in the Punjab for the purpose of silkworm rearing. Apart from this, the Department maintains its own mulberry farms and nurseries and the total area of land under these plantations at present is about 75 acres. The estimated total annual production of cocoons and raw silk is 53,300 lbs. and 10,660 lbs., respectively.

### BIHAR AND KASHMIR

In Bihar\* about 50,000 people are engaged in tassar silkworm rearing, about 200 people in rearing mulberry silkworm and about 2,000 people in rearing Eri silk worm. The estimated total annual production is nearly 50,000 Kahan of tassar cocoon, one lakh lb. of raw reeled tassar and 60,000 lbs. of tassar waste per annum. Forty-five thousand lbs. of cocoon mulberry and 3,000 lbs. of raw charka reeled silk are produced. Besides 60,000 lbs. of pierced cocoon and 21,000 lbs. of handspun Eri yarn, are produced all over the State. Bihar has got a very old silk weaving industry and Bhagalpur is the centre of silk weaving. There are about 10,000 handloom weavers engaged in weaving silk goods. About 20 per cent of the local silk and the rest foreign silk are used by the weavers.

The total annual production of reeled silk and waste silk in Madhya Pradesh\* is estimated to be 140,000 lbs. and 150,000 lbs., respectively. There are about 1,500 handlooms, weaving tassar and mixed fabrics.

Orissa accounts for an annual production of 24,600 lbs. of tassar and 4,920 lbs. of Eri cocoons.

In Himachal Pradesh, sericulture is practised only in Mandi district.

The Government of Assam started the sericulture and weaving department in 1948-49 and despite the prejudice against the rearing of

mulberry silk worms, production has doubled in the past decade and now amounts to 22,000 lbs. The output of Eri and muga is estimated at 393,000 lbs. and 130,000 lbs., respectively.

Silkworm rearing is practised by the rearers in Kashmir as an auxiliary occupation next to agriculture. The industry depends only on full-grown mulberry trees. The annual production of cocoons and raw silk is estimated at: cocoons (2,624,000 lbs.), superior silk (165,000 lbs.). It may be added here that the silk industry in Kashmir is being run on Government monopoly basis. There are about 350 local factories with about 4,000 handlooms.

The Tariff Commission submitted its report on the Sericulture Industries to the Government of India in 1952.

In 1953-54, the Tariff Commission recommended extension of protection for 5 years from January 1, 1954. As the existing duty inhibited demand by creating a rise in the price of indigenous silk, the duties on silk raw and cocoons, silk yarn, yarn spun from silk waste, silk fabrics like pargoe fust, etc. should be reduced to 30 per cent *ad valorem* exclusive of surcharge, while the existing rates of duty on silk waste and voils, yarn spun from silk voils and silk sewing thread should be continued.

The Government accepted the proposal for the extension of protection. It decided that the existing rates of duties should not be reduced, but, stated that the position would be kept under watch and suitable action would be taken, when necessary.

### CENTRAL SILK BOARD

The Central Silk Board was constituted by the Government of India in the year 1919 under the Central Silk Board Act, 1918. The Board is charged with the responsibility of organising the development of the silk industry in India. It examines the schemes of development formulated by the various State Governments and recommends grants by the Central Government for financing the schemes. The Board came under the administrative control of the Production Ministry from 15th June 1955.

The Board is functioning with its own funds drawn from the Government of India as grants-in-aid under the Silk Board Act. Though the Act empowers the Government of India to levy and collect as a cess an excise duty on filature raw silk and on all spun silk, it has not been considered advisable to invoke the provision of this section in the interest of the indigenous sericultural industry.

The head office of the Board was shifted to Bangalore with effect from 1st February 1957.

### SECOND FIVE YEAR PLAN

The capital outlay of the programme under the Second Five Year Plan is estimated at Rs. 5.0 crores which excludes a sum of Rs. 1.5 crores provided for the silk weaving sector. The total outlay of silk and sericulture thus comes to Rs. 6.5 crores, as against a negligible outlay of Rs. 1.3 crores under the First Five Year Plan.

The development programme for silk industry envisages improvement of mulberry, better silk worms seed supply and organisation, development of silk reeling, utilisation of by-products, development of non-mulberry silk industry, co-operative marketing and testing, sericultural research and education, and stabilisation of prices.

**Mulberry Silk:** As regards mulberry silk, an important item in the development programme relates to the reduction in costs of cultivation of mulberry leaf through substitution of existing mulberry with higher-yielding grafts in both rain-fed and irrigated areas, evolving of new

\* Pre-reorganization.

varieties of mulberry of higher yield, and improvement in cultivation methods, manuring, etc. These and other measures for bringing about improvement in mulberry and cocoons will be supplemented by steps to modernise silk reeling, encourage substitution of improved basins for country *charkhas* and converting the improved basins for filatures into multi-end basins, and introducing central cooking system and drawing chambers. Utilisation of by-products in the spun silk industry is necessary for the service of the reeling industry and steps are proposed to be taken to rehabilitate and extend the spun silk industry. And as experimental measure, co-operative societies for raising young worms of the first and second stages collectively are to be established.

Also included are proposals relating to (1) co-operative marketing and testing of cocoons; (2) grading of cocoons; (3) introduction of a system of payment of cocoon prices on actual yield; (4) further development of work in the conditioning of houses at Calcutta and Bangalore and at the Berhampur station; (5) establishment of two training institutes for training personnel for sericulture departments in the States.

**Non-Mulberry Silk:** As regards non-mulberry silk, the development programme provides for plantations, as well as improvement of basic seed cotton production for *eri*, *muga* and *tassar*. The organisation of seed supply, improvement of spinning and reeling, marketing, and training and research will be undertaken more or less on lines similar to those for the mulberry silk industry.

**State Schemes:** The Government of India has so far sanctioned for 1956-57 as many as 138 grants amounting to Rs. 27.98 lakhs for the development of sericulture industry under various State schemes. Loans and grants of the order of Rs. 24.92 lakhs have also been granted for 12 other schemes. The latter include the establishment of a modern filature at Mulda

(West Bengal), the setting up of a raw silk marketing society in Bangalore, and modernisation of filature machines in Jammu and Kashmir.

West Bengal tops the list of States which received grants, with Rs. 4.7 lakhs, while Jammu and Kashmir, Bihar, Assam, Mysore and Madras follow with grants amounting to Rs. 4.23, 764, Rs. 3.67, 932, Rs. 3.38, 263, Rs. 2.39, 350 and Rs. 2.27, 165, respectively. About 147 schemes for the development of sericulture industry during 1957-58, which have been drawn up by 12 States, are under examination.

### IMPORTS, PRICES

During the first half of 1956, the Silk Board imported 109,916 lbs. of raw silk, of which 30,088 lbs. were allotted to States, 22,618 lbs. to silk associations and 40,180 lbs. to actual users. About 16,093 lbs. were also earmarked for export promotion purposes. It is proposed to depute five officers to Japan for training in sericulture and two officers to China for training in silk-worm seed production and silk reeling. In furtherance of measures for the development of sericulture industry in the country, a foreign Race Seed Station and a Central Sericultural Training Institute are proposed to be started in Mysore State.

The silk industry was greatly handicapped by the very high-level of prices prevailing in the country during 1954-55. Though the landed price of silk was not very high, the actual sale prices were as high as Rs. 54 per lb. in April, 1954. The Government of India, therefore, considered that the best course in the circumstances would be to restrict imports through the agency of the Central Silk Board which should also be entrusted with the distribution of the Silk to the actual user, etc. The entire quantity of 2 lakh lbs. of Chinese Silk imported by the Board was lifted by the parties against full payment. The import and distribution of Chinese Silk had a salutary effect in bringing down the prices of

not only imported silk but also indigenous flature raw silk. The stabilisation of the market for silk has helped greatly in infusing a sense of security among the sericulturists. It has also enabled the Board to pursue the development programme for planned development of the industry.

With the stabilisation of the market for raw silk, it has been possible to ensure a steady and fair remuneration to silk-work rearsers and cottage reekers. The level of employment has also been maintained at a satisfactory level, giving part-time employment to nearly four to five million persons in the several branches of the industry in the villages.

The benefits that have accrued to the sericulture industry by the Canalisation Scheme in respect of raw silk were explained by Mr. V. Nangappa, I.C.S., Textile Commissioner and Chairman of the Silk Board, at a meeting of the Board held on 23rd October, 1956. According to him, imports of raw silk are licensed only through the agency of the Central Silk Board at present. No licence for import of raw silk is being given either to the trade or to the actual users. This policy has not only restricted the quantity of imports but also contributed materially towards stabilisation of prices for both indigenous and imported raw silk in India. There have been instances where quotations of imported silk in the months of June and July were ranging between Rs. 52 and Rs. 60 per lb. for Japanese raw silk and between Rs. 51 and Rs. 55 for Shanghai raw silk, but these prices were nominal and there does not seem to be any transactions on these prices. On the whole, the Board has been able to stabilise the prices for raw silk in India which has been very helpful to the silk worm rearsers in getting a fair rate for cocoons. The price of indigenous flature raw silk at present ranges between Rs. 30 and Rs. 33-8-0 per lb., which is quite reasonable according to the cost of production worked out by the Tariff Commission.

## SHIPPING INDUSTRY

**TOWARDS** the end of the Second World War, the Planning Department of the Government of India appointed a Policy Committee on Shipping. It observed: "India possesses a distressingly small number of deep sea ships which at the outbreak of the war stood at no more than 30 with a total of less than 150,000 tons gross. The rectification of this state of affairs should be one of the immediate post-war objectives."

This was followed by the constitution of a Reconstruction Policy Sub-Committee, with Dr. C. P. Ramaswami Aiyar as Chairman, in 1945. This Sub-Committee submitted its report in March 1947 which was approved by the Policy Committee. Its principal recommendations were:—

(1) India needs two million gross tons of shipping to carry more than 10 million tons of cargo and about three million passengers a year. The figure does not include country craft.

(2) Hundred per cent of the purely coastal trade of India, 75 per cent of India's trade with Burma and Ceylon and with geographically adjacent countries, 50 per cent of India's distant trades and 30 per cent of the trades formerly carried in Axis vessels in the Orient should be secured for Indian shipping in the next five to seven years.

(3) As the Indian shipping industry is still very young, emphasis should now be placed on how Indian companies can expand their fleets and the Indian Shipping Board should be

empowered to control deferred rebates, rate-cutting and all other evils arising from monopolies.

The Government of India, by their Resolution dated July 12, 1947, fully endorsed the views of the Committee. They agreed that the definition of "Indian Shipping" should be shipping owned, controlled and managed by Indian nationals. They also laid down that the following conditions should qualify any shipping company for treatment as "Indian shipping companies":—

(a) The steamers of the companies should be registered at a port or ports in India. (b) At least 75 per cent of the shares and debentures of the companies should be held by Indians in their own rights. (c) All the directors should be Indian. (d) The managing agents, if any, should be Indian.

### PRESENT POSITION

The subsequent developments may be summarised as follows:—

(1) Plans for setting up three corporations, each with an authorised capital of Rs. 10 crores were announced in November 1947. The first Government-sponsored shipping corporation (The Eastern Shipping Corporation) was registered on March 24, 1950 with a capital of Rs. 5.5 crores.

As a result of certain provisions of the new Company Act, 1956, in regard to Managing Agents, the Corporation became a full-fledged State enterprise with effect from August 15,

1956. Another State shipping enterprise, the Western Shipping Corporation was set up in 1956 with an authorised capital of Rs. 10 crores.

(2) Indian shipping companies participated in overseas trade for the first time in 1948. Two of them are members of the India-U.K.-Continent Conference Lines and have 30 vessels operating in the trade. At present five Indian companies are engaged in the overseas trade with 42 ships totalling 280,476 gross registered tons. Indian shipping companies are now serving the following foreign trades: India-U.K. Continent; India-Persian Gulf; India-Australia; India-Japan Far East; India-Singapore; India-East Africa. A few vessels are also operating in the international tramp trade.

(3) The coastal trade of the country was reserved in 1950 for Indian vessels in response to a public demand which had been made for the past 25 years. With effect from January 1, 1951, a new Indian Coastal Conference, consisting primarily of Indian shipping companies commenced functioning and the two British shipping companies became associated members.

(4) The first tanker to fly the Indian flag was purchased by the Great Eastern Shipping Co. and was entered on the Indian register in 1956. The vessel has been placed in the coastal trade on charter to the Standard Vacuum Oil Co. A second tanker has since been bought by the Western Shipping Corporation and has been chartered to the Burmah Shell Company.

The more recent progress of Indian shipping is given in the following table:—

Year.	No. of companies.	No. of ships.	Tonnage (G.R.T.).
1948 ..	15	72	249,261
1949 ..	20	84	332,490
1950 ..	23	90	364,632
1951 ..	23	92	366,646
1952 ..	26	100	383,911
1953 ..	25	111	422,452
1954 ..	30	124	435,300
1955 ..	30	126	465,264
1956 ..	30	125	478,307
1957 ..	25	124	517,339

The Shipping Policy Committee fixed in 1947 a target of two million tons to be attained by 1954; Eight of the 25 companies own one vessel each. Six of them own a vessel each under 1,000 G.R.T., while another owns a vessel of 2,200 tons. Six others own two vessels each under 3,500 tons. Thus 14 out of 25 companies own only 20 vessels with an aggregate tonnage of 13,048 G.R.T.

Six ferry steamers with an aggregate G.R.T. of 4,754 are engaged in the carriage of passengers on the Konkan Coast and carry approximately a million and a half passengers per year.

Twenty-four steamers owned by 9 companies with an aggregate G.R.T. of 42,042 run between the Kandla and the Tuticorin Range. On an average they carry about eight lakh tons of cargo every year on the West Coast of India.

Forty-one vessels of 198,461 G.R.T. owned by 9 shipping companies participate in the wider coastal trade of India carrying about 20 lakh tons of cargo every year.

**Planning.**—Taking into account the financial resources available, a programme of development was formulated which aimed at raising the total gross registered tonnage to over 600,000 by the end of the period of the First Five Year Plan. In order to assist the shipping companies in replacing obsolete tonnage operating on the coast and expand, Government had provided funds for constructing ships at Vishakapatnam; a total of 100,000 G.R.T. was expected to become available from this shipyard during the period of the First Plan.

At the beginning of the First Five Year Plan, India had a tonnage of 330,707 G.R.T. The target under the plan was to add 215,000 G.R.T. after allowing for obsolescence to the extent of 60,000 G.R.T., thus increasing the tonnage to 600,000 G.R.T. by 31st March 1956. On that date the actual tonnage stood at 480,000 tons, but taking into consideration the tonnage on order in Indian and foreign yards, the target is expected to be reached soon. In the Second Five Year Plan it is proposed that about 300,000 tons should be added after allowing for obsolescence of 90,000 tons. Thus by the end of the 2nd Plan, the total tonnage is expected to reach 900,000 G.R.T. With the achievement of this target, Indian tonnage is expected to carry about 12 to 15 per cent of the country's overseas trade as against the present 5 to 6 per cent,

50 per cent of the trade with adjacent countries as against 40 per cent at present, besides 100 per cent of coastal trade. In the First Plan a sum of Rs. 19 crores was provided for shipping and this was subsequently raised to Rs. 26.3 crores. Actual expenditure over the First Plan period was about Rs. 18 crores. In the Second Plan a provision of Rs. 45 crores including the carryover of Rs. 8 crores has been made for shipping expansion. The full amount has already been utilised in placing the orders for ships in Indian and foreign yards by the shipping companies in the private and public sector, though the tonnage ordered will be inadequate to enable the merchant marine to reach the proposed target of 900,000 tons.

According to the Sailing Vessels Committee's Report published in 1949, sailing vessels continue to carry a substantial volume of cargo. It is estimated that 160,000 tons of shipping under sail consisting of about 2,000 vessels carry about a million to a million and a half tons of cargo every year. These vessels employ about 40,000 men, 2,500 masters, 2,500 mates and about 35,000 seamen. Taking the average cost of these vessels at Rs. 250 a ton, the capital outlay is computed at Rs. 4 crores.

### SHIP-BUILDING\*

The credit for building the first modern ship-building yard goes to the Scindia Steam Navigation Co., Ltd. This was founded at Vishakapatnam in 1941; the company completed two berths in 1947. The first steamer built in this yard was launched on March 14, 1948 by Mr.

Nehru. A third berth of the same capacity (building of ships ranging from 320 to 550 ft. in length and from about 5,500 tons to about 15,000 tons dead weight capacity) was ready in 1953. The yard is equipped with a fitting-out wharf 1,200 ft. long, which will be capable of fitting-out six ships of large size and 3 medium sized ships in one year. On the engineering side, the hull and structural shop has a fabricating capacity of 8,000 tons of steel per year.

On January 21, 1952 "Hindustan Shipyard Ltd." was registered to take over this yard. The Government of India holds a two-thirds interest in the Company and Scindias one-third. The valuation of the shipyard was provisionally agreed at Rs. 270 lakhs which will be paid by the issue of fully paid shares of the new company for Rs. 103 lakhs and the balance in five equal annual instalments. The aggregate initial capital of the company was to be Rs. 309.9 lakhs.

After the transfer of the shipyard to the new company, a five-year plan for its development was formulated which was estimated to cost Rs. 15.84 crores between 1952-53 and 1956-57. Out of this, Rs. 11.77 crores are envisaged to be spent during the four years ending 1955-56. With a view to obtaining the necessary technical assistance, an agreement has been made with a French firm for 5 years. This provides for advice in setting up a fully-equipped designing and estimating office, organisation, development and management of the shipyard and the building of ships as well as help in procuring supplies from France and training Indians in France. In return, the firm will receive 4 per cent commission on the annual turnover of the yard.

The annual break-up of the expenditure was visualized as under:—

(Rupees in lakhs).

Year.	Acquisition of yard.	Development of yard.	Loans against ships built at yard.	Subsidy.	Total.
1951-52 ..	39.6	10.0	182	—	231.6
1952-53 ..	40.0	100.0	100	42	282.0
1953-54 ..	40.0	110.0	50	60	260.0
1954-55 ..	40.0	110.0	50	60	260.0
1955-56 ..	40.0	145.0	120	70	375.0
1956-57 ..	7.0	150.0	180	70	407.0
	206.6	625.0	682	302	1815.6

At the end of March 1957 it was announced that the Government had decided to construct a second ship-building yard. But neither the identity of the consultants nor the site for the ship yard had been decided at the time.

Under a Cabinet reorganisation scheme, shipping became the sole concern of the Transport Ministry early in 1951. While matters of policy are dealt with in the Ministry, the newly created office of the Director-General of Shipping serves as an executive office, as distinct from the Secretary, for the co-ordinated implementation of policy. The office of the Controller of Indian Shipping, the Mercantile Marine Department and the Lighthouse Department have come under his administrative control.

The administration of the Merchant Shipping Acts and Rules made thereunder, at the ports is undertaken by the Principal Officers, Mercantile Marine Department at the principal ports. The Assistant Director of Seamen's Welfare and his officers carry out the planning and execution of

schemes and projects for seamen's welfare, scrutiny of the schemes and projects recommended by the Welfare Committees at the ports and administration of the Merchant Seamen's Welfare Amenities Fund.

**National Welfare Board For Seafarers:** In 1955, the Government of India constituted the National Welfare Board for Seafarers to advise the Government on all matters relating to the welfare of seafarers. The board consists of Government members, representatives of port authorities, shipowners, seafarers and of voluntary societies dealing with welfare of seamen.

**Employment Of Seafarers:** The Government of India has taken over the work of recruitment of seafarers in Bombay and Calcutta for ensuring equitable distribution of the available volume of employment among the registered seafarers. For this purpose, a Seamen's Employment Office was set up in Bombay in June 1954 and in Calcutta in March 1955.

## STEEL INDUSTRY\*

**T**HE first successful and the most outstanding attempt to manufacture steel in the country on a commercial basis was that of the Tata Iron & Steel Co. which started its Steel Works at Sakchi in the year 1908. Pig iron was made in 1911 and the first steel ingot a year later.

The Indian Iron & Steel Company was started in 1918 at Hirapur about 4 miles from Asansol junction on the Eastern Railway for producing pig iron. Eighteen years later it floated another company, the Steel Corporation of Bengal to manufacture steel. Towards the end of 1952 the two companies were merged.

An iron works was started at Bhadravati in Mysore State in 1921 to which a steel plant was added in 1934. During World War II, a 25-ton basic furnace together with two small electric furnaces were installed.

The combined capacity of all these three factories works at (1950) 1,878,000 tons of pig iron and 1,050,000 tons of finished steel.

The total capital investment is about Rs. 61 crores and the number of workers employed about 60,000.

The recent trend of production is given below:—

Year.	Pig Iron.	Steel Ingots.	Semi-finished steel.	Finished steel (000 tons)
1949	1,528	1,352	1,105	930
1950	1,562	1,438	1,142	1,004
1951	1,709	1,500	1,249	1,076
1952	1,685	1,578	1,308	1,103
1953	1,655	1,507	1,230	1,018
1954	1,793	1,685	1,452	1,243
1955	1,757	1,704	1,457	1,260

The future production and imports in tons are visualized as follows:

1956-57 :	1,335,000 and 1,850,000
1957-58 :	1,385,000 and 1,200,000
1958-59 :	1,510,000 and 600,000
1959-60 :	2,085,000 and 600,000
1960-61 :	4,080,000 and 200,000

Since 1924 there have been three main tariff enquiries into the case of the iron and steel industry—in 1924, 1926 and 1934. In between there were three supplementary enquiries and five special enquiries for the subsidiary industries in India. The scheme of protection sanctioned as a result of the tariff enquiry held in 1934 was to remain in force for seven years till 31st March 1941. Before, however, this protection expired, World War II intervened, and the protective duties on imported steel were continued from time to time by continuation Acts, the last extension being for a period of one year till 31st March 1947.

Since the war in 1939 the price and distribution of steel have been controlled by the Government. The permission for free sale of sheets and plates by Registered Stock-holders, which was withdrawn in August 1953 was again restored in May 1954. During 1954, production of finished steel reached the high level of 1.2 million tons and imports amounted to 3.5 lakh tons. Consequently, it was possible to allot larger quotas of steel to consumers. The total allocation amounted to 14.5 lakh tons as against 12.9 lakh tons in 1953. The demand of the Defence Services, Railways, Industrial Maintenance and Packing and Development Schemes in the Government and the private sector were mostly met in full.

The selling prices of steel were raised on the average by about Rs. 15 per ton with effect from March 29, 1954. The entire scrap price schedule was revised, with certain classes going down and others rising in prices. Tinplate selling prices were reduced by about Rs. 50 per ton on April 1, 1954. Again in 1955, the selling price of steel was increased twice, first by Rs. 20 per ton on the average from July 1, 1955 and by Rs. 80 per ton from October 1, 1955.

The retention prices of steel produced by the Tata Iron and Steel Co. were raised by an average figure of Rs. 32 per ton for 1952-53, Rs. 47 per ton for 1953-55 and Rs. 87 per ton for 1955-60 as a sequel to an inquiry by the Tariff Commission. The Tariff Commission submitted its report regarding steel retention prices payable to the Indian Iron & Steel Co. early in 1954. It recommended an increase of Rs. 66 per ton for the period 1953 to 1956. But the Government decided on an average increase of Rs. 59 per ton and fixed the period from 1953 to March 31, 1955 and a further increase of Rs. 15 per ton for 1955-60. Retention prices for tin plates were also revised during 1954 and on the recommendation of the Tariff Commission, they were fixed at Rs. 807 per ton for 1953 the same level as for 1952 and were reduced to Rs. 782.9 per ton for 1954-56.

### RAW MATERIALS

The important raw materials are iron ore, coking coal, manganese ore, refractories made from magnesite, dolomite, chromite, fireclay, etc. and fluxing materials like silica, limestone and fluor-spar. Sulphur is also required for the manufacture of sulphuric acid.

In regard to most of these raw materials, India enjoys a favourable position. The deposits of iron ore are plentiful and of a superior quality, the average iron content of the ore being as much as 69 per cent as compared with 40 per cent in Europe and 50 per cent in the U.S. This is also true of manganese ore, magnesite and dolomite. Known deposits of coking coal are estimated at between 1,500 and 2,000 million tons.

The principal raw materials brought from abroad are spelter for galvanising, tin for tin plates, ferro-tungsten, nickel, chromium and fluor-spar. Deposits of fluor-spar are located in Madhya Pradesh; but they are yet to be exploited.

As raw materials account for nearly 80 per cent of the cost of pig iron and 60 per cent of the cost of finished steel, they provide the explanation for the low cost of steel produced in India.

### RE-ROLLING MILLS

The re-rolling mills manufacture a variety of products from blooms and billets. In the initial stage the revenue duty on imported billets was removed to encourage the industry and by 1939 there were 32 re-rolling mills with a productive capacity of 140,000 tons. Towards the end of 1942 when control over distribution of scrap and billets was introduced, out of the 130 mills then existing only 75 came within its purview. Later several mills were compulsorily closed under Government orders.

At the end of 1955, there were in existence 142 re-rollers—20 registered rollers and 122 unregistered re-rollers—with an annual capacity, on a three-shift basis, of 335,000 tons and 383,000 tons respectively. Their output during the First Plan was:

	Registered (Tons)	Unregistered (Tons)
1951 .. ..	73,179	23,510
1952 .. ..	68,636	25,426
1953 .. ..	83,349	28,654
1954 .. ..	100,832	37,008
1955 .. ..	120,306	53,336

In addition to these, a few are manufacturers of special products such as tin plates, wire and wire products, fish plates and spikes, bars and rods, bolts and nuts, rivets, spring steel, hoops and strips and are called "secondary producers". Their number during the First Plan was eight.

In 1933-34 the Tariff Board stated that the re-rolling mills had a place in the iron and steel industry in India. The subsequent inquiries have revealed that a large proportion of the mills are inefficient and uneconomic in addition to such handicaps as the acute shortage of raw materials.

The main problem of the re-rolling industry is the shortage of billets and scrap. So, while the registered re-rollers could operate their plants on a single shift basis, the unregistered re-rollers hardly achieved 35 to 40 per cent utilisation of their capacity.

The re-rollers at places like Amritsar, Julundur, etc. situated at considerable distance from the ports had to incur heavy freight charges which inflated their production costs. Relief was given to them from May 1954 through the fixation of a maximum freight charge at Rs. 60 per ton. Similarly in 1955-56 the Government extended the port prices to Jamshedpur and Burnpur to encourage the growth of industries in the vicinity of steel plants.

### FIVE-YEAR PLANS

The Planning Commission has estimated that the demand for steel will rise from 2.34 million tons in 1952 to 2.8 million tons by 1957, while that for foundry pig iron will be stepped up by 100,000 tons to 700,000 tons.

At the beginning of the Plan, the following programmes of expansion were under execution:—

(1) The Mysore Works took up certain schemes for execution in the post-war period. These cover expansion of cement production and direct recovery of acetic acid from pyro-ligneous liquor, erection of two electric pig iron furnaces each capable of producing 100-110 tons of pig iron per day, and modernisation of iron ore mines and extension of forest tramways to ensure an adequate supply of wood fuel and mineral raw materials.

(2) The Steel Corporation of Bengal and the Indian Iron Company had between them projects under execution to increase the installed capacity for finished steel to 345,000 tons by 1953-54.

They had also formulated additional proposals to enable them to produce another 350,000 tons of finished steel and 400,000 tons of foundry iron at a cost of Rs. 31.7 crores spread over 1953-57.

(3) The Tata Iron and Steel Company have formulated a programme of expansion and modernisation of their works at a total cost of about Rs. 22.40 crores apart from normal capital expenditure for replacement and maintenance which is estimated to cost additional Rs. 10.21 crores. A subsequent assessment of the investment in the Programme made it imperative to revise the overall expenditure to Rs. 42.6 crores. Their plan envisages the raising of the capacity for finished steel from 750,000 tons to 931,000 tons by 1957.

The above schemes were expected to produce the following results:—

	Unit	1950-51	1957-58
Rated capacity of finished steel ..	Tons '000	1,015	1,650
Production—			
Pig iron (for foundries) ..	"	350	750
Finished steel ..	"	976	1,650

The Plan had stipulated that the future expansion of the industry should provide for the production of an additional 150,000 tons to 200,000 tons of billets for the re-rolling industry. The expansion will also call for the creation of certain additional transport facilities involving an outlay of about Rs. 10 to Rs. 12 crores.

The Planning Commission was of the view that in spite of the expansion contemplated, there would be a short-fall of a million tons of steel and therefore, urged the establishment of a new iron and steel plant through collaboration between the State and an experienced Indian concern. The total expenditure on this during the period of the first Plan was expected to be about Rs. 25 crores and negotiations for participation by foreign concerns and the World Bank were advocated.

\* See also under 'Government Industrial Undertakings'.

The expansion scheme of the Mysore Iron and Steel Works was reviewed in 1952-53 when it was found that the capital investment would be substantially higher than envisaged under the Plan. By the end of 1953 the first electric pig iron smelter went into production. The second went into production by December 1955.

During the review of the expansion scheme, it was felt that the Works should concentrate on high priced steels rather than mild steel products. So on the report of the T.C.M. experts, the broad development under the Second Plan was finalised. So far the Government has approved schemes relating to a cast non-spun pipe plant of 17,000 to 18,000 tons annual capacity estimated to require an investment of Rs. 45 lakhs; and a sintering plant for the utilisation of iron ore fines involving an expenditure of Rs. 45 lakhs. Altogether a sum of Rs. 138.86 lakhs was estimated to have been invested in the Works during 1951-56.

The expansion scheme under the Second Plan is estimated to cost about Rs. 6 crores and when completed the capacity of the Works is expected to reach one lakh tons of finished steel. Apart from this, the output of ferro-alloy is proposed to be expanded for meeting the requirements of all the steel plants.

By the end of 1953-54, the Indian Iron and Steel Co. completed its major extension plan, viz., the Morgan Mill, boiler plant and ash handling equipment. Its capacity for finished steel stood at 350,000 tons in 1955-56 as against 225,000 tons at the commencement of the first Plan. During the period, the actual investment on the developments is estimated at Rs. 15.27 crores.

According to the estimates made by the Tariff Commission, the production of saleable steel by this plant during the second Plan is about 2.6 million tons at an overall investment of Rs. 42.53 crores.

As regards further expansion designed to raise capacity to 620,000 tons of steel and 500,000 tons of foundry pig iron per annum or alternatively 700,000 tons of finished steel and 400,000 tons of foundry pig iron per annum a loan of 31.5 million dollars was obtained from the World Bank and a special advance of Rs. 10 crores from the Equalisation Fund and a loan of Rs. 7.9 crores (including Rs. 5 crores sanctioned in 1949) were sanctioned by the Government.

The modernisation and expansion scheme of the Tata Iron and Steel Co. designed to increase capacity for finished steel from 7,00,000 tons to 9,31,000 tons in 1957-58 progressed satisfactorily. An investment of about Rs. 3,414 lakhs (out of a total capital expenditure of Rs. 4,200 lakhs for the entire programme) was made upto 1946. The Government of India has agreed

to grant a special loan of Rs. 10 crores to assist the completion of the programme. The capacity of the company at present is estimated around 8 lakh tons.

The Tatas have another project for the expansion of their iron and steel factory still further.\* This project would cost about Rs. 61.9 crores and take about 30 months to complete. The expansion would raise the total capacity to about two million tons. The Tata Iron and Steel Co. have entered into an agreement with the Henry J. Kaiser Co. of California, U.S.A. for this purpose.

Early in 1957, the first stage of the expansion programme was reached when two 100-ton open hearth furnaces were put in operation. It is the aim that the present output of 8 lakh tons of finished steel should be raised to nine lakh tons in 1957-58, to 1.2 million tons in 1958-59 and finally 1.5 million tons in 1959-60 equivalent to two million tons of steel ingots.

The Tariff Commission envisages an output of 5.9 million tons of saleable steel with an investment of about Rs. 85 crores in 1961.

### PUBLIC SECTOR

The year witnessed the finalisation of the schemes for three iron and steel plants in the public sector. One factory, which will have an initial capacity of one million tons of steel per annum, and is located at Rourkela in Orissa State. An agreement was signed with the Krupp-Dezag Combine for financial and technical collaboration in the execution of this major industrial project. Construction started in 1955.

An agreement has also been signed between the Governments of India and the U.S.S.R. to set up a steel plant with an initial capacity of one million tons of steel ingots at Bhilai in Madhya Pradesh. Eventually its capacity is proposed to be raised to one million tons of rolled products. Construction work on this has started.

A third plant is being set up in the public sector at Durgapur in W. Bengal. This will produce about 750,000 tons of light and medium sections and bars in addition to about 350,000 tons of pig iron. An Agreement has been reached with a consortium of British steel interests for the construction of this plant.

The total cost of all the three steel plants in the public sector was estimated as: Rourkela Rs. 165 crores; Bhilai Rs. 115 crores; and Durgapur Rs. 115 crores. These estimates did not include the cost of the three townships, two ore mines, fees to the consultants and the cost of Indian and foreign experts. But mainly on account of an increase in the cost of material and labour in the countries from which plant

was to be imported, the estimates have been revised. The Durgapur Plant is expected to cost Rs. 138 crores and the Rourkela Plant about Rs. 165 crores excluding customs duty and contingencies. The estimates for the Bhilai Plant, when revised, are bound to go up.

The steel expansion programme both in the public and the private sectors will thus entail an overall investment of over Rs. 525 crores.

According to the present time schedule, the Rourkela Plant and the Bhilai Plant are expected to go into production as a whole by the end of 1960. The Durgapur Plant would be in full production by December 1960.

Although all these plants have an ingot capacity of one million tons each, their layouts have taken into account the possibility of their further expansion in later years. Thus the Bhilai Plant provides for ultimate expansion to 2.5 million tons of ingots per annum and the Rourkela and the Durgapur Plants to about 1.25 million tons of ingots each. The actual output of saleable steel from these three steel plants and the Mysore Iron and Steel Works is placed at about 2 million tons in 1960-61.

To relieve shortage due to the wide gap that exists between the demand for steel and the supplies available from internal sources, there have been sizable imports of steel amounting to about 177,000 tons in 1951, 195,000 tons in 1952, 247,511 tons in 1953, 387,401 tons in 1954 and 904,000 tons in 1955. Of this, the imports of steel during the years 1952-53 and 1953-54 under the T.C.A. programme amounted to 12,326 tons and 97,734 tons respectively, while imports in 1954 totalled 119,250 tons.

The total output of saleable steel during the Second Plan period is estimated at about 11 million tons as against the overall requirements over the five years assessed by the Planning Commission at about 17 million tons. Production will be equal to the demand only in the last year of the Plan.

An agreement has been signed with the Soviet Union for the supply of one million tons of steel in the first three years of the Plan period. Similar negotiations for the procurement of substantial supplies of steel from other leading producers have also been initiated.

During the First Plan, exports of steel were mainly restricted to obligations arising from bilateral trade agreements and other inevitable commitments. With the completion of the steel development programmes, Indian steel should be available for export, especially to the whole of South-East Asia. The Second Plan envisages an export target of 2 lakhs to 3 lakhs tons of steel in 1960-61.

\* The World Bank has given a 95 million dollar loan.

## SUGAR INDUSTRY

**T**HE sugar industry is the second largest industry in India, next only to the cotton textile industry, with a capital of about Rs. 72 crores of which about Rs. 30 crores is fixed capital and Rs. 42 crores working capital. The annual value of the industry's products for 1954-55 is about Rs. 1,200 millions.

It has a considerable influence on the agricultural economy in so far as it brings additional remuneration to those who take to the cultivation of sugarcane.

The economy of Uttar Pradesh and Bihar is particularly tied with the development of this industry since 70 per cent of the sugar production is in these two States.

The industry also produces a variety of raw materials for other industries such as power alcohol, paper, paper board and straw board.

The labour employed in sugar factories is roughly 140,000 skilled and unskilled workers, and about 3,500 University-educated men.

The growth of the industry is attributable to the protection given to it in 1932 for a period of 14 years. The import duty in pre-war years was as much as Rs. 0.4 per cwt. of which Rs. 2 represented the quantum of the excise duty on indigenous production. Protection was continued till 1950 but it was of an academic interest since imports were negligible from 1937.

In 1931-32, there were only 32 sugar factories in the country, but at the beginning of the First Five-Year Plan, there were 158 factories. This rose to 160 at the end of the Plan. Of these 13 factories had been lying idle for several years.

The industry has so far developed in the private sector, the only exception being some of the former Indian States in which the State

Governments substantially contributed to its development by financial participation and in other ways.

The year 1952 was notable for another innovation inasmuch as the first factory was built by cane producers on a co-operative basis in the Ahmednagar District in Bombay State.

The Government of Bombay is giving active support and encouragement to the establishment of co-operative mills by contributing to the share capital of these concerns. By 1960, the Government expects 20 co-operative units.

The Government of India gave permission in 1955 for the establishment of 35 new sugar factories and substantial expansion of 38 existing factories. These new factories are expected to give an additional production of 330,000 tons. The proposal for setting up sugar refineries has been postponed indefinitely.

On the basis of an average operating season of 120 working days and assuming a recovery of 10 per cent sugar, the rated capacity of the 167 factories is estimated to be over 1.5 million tons of sugar per annum. The industry in Uttar Pradesh and Bihar alone has a capacity to produce 1.15 million tons.

While announcing their sugar policy for 1953-54 in September, the Government sanctioned an increase in the minimum price payable for sugarcane by vacuum pan factories to Rs. 1-7-0 per maund for gate deliveries and Rs. 1-5-0 per maund at rail centre.

The Government also decided that this increased price would be applicable to the 1954-55 season. This increase of 2 annas would have meant an increase in sugar prices of Rs. 1-4-0 per maund. But, in order to keep the fair price of sugar at the previous year's level of Rs. 27 per maund, the Government decided to discontinue the special additional excise duty of Re. 1 per maund of sugar imposed in the previous year. The Government of India announced on November 16, 1954, its decisions to apply on a voluntary basis a formula for linking the price of cane to that of sugar. Under this formula, the cane grower gets an extra price over and above the minimum price of Rs. 1-7-0 per maund. The formula was applied to the 1954-55 season also.

The State-wise production in the past two seasons is given below :—

(In thou-and tons)

	1954-55	1955-56
Uttar Pradesh	903	987
Bihar	225	319
Bombay*	171	202
Hyderabad*	17	64
Andhra*	65	76
Madras*	57	51
Punjab	10	26
Madhya Bharat*	11	29
Mysore	48	48
PEPSI*	9	11
Rajasthan	11	13
West Bengal	9	10
Bhopal*	4	7
Orissa	3	4
Travancore-Cochin*	5	8
Total	1,581	1,855

\* Pre-reorganization.

The size of the factories operating in the country varies widely from 50 tons to over 2,000 tons of cane crushing capacity per day. It is generally accepted that factories with a minimum cane crushing capacity of 800 tons per day should be considered as economic units. On this basis, only half the number can be considered economic.

### RAW MATERIALS

The principal raw material is sugarcane. Its consumption in 1940-50 was about 10 million tons for a production of 975,000 tons of sugar. Approximately 20 to 25 per cent of cane is consumed by sugar factories. The cane consumption in 1954-55 season is estimated at 15 million tons (provisional figure).

About 90 per cent of the acreage under cane is now under improved varieties; but the yield per acre has not improved materially and this accounts for the high cost of sugar.

The following table gives the details :—

Year.	Acre under sugarcane (000 acres)	Gross output of sugarcane (000 Tons)
1950-51	4,314	5,616
1951-52	4,326	6,068
1952-53	4,272	5,019
1953-54	3,435	4,423
1954-55	3,994	5,700
1955-56	4,116	5,859
1956-57	4,532	5,891
(Estimate)		

### PRODUCTION

Price of sugar is not controlled now. But there was control from 1942 to October 1952 except for a brief period in 1947. During this period the controlled price of sugar was linked with the minimum price for cane fixed for Uttar Pradesh and Bihar. Besides the excise duty, the provincial cess was also levied. Since 1948 the floor for cane prices has been and is being slowly lowered.

Since gur was excluded from the orbit of control, the party price for gur was always higher.

The production capacity of the industry which stood at 15 lakh tons of sugar per annum is to be extended to 25 lakh tons by the end of 1960. Licences have been granted for expansion as well as for the establishment of 57 new factories including 39 co-operative factories.

The Plan for the industry for 1957-58 aims at a production target of 2.16 million tons, the estimated production during 1956-57 being 2.05 million tons. The investment is estimated at Rs. 24 crores, of which Rs. 19 crores will be spent on the setting up of 22 new factories and Rs. 5 crores on the expansion of 17 existing factories.

The details of sugar production are given below :—

Year Ended October	Installed capacity (Lakh Tons)	Sugar output (Lakh Tons)
1951	12.70	11.15
1952	15.50	14.94
1953	16.30	12.91
1954	..	10.01
1955	..	15.95
1956	N.A.	18.51
1957	..	18.53

### CONSUMPTION

The per capita consumption of sugar in the pre-war period was 6.6 lbs. During 1950-51, on the basis of a production of 1.1 million tons of sugar being consumed by a population of 355 million, the per capita consumption worked out at about 7 lb. In addition, gur amounting to three times the quantity of sugar is also consumed in the country so that the total per capita consumption is not much behind that of other countries.

On the basis of a population of 385 millions and of a production of 1.5 million tons of sugar in the country by utilising the entire rated capacity available, the per capita consumption of sugar was expected to be increased to 8.7 lbs. by 1955-56.

This quantity might be deemed sufficient under present economic conditions, according to the Planning Commission.

The main problem is of cane supply. The factories in Uttar Pradesh and Bihar are in a number of cases situated so near each other that there is competition between them for cane. The industry has also been complaining of the prices fixed for cane. Several factories have not enough covered storage facilities for molasses.

The First Five-Year Plan for cane cultivation envisaged an increased output equivalent to 703,000 tons of gur of which Uttar Pradesh was expected to account for 110,000 tons. The additional production targets (in tons) for other States were: Bombay 80,000, Madras 80,000, Punjab 70,000, Bihar 50,000 and other States 13,000.

The development schemes to increase the per acre yield, which were started during the First Plan period with a total expenditure of about Rs. 80 lakhs were extended year by year in view of the encouraging results. Out of a target of 10 lakh acres to be covered during 1955-56 under the campaign for intensive manuring, 8.08 lakh acres were covered with 10 lakh maunds of ammonium sulphate. The target for 1956-57 was 15 lakh acres of which 13.81 lakh acres had been covered by the end of September 1956. The total cost of sugarcane development schemes came to Rs. 10.15 crores.

Another part of the development programme should consist of enabling some of the factories to shift to areas or States where a plentiful supply of cane is assured. These and other remedial measures should enable the industry which has a productive capacity of over 1.5 million tons of sugar to produce by 1955-56 about 1.5 million tons as against 1.12 million tons in 1950-51.

With the removal of all quantitative restrictions on the consumption of sugar in 1952-53, the demand for it rose steeply to about 17 lakh tons per annum. The whole question of capacity was, therefore, reviewed and it was concluded that even the next few years, additional capacity of about 1.5 lakh tons per annum would be needed. Accordingly, applications were invited in April, 1951 for setting up new units and expansion of existing ones.

Exports are allowed upto one lakh tons.

The policy for 1956 was almost the same as for 1955: no statutory control, factories to keep 25 per cent of sugar produced as reserve, formula linking price of sugarcane to sugar, and price of cane Rs. 1-7-0 per maund at gate and Rs. 1-5-0 at rail centre (same as for 1954). A notable change in the sugar policy, however, is the Government's decision not to import sugar from abroad.

The production in 1954-55 season was the highest at 15.8 lakh tons. It was due to larger supplies of cane and extended season. The average All-India recovery of sugar from cane, however, remained unchanged at 10.08 per cent.

The Second Five-Year Plan target for sugar in terms of gur is 7.1 million tons.

## TEA INDUSTRY

**T**EA ranks after jute as the second largest item in India's export trade. It earns a foreign exchange of about Rs. 100 crores and a revenue of about Rs. 16 crores from excise and export duties. The State Governments also derive considerable revenue from the agricultural income-tax on tea grown within their jurisdiction as well as from the sales tax, carriage tax, octroi, etc. on the commodity.

The indigenous plant growing in wild conditions was first discovered in Assam in 1820 and 15 years later the East India Company started an experimental garden which was sold to the Assam Company in 1840. In less than 100 years India became the tea shop of the world.

There are about 6,601 gardens with a total area of about 780,471 acres under tea. Of these, over 582,119 acres are in Assam and West Bengal, while Madras, Mysore and Kerala account for nearly 174,462 acres, and the rest are in Bihar, U.P., Tripura, Punjab and Himachal Pradesh.

The industry as a whole gives employment to a labour force of over a million.

There are over 700 joint stock companies engaged in the tea industry. The total paid-up capital in the industry as a whole is about Rs. 74 crores. The number of Indian companies is about 540 with a paid-up capital of about Rs. 25 crores, and the number of foreign companies about 160 with a paid-up capital of about Rs. 36 crores.

The annual production of tea is about 665 million lbs. of which about 401 million lbs. are exported. India meets about 50 per cent of the world demand for tea.

With the cessation of bulk buying in April 1951 and the re-opening of London auctions, the tendency was for better types of teas to do well at the auctions.

By the end of 1951 the sellers' market was at an end and common teas, which were the worst to be affected, fetched only Rs. 1-3 a lb. at the end of March 1952 as compared with Rs. 1-14 a year before. Simultaneously production costs began to soar and in 1952 the extension of the Minimum Wages Act to the plantation industry prevented many gardens from covering their costs out of prices.

In May 1952 an official team inquired into the problems and recommended certain measures for temporary relief. These included deferred payment of excise duty, guaranteeing the banks of a portion of the loans to gardens, relaxation of provisions in the matter of advance payment of income-tax and supply of more wagons. The labour also agreed to forego certain concessions. Thus a substantial cut in production costs was effected by the end of 1952.

By this time tea prices had again begun to look up but to make sure of the recovery the industry decided to effect a voluntary cut of 8 per cent. in production and pay more attention to quality. The crisis had forced the closure of over 100 estates; but as a result of the above measures, the industry managed to turn the corner.

The latter part of 1953 saw a dramatic change from the weak markets of the previous year and since then prices have boomed to record levels in the world markets. The whole of the benefit of this change of fortunes did not, however, accrue to tea plantations because apart from additional costs arising from the operation of the Plantations Act, the Government sought to take an increased share in the proceeds of the industry.

The total production in 1954 was 644 million lbs. and that for 1955 was 665 million lbs. The estimate for 1956 is 665 million lbs.

Under the International Regulation Scheme the export quota for India was 470 million lbs. But in 1954 the Government permitted an export of only 464.9 million lbs. The International Tea Agreement expired on March 31, 1955 and was not renewed. For the 1955-56 season the export permitted is 480 million lbs. which is about 69.3 per cent of the crop basis of estates.

The export duty is regulated according to price, and may therefore vary from time to time. The duties as fixed are given below. The figure in brackets shows the price per lb.:

1955: April: As. 8 (Rs. 3-8-0); May: As. 8 (Rs. 3-5-0); June: As. 4 (Rs. 2-7-3); July: As. 4 (Rs. 2-6-5); August: As. 6 (Rs. 2-9-0); September: As. 6 (Rs. 2-12-8); October: As. 8 (Rs. 3-0-0); November: As. 8 (Rs. 3-7-6); December: As. 8 (Rs. 3-4-5).

1956: January: As. 6 (Rs. 3-1-5); February: As. 6 (Rs. 2-14-1); March: As. 6 (Rs. 2-11-4); April: As. 6 (Rs. 2-13-4); May: As. 6 (Rs. 3-4-3); June: As. 6 (Rs. 3-5-0); July: As. 6 (Rs. 2-13-11); August: As. 6 (Rs. 2-8-5); September: As. 6 (Rs. 2-11-5); October: As. 6 (Rs. 3-3-9); November: As. 6 (Rs. 4-1-11); December: As. 8 (Rs. 4-3-0).

The following table shows the growth of the industry from 1927 to 1956:—

Year	Area under tea in thousands of acres	Production in millions of lb.	Year	Area under tea in thousands of acres	Production in millions of lb.
1927	756	391	1942	843	573

# TEXTILE INDUSTRY

## COTTON

The statistical position of cotton in the Indian Union is summed up in the following table :—  
(In lakhs of bales)

	1952-53	1953-54	1954-55	1955-56*
Opening Stock .. .. .	21.53	17.96	20.0	26.7
Production .. .. .	36.83	44.70	51.0	46.0
Imports .. .. .	6.25	6.90	6.2	5.0
<b>Total Supply .. .. .</b>	<b>67.21</b>	<b>69.56</b>	<b>80.2</b>	<b>77.7</b>
Mill Consumption .. .. .	43.50	46.00	47.7	46.0
Exports .. .. .	3.80	1.50	3.1	5.0
Extra Factory Consumption ..	2.70	2.70	2.7	2.7
<b>Total Distribution .. .. .</b>	<b>49.50</b>	<b>50.20</b>	<b>53.5</b>	<b>53.7</b>

According to the information furnished by the trade, the total cotton supply, available in the 1955-56 season was estimated at 77.7 lakh bales, of which 7.3 lakh bales were Indian cotton, including 26.7 lakh bales of carryover with both the trade and the mills on August 31, 1955. The total mill consumption was estimated at 46 lakh bales (40 lakh bales of indigenous cotton and 6 lakh bales of foreign varieties). Exports amounted to 5 lakh bales and the extra factory consumption 2.7 lakh bales, thereby allowing a carryover for the 1956-57 season at 21.0 lakh bales. The 1955-56 season therefore started with substantially bigger stocks. The six-year old decline in mills' use of foreign cotton continued; so did the six-year-old increase in their use of Indian cotton.

The latest trade estimates of the production of cotton in 1956-57 is 52 lakh bales.

The sharp recession in cotton prices resulted in the relaxation of the cotton control in the field of movement and the Government had to reiterate in March 1952 its assurance about supporting the floor prices. The prices later rallied and, encouraged by the floor remaining untouched, the Government raised the floor for 1952-53 season by Rs. 50 with a view to providing a fresh stimulus to cotton growing.

In view of the satisfactory supply position, forward trading in cotton was permitted from December 1952 within the ring of the East India Cotton Association.

The supply position of cotton having improved, a number of control measures were further relaxed. Movement controls were removed and the three-tier system of licensing cotton dealers which prevailed in 1951-52 was replaced by a two-tier system. Forward trading in cotton was allowed to be continued during the 1955 season, subject to certain measures proposed by the Forward Markets Commission. At present, the only real control is of the floor and ceiling prices. On December 23, 1955 the Forward Markets Commission suspended forward trading in cotton on grounds that prices had shot up in speculative business.

However, the market was re-opened on June 18, 1956. The by-laws of the East India Cotton Association were suitably amended to ensure smooth functioning of the market. First, there will be two hedge contracts, one with Jarilla 25-32" Fine as its basis and the other with Vijay 27-32" Fine as basis—against the former single hedge contract with Jarilla 13/16" Fine as basis. Secondly, the delivery months for the contracts have been advanced. Thirdly, the margin system has been tightened up and a provision for special clearing has been introduced. Fourthly, the provisions regarding the reporting of information by members have been made more comprehensive.

Besides, the Government of India announced on June 27, 1956, that the floor and ceiling prices of cotton for the 1956-57 season would remain unchanged from the 1955-56 season.

The floor and ceiling prices for Jarilla Fine 25-32" are Rs. 495 and Rs. 820 respectively and for Vijay 27-32" Rs. 610 and Rs. 970 respectively.

In the sphere of trade the Government announced that the licensing for the import of raw cotton of stapling 1.1/16" and above from U.S. would be suspended. Any further imports would have to be made under the American Aid Programme. Later, it was decided that applications for licences for import from soft currency area would be entertained only for Karnak and Menoufi cotton from Egypt stapling 1.1/16" and above. Subsequently, on August 2, the Government stopped the licensing of imports of raw cotton from the United States under the aid programme.

## COTTON MILL INDUSTRY

The cotton textile industry, which is the largest single industry in the country, has made rapid strides during its existence of a century. India holds the third place among the countries of the world in its capacity for yarn and cloth based on mechanical equipment and stands second on the basis of cotton consumption.

In addition to providing means of livelihood for nearly 10 million handloom weavers, the mill industry provides direct employment to about 450,000 workers.

The capital invested is estimated at 110 crores, and the annual turn-over between Rs. 350 crores and Rs. 500 crores.

The record of the industry during the First Five-Year Plan is impressive. Not only has it achieved the target of cloth output set in the Plan but it has exceeded it. In 1955, the production of cloth amounted to 5,094 million yards as against the target of 4,700 million yards. But the output of 1,630 million lb. of yarn in the year was lower than the target of 1,640 million lb. The production of handloom cloth was only 1,480 million yards as against 1,700 million yards in the Plan while that of powerloom cloth was 273 million yards. Altogether, the cloth production was 6,847 million yards compared with 4,618 million yards at the beginning of the First Plan.

Out of this output, only 872 million yards actually shipped as against 952 million yards shipped in 1954. Of this, mill piecegoods accounted for 815 million yards (898 million yards in 1954) and handloom cloth 57 million yards (51 million yards in 1954).

The various fiscal measures adopted by the Government and the constitution of an export promotion council are expected to assist the industry in stepping up exports. A scheme of voluntary inspection of cloth meant for export has also been instituted.

Export of yarn continued to be strictly regulated.

The Textile Enquiry Committee, also known as the Kanungo Committee, which was asked to make a comprehensive enquiry into the

various sectors of the cotton textile industry, namely, the mills, the powerlooms and the handlooms, submitted its Report in September 1954 in which it made a number of recommendations towards their improvement.

The Committee has not favoured the expansion of the weaving side of the mill industry, but has suggested the replacement of plain looms with automatic looms at the rate of 5,000 a year for the next 20 years.

It has recommended that an export target of 1,000 million yards a year should be maintained.

It has estimated that by 1960 the *per capita* cloth consumption in the country will increase to 18.5 yards and that with an estimated population of 400 million, the consumption will rise to about 7,400 million yards by that year.

The Committee is of the view that an extra production of 1,000 million yards will be required to meet the internal demand in 1960, which should be achieved through the improved type of handloom and powerloom industries.

It has suggested a phased programme for the conversion of the 12 lakh active handlooms in the country into semi-automatic looms or powerlooms to make the handloom technically more efficient. It has stated that under the programme, three lakh handlooms should be converted into 2-13 lakh improved handlooms and powerlooms over a period of six years, and the conversion of the remaining looms should be carried out in two or three five-year periods, so that in 15 or 20 years' time the entire industry will have been converted into decentralised improved handloom or decentralised domestic powerloom industry.

On the question of reservations of the field of production, the Committee is of the opinion that the existing reservations in favour of handlooms or improved handlooms and domestic powerlooms must continue upto 1960 only.

## SECOND FIVE-YEAR PLAN

The programme for the development of the cotton textile industry under the Second Five-Year Plan was announced by Mr. T. T. Krishnamachari, who was at the time Commerce and Industry Minister, Government of India, at New Delhi on June 18, 1956. By the end of 1960 61, the *per capita* consumption of cloth in the country is expected to reach 18.5 yards, in addition to the export target of 1,000 million yards a year. This would involve a production of 8,400 million yards. But the present production of all the three sectors is about 6,700 million yards a year. Therefore, the country would require an additional quantity of 4,700 million yards of cloth.

This quantity has been allocated thus: 700 million yards for handloom industry from mill yarn; 300 million yards for handloom industry from Ambar (harka) yarn; 200 million yards for powerlooms to be introduced in the handloom sector; 350 million yards for mill sector for export purposes, leaving an allotted balance of 150 million yards.

The quantity of 350 million yards for export and allotted to the mill sector is required to be produced through the installation of 14,000 automatic looms. It has also been decided to allow the installation of 35,000 powerlooms spread over 1956-57 and 1957-58.

By June 1956, over 10,000 looms had been allotted. A further allocation of 6,000 looms was made in February 1957.

Certain conditions were laid for the allocation.

It was laid down that all the cloth produced on these looms would be earmarked for export and the allocation of looms was being made on a guarantee being given by the mills that in addition to 87 per cent of their past exports all the cloth produced on these looms would be exported and that any cloth sold internally therefrom would be subject to penal excise duty.

The following table gives details about the distribution of mills in India, as on 31st August 1956.

Where situated †	Number of Mills	Number of Spindles installed	Number of Looms installed	Average No. of Hands employed	Approximate Quantity of Cotton consumed in cwts.
Bombay City and Island .. .. .	66	3,113,620	61,467	111,339	4,441,297

1956 .. .. .	1,671,201	700,640	3,796,599	444,033	347,295	5,306,584

On the basis of the full rated capacity of the industry, about 50 lakh bales of cotton are required compared to the actual indigenous supply of 46 lakh bales (commercial crop) in 1955-56. During 1955-56 the cotton consumption by mills was 46 lakh bales (Trade Estimate). The estimates of the other important raw materials are given below:—Card clothing—3,500 sets; Bobbins—425,000 gross; Shuttle—8,300 gross; Heads—800,000 sets; Reeds—400,000 pcs.; Pickers—37,500 gross; Mutton tallow—3,000 tons; Starch—30,000 tons; Coal tar dyes—5,000 tons; Hydro-sulphite of soda—2,000 tons; Zinc chloride—3,000 tons; Caustic soda—15,000 tons.

#### SMALL-SCALE INDUSTRY

It is estimated that there are 2,850,000 handlooms and 23,800 power looms in existence in the country. About 65 per cent of the power looms are located in Bombay State though the handloom industry has witnessed the largest development in Madras State.

The regional distribution of powerlooms and handlooms, together with their estimated requirements of yarn is given below:—

State†	No. of Powerlooms	Annual yarn Requirements (m. lb.)	No. of Handlooms	Annual yarn Requirements (m. lb.)
Bihar .. .. .	147	0.72	196,218	47.10
Bombay .. .. .	15,722	76.82	161,255	38.70
Madhya Pradesh .. .. .	1,123	6.43	105,000	25.20
Madras .. .. .	1,415	6.91	841,140	201.87
Orissa .. .. .	10	0.05	129,686	31.12
Punjab .. .. .	1,330	6.53	46,357	11.13
Uttar Pradesh .. .. .	342	1.67	253,311	60.69
West Bengal .. .. .	1,354	6.61	97,151	23.32
Hyderabad .. .. .	167	0.81	149,000	35.70
Madhya Bharat .. .. .	24	0.12	18,500	3.72
Mysore .. .. .	1,303	6.36	35,000	8.40
Rajasthan .. .. .	36	0.18	26,000	6.24

Ajmer .. .. .	10	0.05	2,016	0.48
Delhi .. .. .	491	2.35	750	0.18
Other Areas .. .. .	28	0.01	190,164	166.46
<b>Total .. .. .</b>	<b>23,800</b>	<b>116.11</b>	<b>2,851,685</b>	<b>684.40</b>

Statistics of the production of powerlooms are not available. The actual output of the handloom sector, which showed a remarkable expansion during the Second World War when it reached a peak of 1,700 million yards, registered a fall in the subsequent period and was as low as 810 million yards in 1950 as against 1,250 million yards in 1948 and 1949. It has gone up to 1,318.2 million yards in 1954.

According to the Governments' textile policy referred to above, 200 million yards of the additional requirements have been allotted for production from powerlooms to be introduced in the handloom sector. A number of State

Governments have already indicated their desire to instal these looms totalling about 35,000.

#### HANDLOOM CLOTH

The handloom industry is by far the biggest cottage industry in India and had been going through a difficult period during the last two years. Some time ago its main handicap was lack of sufficient yarn. Supply of free yarn has, however, been increasing steadily and the monthly average for 1954 is 85,015 bales as compared to 72,000 bales in 1953. On the basis of yarn supply, handloom product on is esti-

mated at 1,318 million yards in 1954. Exports of handloom cloth in 1954 amounted to about 56 million yards as compared to 62 million yards in 1953.

The year 1955 maintained the upward trend in this sector. The output was 1,480 million yards in 1955 and 802 million yards in the first 6 months of 1956. During the year India exported 57 million yards.

Under the Second Five-Year Plan, out of the additional quantity of 1,700 million yards of cloth required to meet the total estimated demand for 8,400 million yards in 1960-61, as much as 1,000 million yards have been allocated

† Pre-reorganization areas.

to this sector. This is in addition to the present annual output of 1,600 million yards. Of this additional quota of 1,000 million yards, 700 million yards will be produced from mill yarn and 300 million yards from Ambar Charkha yarn.

The Government of India sanctioned a sum of Rs. 10.9 crores to State Governments for the development of the handloom industry from September 1953 up to March 31, 1956.

The State Governments have been asked to establish necessary machinery to collect statistics of handloom cloth production. Meanwhile such production is estimated on the basis of yarn deliveries to the States.

The production so estimated is given below :—

	Million Yards	
1952 .. ..	1,108	From indigenous yarn only.
1953 .. ..	1,200	
1954 .. ..	1,318 21	
1955 .. ..	1,480	
1956 (Jan. to June)	802	

The number of persons engaged in khadi production is about 700,000; and annual sale is about Rs. 3 crores.

The following measures have been adopted to improve the export trade in handloom cloth :

1. Exports of handloom cloth and manufactures thereof are allowed under O.G.L. and no export duty is levied on such cloth;
2. Representative varieties of handloom cloth have been supplied to the Indian Commercial Representatives for being exhibited in show-rooms;
3. Participations in International Trade Fairs and Exhibitions are arranged for by the Government;
4. An Export Marketing scheme has been sanctioned by the Government and is being implemented by the Madras State Handloom Weavers' Co-operative Society.

#### AMBAR CHARKHA\*

A significant development of the year 1955-56 was the emergence of the Ambar Charkha, an improved hand-operated spindle. In April 1956, the Government of India set up a special committee under the Chairmanship of Mr. S. S. Khira, Secretary, Union Ministry of Production,

to investigate the economic and technological aspects of the Ambar Charkha. The Committee submitted its interim recommendations to the Government two months later and the final report was placed before the Lok Sabha on June 23, 1956. This was published in August 1956.

The Committee has recommended the introduction of 75,000 Charkhas for 1956-57 and about 200,000 for 1957-58. The Government has accepted the scheme for 1956-57. Also, 16 more training centres and 100 more production-cum-training centres will be opened this year. About 50 workshops and five main and sub-production centres will also be set up. The Union Government has sanctioned over Rs. 3.27 crores for implementing the programme.

**Khadi and Village Industries Commission :** In September 1956, Parliament adopted a Bill for the establishment of a Commission for the development of Khadi and Village Industries. This body will have powers to plan as well as implement schemes for the extension of khadi and village industries. At the same time, the All-India Khadi and Village Industries Board will function as a panel advisory body.

#### IMPORTS AND EXPORTS

The following table gives the sea-borne export trend of all cloth :—

Year	Twist and Yarn		Cloth	
	Million lb.	Rs. in crores	Million yd.	Rs. in crores
1950-51 .. ..	74.5	17.1	1,289.68	116.7
1951-52 .. ..	6.2	2.0	423.82	51.7
1952-53 .. ..	17.9	4.4	615.75	61.46
1953-54 .. ..	22.2	4.7	765.5	63.1
1954-55 .. ..	1.2	0.3	819.0	61.15
1955-56 .. ..	23.1	4.21	740.0	56.60

The year 1952 witnessed the emergence of a buyers' market in cotton textiles and the accumulation of unsold stocks was accompanied by a fall in prices. As a result, there was a progressive relaxation of control measures and restrictions. In October the prices of a number of varieties including dhoties, sarees and mulls were de-controlled and the policy was further extended to coatings, twills, etc. with effect from January 1, 1953, leaving about one-third of the mill production subject to price control. With effect from July 1, 1953 the cloth control was totally abolished.

The production control was used towards the end of 1952 for helping the handloom industry by reserving the production of certain varieties including sarees woven of dyed yarn, dhoties with borders of certain width, lungies, sarongs, etc.

In the post-war period, foreign exchange difficulties have resulted in shutting out imports of cotton textiles except (a) umbrella cloth and special fabrics; (b) yarn of 80s and above required for handloom purposes; and (c) yarn of 30s and 60s for manufacture of heads and reeds.

While India was an important importer of cotton goods for several years she has now become an important exporter. In January 1953 the Government provided a stimulus to exports by reducing the export duty on coarse and medium cloth from 25 per cent. *ad valorem* to 10 per cent. Later at the end of 1953 the 10 per cent duty on medium cloth was also abolished. In 1955, import duty on cotton textiles was reduced following the British Government's representation that Indian import duties were prohibitive.

The Karve Committee on Village and Small-Scale Industries (Report published in October 1955) estimates the country's aggregate cloth requirements at the end of the second Five-Year Plan (1960-61) at 8,460 million yards, including 1,000 million yards for export as against the 1955 output of 6,750 million yards. The Committee wants the entire additional demand of about 1,700 million yards to be met by expansion of handloom production. The mill industry, however, was opposed to this view and suggested a vigorous policy of

rehabilitation and modernisation of plant and equipment in mills in order to undertake additional production.

#### DEVELOPMENT PROGRAMME

Cotton cloth (mill-made and handloom) available for consumption per head averaged 15 to 16 yards in pre-war years. The consumption in 1951-52 was, however, estimated at 12.5 yards as against 9 yards in 1950-51, and has been fixed at not less than 13 yards for 1952-53 so as to be progressively increased to 15 yards by 1955-56.

To enable the handloom industry to meet the consumer resistance, the Government constituted an All-India Handloom Board in December 1952.

In regard to the mill industry, it was found that apart from cotton shortage, there were about 150 inefficient and uneconomic units. Another important problem related to diminishing productivity.

**Excise Duties :** On August 31, 1956, the Government of India announced its decision to raise the excise duty on four varieties of mill cloth with effect from September 1, 1956. The rates of increase are : one and a half annas per

sq. yard on superfine cloth (i.e., the excise duty of 4 annas per sq. yd.) ; one and a quarter anna per sq. yd. on fine cloth (i.e., three annas per sq. yd.) ; one anna per sq. yd. on medium cloth (i.e., two annas) ; six pias per sq. yd. on coarse varieties other than dhoties and sarees (i.e., one and a half annas per sq. yd.). These duties are estimated to bring in an additional revenue of Rs. 17.5 crores during the seven months in 1956-57.

**Export Promotion Council :** The Council opened its first office in Baghdad in February 1956 and then other offices in Singapore, Lagos, Rangoon, Aden and Mombasa. Besides, it has taken part in many exhibitions—Industrial Exhibitions in New Delhi, the Leipzig Fair, the Pakistan Trade Fair and the Milan Samples Fair. It has undertaken the publication of a handbook known as *The Indian Textile Industry*. The Council has also brought about an overseas edition of its fortnightly *Bulletin*.

**Indo-Burma Textile Deal :** During 1955-56 India and Burma signed an agreement, under which India would supply Burma cotton textiles worth Rs. 1.9 crores against payment of American cotton which the U.S. had contracted to sell to Burma.

The following table summarises the programme of development of the whole industry as approved by the Planning Commission for the Five-Year Plans :—

	Unit	1952-53	1955-56	1960-61

## TOBACCO INDUSTRY

**I**NDIA is one of the three major producers of tobacco in the world, the other two being U.S.A. and China. Tobacco is also an important item in India's foreign trade.

The more important tobacco growing States in India are Andhra, Madras, Bombay, U.P. and Bihar.

The tobacco plants are mainly of two varieties—*nicotiana rustica* and *nicotiana tabacum*. The first has a higher nicotine content and is used in hookahs, for purposes of chewing and in making snuff. The second has a smaller nicotine content and is used in the manufacture of cigarettes, cigars and cheroots.

There are six main tobacco producing areas in India—the Guntur area in Andhra Pradesh, the Charotar area in Gujarat of Bombay State, the Nipani area in Mysore, the southern Madras area, north Bihar and Bengal area and Uttar Pradesh and Punjab area.

The Guntur area comprises the districts of Guntur, East and West Godavari, and the adjoining portions of Telangana. The variety grown is *nicotiana tabacum*.

The Charotar in Gujarat covers Anand, Borsad, Petlad and Nadiad talukas of the Kaira District. Here the chief variety is *nicotiana tabacum*.

The Nipani area is made up chiefly of the District of Belgaum in Mysore State and certain areas in North and South Satara and Kolhapur districts of Bombay State. Here both the varieties are grown though *nicotiana tabacum* predominates.

In Madras State the chief tobacco growing districts are Madura and Coimbatore.

The north Bihar area covers the districts of Muszafarpur, Purnea and Darbhanga, and the north Bengal area the districts of Jalpaiguri, Malda, Berhampore and Dinajpur. Here both the varieties are grown.

Uttar Pradesh area comprises the districts of Farukhabad, Etah and Sitapur and Punjab comprises the districts of Jullundur and Ferozepur. Both the varieties are grown in these areas.

The development of tobacco cultivation, marketing and research are looked after by the Indian Central Tobacco Committee with headquarters in Madras. The Committee has a tobacco research institute at Rajahmundry (Andhra Pradesh), cigar and cheroot tobacco research station at Vedaasandhur (via) Dindigul (Madras), hookah and chewing tobacco research station at Pusa (Bihar), wrapper and hookah tobacco research station at Dinhat (West Bengal) and a cigarette tobacco research sub-station at Guntur (Andhra Pradesh).

About tobacco manufactures, there are over 4,600 bidi manufacturers, about 300 chewing tobacco manufacturers, over 300 snuff manufacturers and about 30 cigarette manufacturers. Export of tobacco is allowed freely without any restrictions.

There are about 86 associations connected with tobacco industry.

## VEGETABLE OIL INDUSTRY

INDIA is one of the most important producers of oilseeds in the world and is consequently a large producer of vegetable oils as well as an exporter of oils and oilseeds.

The following figures show the average production of different varieties of oilseeds in recent years along with their share in world production :—

	Average Indian Production (lakh tons)	As percentage of world Production
Groundnut .. ..	30.0	36
Castor seed .. ..	1.2	26
Linseed .. ..	4.0	15
Sesamum .. ..	5.0	26
Cotton seed .. ..	13.0	13

In 1951, there were about 174 large-scale oil mills on the active list of the Development Wing of the Ministry of Commerce and Industry engaged in the production of edible oils with an annual rated capacity of about 680,000 tons of oil on a single shift basis. During 1951-56,

no new large-scale units or substantial expansion of existing large-scale mills for the crushing of oilseeds (except cottonseed) came into existence. In March 1956, there were 2,097 oil mills registered under the Factories Act. The State-wise\* distribution of these oil mills is as follows : Assam 73; Bihar 92; Bombay 375; Madhya Pradesh 101; Madras & Andhra 540; Orissa 7; Punjab 39; Uttar Pradesh 125; West Bengal 664; Hyderabad 298; Madhya Bharat 101; Mysore 23; PEPSU 12; Rajasthan 29; Saurashtra 120; Travancore-Cochin 56; Other States 40. The total crushing capacity of the mills in the country is estimated at 56 lakh tons per annum in terms of oilseeds.

It is also estimated that there are about four lakh village *ghatis* in the country with an annual crushing capacity of about seven lakh tons of oilseeds. Thus the total crushing capacity is estimated at 63 lakh tons in terms of oilseeds. But the total output of oilseeds in recent years is estimated at only 50 to 55 lakh tons. Therefore, there is an appreciable part of the available capacity lying idle.

The capital invested in the organised industry is estimated at Rs. 24.4 crores and the number of workers at 43,580. The most important oilseeds consumed in large quantities for the production of oils are groundnut, linseed, rape and mustard, castor seed and sesamum seed. Small quantities of cottonseed and mohwa seed are also crushed.

According to the first Five-Year Plan, the production of oilseeds was expected to increase by 400,000 tons over the estimated production of 5,103,000 tons in 1950-51. Consequently, the supply of oil was expected to rise from about 1,113,000 tons in 1949-50 to about 1,272,000 tons by 1955-56. The total supply of vegetable oils of all varieties including about 110,000 tons of coconut oil was thus expected to be 1.88 million tons by 1955-56. But the production in 1954-55 is estimated at 1.76 million tons.

The Commission has recommended measures for assisting the cottonseed industry, introduction of solvent extraction process to secure higher overall recovery of oils and wider utilisation of neglected resources of oil-bearing materials such as neem, mohwa, karang and marotly which grow wild.

Since the Industries (Development and Regulation) Act, 1951, came into force, eight firms have been granted licences for setting up vegetable oil mills on the condition that they will crush cottonseed only. In addition, the former Madhya Bharat Government had, under the Second Plan, a proposal for installing a plant with a crushing capacity of 15,000 tons of cottonseed per annum. The total installed capacity of the 9 units is estimated at 98,200 tons per annum in terms of seed. Besides, the crushing of cottonseed is carried on along with other seeds by a large number of mills. As against the target of an additional 7,500 tons of cottonseed oil envisaged under the Plan, the output of cottonseed oil was estimated to be about 9,000 tons in 1955-56.

The actual production of oil from the five major oilseeds has been estimated as follows :

(000 Tons).

	Groundnut	Castor	Sesamum	Rape and Mustard	Linseed	Total
1950-51 ..	748	7	136	221	83	1,195
1951-52 ..	662	37	135	275	89	1,198
1952-53 ..	628	36	140	247	103	1,154
1953-54 ..	817	37	165	246	103	1,398
1954-55 ..	938	39	184	291	114	1,566

### IMPORTS AND EXPORTS

The following table shows the imports and exports of oil since 1953-54 :—

(In gallons).

	1953-54	1954-55	1955-56
<b>Imports (Total)</b> .. ..	12,009,880	11,330,645	8,778,386
Coconut Oil .. ..	5,761,500	5,889,866	5,449,548
Linseed .. ..	4	136	2,528
Other Sorts .. ..	6,248,376	5,440,643	3,326,260
<b>Exports (Total)</b> .. ..	7,687,234	39,467,424	68,258,422
Groundnut Oil .. ..	360,189	24,834,930	30,188,499
Linseed Oil .. ..	909,386	2,399,567	18,573,331
Castor Oil .. ..	4,564,402	7,233,090	9,374,321

On the basis of the minimum *per capita* consumption of fats in this country the total consumption of fats of the entire population would work out at 7 million tons as against the present estimated consumption of 1.2 million tons.

In 1954-55, about 1.14 million tons of vegetable oils (including coconut oil) and about 255,000 tons of vanaspati were estimated to have been consumed for edible purposes in the country. This means a *per capita* consumption of 8.2 lb. (6.7 lb. of edible oils and 1.5 lb. of vanaspati). It is likely to go up during the Second Plan. Assuming the higher consumption at 8.8 lb. the total requirements of vegetable oils and vanaspati for 400 million people would be about 1.62 million tons by 1960-61.

The consumption of vegetable oils in industries has considerably risen since the last war. The development of soap, paints and varnish industries has stimulated the consumption of non-edible oils. Castor oil consumption as a lubricant has also registered considerable expansion. During the decade following the outbreak of the war, consumption of vegetable oils by the soap industry has doubled from 30,000 tons to 63,000 tons, and that of paints and varnish industry and lubricant has risen from 15,000 tons each to 80,000 tons and 25,000 tons respectively. By 1960-61, the total requirements of vegetable oils for all the industrial and miscellaneous purposes are estimated at 278,000 tons. Thus for internal consumption only, we may require 1.9 million tons.

In regard to solvent extraction of oilcakes, the Government had given licences by the end of March 1956, to install plants with a capacity of 340,000 tons of oilcakes, which together with the capacity established before the industry came under statutory control, made a total of 400,000 tons per year. The current production of oil by the techniques of solvent extraction is estimated at about 7,000 tons per annum.

The development programme for the vegetable oil industry in the Second Plan is indicated in the following table :

(Tons)

	1954-55	1960-61
<b>Production of oil :</b>		
1) Solvent extraction from oilcakes ..	7,000	64,000
2) Cottonseed Oil .. ..	9,000	80,000
<b>Total (all sources) ..</b>	1,760,000	2,110,000
<b>Utilisation of oil :</b>		
For edible purposes .. ..	1,140,000	1,180,000
For Vanaspati manufacture ..	260,000	430,000
For other industrial purposes ..	230,000	280,000
Exports .. ..	140,000	210,000

On the basis of the production statistics of important vegetable oils including kardi, niger, cottonseed and coconut for 1954-55, the output of vegetable oils in the year is estimated to be about 17.6 lakh tons compared with 11.13 lakh tons in 1949-50 taken as the base year

\* Pre-reorganization States.

This represents a considerable improvement in the availability of oils in comparison with the previous years and the target of 13.0 lakh tons envisaged in the first Plan has also been surpassed.

### VANASPATI

The Vanaspati Industry though a minor branch of the Vegetable Oil Industry is one of the most highly organised and efficient industries. Its history is interesting. It started on a small scale in 1930.

In April 1951, there were 48 vanaspati factories in India with an annual rated capacity of about 333,000 tons. In March 1956, their number had increased to 51 with a rated capacity of about 412,100 tons. Out of these, one is the Government Hydrogenation Factory at Kozhikode having an installed capacity of 3,000 tons per annum. Besides, there are seven factories with an annual rated capacity of 33,000 tons. Thus the total capacity of the industry comes to about 445,000 tons per annum. It is the Government's policy not to permit any further expansion of the industry as the present capacity is adequate to meet all the requirements of 4 lakh tons.

The consumption of vanaspati in India has increased at an average rate of about 20,000 tons per annum during the First Plan period. It is assumed that the consumption will rise to about 25,000 tons per annum during the Second Plan. On this basis, the internal consumption may be estimated at about 380,000 tons in 1960-61.

The following table summarises the progress of the industry :

(tons)

Year	Production	Consumption	Exports
1951-52 ..	180,000	177,000	3,000
1952-53 ..	199,000	196,000	2,800
1953-54 ..	199,000	198,000	900
1954-55 ..	225,000	216,000	9,870
1955-56* ..	270,000	255,000	15,000

\* Estimates.

The State-wise distribution of factories at the beginning of 1956 with annual capacity was as follows :-

State	In production	Under construction	Annual capacity (tons)
Bombay ..	10	..	114,600
Saurashtra ..	4	..	30,000
West Bengal ..	5	..	60,500
U. P. ..	5	..	54,000
Delhi ..	2	..	42,000
Punjab ..	2	..	10,500
Andhra ..	3	..	18,000
Madras ..	6	..	22,900
Mysore ..	4	..	10,800
Madhya Pradesh ..	2	..	21,300
Other States ..	5	..	27,500
Total ..	51	..	412,100*

\* Estimated, † Pre-reorganization.

The gap between the installed capacity and actual production has continued to remain wide as will be seen from the following table :-

Year	Installed Capacity Tons	Production Tons
1950 ..	319,728	171,636
1951 ..	325,728	172,820
1952 ..	339,228	190,812
1953 ..	368,232	191,652
1954 ..	414,000	280,749
1955 ..	468,000	260,927

The net capital invested in the industry is about Rs. 22 crores. Besides 10,000 workers directly employed, the industry provides indirect employment for nearly 60,000 workers.

Edible Oils constitute the chief raw material of the industry.

The table below summarises the programme of development in the Second Plan :

	(Tons)	
	1955-56	1960-61
Installed Capacity	445,000	445,000
Production ..	270,000	400,000
Internal Consumption ..	255,000	375,000 to 380,000
Exports ..	15,000	20,000 to 25,000

## WOOLLEN INDUSTRY

There are three main groups of mills, those which operate both woollen and worsted systems, those with woollen or worsted systems only, and lastly, the Amritsar group of mills which purchase ready spun yarn, and from that stage occupy themselves in weaving, dyeing and finishing.

Among the first group, the Cawnpore Woollen Mills and the New Egerton Woollen Mills, Dhariwal, each with more than 15,000 spindles and operating both woollen and worsted systems,

are the largest units in India at the present time.

In 1951 there were 44 factories including four put up since the war and the total capital employed was estimated at Rs. 7 crores. The industry gave employment to about 18,000 workers. The number of powerlooms and spindles installed were 2,039 and 116,800 respectively. But early in March 1956, the number of factories had been higher at 119 with 3,950 powerlooms and 157,448 spindles installed on the basis of a double shift.

The regional distribution of woollen mills and their capacity at the end of 1955-56 are as follows:

State*	No. of units	Capacity (Numbers)		
		Woollen Spindles	Worsted Spindles	Powerlooms
Bombay .. .. .	12	12,226	47,936	605
Saurashtra .. .	1	2,130	7,032	84
Mysore .. .. .	3	10,478	..	221
Uttar Pradesh ..	4	12,358	9,672	368
Kashmir .. .. .	1	1,542	1,500	18
West Bengal .. .	5	1,380	5,094	76
Madhya Bharat ..	1	516	..	20
Punjab .. .. .	94	20,402	25,182	2,558
Delhi .. .. .	1	..	..	..
Total .. .. .	122	61,032	90,146	2,950

\* Pre-reorganization.

Woollen manufactures consist of blankets, rugs, shawls, lols, coating, overcoating, tweed, flannel, serge, etc.; but the major portion is of coarser and heavier types of goods. The trend of production of woollen and worsted fabrics and yarns during 1954-55 and 1955-56 is detailed below:

	1954-55	1955-56
<b>A. Woollen and worsted fabrics</b>		
1. Suitings ..	5.31	4.93
2. Blankets and Rugs ..	2.07	3.30
3. Melton and Shoddy ..	1.03	0.49
4. Lohis and Shawls ..	1.60	2.14
5. Uniform Cloth ..	1.21	0.88
6. Other Sorts ..	2.54	3.20
<b>Total ..</b>	<b>13.76</b>	<b>14.94</b>
<b>B. Yarn</b>		
1. Woollen Yarn ..	9.10	10.56
2. Worsted Yarn ..	11.64	11.00
<b>Total ..</b>	<b>20.74</b>	<b>21.56</b>

The fall in production during the years 1951-52 and 1952-53 was mainly due to the difficulty of marketing the goods as a result of consumer resistance to high prices. Since then, however, the fall in the prices of raw wool and finished goods has been accompanied by the broadening of the demand as well as production. Against the target of 25 million lb. envisaged for 1955-56, the actual production was 14.94 million yards of woollen/worsted fabrics and 21.56 million lb. of yarn.

The consumption of woollen goods in India is low in comparison with other countries.

The production of the mill sector was 13.76 million yards in 1954-55 and 14.94 million yards in 1955-56. Production in the cottage sector is about 4.5 million yards. Thus the indigenous output amounts to about 19 million yards. Imports during 1952-55 averaged 3.5 million yards. The total quantity available for consumption is thus about 23 million yards.

### WOOLLENS

Imports of wool and woollen goods have remained at a fairly high level, the annual value being of the order of Rs. 11.12 crores in 1954-55, and Rs. 11.86 crores in 1955-56. The import of wool tops accounted for nearly Rs. 7.16 crores and Rs. 7.46 crores, respectively. The large imports of wool tops are indicative of an important gap in the structure of the industry, the combing capacity of which is considerably short of the demand for wool tops.

The exports of woollen manufactures declined from Rs. 6 crores in 1950-51 to Rs. 4.4 crores in 1953-54 and to Rs. 3.87 crores in 1954-55 and to Rs. 3.97 crores in 1955-56. The export of woollen yarn, which was totally banned, has been permitted since March 1954 in view of the improved supply position, but not much progress has been made. Export of raw wool is placed at Rs. 8.61 crores in 1954-55 and Rs. 9.73 crores in 1955-56 as against Rs. 5.87 crores in 1953-54.

The total capital investment in the industry amounted to Rs. 9.5 crores in 1953. The fixed capital investment on new units and expansions during the First Plan period was about Rs. 75 lakhs. The labour force has increased from 15,600 in 1950 to 17,000 in 1955-56.

A Development Council for the Woollen Industry was constituted by the Government of India in July 1955.

### SECOND FIVE-YEAR PLAN

Under the Second Five Year Plan the output of woollen and worsted fabrics by the organised mill sector is expected to be stepped up from the present level of about 15 million yards to about 20 million yards by 1960-61. The yarn requirements of all the sectors will be 12 million lb. of woollen yarn and 15 million lb. of worsted yarn per annum. But the existing capacity is much more than the demand.

But there is no combing plant in the country to produce wool tops. So it is proposed to establish during the Period a plant with a capacity of about 9 million lbs. involving a capital investment of Rs. 2.25 crores.

The development programme for the woollen textile industry, mill sector, in the Second Five Year Plan is indicated below:

	1955-56	1960-61
<b>Spindleage and Loomage</b>		
Woollen sector-spindles	61,032	62,768
Worsted sector- "	96,416	1,23,416
Powerlooms ..	3,950	4,051
<b>Annual rated capacity on double shift</b>		
Woollen Yarn (million lb.)	17	17.5
Worsted Yarn (million lb.)	21	28
Woollen and Worsted fabrics (million yd.)	48	50
<b>Production</b>		
Woollen tops (million lb.)	..	9
Woollen yarn (million lb.)	10.6	12
Worsted yarn (million lb.)	11.0	15
Woollen & Worsted fabrics (million yd.)	14.9	20

### HOSIERY INDUSTRY

According to the Tariff Commission, there were in 1951, 875 units, excluding four mills having a hosiery section, of which as many as 843 were in the Punjab with a capital investment of approximately Rs. 3 crores. Only 56 units were, however, registered under the Factories Act and 45 used electric power.

The Ludhiana factories numbering about 805 work during the season, but have a rated capacity for consuming 10.425 million lbs. of yarn annually. The annual rated capacity of the four woollen mills having hosiery section is estimated at 1.313 million lbs. of yarn. The actual production of the industry has, however, been very much less than the rated capacity and has been estimated as under by the Tariff Commission in terms of weight of the finished products:—

Year.	Lakh lbs.
1949 .. .. .	37.83
1950 .. .. .	27.57
1951 .. .. .	20.22

It is estimated that about 4 million lb. of hosiery and knitting yarn are at present consumed by the Ludhiana hosiery units and about 0.5 million lb. by the hosiery units located in other States. Some of the organised mills also produce worsted hosiery goods, consuming about 0.5 million lb. of yarn. Thus the total quantity of yarn consumed by the hosiery industry is estimated at around 5 million lb.

# MINES AND MINERALS

(By courtesy of the Indian Bureau of Mines, Intelligence Section, Government of India)

Allotment under the First Five-Year Plan (mineral development)... Rs. 1.06 crores.

Allotment under the Second Five-Year Plan: Rs. 73 crores.

**T**HE mineral wealth of India, as at present known, though by no means inexhaustible, comprises an adequate range of useful products necessary for industrial development.

The reserves are ample in respect of minerals essential for basic industries—coal and iron—but the country is deficient in a fairly long list of vital minerals like ores of copper, tin, lead, zinc, nickel, cobalt and in sulphur and petroleum.

The position with regard to aluminium ore, refractories, abrasives, limestone, etc., may be considered as fairly adequate while in respect of titanium and thorium ores and of mica, the country has considerable reserves.

Coal, iron ore, manganese ore, ilmenite, kyanite (and mica for which data is not available) are produced in quantities of real importance to industry and other sections of economy.

Of these mica, manganese ore, kyanite and ilmenite are wholly or largely exported.

An idea of India's present mineral production is given in tables in next column:

## MINERALS ADEQUATE FOR INDIA'S NEEDS

Mineral	Production in 000 tons	
	1954	1955
Bauxite .. .. .	75	81
Coal .. .. .	36,881	38,226
Ilmenite .. .. .	241	251
Iron ore .. .. .	4,808	4,653
Kyanite .. .. .	42	12
Sillimanite .. .. .	8	2
Magnetite .. .. .	71	58
Manganese ore .. .. .	1,414	1,584

Production of coal in 1956: 39.43 million tons; of soft coke 1.652 mln. tons; of hard coke 0.255 mln. tons; of beehive hard coke 0.265 mln. tons.

## MINERALS WITH FAIRLY ADEQUATE SUPPLIES

Mineral	Production in 000 tons	
	1954	1955
Barytes .. .. .	19	8
China clay .. .. .	146	87
Other clays .. .. .	N.A.	N.A.
Fire clay .. .. .	93	87
Felspar .. .. .	6	5
Chromite .. .. .	46	80
Gold (000 oz.) .. .. .	239	211
Gypsum .. .. .	612	690
Salt .. .. .	2,516	2,990

## MINERALS WITH DEFICIENT SUPPLY

Mineral	PRODUCTION	
	1954	1955
Copper ore (000 tons) .. .. .	343	353
Copper .. .. .	7.2	7.3
Graphite .. .. .	1.5	1.6
Lead concentrate .. .. .	2.8	3.1
Lead pig .. .. .	1.8	2.5

Pyrite .. .. .	...	0.8
Sulphur .. .. .	...	...
Mercury .. .. .	...	...

## MINERAL NEEDS OF INDUSTRIES

Mineral	Estimated annual consumption (1955)	Estimated requirements in 1960-61
Coal (m. tons) .. .. .	36.73	60
Limestone (m. tons) .. .. .	7.2	23.3
Gypsum (000 tons) .. .. .	694	1.97
Iron ore .. .. .	3,448	10,500
Manganese ore .. .. .	100	500
Bauxite .. .. .	72	175
Ilmenite .. .. .	3	8
Sulphur .. .. .	75	210
Rock phosphate .. .. .	55	400
Petroleum crude (m. tons) .. .. .	3.5	N.A.
Erylites .. .. .	Nil	Not estimated

As part of the national policy to ensure efficient working of known mineral deposits, the Mines and Minerals (Regulation and Development) Act was put into force on 25th October, 1949. By Section 5 of this Act the Central Government is empowered to make rules for regulating the grants of mining leases or for prohibiting grants of such leases in respect of any mineral or in any area.

By Section 6 of the same Act, the Central Government is empowered to make rules for Conservation and Development of minerals and by Section 7 to make rules for the modification or alteration of the terms and conditions of the leases granted prior to the commencement of this Act, so as to bring the terms and conditions

of leases granted in accordance with the rules made under Sections 5 and 6.

Section 4 of the Act provides that any prospecting license or mining lease granted after the commencement of that Act otherwise than in accordance with those rules, shall be void and shall have no effect.

The Central Government have so far issued three sets of rules: The Mineral Concession Rules, 1949; The Petroleum Concession Rules, 1949 and the Mineral Conservation and Development Rules, 1955.

Lately, the Ministry of Natural Resources and Scientific Research\* have framed mining leases (Modification & Terms) Rules, 1956, under Section 7 of the Mines and Mineral (Regulation,

and Development) Act, 1948. These Rules were published in the Gazette of India in Part II, Sec. 3 of 15th September, 1956.

In 1952 the Government of India enacted the Coal Mines (Conservation and Safety) Act, for the purpose of taking under its control the regulation of coal mines to the extent as provided in the Act. The Indian Mines Act, 1923 was re-enacted after making suitable amendments in 1952 and called Indian Mines Act, 1952.

Government of India has also framed rules for atomic energy minerals and other minerals used for the production or use of atomic energy or for research. This Act is known as The Atomic Energy Act, 1948.

## GOVERNMENT ORGANISATIONS

The Geological Survey of India prepares geological base maps showing mineral deposits, and also tackles the engineering problems connected with the country's hydro-electric development as well as ground water supply. In order to cope with the growing need of the country the Department has been expanded quite rapidly in recent years.

Indian Bureau of Mines tenders advice to the Government on mineral concessions, takes up exploratory work for proving of minerals and ore deposits required for various industries; undertakes research and beneficiation of low grade ores. Inspects mines to ensure improvement in mining practices and conservation of minerals; advises the Government regarding mineral policy; advises the Government and other interested parties regarding the uses, occurrences and marketing of different minerals; and collects and publishes mineral production statistics.

The Atomic Energy Department looks after the development and processing of such minerals and substances as may be used for the production or use of atomic energy or for research into matters connected with it. The Central Government have declared the following substances and all their respective components as prescribed substances for atomic use:— Uranium minerals, thorium minerals, beryllium minerals, vanadium minerals, lithium minerals, radium, zirconium, graphite, deuterium, plutonium, neptunium and minerals containing the above metals and accessories ingredients, such as uraniferous allanite, triplite, columbite and tantalite.

The Government of India have also set up a separate wing known as the Natural Oil and Gas Commission for exploration of oil and gas in the country. To start with, work at the Jwalamukhi area in the Kangra district of the Punjab, where there is drilling for oil, has been intensified.

The Coal Board under the Ministry of Steel, Mines and Fuel looks after the mining and development of collieries in the Public Sector and the distribution of coal to various consumers.

For the import and export of important minerals like iron ore, manganese, etc., there is now a State Trading Corporation under the Ministry of Commerce and Industry.

## MINERAL TRADE

The total value of the mineral produced in 1955 was of the order of Rs. 105.6 crores as against Rs. 102.5 crores in 1954. This represents about 1 per cent of the total national product. The principal minerals like coal, manganese, mica and iron ore have shown a marked improvement in production.

The total export of ores of minerals from India in 1955 fetched foreign exchange worth Rs. 31.4 crores compared with Rs. 35.6 crores in the year before. This decline is mainly due to a fall in respect of manganese because of the abolition of the export duty in 1954. Mica, iron ore and ilmenite, however, showed a marked increase in the quantity and value of export.

The exports of metals in 1955 were valued at Rs. 443 lakhs which was 55 lakhs higher than that for 1954.

\* After April 16, 1957 mines came under the Ministry of Steel, Mines and Fuel.

The import of minerals also indicated a rise from Rs. 3.41 lakhs in 1954 to Rs. 4.71 lakhs in 1955. The increase was mainly due to a larger import of asbestos (raw) and sulphur.

### EMPLOYMENT

Five lakhs and ninety-one thousand (5,91,000) persons were employed in mines in 1955. Of these 60 per cent were in collieries.

The actual break-up of the persons employed in mines is given below :—

	1954	1955
Coal .. .. .	340,964	347,980
Manganese Ore .. .	84,821	89,907
Salt* .. .	39,591	38,296
Iron Ore .. .	30,772	34,218
Mica .. .	27,335	30,632
Gold .. .	18,054	17,787
Others .. .	26,717	31,925
Total employment in mines .. .	568,254	590,745

\* Small units were re-aligned and formed into co-operatives.

This is exclusive of people employed in connected industries. In all, two lakhs of people are estimated to be employed in the mining and in the associated industries of mica.

### COAL

The most important coal fields are Raniganj in West Bengal and Jharia and Bokaro in Bihar. The Raniganj and Jharia fields contribute about 82 per cent of the total output. The best coking coal comes from Giridih, Jharia and Raniganj. Other States in which coal is found are Madhya Pradesh, Orissa, Andhra, Madras, Kerala, Bombay, Assam, Rajasthan and Kashmir.

There are about 832 coal mines working in India.

Indian coal falls mainly into two classes namely, high grade steam and low grade steam.

The Metallurgical Coal Conservation Committee placed the reserves of coking coal at 329.6 million tons in respect of selected grade, 395.7 million tons of grade I quality and 49.1 million tons of grade II quality. With stowing, washing and blending the Committee thought that a reserve of 2,000 million tons of good quality coking coal could be obtained. The Geological Survey of India estimated the reserves of non-coking coal at 30,650.25 million tons of which Gondwana coal represented 37,113.25 million tons and balance tertiary coal.

The following table gives the details of output :—

Year	Production (million tons)
1947 .. .. .	80.07
1948 .. .. .	29.82
1949 .. .. .	31.44
1950 .. .. .	32.31
1951 .. .. .	34.43
1952 .. .. .	36.30
1953 .. .. .	35.98
1954 .. .. .	36.78
1955 (estimate) .. .	38.22
1956 .. .. .	39.43

In 1940 the mineral concession rules were revised by the Government of India. The rules limit the period of the leases to twenty years with the option of one renewal for another twenty years. The rules also require the certificate of approval from the State Governments. The Government has also constituted a committee to consider all applications for opening new mines.

Mechanisation in the industry is at an early stage of development. In the year 1955, on average, there were only 442 coal cutting machines in about 144 mines which produced

23.6 per cent of the total output. Also, there were 4 mechanical loaders and about 88 mechanical conveyors in operation.

In earlier times the coal used to be sold by the name of steams. An Indian Coal Grading Board was constituted in 1926. The maintenance of grades requires beneficiation but only about 70 collieries are fitted with screening plants and mechanical chutes, the rest are worked by hand labour.

The Coal Grading Board split up the area into Raniganj and Jharia coal fields and carried out extensive work in the field of grading.

In 1944 the necessity was felt to control production and distribution of coal and the Colliery Control Order introduced what is known as Coal Commissioner's grade.

Under the Coal Mines (Conservation and Safety) Act, 1952, the Central Government is empowered (1) to adopt measures for the safety of coal mines or for conserving coal, (2) to authorise the Coal Board to deal with problems of the industry, (3) to levy excise duty on coal and coke, and (4) to frame rules for regulating the industry.

The coal industry is thus subjected to a comprehensive control embracing production, allocation, prices and wages. Levies on exports also differ from country to country.

The Second Plan aims at the long awaited rationalization of the coal industry both in the matter of regional distribution of coal and the preservation of coking coal for metallurgical process.

The target for coal production by 1960-61 has been fixed at 60 million tons. At the same time the question of conserving metallurgical coal and washing of coal up to grade 4 has been given high priority during the Second Five Year Plan. There are already three washeries in the private sector at the Jamadoba, West Bokaro and Lodna collieries which supply washed coal to the Tata Iron and Steel Company and the Indian Iron and Steel Company. It has already been decided to set up a coal washing plant at Bokaro-Kargali with a capacity for 2.2 million tons of coal per annum. The washed coal from here will be supplied to the Rourkela and Bhilai steel plants. Another washery is proposed to be set up at Durgapur. A provision of Rs. 6 crores has been made in the Plan for setting up coal washeries.

Because of the paucity of coal deposits in south India, high priority has been given to the development of the multi-purpose 'South Arcot Lignite Project' at Neyveli. This plant will be producing 380,000 tons per annum of carbonised briquettes.

Out of the 22 million tons of additional coal to be raised by 1960-61, 12 million tons will be raised in the public sector and 10 million tons in private sector.

To organise the production of coal in the public sector, Government have set up a wing under a Coal Production and Development Commissioner who will be the administrative head of the existing State collieries and the new collieries proposed to be established during the Plan period.

The control of coal, exercised under the colliery control order regarding distribution, price, etc., and the general control over private industry has been entrusted to a separate authority, the Coal Controller. The existing State collieries are at present administered departmentally, but it is proposed to set up a company\* to own and manage these as well as those collieries which will be established during the period of the Plan.

The approximate quantity of coal consumed by some of the principal consumers in India during the year was in million tons: Railways 13.37; iron and steel plants 3.31; electric supply companies 3.17; cement factories 1.78; cotton mills 1.81; paper mills 0.59; jute mills 0.47; engineering works 0.35; domestic coke 1.65; brick burning works 2.25.

### IRON ORE

On account of the high ash of Indian metallurgical coke, it is usual in estimating the Indian iron ore reserves to accept only ores with an iron content of 60 per cent and above. Ores below this iron content are used only in very small quantities in Indian blast furnaces.

India possesses about one-fourth of the total world reserves of iron ore and is the biggest single country possessing such a large quantity of iron ore deposits.

The region-wise reserves proved and indicated are shown below in million tons:

### HÆMATITE ORES

Bihar and Orissa: Singhbhum 1,047; Keonjhar 988; Boudh 648; Mayurbhanj 60; total 2,743.

Madhya Pradesh: Dhalli-Rajhara 114; Balladila 610; Rowghat 740; Jabalpur 100; total 1,564.

Bombay: Ratnagiri 5; Goa 15; Chanda 22; total 42.

Andhra .. .. .	41
Kashmir .. .. .	5
Mysore .. .. .	904
Rajasthan .. .. .	5
Punjab .. .. .	2
U P. .. .. .	10

Total (Hæmatite ores) .. 5,310 million tons.

The total possible reserves of hæmatite ores are 17,630 million tons.

### MAGNETITE ORES

The reserves proved and indicated in million tons are:

Madras: Salem-Tiruchirappalli 305.

Mysore: 215.

Bihar and Orissa: 5.

Himachal Pradesh: 60.

Andhra: 20.

Total (Magnetite ores): 605 million tons.

The total possible reserves of magnetite ores are 1,610 million tons.

### LIMONITIC AND SPATHIC ORES

The reserves proved and indicated of limonitic and spathic ores are:

Bengal: 500 million tons; and the possible reserves 2,000 million tons.

The grand total of all ores proved and indicated is 6,421 million tons and the possible reserves 21,240 million tons.

Large deposits of high grade ores are limited to a few areas of which the following fields require special mention :—

(i) *Singbhum and Orissa*: In what is known as the Singhbhum Iron Belt, consisting of the Singhbhum District, in which the Tata Iron & Steel Company's Steel Works are situated, and the neighbouring areas, there exist some of the richest iron ore deposits in the world. The iron content of the ore considered usable varies from 60 per cent to 65 per cent.

The proposed Durgapur steel plant will meet its requirement from the iron ores occurring in the neighbouring regions. The Boudh range which is the extension of the main iron ore range will feed the Rourkela steel plant. The Indian Bureau of Mines has worked in this area for proving iron ore deposits for the Rourkela steel plant.

(ii) *Mysore*: There are big deposits of hæmatite and quartz-magnetite ore in Mysore but the latter are of low-grade and would require concentration before using them. The ores used in the Bhadravati Iron Works are from the Bababudan Hills and can be compared to Singhbhum ores containing about 60 per cent iron.

Limonites deposits are also known to exist but they have not been properly explored owing to transport difficulties.

\* This Company has now been set up: National Coal Development Corporation (Private) Ltd. located in Ranchi.

(iii) **Madras:** Very large deposits, mainly magnetite, occur in Salem. They have been estimated at 305 million tons. They will, however, require concentration before use, and there may be considerable losses in the process.

(iv) **Madhya Pradesh:** Large deposits of hematite are found in the Bastar, Drug and Jabalpur districts of this State. Dhuli-Rajhara, Rowghat and Bailadila ranges in the Drug and Bastar districts are the major deposits in Madhya Pradesh. These three ranges are the main sources of iron ore for the Bhilai steel plant.

The exploratory work for blocking the iron ore deposits at Jharandalli in Rajhara Palar, from where the Bhilai steel plant will draw its supplies was done by the Indian Bureau of Mines. In addition to iron ore, the Indian Bureau of Mines has also done operations in respect of limestone at Bhanpuri, dolomite at Bhanpuri, dolomite at Batapara and manganese ore at Balaghat area, in Madhya Pradesh for the requirements of the Bhilai steel plant.

(v) **Other Areas:** In Andhra the Bailadila range is reported to have hematite deposits which are inaccessible and far away from coal fields.

The only source of high-phosphorus ore is in Bengal. It is poor in iron content being 35 per cent to 45 per cent and the more easily available ore in this locality has been exploited.

The deposits in the Ceded Districts in Andhra are estimated to be not less than 300 million tons.

The contribution of Mysore to iron ore production ranges between 40,000 and 60,000 tons, and the rest comes practically from Bihar and Orissa.

The following is the trend of production:—

Year	000 Tons
1950 .. ..	2,965
1951 .. ..	3,657
1952 .. ..	3,926
1953 .. ..	3,784
1954 .. ..	4,308
1955 .. ..	4,653

There has been a growing export trade in iron ore as indicated below:—

Year	Tons
1949-50 .. ..	4,300
1950-51 .. ..	84,513
1951-52 .. ..	280,036
1952-53 .. ..	811,025
1953-54 .. ..	1,281,977
1954-55 .. ..	1,008,878
1955-56 .. ..	1,362,776

The present yearly production of iron ore is 4.65 million tons and the target for the Second Five-Year Plan is 12.5 million tons. Of these, 10.3 million tons are expected to be consumed in the country, and 2.2 million tons would be available for export.

#### MANGANESE ORE

India is rich in manganese ore. Extensive deposits occur in Madhya Pradesh, Orissa, Andhra, Bombay, Mysore, Bihar, and Rajasthan. It is estimated that the deposits in the main belt of Nagpur and Bhandara in Bombay State and Balaghat in Madhya Pradesh alone contain reserves of the order of 100 million tons upto a depth of 800 ft., of which 55 million tons are of shipping grade ore having 45 per cent manganese and above. Twelve million tons of ore are estimated to be available from deposits in the other States. A major part of the output is exported at present.

The following is the trend of output and exports (000 tons).

Year	Production	Exports
1950 .. ..	888	780
1951 .. ..	1,292	907
1952 .. ..	1,462	1,409
1953 .. ..	1,902	1,654
1954 .. ..	1,413	1,042
1955 .. ..	1,583	837

To conserve good quality ore, export has been controlled since 1948. At present the export of high grade manganese ore is allowed to the extent of one million tons including 12,000 tons of battery grade. There is no quota restriction on the export of low grade. To conserve high grade ore Government is encouraging the setting up of beneficiation plant to improve low grade coal and promote export. A heavy media separation plant for beneficiating low grade ore has been set up by the C P M O. Co. at Balaghat. Similar plants are being put up by other industrialists. The Government is also encouraging the setting up of new units for the manufacture of ferro-manganese for which a production target of 160,000 tons during the Second Five-Year Plan has been proposed.

The export price for manganese ore which had touched Rs. 175 per ton during the Korean boom and remained almost steady around Rs. 155 in 1952 steadily declined to Rs. 110-7-0 by October 1953, then there was a recovery to Rs. 143 in October, 1954. It went up to Rs. 180 per ton in the latter half of 1955. Exports which had declined, also showed a tendency to pick up towards the end of 1954 as a sequel to the removal of the export duty.

The position improved in 1956. The price was quoted at Rs. 220 to Rs. 230 per ton during the months of July, August and September.

The Government imposed an export duty on grade basis again with effect from 1st September, 1956.

The export duty was as follows:—(i) 30% Mn or below: Free from duty; (ii) Over 30% Mn and not exceeding 40% Mn: Rs. 10 per ton; (iii) Over 40% Mn not exceeding 44% Mn: Rs. 20; (iv) Over 44% Mn: Rs. 30.

During 1955 the manganese ore produced, amounted to 1.58 million tons of which 0.92 million tons were exported.

By the end of Second Five-Year Plan period the production and export figures are expected to reach 2 million tons and 1.5 million tons respectively.

#### MICA

Mica has been treated as a strategic mineral and India accounts for a big slice of the world trade in it.

The principal mica deposits are concentrated in Bihar, Rajasthan and Andhra.

In Bihar the mica belt is 60 to 80 miles long and about 12 to 16 miles wide and produces "runby" mica which is in great demand all over the world.

At present Rajasthan is responsible for about 25 per cent of the Indian production. Most of the production from Rajasthan is sent to Bihar to be split and marketed.

The mica belt in the Nellore district in Andhra is about 40 miles long and 5 to 10 miles wide. The greater portion of the Andhra output is of "green" variety.

Statistics of mica production are not reliable and export figures are always higher than production figures. The quantity and value of mica exported from India are given below:—

Year	Quantity in 000 cwt.	Value in lakhs of Rs.
1948-49 .. ..	840.2	593.7
1949-50 .. ..	207.7	684.5
1950-51 .. ..	383.4	958.5
1951-52 .. ..	407.7	1320.9
1952-53 .. ..	284.1	901.1
1953-54 .. ..	254.6	709.6
1954-55 .. ..	373	672
1955-56 .. ..	519	837

#### CHROMITE

Chromite is an important strategic mineral of which India has moderate supplies.

The chief deposits are in the Singhbhum district of Bihar, the Mysore and Hassan districts of the Mysore State, the Ratnagiri and Sawant-

wadi areas of Bombay State, the Krishna district of Andhra, the Salem district of Madras and the Keonjhar district of Orissa.

No reliable estimates of reserves are available but the following figures in tons may be given:—Reserves in tons: Mysore (135,000); Bombay (87,000); Orissa (200,000); Salem (200,000).

The following table gives details regarding production and export of chromite ore:—

Year	Output	Exports
1950 .. ..	17	4
1951 .. ..	17	9
1952 .. ..	35	9
1953 .. ..	65	15
1954 .. ..	45	23
1955 .. ..	89	49

Export of chromite which was unrestricted till 1948 was brought under control and a ceiling of 10,000 tons was prescribed. In September 1955 the restriction on exports was removed.

#### MAGNESITE

Large deposits of magnesite used in the manufacture of magnesium salts, metallic magnesium and refractory bricks are known to occur in Salem (Madras), Hassan, Coorg and Mysore (Mysore), Almora (U P), Idar (Bombay), Durgapur (Rajasthan) and Singhbhum (Bihar).

Of these, the chief producing centres are Salem, Hassan and Mysore.

The deposits in Madras and Mysore States are known to contain 100 million tons upto a depth of 100 ft. Large deposits of magnesite have been discovered near Almora in U P.

About a half of the output is used in the manufacture of refractory bricks for steel works and a considerable quantity is exported.

The output and export of magnesite from Madras and Mysore from 1950 to 1955 are given below:—

Year	Output (Tons)	Exports (Cwt.)
1950 .. ..	52,859	16,465
1951 .. ..	117,460	49,085
1952 .. ..	89,441	31,277
1953 .. ..	92,748	42,533
1954 .. ..	70,507	25,302
1955 .. ..	57,509	21,879

#### GYPNUM

Gypsum deposits are known to exist in several parts of India. The better known gypsum bearing regions are in Rajasthan (Jodhpur, Bikaner and Jaisalmer) and in Madras (Tiruchirappalli district).

The total reserves are estimated at 95 million tons, of which more than half is located in Rajasthan.

Smaller deposits also occur in Tehri-Garhwal, Himachal Pradesh and parts of western India; but these have not been explored.

The annual production from Indian deposits from 1949 is given below:—

Year	Output (Tons)
1949 .. ..	199,944
1950 .. ..	206,366
1951 .. ..	203,602
1952 .. ..	411,000
1953 .. ..	586,000
1954 .. ..	610,000
1955 .. ..	690,000

The entire output is consumed in the country for the manufacture of fertilisers, cement and plaster of Paris. The cement industry consumes 3 to 4 lbs. of gypsum for one ton of cement produced. The annual requirements of the Sindri fertiliser factory is about 600,000 tons of gypsum.

Planning Commission has estimated that by the end of 1960-61 the country will require 1-97 million tons of gypsum. The figure is based on the capacity envisaged for industries which use this mineral. There is a proposal to set up two additional plants similar to Sindri during the Second Five-Year Plan. One of them is to be located near Bhakra-Nangal.

### SULPHUR

Native sulphur in deposits of large size is unknown in India though some occurrences have come to light in the hill ranges in the north of India, and small deposits of native sulphur produced by bacterial action on sulphates derived from sea-water have been found in the coastal tract of Masulipatnam and in the Barren Island.

There are occurrences in Puga and Kashmir but they are situated in a difficult terrain.

As there is no production of sulphur in India, the country's requirements are met from imports, for which the recent figures are given below :—

Year	Quantity (cwt.)
1951-52 .. ..	745,619
1952-53 .. ..	1,478,818
1953-54 .. ..	878,287
1954-55 .. ..	1,510,485
1955-56 .. ..	1,695,411

The mineral pyrites is another source of sulphur. It is found widely scattered in Amjor (Bihar), Taradevi (Sindh), Lashital (Kashmir), Ingaldhal, Chitaldurg (Mysore), Polur (Madras).

Substantial quantities of pyrites are associated with the gold deposits of Wynad in the Nilgiris district of Madras.

Copper pyrites deposits are also a source of sulphur. Some of the Indian coal e.g. Assam coal and Rewa coal are high in sulphur. It has been estimated that one ton of sulphur can be extracted from the wasting of every 100 tons of coal.

The industrial development of the country largely depends on sulphuric acid. Its production went up from 107,000 tons in 1951 to 165,000 tons in 1955. A target of 470,000 tons, representing a 300 per cent increase over the present output, has been set for the Second Plan.

### COPPER

India has only a small supply of copper. The country produces on an average 7,000 tons of fine refined copper per year, which is mostly utilised in the manufacture of brass for utensils and coins. The country's entire requirement of electrolytic copper is imported. The more recent figures of import of the copper metal are given below :—

Year	Quantity (000 cwt.)	Value in Rs. crores
1952-53 .. ..	..	..
1953-54 .. ..	..	..
1954-55 .. ..	540	8.7
1955-56 .. ..	362	8.7

The only area for copper ore in India is being worked by the Indian Copper Corporation at Ghatsila, Bihar, whose smelting plant is six miles away from the place.

There are other areas in the country where the ore might be worked. The more important of these are the Singhbhum copper belt of Bihar, Sikkim, Jalspaiguri and Darjeeling district (W. Bengal), Khetri, Daribo (Rajasthan), Tehri Garhwal (U.P.) and Gani (Indore). Exploration in Rajasthan, Sikkim, U.P. and Andhra continues.

### SALT

The country has been not only self-sufficient in salt since 1951 but has now (1957) an exportable surplus of over 100 lakh maunds. As late as

1947 or 1948 the country had to import about 120 lakh maunds each year to make up for the deficit.

The First Five-Year Plan envisaged a production of 837 lakh maunds (3.1 million tons) in 1955-56. This target was surpassed in 1953 when 861 lakh maunds (3.16 million tons) of salt were produced.

The production in 1956 was 872 lakh maunds (3.2 million tons) upto the beginning of November. It was calculated that the total production during the year would be about 882 lakh maunds (3.24 million tons).

The Second Plan target is 1,000 lakh maunds (3.7 million tons) in 1961-62.

The salt-producing areas are :

The coastal regions of Bombay, Kerala, Madras, Andhra, Orissa and West Bengal for salt from sea-brine ;

Rajasthan from lake brine as well as subterranean brine ;

Kharaghoda, Kuda, Jasdan, Dahlgam, Bajana in the Little Rann of Kutch all in Bombay for manufacture from subterranean brine ;

Mandi, for rock salt, in Himachal Pradesh.

The total fixed capital in the salt industry is estimated at Rs. 10 crores. In 1950-51 the total investment was about Rs. 5.8 crores, of which Rs. 0.9 crores were invested in the public sector. In 1954-55 the total investment rose to Rs. 8.3 crores, of which Rs. 1.1 crores were invested in the public sector.

The statistics of production of salt are given below (in lakh maunds) :

1946	479	1952	709
1947	516	1953	861
1948	635	1954	739
1949	556	1955	811
1950	713	1956	882
		(estimated)	
1951	744	1961-62 (target)	1,000

The capacity for production is unlimited. Actual production is limited by market conditions.

With the increase in production the exports have also increased. The statistics are as follows (in lakh maunds) :

1949	2
1956	70 (upto November)

The whole of the salt was exported to Japan. There is a trade agreement with Indonesia for the export to that country of 50,000 metric tons of salt (14 lakh maunds) during the period December 1956 to March 1957.

About 29,500 workers on an average would be engaged in the salt industry a day, of which about 25,500 would be in the private sector. Machinery is hardly in use except in some factories in Kutch and Kathiawad, where some processes are mechanized.

There are both licensed and unlicensed manufacturers. The latter are engaged in work on areas of 10 lakh acres and less. The number of licensed manufacturers is 4,298.

Salt is subject to the levy of a cess under the Salt Cess Act of 1953. To encourage the small-scale part of this industry Government exempted it from the payment of cess with effect from 15th May 1955. The small-scale manufacture was defined as manufacture by persons whose holdings did not exceed 10 acres. Later with effect from 23rd April 1956 all manufacturers with holdings of 10 acres to 100 acres were asked to pay a cess at the rate of only one anna a maund, while those with larger holdings continued to pay cess at the rate of two annas a maund.

There are one Central Board and five regional Boards—in Bombay, West Bengal and Orissa, Andhra, Madras, Sambhar Lake—to advise the Government on the proper utilization of the proceeds of the salt cess.

To induce smaller manufacturers to join together to form co-operative societies a number of concessions are made.

As mentioned above there were no imports during 1956. The Indo-Pakistan Trade Agreement concluded in July 1955 to import 10 lakh maunds of rock salt into India was extended upto 31st Jan. 1957. There has however been no import under this agreement as yet (Dec. 1956).

The minimum standard of edible salt continued to remain 94 per cent sodium chloride. It has been decided that the standard is to be raised to 95 per cent in 1957. The Salt Control Board has decided to impose control on unlicensed salt manufacture.

Eight test laboratories in the Madras region, one in the E. S. S. Division and two in the Bombay region have been opened.

Under the Second Five-Year Plan developments are proposed along the following lines: establishment of laboratories, development of works and improvement of brine and of water supply, purchase of plant and machinery, medical and educational facilities and other amenities for the staff.

An expenditure of Rs. two crores is to be incurred both in the public and private sectors.

A scheme for sinking shafts into Mandi mines has been approved. This is expected to increase the production from 1.5 lakh maunds to 4 lakh maunds.

The Salt Commissioner prepares every year a programme of distribution to every State based on per capita consumption. The supply from the source to the consuming areas is regulated under a zonal scheme.

The Salt Department is now under the Ministry of Commerce and Industry. The head of the Department is designated Salt Commissioner; the headquarters are in New Delhi. He is assisted by four Regional Officers, one each at Sambhar, Bombay, Madras and Calcutta.

### RARE METALS

The recent technological advances for meeting the rigorous demands of modern times have focussed the attention of the various countries on the possibilities of using new metals or modifying known metals. Some of the rare metals which were scientific curiosities till recently are now being produced on a commercial scale in Western countries. It is known that the soils of India contain ores from which some of these rare metals can be recovered.

The Government of India and the Kerala Government have jointly floated a joint-stock company, the Indian Rare Earths Ltd., to process the monazite sands of Travancore. The Company hopes to extract a mixture of oxides of rare earths containing cerium, lanthanum, praseodymium, neodymium and ten, other metals of the rare earth group.

Cerium is now being extensively used in glass manufacture, cores of cinema electrodes, catalyst in chemical manufacture, as abrasive in optical glass fabrication and in some structures of steel.

The use of thorium salts in the manufacture of incandescent gas mantles is well known. It is also used in glass manufacture, benzene synthesis, metallurgy and cloth impregnation. Intensive search has located deposits of pitch blend containing a high percentage of uranium oxides in Rajasthan. A belt of uranium minerals over 150 miles long has been found in Bihar and there are sporadic occurrences in Madras as well.

Vanadium is of great value to the manufacture of certain types of steel. Appreciable reserves bearing titaniferous iron ores containing about 3 per cent oxides of vanadium have been discovered in Bihar. Tungsten ore accepted as of strategic importance is found in parts of West Bengal and Rajasthan. Chromite ores occur mostly in Chitaldurg (Mysore) and Singhbhum (Bihar). The minerals containing columbium

and tantalum used to prevent weld decay and corrosion respectively have been traced in small quantities in the mica producing areas like Nellore, Monghyr, Gaya, Mysore and Kerala.

Beryllium used in metallic springs and in manufacturing X-ray tubes is produced from the ore known by that name. It is found in Rajasthan, Bihar and Nellore in Andhra. Gallium and germanium are found in coal. More recently a rich source in the mineral sphalerite was reported from Nepal. The National Metallurgical Laboratory at Jamshedpur is examining the economics of Mysore and Singhbhum chromites and of low-grade chrome ores from Talur (Mysore) and has evolved a new electrolytic

technique for separating beryllia from beryl. The National Chemical Laboratory of Poona has developed quick methods for estimating vanadium, beryllium, uranium and germanium.

Lithium is an important light metal of strategic significance. In India lithium minerals were first noticed as early as in 1874, and are commonly found as constituents of granite pegmatites. The sources are Pihara (Bihar), Jodhpur, Bastar (Madhya Pradesh) and Ooregam (Mysore). Kashmir is reported to have crystalline white blocks in a valley north of the famous sapphire mines. Nevertheless no systematic survey of the resources has yet been undertaken.

What is believed to be probably the world's biggest deposits of radioactive minerals was

located "somewhere in North East India" by the Indian Atomic Energy Department early in 1957.

Investigations carried out showed that the deposit had over 3.3 million tons of ore containing 300,000 tons of thorium of concentration of about 10 per cent. and 10,000 tons of uranium of concentration of 0.3 to 0.4 per cent.

The deposits also contain about 80 million tons of limonite. It is expected that further investigation would lead to doubling the present estimates.

The deposit is, therefore, considered more important than the famous beach deposits of Travancore, hitherto recognised as one of the world's richest deposits.

### QUANTITY AND VALUE OF MINERAL PRODUCTION IN INDIA

(Value in '000 Rupees).

Minerals	Unit	1954		1955	
		Quantity	Value	Quantity	Value
Apatite (Including phosphatic Nodules) ..	Tons	2,292	38	5,562	83

# COMMUNITY DEVELOPMENT PROJECTS

(See end of article for position at end of Sept. 1956).

IT was proposed that during the First Plan period 1951-56 the Community Development Projects should cover one-fourth of the country's villages.

This meant the initiation of work on 1,200 Community Development Blocks, covering 1,20,000 villages with a population of about 80 millions.

In the Second Five-Year Plan, the entire country is to be covered with about 5,000 Blocks, of which 40 per cent will be marked for intensive development. About 3,49,000 workers will be required.

The whole programme was estimated to cost Rs 263 crores. The Second Plan allotment is Rs 200 crores.

The progress from year to year during the First Plan period 1951-56 is given by the following tables:

**National Extension Blocks**

Years.	No. of blocks or projects.	Villages covered.	Population affected (millions)
1952-53 ..	—	—	—
1953-54 ..	251	25,100	18.6
1954-55 ..	253	25,400	18.7
1955-56 ..	396	39,600	21.1
Total ..	900	90,000	59.4

**Community Development Projects**

Years.	No. of blocks or projects.	Villages covered.	Population affected (millions)
1952-53 ..	217	25,264	18.4
1953-54 ..	53	7,693	4.0
1954-55 ..	—	—	—
1955-56 ..	—	—	—
Total ..	800	32,957	20.4

The total number of all blocks allotted was thus 1,200, the number of villages covered 1,22,957, and the number of persons covered 79.8 millions.

Of these, 163 N.E.S. Blocks were allotted to the States in Jan 1956. The work on these Blocks was scheduled to be taken up on Apr. 1, 1956. The total coverage under these Blocks was 16,300 villages and 11 million persons.

The total expenditure incurred during the First Plan period from 1951 April, to 1956 March was Rs. 46 crores and the people's contribution was estimated at Rs. 26 crores.

Village institutions have played an important part in enlisting the participation of the people in the execution of development programme. Thus, considerable use is being made of local

bodies like the panchayats, co-operative societies, and union boards for the execution of development programmes.

In some areas success has been achieved by entrusting development activities to *ad hoc*, non-statutory and non-elective bodies, such as, the Gram Vikas Mandals in parts of Madhya Pradesh and Bombay, the Gram Mangal Samities in Orissa, the Gram Seva Sanghams in parts of Madras and the Palli Unnayan Samities in West Bengal.

Students and N.C.C. Cadets have also played an important part in development activities in many places.

It is now agreed that all works of village improvement within the jurisdiction of panchayats such as laying of streets, construction of culverts, new wells, roads etc. should be entrusted to panchayats. They should be authorized to plan and execute works upto a limit of Rs 2,000 for a period of three years provided an equal amount in cash, kind or labour is contributed by the people.

## PHYSICAL ACHIEVEMENT

The physical achievements till the end of Sept 1955 were as follows:

Till the end of Sept. 1955 3,112,000 maunds of improved seeds, 67,96,000 maunds of artificial fertilizers, 2,37,000 labour saving implements and spare parts were sold to farmers. About 12,23,000 compost pits were dug. About 1,19,000 acres of land were planted with fruit trees and 2,69,000 acres were brought under vegetable cultivation. About 8,42,000 acres of land were reclaimed which will permanently increase food production by about 2.8 lakh tons.

In the Project and N.E.S. areas a total of 1,731 breeding centres including 138 artificial insemination centres have been established, while 6,547 pedigree bulls were supplied and 8,66,000 scrub bulls castrated. A total of 71 lakh bovines (cattle) received treatment. In addition, 1,75,000 birds (poultry) of improved exotic breeds were supplied and the inland water-spreads of the areas were stocked with 153 lakh fingerlings.

Other physical achievements are as under:

Land reclaimed 8,05,000 acres, additional area brought under irrigation 1.56 mln acres; soakage pits constructed 2,79,000; rural latrines 67,000, drains 36 lakh yds; wells constructed 28,000, wells renovated 45,000; new schools 12,000, ordinary schools converted into Basic 4,359; adult education centres 30,000; No. of adults trained 6,05,000; community centres started 65,000; community entertainments organized 1,73,000, units of peoples' organizations developed 56,000; pucca roads constructed 3,361 miles; kacha roads constructed 25,000 miles; production-cum-training centres started 724; new co-operative societies 28,000; new members 8,11,000; village houses constructed 25,000; village house reconditioned 28,000.

People's contribution (cash, kind and labour) was Rs 18.70 crores out of a total Government expenditure of Rs. 31.03 crores.

## Minor Irrigation Works

Out of the area under Community Projects and N.E.S. Blocks, about 35 million acres (position: March 1955) is under crops of which about 7 million acres is under irrigation. From the figures for improved seeds distributed it is estimated that about 8 to 10 per cent of the cropped area has been covered.

Since irrigation is one of the quickest means to step up agricultural production, it has been given a good deal of emphasis in project areas.

Till the end of Sept., 1955, the additional area brought under irrigation in project areas is as follows:

	Expenditure	Additional area brought under irrigation
	Rs.	
Community Projects (1952-53 series)	3.35 crores	8.85 lakh acres
Community Development Blocks (1953-54 series)	0.54 "	0.91 "
N.E.S. Blocks	0.64 "	4.19 "
Community Development Blocks (1955-56 series)	0.2 "	1.47 "
Total ..	4.65 crores	15.42 "

One of the important achievements of the minor irrigation programme in the Community Projects is that the cultivator in many parts of the country has learnt to build his own irrigation works. Another significant achievement is that in some parts of the country, it has been possible to build medium sized irrigation works through private enterprise. Normally, such works are constructed through State agencies.

The development of irrigation through co-operation is another important achievement in the community projects, e.g. the very successful Irrigation Co-operative Societies in the Kakinada-Peddapuram Project in Andhra, and also in Godavari District.

In North Gujarat (Bombay State) and the Punjab lift irrigation co-operative societies and tube-well irrigation societies have been formed on a small scale.

Lastly, the minor irrigation programme in community projects is to play an important role in developing irrigation quickly in the newly constructed river valley projects or other irrigation sources where water already stored is not being fully made use of.

## Industry, Health, Education

Under the Cottage Industries Programme, Rs. 4.5 lakhs out of Rs. 65 lakhs were provided per Community Project started under 1952-53 series. Fifty per cent of this allocation, viz., Rs. 2.25 lakhs is 'loan' and the other 50 per cent is 'other than loan'. For the rest of the Community Project blocks, Rs. 1.25 lakhs are provided for cottage industries out of the total budget provision of Rs. 15 lakhs for a project. Out of the Rs. 1.25 lakhs, Rs. 75,000 are 'loan' and Rs. 50,000 are 'other than loan'.

The community projects have been setting up training-cum-demonstration centres for giving improved training in the rural industries and the artisans who have received such training are given loans to buy the better types of tools and raw materials.

About 1,000 detailed schemes costing over two and a half crores of rupees were sanctioned for projects started in 1952-53, in the various States.

Some of the States have on the advice of the C.P.A. liberalized terms governing grant of loans so that the needy artisan may get small loans on personal security, or the security of his equipment and implements instead of furnishing security in the form of immovable property.

Twenty-six pilot projects are in operation. This is an activity with which the Village and Small-Scale Industries Board is associated. Industrial schemes for the pilot projects have also been drawn up.

To provide necessary encouragement States have been asked to set up Action Committees with the State Development Commissioners as Chairmen.

In the field of co-operation, about 27,000 co-operative societies were started with a membership of 7,84,000 in the Project and N.E.S. areas.

It is the aim to establish one multipurpose co-operative society for each village level workers' circle. It was also decided that about 50 per cent of the rural credit provided by the Central Government (Rs. 5 crores medium term loans and Rs. 5 crores long-term loans) were to be used in the Project N.E.S. areas.

The fourth Development Commissioners' conference held at Simla recommended that in view of the large area in charge of each Social Education Officer, work should be organised on the basis of a full, large and small programme. The full programme was to be implemented in one village by each Social Education Officer, the large in ten villages which are the headquarters of the Gram Sevaks, and the small in the remaining villages. The contents of the three types of programmes, were finalised. Quantitative targets to be achieved during the period of three years were also agreed to.

Pilot projects for intensive work among women and children were also recommended by this conference of Development Commissioners. Two of these have already been started in Madhya Pradesh in Hoshangabad and in Bombay in Chiklil.

The Central Social Welfare Board set up about 400 Welfare Extension Projects during the period 1954-1957, each project covering about 25 villages. The total number of villages covered upto March 1957 was in the neighbourhood of 10,000.

The work of the Social Welfare Board and of the Community Projects Administration is to be co-ordinated. When this materializes a village project would cover 100 instead of 25 villages.

The progress in organising adult education centres is maintained. As against the total of 22,054 by the end of March, 1955, the figure at the end of September, 1955 was 30,000. The number of community recreation centres also increased from 43,357 to 65,000 during the same period. Starting of recreational activities and literary classes are still the spearhead of social education programmes, but greater efforts are noticeable in organising youth clubs, children clubs, Mahila Samaj, sports clubs, etc.

The total of people's organisations developed was 56,000 by the end of September, 1955, as against the total of 30,372 at the end of March, 1955.

The majority of State Governments have set up primary health centres according to the programme. A centre generally consists of a dispensary, a consulting room with diagnostic facilities and a ward of six beds. In addition, there are also generally three maternity sub-centres in each Block, each under the charge of a qualified mid-wife.

A pilot project of rinderpest eradication was taken up in all the States lying south of the river Krishna. Under this project most of the cattle in the Community Project and N.E.S. areas of the States were protected against rinderpest, thereby ridding them permanently of the threat of this devastating disease.

Under the pilot project of poultry development, 30 demonstration centres and 30 poultry development blocks were established throughout the country, mostly in the Community Project and N.E.S. Blocks, and before the close of 1955-56, twenty more such centres and blocks are expected to be opened in the Community Project and N.E.S. areas.

Each Block comprises 100 villages, covering about 160 sq. miles, a cultivated area of about 50,000 acres and a population of about 66,000.

It is estimated that there would be about four Blocks in each district in a State out of which one or more might be selected for intensive development.

Generally speaking, a project is to be completed in three years, the period being broken into five stages: conception, three months; initiation, six months; operation, 18 months; consolidation, 6 months; and finalization, 3 months.

## EXPENDITURE

Government expenditure and people's contribution in the community projects/blocks and N.E.S. blocks upto Sept. 30, 1955 are given in the table below:

	Government expenditure		People's Contribution	
	(Rs. crores)	% of 'pro rata targets	Value in Rs. crores	Value per 1,000 persons (Rs.)
<b>Community Projects/Blocks</b>				
1. 1952-53 Series (Oct. '52 to Sept. '55)	10.92	81	7.78	4,680
2. 1953-54 Series (Oct. '53 to Sept. '55)	3.39	64	1.54	3,468
3. 1955-56 Series (converted C.D. Blocks)	2.66	38	2.63	2,470
<b>N. E. S. Blocks</b>				
4. 1953-54 Series (Oct. '53 to Sept. '54)	2.60	64	3.60	3,501
5. 1954-55 Series (Oct. '54 to Sept. '55)	2.15	63	2.71	1,684
6. 1955-56 Series (Apr. '55 to Sept. '55)	0.22	27	0.54	640
Total ..	31.03	72	18.70	2,823

Note: Expenditure includes cost of imported equipment, received upto 31st March, 1955. People's contribution includes cash, kind and labour.

The total expenditure during the First Plan period was Rs. 46 crores, and the people's contribution Rs. 26 crores.

The total Government expenditure upto Sept 1955 including the cost of imported equipment amounted to Rs. 19.92 crores. This is about 81 per cent of the target expenditure for the period.

Government expenditure as percentage of target expenditure for the period on different items was as follows: State and project headquarters 122; Agriculture and Animal Husbandry 82; Irrigation 65; Reclamation 51; Health and Sanitation 65; Education 76; Social education 92; Communications 64; Arts and Crafts 46; All fields 81.

Expenditure on sets of projects was as follows: Community Development Blocks 1953-54: Rs. 3.39 crores (64 per cent of target); Community Development Blocks 1955-56 (converted from N.E.S.): Rs. 2.66 crores (38 per cent); N.E.S. Blocks 1953-54: Rs. 2.60 crores (64 per cent); N.E.S. Blocks 1954-55: Rs. 2.15 crores (63 per cent); N.E.S. Blocks 1955-56: Rs. 0.22 crores (27 per cent).

The money available from the U.S. Government—the Indo-American Technical Co-operation Fund—for the import of equipment for the community development projects is \$12,771,860 in 1955-56 equipment worth 1.6 million dollars was imported. Besides this, equipment worth Rs. 3 lakhs was procured from indigenous manufacturers.

## ORIGINAL ESTIMATES

Original estimates are given below.

Total cost of programme—Rs. 156.2 crores.  
Share of Centre—Rs. 107.2 crores.  
Share of States—Rs. 27.0 crores.  
Loan for short-term credit—Rs. 27.0 crores.

Total cost during First Plan period—Rs. 101.6 crores.

Share of Centre during Plan period—Rs. 73.8 crores.  
Share of States during Plan period—Rs. 18.0 crores.

Loans for short-term credit—Rs. 15.8 crores.  
Recurring expenditure—Rs. 21.7 crores.  
Non-recurring expenditure—Rs. 21 crores.

Cost of single Development Block for 3 years—Rs. 7.5 lakhs.

Share of Centre—Rs. 3.25 lakhs.  
Share of State—Rs. 1.25 lakhs.  
Short term loans—Rs. 3 lakhs.

Cost of single Intensive Development Block for 3 years—Rs. 15 lakhs.

Share of Centre—Rs. 12.07 lakhs.  
Share of State—Rs. 2.93 lakhs.

Allotment under First Plan—Rs. 90 crores

Some details about the major items about cost given above are as follows:—

## Development Block:—

Cost of staff—Rs. 33,000 per annum.	
Salary of Block Development officer	Rs. 250-400 p.m.
Salary of Social Education organizer	125 p.m.
Overseer with public health bias	250 "
Village level worker	100 "
Transport, office equipment, building, stores	Rs. 60,000 for 3 years
Local works	1,60,000 "
Social education	25,000 "
Grants-in-aid to local institutions	25,000 "
Loan for minor irrigation works	1,00,000 "
Loan for short term credit	3,00,000 "
Total cost (includes items not shown above)	Rs. 7.5 lakhs
Recurring expenditure	1.5 "
Non-recurring expenditure	2.0 "
Loan	4.0 "
Share of Central Govt. (50 per cent of recurring and 75 per cent of non-recurring plus loans other than short-term)	3.25 "
Share of States	1.25 "
Short-term loans	3.0 "

## Intensive Development Block:—

Total cost for 3 years	Rs. 15.0 lakhs
Personnel	2.0 "
Transport, office equipment	0.25 "
Tractors	0.24 "
Demonstration equipment	0.10 "
Extension sub-quarters	0.09 "
Repair service centre	0.05 "
Marketing centre	0.10 "
Key village scheme	0.29 "
Irrigation	5.00 "
Reclamation	0.25 "
Dispensary (recurring)	0.10 "
Dispensary (building)	0.10 "
Dispensary (equipment)	0.10 "
Drinking water	0.50 "
Drainage and sanitation	0.25 "
Education	1.50 "
Social education	0.50 "
Communications	1.25 "
Rural arts and crafts	1.25 "
Housing (staff and rural housing)	1.10 "
Indian contribution	13.6 "
American	1.4 "
Recurring expenditure	4.23 "
Non-recurring expenditure	10.77 "
Loans	7.40 "
Share of Centre (75 per cent of non-recurring, 50 per cent of recurring plus loans)	12.07 "
Share of State Government	2.93 "

Development projects are of three main types. First of all, there are envisaged the so-called "basic" community development projects, National Extension Service (N.E.S.) in which the primary emphasis will be on material necessities food, clothing, shelter, with some work on public health and sanitation, education and road building.

Second, there are to be the so-called "composite" development projects (Community Projects), in which emphasis will be on development of small industries, as well as on agricultural production. The aim is the all-round improvement of the farmer and his life social, cultural and economic. The industry phase of these "composites," it is proposed, will be patterned after the industry-development project in Nilokheri and Faridabad.

The third main type of project is a training centre for instructing village workers. Each

of these centres would be located either in or nearby rural development areas to permit the students practical on-the-job training in the villages.

The programme includes the following activities: agriculture and allied subjects, (upgrading of cattle by artificial insemination and natural breeding, supply of birds and eggs of improved breeds and supply of fingerlings), communications, education, health, employment, housing, social welfare, training.

More specifically the proposed programme aims at these objectives in each village: two surface wells or other facility per village to assure a safe, clean drinking water supply; tube-wells for irrigation in those areas where tube-wells can be sunk (approximately a tenth of the proposed projects are in tube well areas); in other areas, assistance to canal, tank and well construction

for irrigation purposes, with the proposal that at least half the land in each village be given improved irrigation; reclamation of culturable waste land where feasible; sanitary services plus improvement of village drainage as a sanitation measure; improvement of roads to link village to village; and facilities for primary and adult education.

Included in the plans for each project and block is the development of a "Mandi" unit for each 15 to 25 villages where one does not already exist. Under present proposals, this Mandi unit would have a dispensary and health centre reaching out to the villagers through mobile units and serviced by a health visitor, midwives and the sanitary inspector. It would also have a transport and tractor servicing centre, a centre for marketing and shopping, a storage godown for agricultural produce and veterinary centre.

### ADMINISTRATION

The administrative structure is somewhat like this:

At the very top in Delhi is the Ministry of Community Development with a Minister in charge, who is a member of the Government of India.

Matters of basic policy go before a Central Committee consisting of members of the Planning Commission and the Ministers of Food and Agriculture and Community Development with the Prime Minister as Chairman.

In each of the States there is a State Development Committee consisting of the Chief Minister and Ministers in charge of the development departments, for laying down general principles.

There is a Development Commissioner who acts as secretary of the Committee. He is the leader of a team consisting of the heads of the development departments or secretaries to Government in those departments. In some States the Chief Secretary himself may be the Development Commissioner. In others States it may be someone else with the rank of an Additional Chief Secretary. In any case his rank is never below that of a Secretary to Government.

At the District level there is a District Development or Planning Committee. This Committee will consist among others of the district heads of the development departments and Chairman and Vice-Chairman of the District Board.

The Collector of the District will be the Chairman of this Committee, and the District Development Officer (also called Extension or Planning Officer) will be the secretary.

At the sub-divisional level the Revenue Divisional Officer may act as the Extension or Development Officer or there may be an assistant to him who will be entrusted with the work of an Extension Officer.

There are information centres at Block head quarters—the number set up upto March 1957 being 847. By the end of 1961 all Blocks will have information centres.

The core of the whole organization is the multi-purpose village worker (Gram Sevak) who is directly in touch with the villager and instructs, guides and educates him in his day to day work, and the technical supervisor whose duty is to supervise the work of a group of the village level workers.

A multi-purpose village worker will generally be in charge of about 10 villages.

As he is greatly over-worked, it is now proposed to give him an auxiliary.

The agency in the village through which much of the administration will be carried on such as distribution of improved seeds will be the village panchayat.

In each project area there will be seven Social Education Organizers, three of whom will generally be women. Of these seven one will be the Chief Education Organizer.

The trained technical personnel includes besides, of course, the village level workers and social education organizers the following categories: agricultural extension supervisors, veterinary doctors, co-operative and panchayat officers, school teachers, doctors, compounders, sanitary inspectors, lady health visitors, midwives, engineers, overseers, mechanics.

The existing staff of the various development departments (Agriculture, Animal Husbandry, Medical, Education, Public Works, Cottage Industries, Co-operation) has been absorbed in the N.E.S. organization. Thus it can be assumed that about one-fourth of the staff required already exists in the area.

The majority of the Development Blocks are under the C.P.A., the rest of the Blocks and all the training centres for the staff are under the Ministry of Food and Agriculture.

The position of staff as on 30th Sept, 1955 was as follows (The figures in brackets show the shortage): Block Development Officers: 847 (17), Village Level Workers: 10,436 (364); Agriculture Extension Officers: 821 (25); Veterinary Doctors: 628 (113); Co-operative and Panchayat Inspectors: 705 (64); Social Education Organizers: 1,524 (169); Overseers: 967 (117); Doctors: 496 (56); Sanitary Inspectors: 385 (47); Lady Health Visitors: 124 (117); Midwives: 733 (299).

Overseers include 77 engineers in Bombay. Staff requirements for covering the whole country with National Extension and Community Projects are given below:

### Staff Requirements

CATEGORY.	N. E. S. Blocks 2,404		N. E. S. Blocks 2,524 for intensive development.		TOTAL.

Mechanics ..	..	..	3	7,572	7,572
<b>Total</b> ..		55,202		2,93,625	3,48,917

Including certain other categories, the total requirements are of the order of 350,000 persons.

Forty-three centres for training Gram Sevaks (Village Level Workers) have been set up. The annual out-put from the 43 centres will be 5,000. The position at the end of Dec. 1955 was 11,491 Gram Sevaks had in all been trained and 3,222 were undergoing training. These centres are designed to give a training in agriculture, animal husbandry, public health, education, co-operation, panchayats, village housing.

Group Level Workers give support to V.L.W.'s in the solution of difficult problems. It has been decided to train 2,200 personnel of this category each year. The number trained and of those undergoing training were respectively 1,268 and 82 as on Dec. 31, 1955.

Each Development Block requires three Group Level Workers, one each for agriculture, animal husbandry, co-operation and panchayats. The total requirements of each category is about 5,000. Existing facilities are enough for meeting requirements of trained personnel in basic agriculture. As regards animal husbandry the present annual turn-over is about 275 to 300 graduates. Ten new colleges have been sanctioned for conducting two-year emergency diploma courses, and five additional shifts in the existing colleges having a four-year course. As a result of this 1,000 diploma holders and 340 graduates will be available in 1957 and 1959 respectively.

For the training of co-operative officers, 3 centres have been set up at Uttarpara (W. Bengal), Kotah (Rajasthan), Gopalpur (Orissa). Five more are proposed to be set up. The course will be of 10 months' duration with an interval of six weeks' study tour. Each centre will train 100 trainees a year.

Five centres for training social education organizers were started on April 1, 1953. These centres are situated at Nilokheri, Hyderabad, Gandhigram, Shantiniketan and Allahabad. Of these, the centre at Allahabad will train Chief Social Education Organizers. The training period will be five months. Each centre will train 150 persons a year. As on Dec. 31, 1955, 1,350 Social Education Organizers were trained.

There is a centre at the Baroda University to give a specialized supplementary training. The course is of three months' duration and the annual out-turn 100 trainees a year.

Two new centres were established at Belur Math in W. Bengal and Udaipur in Rajasthan.

The centre at Nilokheri is administered directly by the C.P.A., while the others are run under the auspices of established institutions.

The expenses of training the education organizers are shared among the Government of India, the T.C.A. and the Ford Foundation.

For Block Development Officers the training centres are at Nilokheri, Hyderabad and Ranchi. As on Dec. 31, 1955, 756 Block Development Officers had been trained, and 59 were undergoing training at the three Development Officers' Training Centres.

The first course of training for the Block Level Extension Workers in cottage industry began at the four Regional Institutes at which 63 officers were undergoing training in Dec. 1955. Another 100 were undergoing training in khadi and village industries at the Nasik and Ahmedabad Vidyalayas. At the Hyderabad and Gopalpur (Orissa) training centres 135 Block Level Extension Officers were undergoing training in co-operation.

In the field of health, existing facilities are adequate to meet the requirements of doctors, compounders and sanitary inspectors. Twenty-seven schools for the training of auxiliary nurse-mid-wives, 6 for mid-wives, and 9 for lady health visitors were in operation. At the end of Dec. 1955, 538, 118 and 128 candidates respectively were undergoing training.

Orientation training was given to 520 health personnel at three centres Ponnammallee (Madras), Singur (W. Bengal) and Najafgarh (Delhi). Thirty-six persons were under training.

The total number of health personnel trained upto March 1955 was 295.

"Workshops" are being established in twenty of the extension training centres for imparting training to gram sevaks and village artisans in smithy and carpentry with special emphasis on repairs and manufacture of improved agricultural implements.

Home economics wings are being attached to 25 of the extension training centres to train 20 women annually at each centre. In addition

to this 2 more auxiliary centres had been sanctioned one each in the States of Madhya Pradesh at Indore under the auspices of Kasturba Trust Centre, and the other at Amravati (Bombay) under the auspices of the Shivaji Educational Institute, Amravati. These centres will also provide training facilities for 20 women village level workers in each centre. The duration of the course at each of the total 27 home science centres is 12 months.

Out of the 27 centres, 17 were functioning at the end of 1955.

There are arrangements for the training of operators of heavy equipment such as tractors, road-rollers, graders, rippers and also for multipurpose overseers.

Forty-three training centres for Gram Sevaks are located as follows: Samalkot (Andhra), Jarhat (Assam), Patna, Muzaffarpur (Bihar), Anand Manjri (Bombay), Dharwar (Mysore), Powarkheda (Madhya Pradesh), Sindewahi (Madhya Pradesh), Gandhigram (Madras), Parli (Kerala), Bolangir (Orissa), Nilokheri (Punjab), Batala (Punjab), Bakshi-ka-Talab (Uttar Pradesh), Hawalbagh (Uttar Pradesh), Chirgaon (Uttar Pradesh), Ghazipur (Uttar Pradesh), Gorakhpur, Bulandshahr (Uttar Pradesh), Burdwan Farm (W. Bengal), Fulla I (West Bengal), Fulla II (West Bengal), Himayatsagar (Hyderabad), Antri (Madhya Bharat), Mandya (Mysore), Nabha (Punjab), Kotah (Rajasthan), Junagadh (Bombay), Mavelikara (Kerala), Bafargah (M.P.), Mashobra (Himachal Pradesh), Nowgong (M.P.), Srinagar (Jammu and Kashmir).

Gopannapalam (Andhra), Khannapara (Assam), Sigauli (Bihar), Bhavanagar (Madras), Betul (M.P.), Tharsa (M.P.), Chin-sarah (W. Bengal), Rajinder Nagar (Farbhanli, Bombay), Padzanpura (Kashmir), Sheoganj (Rajasthan).

The Social Education Training centres (as mentioned above) are located as follows:

Gandhigram (Madras), Nilokheri (Punjab), Allahabad, Shantiniketan, Himayatsagar (Hyderabad), Baroda, Belur Math, Ranchi, Udaipur.

Block Development Officers are trained at: Dipatoli camp, Ranchi (Bihar), Nilokheri (Punjab), Himayatsagar (Hyderabad).

Public Health training centres are at: Arni (Madras), Singur (W. Bengal), Najafgarh (Delhi), Ranchi.

## STATE-WISE DISTRIBUTION OF PROJECTS

An Operations Agreement signed in May 1952 provided for the starting of 55 projects.

The distribution and location of these projects is given in the following table:

### Andhra

1. Project—Kurnool-Cuddapah Canal Area.
2. Project—Kaklnada-Peddapuram—East Godavari District.
3. Project—Nizambad District.
4. Block—Laknawaram (Warangal District).

### Assam

1. Project—Cachar District.
2. Project—Darrang District.
3. Block—Garo Hills, tribal area.
4. Block—Golaghat, tribal area.

### Bihar

1. Project—Darbhanga-Monghyr Districts.
2. Project—Shahabad District.
3. Project—Ranchi District.
4. Project—Patna District.
5. Block—Santhal Parganas District.

### Bombay

1. Project—Mehsana District.
2. Project—Kolhapur District.
3. Project—Thana-Kolaba Districts.
4. Block—Sabarkantha District.
5. Project—Amravati District.
6. Project—Sorath District.
7. Block—Kutch District.

### Madhya Pradesh

1. Project—Raipur District.
2. Project—Hoshangabad District.
3. Project—Bastar District.
4. Project—Sehore-Raisen.
5. Block—Nazad-Razhura Tehsil.
6. Project—Gird District.
7. Project—Nimar District.

### Madras

1. Project—Coimbatore District.
2. Project—Madurai District.

### Orissa

1. Project—Kalahandi District.
2. Project—Balasore District.
3. Project—Ganjam District.

### Punjab

1. Project—Gurdaspur District.
2. Project—Ambala District.
3. Project—Jullundur District.
4. Block—Nilokheri.
5. Two Blocks—Faridabad.
6. Project—Rohtak District.
7. Project—Dhuri Tehsil (Sangrur District).

### Uttar Pradesh

1. Project—Gorakhpur District.
2. Project—Azamgarh District.
3. Project—Faizabad District.
4. Project—Mainpuri District.
5. Project—Jhansi District.
6. Project—Almora District.

### West Bengal

1. Block (composite)—Birbhum District, Sadar Sub-division.
2. Block (composite)—Birbhum District, Sadar Tehsil.
3. Block (composite)—Birbhum District, Rampurhat Tehsil.
4. Block (composite)—Burdwan District, Burdwan-Sadar-Katwa Tehsils.
5. Block (composite)—Burdwan District, Burdwan-Sadar Tehsils.
6. Block (composite)—24 Parganas District, Sadar Tehsil.
7. Block (composite)—Midnapore District, Jhargram Tehsil.
8. Block (composite)—Nadia District, Ranaghat Sub-division.

### Mysore

1. Project—Shimoga District.
2. Project—Belgaum District.
3. Project—South Kanara District.
4. Project—Raichur District.
5. Project—Guilbarga District.
6. Block—Coorg.

### Rajasthan

1. Block—Sawal Madhopur.
2. Block—Bikaner-Ganganagar District.
3. Block—Alwar District.
4. Block—Kotah District.
5. Block—Pali District.
6. Block—Udaipur District.
7. Block—Dungarpur District.
8. Block—Pirangan (Ajmer).

**Kerala**

1. Project—Trichur District.
2. Project—Trivandrum District.
3. Project—Malabar area.

**Delhi**

1. Block—Allpur area.

**Himachal Pradesh**

1. Project—Sirmur.
2. Block—Saddar (Bilaspur).

**Manipur**

1. Block—Thoubal Tehsil.

**Tripura**

1. Block—Nutanbavell and Old Agartala.

**North-East Frontier Agency**

1. Block—Ahor Hills District.

**Jammu and Kashmir**

1. Badgam Block.
2. Ladakh Block.
3. Mansar Block.

**SECOND SET OF PROJECTS**

In December 1952 a supplement to the first operational agreement was signed, whereby 65 new Development Blocks were to be started.

**Andhra****2 DEVELOPMENT BLOCKS.**

1. Chittoor District.
2. Ichapuram—Srikakulam District.

**Assam****3 DEVELOPMENT BLOCKS**

1. North Lakhimpore Block consisting of 8 Mouzas of the Ranganadi Circle of the Lakhimpore District.
2. Nowgong Block consisting of whole or parts of seven Mouzas of the Nowgong District.
3. Aijal, Mazo Hills District.

**Bihar****2 DEVELOPMENT BLOCKS**

1. Shikarpur Development Block, District Champaran.
2. Hura Development Block, District Manbhum.

**Bombay****9 DEVELOPMENT BLOCKS**

1. Vallia Mahal and some villages in Jhagdia Taluk—Broach District.
2. Kalol—Panchmahals District.
3. Mandangad and some villages in Dapoli Taluk in Ratnagiri District.
4. Malegaon in Nask District.
5. Shahada in West Khandesh.
6. Chikhali—Buldana District.
7. Bendsura—Bhir District.
8. Nanded-Khandar—Nanded District.
9. Kalawad—Halar District.

**Madhya Pradesh****8 DEVELOPMENT BLOCKS**

1. Waraseoni Block, District Balaghat.
2. Bohuriband Block, District Jabalpur.
3. Bazag-Gorakhpur Block, District Mandla.
4. Pachor, District Rajgarh.
5. Mandasaur, District Mandasaur.
6. Fanchi, Raisen District.
7. Panna, Panna District.
8. Jafara, Tikamgarh District.

**Madras****4 DEVELOPMENT BLOCKS**

1. Chingleput—Chingleput District.
2. Ambasamudram—Tirunelveli District.
3. Chidambaram—South Arcot District.
4. Dindigul—Madurai District.

**Orissa****8 DEVELOPMENT BLOCKS**

1. Sundargarh Block, District Sundergarh.
2. Nayagarh Block, District Puri.
3. Bargarh Block, District Sambalpur.

**Punjab****5 DEVELOPMENT BLOCKS**

1. Taran Taran, District Amritsar.
2. Kulu, District Kangra.
3. Thanesar, District Karnal.
4. Naraingarh, District Ambala.
5. Bhatinda, District Bhatinda.

**Uttar Pradesh****8 DEVELOPMENT BLOCKS**

1. Bah—District Agra.
2. Dataganj-cum-Jalalabad—Basin of the river Sot in District Badaun and Shahjahanpur respectively.
3. Deoband—District Saharanpur.
4. Nagar—District Basti.
5. Dudhi—District Mirzapur.
6. Jaunsar Bawar-cum-Jaunpur Rawain—Basin of the river Jamuna in Districts Dehra Dun and Tehri (Garhwal) respectively.
7. Phulpur—District Allahabad.
8. Bhilgauna, District Tehri Garhwal.

**West Bengal****3 COMPOSITE BLOCKS**

1. Habra Block, Sub-division Baraset, District 24-Parganas.
2. Sonamukhi Block, District Bankura.
3. Dinhat Block, District Cooch-Bihar.

**Mysore****2 DEVELOPMENT BLOCKS**

1. Indi in Bijapur District.
2. Mercara - Bhagamandala - Napok—Ammatinad.

**Rajasthan****2 DEVELOPMENT BLOCKS**

1. Nagar Pahari Govindgarh (District Bharatpur, Alwar and Jaipur Division).
2. Maulasar (District Nagore-Jodhpur Division).

**Kerala****1 DEVELOPMENT BLOCK**

1. Ambalapuzha, Parkkad, Thakazhi, Nedumudi, Champakulam and Kalnakari consisting of the Pakuthies of Alleppey (excluding the Municipal area), Revenue District of Quilon.

**Himachal Pradesh****1 DEVELOPMENT BLOCK**

1. Ghumarwin Block in Tehsils Sadar and Ghumarwin.

**N.E.S. BLOCKS (1953-54)**

The number of blocks in each State is given in brackets. They were launched on October 2, 1953. A number of these (about 150) were converted into Community Development Blocks in 1955.

**Andhra (22):** Gara Srikakulam, Amadalavalasa Nagarikatakam (Dist. Srikakulam); Kota Utagiri Jalluri, Pendurthi and Maduravada Revenue sika, Nakkapalli (Dist. Vishakhapatnam); Rajahmundry Rajangaram, Raghu-devapuram Burugupudi (Dist. East Godavari); Denduluru Bhimadole, Kanavarepukota Dhamrajegudem and Chintalapudi (Dist. West Godavari); Triuvur Visanapeta, Murvid Musunur (Dist. Krishna); Santanuthalapadu Doddavaram, Ongole Ammahbrole Duddukuru (Dist. Guntur); Kasur Sarvepalle, Podalakur Chittalur (Dist. Nellore); Nagari Narayana-nam, Arugolanu Palliputtur (Dist. Chittoor); Yerrangondapalem Tripuranthakam Dornai

Duped, Alur Chippagiri Holgagundi Peddaho-thur (Dist. Kurnool); Hindupur Parigal, Madakasira (Dist. Anantapur); Talamanchipatnam (Dist. Cuddapah).

**Assam (12):** Siddi-Chirang (Goalpara Dist.); Dimoria-Barpeta (Kamrup District); Dalu (Dist. Garo Hills); Majuli, Sibsagar (Dist. Sibsagar); Bhoi (Dist. Khasi Hills); Tengakhat (Lakhimpur District); Karimganj (District Karimganj); Kohima (District Naga Hills); Kathiatoli (Nowgong District); Rangiya (District Kamrup).

**Bihar (14):** Bodh-Gaya (Gaya District); Barharpur (Monghyr District); Dumri (Hazari-bagh District); Serakella (Singbhum District); Phulwari Sharif Sillao (Patna District); Musheri (Muzaffarpur District); Kuchalkote (Saran District); Ramnagar (Champarnar District); Sabour (Bhagalpur District); Isampur (Purnea District); Bangoon (Saharsa District); Barhee (Hazari-bagh District); Fanki (Palamau District).

**Bombay (31):** Nadlad, Kapadvanj, Mehmedabad (Kaira District); Karad, Patan, Satara (Satara North District); Karwar, Supa, Mahal, Hallyal (North Kanara District); Dharwar (Dharwar Taluka); Edlabad (East Khandesh District); Mohol (Sholapur District); Nagar (Ahmednagar District); Khanapur (South Satara District); Haveli (Poona District); Kodinar-Okhamandal (Amreli District); Fabugam (Baroda District); Songadh (Surat District); Dehgam (Ahmedabad District); Deesa (Banaskantha District). Total equivalent to 31 Blocks.

**Madhya Pradesh (30):** Narieoli, Patharia (Dist. Sagar); Barela (Dist. Jabalpur); Tharni, Karakhet-Gotegeon (Dist. Hoshangabad); Shahpur (Dist. Nimar); Narsinganj (Dist. Mandla); Prabhat Patan (Dist. Betul); Fandhurna, Kalanikhas (Dist. Chhindwara); Kundia (Dist. Raipur); Masturi, Lormi (Dist. Bilaspur); Patan (Dist. Durg); Charama (Dist. Bastar); Sitapur (Dist. Surguja); Sarile-dhara (Dist. Raigarh); Mul (Dist. Chanda); Tumur, Tirora (Dist. Bhandara); Lanji (Dist. Balaghat); Seloo, Mandgaon (Dist. Wardha); Narkher, Kalneswar (Dist. Nagpur); Teosa (Dist. Amravati); Risod (Dist. Akola); Babulgaon, Umkher (Dist. Yeotmal); Falamb (Dist. Buldana).

**Madras (28):** Kalasappakkam-Kadalady, Thuringapavram—Kilpennathur (North Arcot District); Kadambullyur-Tirunavalur, Kulan-javadi-Kurinilpadi, Chinnasalem-Vadakkanaundal (South Arcot Dist.); Odappal-Tiruvallur, Mappedu-Pandur (Chingleput Dist.); Tiruppur-Avanashi, Palladam-Vellakoll-Engayam (Colum-batore Dist.); Kumbala-Manjeshwar, Sullia-Nileshtar (Cannanore Dist.); Tirumanai-lam-Pannikundlu-Kalligudi, Kallupatti-Sedap-pati, Uslampatti-Valandur (Madurai Dist.); Tellicherry-Kuthuparamba-Mattanur, Madayi-Payyanur (Malabar); Kundah-Gudalur-Paddalur Thuner (Nilgiris Dist.); Malli-Nath-appatti-Srivilliputhur, Edircottal-Kalayar-kurchi Sivakasi (Ramanathapuram Dist.); Krishnagiri-Kaveripatnam, Veeraganur-Talaiva-sal-Gangally (Salem District); Vedaranyam, Telainayar—Alathambadi-Salla-mangalam (Tan-jore Dist.); Musiri-Thathilengerpattai-Pullivalam, Vengalam-Valkandapuram, Parnati-Chinna-darapuram (Dist. Tiruchirappalli); Sankaran-koll-Nilidanalur-Vasudevanalur, Pazhamoot-tal-Tiruvengadam (Tirunelveli Dist.).

**Punjab (7):** Hansi (Hissar Dist.); Gurgaon (Gurgaon Dist.); Guha Sub-Tehsil (Karnal Dist.); Samraia (Ludhiana Dist.); Moga (Ferozepore Dist.); Nurpur (Kangra Dist.); Una (Hoshiarpur Dist.).

**Uttar Pradesh (40):** Loni (Dist. Meerut); Rudrapur Terai (Dist. Nainital); Kherband (Dist. Banda); Koraon (Dist. Allahabad); Tarikhet (Dist. Almoraa); North Western Trans Rapti (Dist. Basti); Captainganj (Dist. Deoria); Nichlaul (Dist. Gorakhpur); Mangrabad—Shahpur (Dist. Jaunpur); Bah (Dist. Agra); Gordanpur (Dist. Muzaffarpur); Uncha-gaon (District Buland Shahar); Tappal (District Aligarh); Mathura-cum-Chhata (Dist. Mathura);

Bareilly (Distt. Bareilly); Afzalgarh (Distt. Bijnor); Joya (Distt. Moradabad); Saldnagar-Tanda (Distt. Rampur); Pillibhit (Distt. Pillibhit); Ghatampur (Distt. Kanpur); Ait (Distt. Jalaun); Arazilines (Distt. Banaras); Goshalganj, Sarojinagar (Distt. Lucknow); Unnao (Distt. Unnao); Hargao (Distt. Sitapur); Hardoi-Bilgram (District Hardoi); Kheri (Distt. Kheri); Intiathoke (District Gonda); Kaiser-gunjin (South of Bahraich); Lachhmanpur (Distt. Pratapgarh); Bara Banki (Distt. Bara Banki); Dhangu (Distt. Garhwal); Ghaugarh—Bishjula-Rao (Distt. Nainital); Salon (Distt. Rae-Bareilly); Bahuwala (Distt. Fatehpur); Maudaha (Distt. Hamirpur); Aurni (Distt. Banaras); Kara (Distt. Allahabad); Kheragarh (Distt. Agra).

**West Bengal (6):** Kandi, Burwan, Bharatpur (Distt. Murshidabad); Darjeeling, Jore Bungalow, Rangli Rangliot (Distt. Darjeeling).

**Orissa (2):** Chatrapur (Distt. Ganjam); Angul (Distt. Dhenkanal).

**Hyderabad:** Zaheerabad and Bida Taluka (Bida District—2 Blocks<sup>4</sup>); Davarakonda and Miriyakonda Taluka (Nalgonda Distt.—3 Blocks<sup>5</sup>); Sangareddy and Vikarabad Taluka (Medak Distt.—3 Blocks<sup>6</sup>); Kannad and Vijapur Taluka (Aurangabad Distt.—2 Blocks)<sup>7</sup>; Omerga Taluk (Distt. Osmanabad).<sup>8</sup>

**Madhya Bharat:** Dewas and a portion of Sonkateh Tehsil (Dewas District); Ranapur (District Jabua); Jore-Morena (Morena District).

**Mysore (7):** Ramanagaram-cum-Kanakapura Taluka (Bangalore Distt.); Gundlupet Taluk (Mysore Distt.); Holenarsipur-Arkalgud Taluka (Hassan Distt.); Koppa Narasimharajapura Taluka (Chikmagalur Distt.); Siddaghatta Taluk (Kolar Distt.); Harihar—Devangere Taluka (Chitaldrug Distt.); Turuvekere (Tumkur Distt.).

**PEPSU<sup>1</sup>:** Rajpura Tehsil, Jind Tehsil, Sangrur Tehsil, Phagwara Tehsil.

**Rajasthan (12):** Shahabad, Ladpura (Kota Distt.); Sagwara, Simulwara (Dungarpur Distt.); Pali Desuri (Pali Distt.); Anet, Kumbalgarh (Udaipur Distt.); Mahwa (Sawal-madhopur Distt.); Jobner (Jaipur Distt.); Anta (Kota Distt.); Bassi (Jaipur Distt.).

**Saurashtra:** Rajula-Jafrabad (Gohilwad Distt.); Chotila (Zalawad Distt.); Babra Jasad (Madhya Saurashtra Distt.); Kalyanpur (Halar Distt.).

**Kerala (3):** Muvattupuzha Taluk; Thiruvalla Taluk; Agasteeswaram Taluk.

**Ajmer:** Deawar Istimari Girdawar's Circle.

**Bhopal:** Berasia Tehsil; Berelli; Ashta Tehsil.

**Coorg:** Ammathi Virazpet.

**Delhi (1):** Najafgarh.

**Himachal Pradesh (4):** Bhattiyat Tehsil (Chamba Distt.); Paohlad Tehsil (Sirmur Distt.); Chachiot Tehsil (Mandi Distt.); Kasumpti and Sunni Sub-Tehsils (Mahsu Distt.).

**Kutch:** Bahpur Taluka.

**Tripura (1):** Dharmanagar.

**Vindhya Pradesh:** In Sidhi District; In Shadol District; In Datia District.

**NEFA (1):** Namsang.

**Jammu & Kashmir (10):** Anantanag; Kulgam; Pulwama; Badgam; Baramulla; Sopore; Handwara; Ganderbal; Srinagar. (One more.)

## 1954-55 BLOCKS

On October 2, 1954, 252 National Extension Blocks were launched. They covered 24,100 villages and a population of 15-01 millions.

**Andhra (5):** Subbavaram and few other non-rural welfare areas, Anakapalli, Taluk (Vishakapatnam District); Palavaram, Janagareddigudem and non-rural welfare area in Jesugumalli, Palavaram Taluk (West Godavari District); Non-rural welfare areas in (i) Chinna Takur, (ii) Ulchala and (iii) Vervakal in Kurnool Taluk (Kurnool District); Rachelra and Giddalur in Cumbam Taluk (Kurnool District); Roddam and few other non-rural welfare areas in Ponukonda Taluk (Anantapur District).

**Assam (5):** Howraghat (Mikir Hills); Mikir Hills (Barapathar and Sarupathar) (United Mikir and N. C. Hills) Goalpara (Unions of Goalpara and Dudhi P.S.); Jorhat (Jorhat District); Chakesang (Kohima Hills).

**Bihar (20):** Bilkram (Dinapur) (Patna District); Shakra (Muzaffarpur) (Muzaffarpur District); Samastipur (Samastipur) (Darbhanga District); Bagaha (Bettiah) (Champaran District); Pancha (Manbhum) (Manbhum District); Dumka (Dumka) (Santhal Pargana District); Kharswan (Serakella) (Singbhum District); Patepur (Hazipur) (Muzaffarpur District); Manbazar (Puzilla) (Manbhum District); Topchanchi (Dhanbad) (Dhanbad District); Nala (Jamtara) (Santhal Pargana District); Jamtara (Jamtara) (Santhal Pargana District); Kundahit (Jamtara) (Santhal Pargana District); Sarath (Deoghar) (Santhal Pargana District); Chaki (Jamtara) (Monghyr District); Bengaba (Giridih) (Hazaribagh District); Gonde (Giridih) (Hazaribagh District); Raniganj (Ariaria) (Purnea District); Purnea Sadar (Purnea District); Katihar (Purnea District).

#### POSITION IN 1956 SEPTEMBER

People's contribution in the various community project and National Extension Service blocks in the country till September 1956 amounted to Rs. 32.96 crores, according to a Government review of the progress of the community project and N.E.S. schemes from October 1952 to September 1956. The contribution was offered in cash, kind and labour.

The total Government expenditure on these schemes during the period was Rs. 56.30 crores—about Rs. 49 crores for community project blocks and Rs. 7 crores for N.E.S. schemes.

The people's contribution came to nearly 60 per cent of the Government expenditure.

In the case of N.E.S. blocks particularly, the people's contribution valued at over Rs. 7 crores exceeded the Government's expenditure by Rs. 3 lakhs.

The value of the people's contribution in the community project areas was about Rs. 26 crores.

Of the total Government expenditure on various schemes approximately Rs. 425 lakhs were spent on animal husbandry and agricultural extension. Irrigation and land reclamation accounted for Rs. 924 lakhs and Rs. 93 lakhs respectively. Nearly Rs. 510 lakhs were utilised for health and rural sanitation and Rs. 368 lakhs for education.

Among other items of expenditure were social education Rs. 213 lakhs, communications Rs. 623 lakhs, and rural arts, crafts and industry Rs. 183 lakhs. About Rs. 68 lakhs were spent on housing.

A total of 16.67 lakh acres of land was reclaimed and 28.5 lakh acres brought under irrigation. The area of land brought under fruits and vegetables was 2.16 lakh acres and 5.57 lakh acres respectively. The number of key village centres started was 3,838.

Under the community development scheme, 981 primary health centres were started up to the end of September 1956. The number of maternity and child welfare centres set up was 947.

In the sphere of education, 20,000 new schools were started and 7,704 ordinary type of schools were converted into the basic type.

Besides 53,000 adult education centres and 1.55 lakh community centres were started and 12.84 lakh adults were made literate. Over one lakh organisations such as youth clubs, farmers' unions and mahila samities, were developed.

Construction of over 7,000 miles of pucca and 42,000 miles of kacha roads indicates the progress made in the field of communications.

An additional 30,000 miles of existing kacha roads were renovated. Sixty-five thousand new houses and 6,154 model houses were built during the period.

Under the rural arts and crafts scheme of the community development programme, 2,040 demonstration-cum-training centres were started and 75,000 persons received refresher and basic training.

The number of new co-operative societies started during this period was 41,000 bringing the total number of new members enrolled to 23.3 lakhs.

In the sphere of local self-government, 28,000 panchayats and other statutory bodies and 46,000 non-statutory bodies like village councils, vikash mandals, etc. were started during the period under review. These organisations of the people have been taking an increasingly larger share in planning and implementation of the schemes with the technical aid of experts provided by the Government.

On 30th Sept. 1956 there were 876 Block Development Officers. The shortage here was 18. The number of Village Level Workers was 10,043, the shortage here being 238.

These last figures are exclusive of those for Bombay and Mysore.

\* No. of equivalent Blocks yet to be decided.

## FOREIGN AID TO INDIA

The total foreign assistance received by India from 1951 to March 1956 amounted to Rs. 297 crores\*. Of this, Rs. 198 crores were utilised. This was obtained by way of loans and grants from the International Bank of Reconstruction and Development, the Common-

wealth countries under the Colombo Plan, U.S.S.R., Norway, and the Ford Foundation.

**IBRD:** Since 1949 India has received 8 loans from the IBRD equivalent of \$ 200 million (Rs. 95 crores), of which \$ 77.5 million

(Rs. 37 crores) were drawn upon by June-end 1956. The loan granted to the Tata Iron & Steel Co.—the biggest ever offered to India—has not yet become effective.

Details of loans extended by the IBRD are given in the Table below:

Year of Loan Agreement.	Principal Amount* (Net of cancellations).	Purpose.	Period (In years).	Interest.	Commencement of Amortisation.
1. 1949 August ..	32.8 (15.6)	Railway rehabilitation .. .. .	15	4 %	1950
2. 1949 September ..	7.2 (3.4)	Agricultural Development .. .. .	7	3½ %	1952
3. 1950 April ..	16.7 (8.0)	Electric Power Development (Damodar Valley Corpn.)	20	4 %	1955
4. 1952 December ..	31.5 (14.9)	Expansion of iron and steel production facilities (India Iron & Steel Co.) .. .. .	15	4½ %	1959
5. 1953 January ..	10.5 (4.9)	Electric Power Development, Flood Control & Irrigation (Damodar Valley Corporation) .. .. .	25	4½ %	1956
6. 1954 November ..	16.2 (7.7)	Electric Power Development (Tata Hydro, Andhra and Tata Power Companies for Trombay plant) .. .. .	20	4½ %	1958
7. 1955 March ..	10.0 (4.8)	Foreign Exchange for Development of private industry (Industrial Credit and Investment Corporation of India)	15	4½ %	1960 (not yet effective)
8. 1956 June ..	75.5 (35.7)	Expansion of steel production (Tata Iron & Steel Co.) ..	15	4½ %	1959 (not yet effective)
<b>TOTAL .. ..</b>	<b>199.9 (95.0)</b>	<b>—</b>	<b>—</b>	<b>—</b>	<b>—</b>

\* Figures are in million dollars except the figures in brackets which are in Rs. crores.

**Note** Items 1, 2, 3, 5 are on Government account.

**U.S.A.:** Inclusive of the proceeds of the wheat loan of \$ 190 million, the total U.S. aid allotted as at the end of 1955-56 stood at \$ 487 million (Rs. 230 crores.). In the initial stages of the Indo-U.S. Aid Programme, the entire aid was offered as a grant. In 1954-55 however, it was laid down that about 75% of U.S. funds were to be treated as a loan, to be expended mainly on the purchase of surplus agricultural commodities available in U.S. Accordingly, a long-term loan of \$ 82.5 million (Rs. 39 crores) was made available to India during the period 1954-56 towards the purchase of surplus wheat and cotton as well as fertilisers and steel. The development assistance allocation for 1955-56 was \$ 50 million (Rs. 23.8 crores), of which \$ 37.5 million (Rs. 17.9 crores) was the loan component.

The U.S. aid is being utilised on mutually agreed projects such as import of fertilisers, iron and steel for agricultural and industrial use, construction of tube wells, and supply of essential items of equipment like locomotives and wagons for the railways, vehicles, agricultural implements and visual aid for community projects.

In August 1956, an agreement was signed between India and U.S. Governments providing a sum of \$ 360 million for the purchase of agricultural commodities in the U.S. during the next three years. This Agreement provides for the purchase of wheat worth \$ 200 million, rice worth \$ 26.4 million, cotton worth \$ 70 million, tobacco worth \$ 8 million and dairy products worth \$ 3.5 million. From the sale proceeds, India will get a long-term loan of \$ 234 million, and a grant of \$ 55 million towards the execution of development projects, while U.S. would retain \$ 72 million for her use in India.

**Canada:** Capital assistance provided by Canada from 1951 amounted to \$ 75 million (Rs. 36 crores). This has been used for the purchase of wheat, trucks and buses for the Bombay State Transport Corporation, locomotives and locomotive boilers for Indian railways, and heavy equipment for Mayurakshi Project and Umtru—and Kundah Hydro-electric projects. A part of the 1955-56 allocation is being utilised for the setting-up of an Atomic Reactor of the NBX type for the Atomic Research Centre at Bombay estimated to cost \$ 7 million.

**Australia:** The total aid allocated by Australia is of the order of £A 10.6 million (Rs. 11.3 crores). In the first two years, the funds were utilised to purchase wheat and flour as well as construction equipment for the Tungabhadra Project and electrical equipment for the Ramagundam Project in Hyderabad. The allocations for the subsequent years are being used for the supply of radio equipment and diesel cars and wagons for railways.

**New Zealand:** At the inception of the Colombo Plan, New Zealand offered £ 1 million towards meeting a part of the capital cost of The All-India Medical Institute. A further allocation of £ 250,000 was made in 1954-55 towards the supply of equipment for dairy schemes in India. In 1955-56, an additional sum of £ 400,000 was allotted for the Delhi Milk Supply Scheme.

**U.K.:** Assistance from the U.K. has been offered mainly for research and demonstration equipment for the technical institutes. During the year 1956-57, the Government of U.K. granted a loan of £ 15 million (Rs. 20 crores) towards the erection of the Durgapur steel plant. The Indian Steel Consortium, London, have arranged for bank credits of £ 11.5 million

(Rs. 15.3 crores) with a syndicate of British banks.

**U.S.S.R.** The U.S.S.R. has granted export credit to the value of Rs. 63 crores towards the construction of the Bhilai steel plant. The rate of interest is 2½% per annum and repayable in 12 equal annual instalments.

In November 1956, Russia offered a further credit of Rs. 60 crores for financing industrial projects included in the Second Plan, such as coal mining, oil refineries and heavy industries. The credit will be on the same terms as those under the Bhilai steel project, mentioned above.

**Norway:** Norway extended in 1953 a sum of Rs. 6.6 million (Krs 10 million) for a pilot project on fishery development in Kerala. In 1955-56 an additional sum of Rs. 10 million was offered to expand the activities of the same project as well as to develop a new fishery centre at Cochin.

**Ford Foundation:** From September 1951, the Ford Foundation extended aid totalling \$ 15 million (Rs. 7.1 crores) towards the training of personnel for rural development, encouraging small-scale industries and fostering education, research and training and cultural interchange.

**Technical Assistance:** India has received substantial technical assistance from Australia, Canada, New Zealand, U.K., U.S., and from the United Nations and its Specialised Agencies. Under the Technical Co-operation Scheme of the Colombo Plan, the Commonwealth countries undertook to provide books and equipment worth Rs. 6 million for technical institutes and research centres.

Training facilities for Indians Overseas are also provided by U.S., U.K., Australia, etc.

\* Other than U.S.A. for which see below.

## U. N. AID TO INDIA

During 1956 the sum of money allotted to India was Rs. 127.5 lakhs, and the sum contributed by India was Rs. 21.42 lakhs.

The total cost of the projects undertaken under the expanded technical assistance in 1955 in U.S. dollars was 944,726.

The contributions pledged by the Governments for the years 1955 and 1956 were in U.S. dollars 400,000 and 450,000 respectively.

The total amounts obligated during 1955 classified under different bodies are as follows. Figured in U.S. dollars:

UNTA: 197,466; ILO: 88,655; FAO: 335,500; UNESCO: 193,896; ICAO: 9,058; WHO: 120,151; ITO: —; WMO: —; Total: 944,726.

Fifty-eight Indian experts were engaged in all: 11 by UNTAA, 5 by ILO, 18 by FAO, 11 by UNESCO, 2 by ICAO, 13 by WHO, one by WMO.

During the year under review 80 experts were assigned to India: 12 by UNTAA, 9 by ILO, 37 by FAO, 12 by UNESCO, one by ICAO, 9 by WHO.

The total fellowships awarded to Indians both under the expanded and regular programmes during the year were 96: UNTAA 41, ILO 16, FAO 6, UNESCO 19, ICAO 4, WHO 10.

The total fellowships both under the expanded and regular programmes with tenure in India were 121: UNTAA 44, ILO 16, FAO 14, UNESCO 19, WHO 28.

Subjects in which technical assistance was offered were: urban water supply and sewage disposal, textile technology, production of structural steel, housing, fermentation industry, use of equipment for aerial survey and mapping in relation to development resources, statistics (of planning, inter-industry study, national income, quality control, national sample survey, machine tabulation, demography), dam designs at Bhakra, hydro and thermal plants, electrical machinery, leather technology, plastic and glass moulds, DDT factory, penicillin factory, inland water transport, naval architecture, highway construction, bridge maintenance, lighthouse equipment, rock salt mining, power drilling, housing research, primary metals development, water resources development, manpower organization including vocational training, national labour market and vocational guidance and apprentice legislation, development of TWI programmes, productivity centre, industrial relations and personnel management, use of farm machinery, grassland and fodder improvement, artificial insemination of animals and animal production

and disease control, dairy and milk production veterinary education, refrigeration, rinderpest vaccine manufacture, sheep and wool production, hides and skins, tanning, wool-spinning and weaving, surf boats in fishery, mechanized equipment for fishing, training in fisheries, fish harbour designing, Fishery Technological Station, forest resources and industries, erosion, soil conservation, tea-chest plywood, afforestation, nutrition, horticultural practice, fruit processing, infant foods, home economics, catering management, fundamental education, basic education, training and checking of air crews, airport lighting, environmental sanitation, public health engineering, vital and health statistics, domiciliary nursing and midwifery, T.B. control, preventive and social medicine.

Among the institutions that benefited were: Indian Institute of Technology at Kharagpur, Ahmedabad Textile Research Institute, Central Water and Power Research Station at Poona, National Physical Laboratory at Delhi, Central Bureau of Vocational Guidance, Indian Institute of Science at Bangalore, Banaras University, Institute of Radio Physics and Electronics, The Engineering College at Poona and the School of Tropical Medicine at Calcutta.

## U. S. AID TO INDIA

### AGRICULTURAL COMMODITIES AGREEMENT\*

The Agricultural Commodities Agreement signed in August 1956 is the largest such agreement the U.S. has signed with any country. It was negotiated under U.S. Public Law 480—the Agricultural Trade Development and Assistance Act of 1954, as amended in 1956—which permits the sale of surplus agricultural commodities to foreign countries for their own currencies.

Although the U.S. law is designed to cut down on agricultural surpluses, India is not required to buy surplus products from U.S. Government storage. The agreement permits the Indian Supply Mission in the U.S. to buy the commodities from whatever source in the United States it finds most advantageous.

The agreement also includes \$54,200,000 (Rs. 28 crores) for payment of half the shipping costs.

Rupee proceeds are to be used as follows:

65 per cent (\$234 million) to be loaned to India on a long-term basis, for economic development, \$55 million of which will be for the private sector;

15 per cent to be given as a grant to the Government of India for economic development projects;

20 per cent (\$72 million) will be for U.S. Governmental expenditures in India, including purchases of Indian goods for other countries getting U.S. aid.

Both Governments will take precautions to assure that the sale of the commodities will not unduly disrupt world-price of the products. The two Governments agree that the imports of the commodities will be over and above usual commercial imports from all sources.

### WHEAT LOAN

Large-scale American aid to India began in 1951, when India was faced with a threatened famine. Americans in large numbers voluntarily

contributed hundreds of thousands of dollars worth of foodstuffs, clothing and medicine. This aid was channelled through various relief groups, which have continued every year to send large quantities of such items since.

Also, in 1951, the U.S. Government provided a loan to India of \$190 million on easy terms for the purchase of nearly two million tons of foodgrains in the United States. The loan is to be repaid in 35 years at an interest rate of 2½ per cent, with no interest due for a year and no principal due for five years.

In addition, the U.S. Government at that time specially re-activated nearly 100 World War II Liberty-type ships for quick transport of the grain to India, as there was an acute shipping shortage at that time.

The Wheat Loan agreement also provided that the first \$5 million of interest paid by India to America would be set aside in a special fund in the U.S. Treasury for the support of higher education in India and to a lesser degree in the United States.

Under the India Wheat Loan Educational Exchange Programme, Indian universities and other institutions of higher education and research in all parts of the nation are now receiving American books and scientific and technical equipment. There is also provision under the programme for professional visits to the United States by Indian scholars, professors and technicians and for similar visits to India by American specialists.

The programme began operation in June 1954, and is scheduled on a five-year basis, wherein approximately \$1,000,000 worth of scientific and other academic resources are to be provided to India each year.

As the greater part of the programme is designed to rehabilitate and develop Indian universities and other centres of advanced study, the Union Ministry of Education has been made the co-ordinating agency for determining the best usage of these funds for supporting and supplementing the educational development

American aid to India, public and private, totalled \$955,711,000 as of December 1956, or nearly Rs. 455 crores.

The biggest single item under the U.S. aid programme was the \$360,100,000 Agricultural Commodities Agreement signed by the Governments of India and the United States on August 29, 1956. This agreement enables India to buy needed agricultural commodities from the United States during the next three years, including 3,500,000 tons of wheat (\$200 million), 500,000 bales of cotton (\$70 million), 200,000 tons of rice (\$26.4 million), six million pounds of tobacco (\$6 million), and dairy products worth \$3.5 million. It will help assure India of an adequate supply of basic agricultural commodities and aid the Government of India's efforts to keep prices stable during the Second Five-Year Plan.

All commodities are to be sold for Indian rupees, thus yielding foreign exchange to the extent of nearly Rs. 170 crores. Eighty per cent of the rupee proceeds is to be used for economic development under India's Second Five-Year Plan.

The biggest transaction entered into by India and the United States before the Agricultural Commodities Agreement was the 1951 Wheat Loan of \$190,000,000.

Other financial assistance to India from U.S. Government and private sources has included:

Indo-American Technical Co-operation—\$328,800,000.

Milo Assistance in 1950-51—\$12,000,000.

Flood Relief—\$4,435,000.

Fulbright and Smith-Mundt grants for Educational Exchange—\$2,283,000.

Ocean Freight Assistance—\$1,287,700.

Food Distribution by American Voluntary Agencies—\$37,800,000.

Ford Foundation—\$15,000,000.

Rockefeller Foundation—\$6,000,000.

\* It is calculated that in the next three years (1957-1959) about Rs. 172 crores worth of U.S. farm surplus might be imported—about six million tons.

pattern of the five-year plans. Each year the Ministry invites eligible institutions to submit their requests for assistance under this scheme, and, after consultation with the Wheat Loan Office staff as to the various projects, the annual Government of India proposal is forwarded to the American Embassy.

In the first year's programme (1954-55), 57 universities and research centres throughout India participated. Approximately 30,000 books were provided to 31 institutions and \$411,275 worth of scientific equipment was ordered for 25 institutions. In addition, five medical research stations received specialised books and laboratory instruments for use in a project of Indo-American exchange of pathological tissue specimens. Also, 12 Indian librarians went to America for a five-month study tour, and one American specialist came to India to consult on plans for the development of the National Museum in Delhi.

The second year's programme provided approximately \$500,000 worth of American books to humanities and science libraries at colleges and universities throughout India. Approximately the same amount of money was allotted for procuring scientific instruments for university laboratories and other research centres. In support of and in conjunction with these allocations for material resources, 12 Indian librarians and 21 Indian scientists made professional study tours of the United States. Five American scientists came to India to lecture and to conduct seminars in their fields of specialisation. By the end of the second year, the programme provided assistance to all of the 31 universities and to 37 non-university institutions in India.

The third year's programme will provide \$375,000 worth of scientific equipment to the laboratories at 15 Indian universities and 4 non-university institutions. Approximately \$325,000 will purchase books for libraries at institutions of higher education. In addition, \$200,000 has been allocated for an exchange of persons project which will send 30 Indian academicians to the United States for study of the general movement at leading American universities. In return, 10 leading American educators will come to India and participate in the general education programme at certain Indian universities.

#### TECHNICAL CO-OPERATION PROGRAMME

U.S. governmental aid to India is channelled mainly through the Indo-U.S. Technical Co-operation Programme, which has been shaped to support the objectives of India's Five-Year Plans, and is now in its sixth year. The programme has expanded steadily and now includes a wide range of activities.

The essential purpose of the Technical Co-operation Programme is to make available knowledge, techniques, men and material of one country for the economic and social development of the other. The assistance given to India is mainly technical and developmental, and comprises a five-pronged approach:

1. The use of American technicians or experts who demonstrate new techniques or methodology under the various projects;
2. The additional training of Indian technicians abroad, who upon their return to India carry forward work already undertaken by American counterparts;
3. Procurements of demonstration equipment not available with India for pilot projects;
4. Payment of costs for contracted services; and
5. Substantial assistance in the form of foodstuffs, steel and capital equipment.

#### TYPES OF AID

In its present form the Indo-American programme dates from the signing of the general agreement between the Governments of India and the United States on January 5, 1952. Since then the two countries have signed agreements covering a total of 63 projects in support of India's First and Second Five-Year Plans. These projects have been developed by the appropriate Ministries of the Government of India, and approved by the Planning Commission

and by the U.S. Technical Co-operation Mission (TCM), representing the International Co-operation Administration of the United States.

Contributions of the Government of India to the joint effort—rupee expenditures—are mainly in payment of local construction costs, project sites, transport and handling charges within India of American-contributed commodities, and finally, salaries of Indian personnel who work side by side with Americans on the jointly administered projects.

Where imported commodities such as fertilizer and iron and steel are sold within India (commodity or development assistance) the rupee proceeds are used to finance within India other projects of economic development. For example, out of the sale proceeds under the 1954 steel agreement, \$15.7 million (Rs. 7.5 crores) was provided as part of the revolving fund for the Industrial Credit and Investment Corporation of India, an agency established to assist private industrial development.

Initial emphasis of the Indo-American programme was on agriculture, since this occupied top priority in India's First Five-Year Plan. Accordingly, commodity and technical assistance stressed such activities as community development, tube-wells, river-valley development, fertilizer and steel for agricultural implements. The emphasis has now shifted somewhat from earlier problems of food, over to the problems of industrial development and transportation.

With special economic aid funds available from 1954, transport and industry received major attention, with programmes for railway equipment, steel for railways and industry, for the Rihand hydro-electric development and increased electric power facilities in the city of Madras and the State of Rajasthan.

As of June 30, 1956, U.S. technical and economic aid obligations to India totalled \$326.8 million. Obligation and Expenditure totals during each U.S. fiscal year (July 1 of the previous year to June 30 of the year given) are shown below. Totals reflect expenditures against both current and prior-year obligations:

	Obligations (Millions)	Expenditures (of dollars)
FY 1952 .. ..	50.5	1.2
FY 1953 .. ..	40.1	27.4
FY 1954 .. ..	76.8	28.4
FY 1955 .. ..	78.9	57.7
FY 1956 .. ..	80.5	80.6
Total .. ..	326.8	195.3

The following table gives a summary of data showing component elements of the Indo-American programme for the fiscal years 1952-56 (as of June 30, 1956):

Participants (Indian technicians)	
Covered by Project Agreements .. ..	\$ 428,194
Exclusive of Project Agreements .. ..	\$ 2,302,462
Total Participants .. ..	\$ 2,730,656

Total Commodities .. ..	\$ 298,266,152

Grand total of U.S. Technical and Economic Aid .. ..	\$ 320,751,412
--	----------------

#### Cost-Sharing

The Indo-American Technical Co-operation Agreement provides that programmes be mutually developed and projects established for which costs are shared by the U.S. Government and the Government of India. U.S. dollar financing normally covers foreign exchange costs whereas 40:1 rupee financing covers costs within India. While U.S. contributions to Indo-American project costs for the period from January 1952 to June 30, 1956 totalled \$326.8 million, India's contributions for the same period totalled Rs. 3,700 million, or the equivalent of \$755 million.

While the U.S. contributions to Indo-American projects derive exclusively from funds appropriated by the U.S. Congress, the Indian contributions derive from a variety of sources including: (1) sales proceeds of the American Wheat Loan of 1951, (2) sales proceeds of U.S. financed fertilizer, steel and agricultural commodities, and (3) regular development budgets of operating Ministries.

#### TECHNICAL SPECIALISTS

Technical specialists from the United States are brought to India on agreement between the Government of India and the director of TCM to assist development work in particular fields. Specialists may be assigned to agencies of the Central Government, to the States, groups of private concerns, of educational institutions, or to TCM.

Assignments range from a few months to two years and in various cases have been renewed for additional periods. Salaries and travel of the U.S. specialists to India are paid entirely from dollar resources available to the Indo-American programme. Since the technical specialists are recruited from regular work in the United States, the level of salaries is comparable to that for similar work in the United States.

Measured in terms of activities, American assistance is a composite of the agriculturist, the doctor, the educator, the industrialist, the railroad engineer, the chemist, the nurse and the social welfare worker. As of June 30, 1956, there were 174 U.S. men and women technicians in various fields working in India.

The following table gives the number of U.S. technicians in different fields assigned as of the end of each U.S. fiscal year:

### INDIAN TECHNICIANS

Under the Indo-American programme, Indian technicians study in the United States and in other countries as well.

Since 1951 there have been 558 Indian participants in this programme who have either already been abroad or are in process. The nature of participant training is very broad and goes all the way from a two-week seminar in audio-visual techniques in the Philippines to an intensive 15-month academic study programme in electronics at a leading American university. Emphasis throughout these years has continued in the agriculture and natural resources fields, with industry and mining sharing almost equally

in importance. The fields of health, education, labour and transportation are also represented in the Indo-American participant programme, as vital adjuncts to India's overall economic development.

As of June 30, 1956, 403 technicians had completed their advanced training in the United States and third countries, and returned to India to carry on work in their particular fields. Also, as of that date, 58 technicians remained in training in the United States and 97 technicians were in final process for further study there.

The following table gives data on Indian technicians participating in the programme:

Field of Activity	1951-52	1953	1954	1955	1956	Total as of June 30, 1956
Agriculture & Natural Resources	38	45	54	15	30	182
Industry & Mining	34	25	24	17	53	153
Transportation	16	2	1	1	7	27
Labour	18	7	17	4	9	55
Health	26	37	8	3	14	88
Education	12	1	5	—	13	31
Public Administration	5	—	—	—	2	7
Community Development, Social Welfare & Housing	—	3	—	—	—	3
General & Miscellaneous	8	—	—	1	3	12
<b>Total</b>	<b>157</b>	<b>120</b>	<b>109</b>	<b>41</b>	<b>131</b>	<b>558*</b>

\* Excludes participants covered by contracts.

### INDIVIDUAL PROJECTS

The 63 project agreements under the Indo-American Technical Co-operation Programme signed as of June 30, 1956, cover the fields of agriculture and natural resources, industry and mining, transportation, labour, health and sanitation, education, community development, social welfare and housing, and public administration.

The American approach and interest in India's agricultural and natural resources development is based on the conviction that the United States can make its most effective contribution by helping in the solution of basic problems and the development of basic institutions. At mid-1956 a total U.S. commitment of \$65,144,673 had been reached, under the following heads:

#### Fertilizer

Total U.S. Commitment to June 30, 1956—\$25,315,210.

Import of fertilizer, largely ammonium sulphate, was agreed in 1952 to be a primary means of increasing agricultural production in India as rapidly as possible. Since the original project was set up, India's big Sindri fertilizer plant has become the main source of supply of ammonium sulphate for India's needs.

The Indo-American programme provided for the import of fertilizer for distribution to the farmers, the sale proceeds being credited to Fund B, for the acquisition from within India and from abroad of certain types of fertilizer for demonstration purposes and for a survey of Sindri leading to its expansion. A contract for carrying out this expansion has been entered into by the Government of India, in addition to making available the services of a chemical engineer who will work on research and development problems.

The 1952 and 1953 fertilizer programmes provided 215,000 tons of fertilizer. In 1954, the programme was confined to additional types of fertilizer to be tested under Indian conditions—5,000 tons of urea and 5,000 tons of ammonium sulphate-nitrate.

The 1955 programme provided for the import of 44,000 long tons of fertilizer including urea, ammonium sulphate, sulphate-nitrate and nitro-chalk (calcium ammonium nitrate). For the demonstration aspect of the programme, import of 14,500 long tons of fertilizer was provided for.

The programme for 1956 provided for 400,000 cultivator demonstrations, compared to 100,000 and 200,000 respectively in 1954 and 1955, to acquaint Indian farmers with the importance of phosphorus for crop fertilization. It also provided for approximately 4,250 tons of fertilizer for free distribution and another 50 tons for storage experiments. This brings the total amount of fertilizer under the Indo-American programme to approximately 287,300 long tons.

#### Soil Fertility and Fertilizer Use

Total U.S. Commitment to June 30, 1956—\$402,915.

The original soil fertility and fertilizer use project, set up in 1952, was designed to extend the work already being done at various Indian research institutes. Several thousand agronomic field trials of fertilizer experiments are now under way all over the country. Data are being assembled by technicians of the Indian Council of Agricultural Research and Indian Agricultural Research Institute.

Expansion of the present soil survey zones, establishment of 16 soil laboratories in various States of India, establishment of soil physics laboratories at two existing States' soil laboratories, and use of a mobile soil testing laboratory were subsequently provided for. It has since been agreed that soil testing laboratories are to be established in eight more States.

The 1956 programme provides for the additional procurement from outside India of soil testing, soil conservation and audio-visual equipment, books, publications and chemicals.

**Locust Control and Plant Protection:** The locust control project under the Indo-American programme has supplied jeeps and other vehicles, power sprayers, wireless communication sets and other equipment to augment what is already available. Originally covering locust control only, the project has been extended to cover other forms of plant protection, and a supplement during 1954 provided for fumigants for a demonstration programme on protection of grain in storage.

Total Commitment to June 30, 1956:

U.S., \$608,602

#### Fisheries

Total U.S. Commitment to June 30, 1956—\$2,894,410.

The original fisheries agreement provided for the initial purchase of three trawlers, small diesel engines to equip small fishing craft, and for the overhaul of trawlers already in use. Later recognizing that inland waters, particularly lakes created by river development projects, would provide other sources of fish for markets, a supplement to the original Fisheries Agreement provided for procurement of equipment necessary to develop inland fisheries also.

Continuing aid in 1956 provides 20,000 pounds of nylon twine and nets to be sold, leased, or given to fisheries co-operatives; seven audio-visual units; six jeeps; two sets of films on fisheries; scientific equipment for establishing a fisheries technological station on the west coast, and four purse-seine fisheries experts, as well as additional technical services for further improvement of the fisheries industry in India.

**Ground Water Irrigation (Tubewells):** Under the Indo-American programme, 2,650 tubewells were approved for construction in Uttar Pradesh, Bihar, Punjab and construction work began late in 1953. With the addition of 350 wells in 1955, the Indo-American programme now includes 3,000 tubewells.

Contracts for the construction of some of the wells were let to an American, a German, a British and a French firm; and the States of Uttar Pradesh, Punjab and Bihar received equipment for constructing some of the wells departmentally. Dollar aid is used for technical assistance as well as for specialized equipment needed for the programme.

Total Commitment to June 30, 1956:

U.S., \$18,614,842

**Ground Water Exploration:** Under the Indo-American programme, a ground water project was set up in 1953 to drill 350 exploratory wells and collect hydrological data in 16 areas where usable supplies of ground water for irrigation are believed to exist but where there is insufficient data upon which to plan sound developments.

Drilling operations have been under way since January 1955 under the Exploratory Tubewell Organisation in the Ministry of Food and Agriculture, with the assistance of the Geological Survey of India and U.S. technicians.

In addition to technical assistance, dollar aid under the Indo-American programme has been spent on scientific field and laboratory equipment, as well as drilling equipment to be used in the exploratory projects.

Total Commitment to June 30, 1956:

U.S., \$4,050,000.

#### Water Resources Survey and Minor Irrigation

Total U.S. Commitment to June 30, 1956—\$465,000.

Under this project it is proposed to assist in the development of a systematic, integrated approach towards the full utilisation of water resources with emphasis on minor irrigation. An overall survey of areas in the States of Andhra Pradesh, Madhya Pradesh and Bombay is being undertaken in order to collect basic data on rainfall, stream flow, underground water, etc. An appraisal will then be made of the total water and soil resources of water sheds or similar areas. The project is to demonstrate the development and application of necessary survey data for other areas of India through the planning and construction of selected, properly designed, minor irrigation works.

Dollar aid will be used to purchase equipment and supplies outside India for use in surface water studies, including current meters, sounding reels, sump pumps, casing pipe, heavy earth moving equipment, etc.

#### Agricultural Machinery Training

Total U.S. Commitment to June 30, 1956—\$100,000.

To provide a centre where operators and mechanics can be trained, to demonstrate proper methods of utilising agricultural equipment and to test the suitability of various types of machinery under Indian conditions, a pilot training and demonstration centre has been set up.

Dollar funds will provide various kinds of machinery and shop equipment for the training centre. Agricultural machinery specialists requested by the Government of India also will be obtained.

**Modern Storage of Food Grains:** The Indo-American programme in 1954 set up a demonstration programme to provide two 10,000-ton capacity silos with elevators to handle grain in bulk. The project will permit studies in aeration, drying, disinfestation, and other techniques of this form of storage.

Experiments also will be conducted with prefabricated metal storage facilities which can be set up on short notice and which can be moved from one part of the country to another in times of emergency. Storage facilities of this type under the programme will take care of approximately 50,000 tons of grain.

A 1955 supplement to this programme provided equipment for the purpose of reducing grain damage caused by high moisture content, and dust and other foreign particles. The pilot and demonstration equipment provided under the programme is expected to assist in improving methods for handling and storing grain in the future.

Under the 1956 programme, it is proposed to increase the storage capacity from 400,000 tons of grains to 1,000,000 tons. Prefabricated metal storage structures are being acquired from outside India.

Technical assistance provided under the programme includes the services of a grain storage expert, an agricultural engineer and an entomologist. Provision is also made for officers of the Union Ministry of Food and Agriculture to study grain storage in the United States.

**Total Commitment to June 30, 1956:**  
U.S., \$5,468,000

**Village Worker Training:** Before the broad programme of rural development embodied in Community Projects got under way in 1952, training of village workers had begun at five training centres set up by the Government of India, the States and the Ford Foundation.

Twenty-five additional training centres followed soon afterwards, with the Ford Foundation providing full operating expenses for a two-year period, and with the Indo-American programme furnishing vehicles, training aids, agricultural demonstration equipment and other supplies. American agricultural extension specialists have worked with the training centres helping the staff train the village workers who in turn carry better agricultural techniques to the farmers of India. At present there are 43 training centres and they have trained more than 5,000 village workers who are on the job in Community Projects. More than 600 supervisory personnel also have been trained.

Courses have also been set up in 25 existing training centres to train women in home economics extension work. Instructors receive part of their study course in India, part in Japan. New courses in farm leader training also have been introduced, and instructors are being sent to Denmark to study the Danish folk schools, famous for their contribution to improving farm life.

The 1955 programme provided instruction facilities, equipment and supplies for 97 such basic agricultural schools as well as 16 additional training centres, and 16 additional home science wings to be attached to training centres.

The 1956 programme makes available funds for the acquisition from outside India of books; demonstration supplies and equipment for the training centres, for financing motion pictures and

film strips to be locally produced, the services of 24 extension specialists plus the training of 12 Indian extension personnel.

**Total Commitment to June 30, 1956:**  
U.S., \$1,034,461.

#### **Livestock Improvement**

U.S. Commitment to June 30, 1956—\$148,100.

In addition to technical assistance and training opportunities abroad in animal disease control, this project will furnish pilot and demonstration biological production equipment for the Biologic Products Division of the Indian Veterinary Research Institute. This project is associated with the work of FAO in India, which is at present concentrating on the production of a dried rinderpest vaccine and its use through a country-wide rinderpest eradication programme.

Under the 1956 programme, funds are provided for acquiring from outside India demonstration and training equipment and the services of five experts in animal nutrition, poultry husbandry, etc. Two Indian personnel are also to be trained abroad.

**Agricultural Education and Research:** Agricultural research and agricultural education institutions at the college level in India are filling a vital need in training leaders and technicians. From more than 20 such colleges about 1,250 students are graduated each year. Many of these institutions do not have adequate laboratories or classroom and training equipment.

A number of institutions devoted primarily to agricultural research was assisted under the programme in 1954, and previous years, by the provision of more complete field, laboratory, classroom and training equipment, books and journals. Provision was also made for the interchange of staff personnel and advanced students between agricultural institutions in India and the United States.

In the 1955 programme further provision was made for equipment as well as the interchange of faculty and students with emphasis upon a regional programme. On this basis five United States land grant colleges and universities accredited to the Ministry of Agriculture—Kansas State College, Ohio State University, University of Illinois, University of Missouri and University of Tennessee—each co-operates with the agricultural institutions in a particular region in India to carry out an interchange of selected faculty and students, provide supporting and advisory services, as well as assist in procurement of equipment and supplies under the programme.

The 1956 programme provides for expanding the Kansas State College contract, and additional funds provided to the Universities of Missouri and Tennessee will make possible the establishment of post-graduate training courses at the Indian Veterinary Institute and the National Dairy Research Institute. Eight training grants will be given to Indian technicians for further study abroad and the services of five veterinary professors will be provided for assignments with veterinary colleges in India. Other technicians' services will be provided as needed.

**Total Commitment to June 30, 1956:**  
U.S., \$ 5,057,517.

**Agricultural Information Production and Training:** The provision of technical assistance, equipment and supplies in connection with the All-India Agricultural Information Programme is the main purpose of this project.

Approximately 15,000 village extension workers, plus additional extension workers in specialised fields such as home science, were at work in Community Projects and National Extension Service Development blocks by March 31, 1956. This project is to supply simple reference materials, audio-visual production and teaching

aids to relay information on the latest findings in agricultural research and experience to these extension workers as well as cultivators.

Support is also being given to the Indian Council of Agricultural Research to enable the Council to perform its key role in the programme, which includes organization of national workshops, establishment of regional training courses and preparation of extension material.

**Total Commitment to June 30, 1956:**  
U.S., \$200,000.

**Agricultural Economic Research:** As agriculture is by far the most important means of livelihood in India, special steps are being taken to develop research in the field of agricultural economics in order to increase production and raise the standard of living of the people.

The Government of India has established four agro-economic research centres and six farm management centres which will specialise in agricultural research and farm management studies respectively and encourage research.

This project is to provide further technical assistance, training opportunities, equipment and supplies to assist in developing and implementing work in various aspects of agricultural economics, and particularly to assist in the research programme noted above in farm management and economics of agriculture. Such equipment as calculators, card punching, tabulating and verifying equipment and books on agricultural economics, will be provided from outside India for the use of the research centres.

The 1956 programme will provide training facilities in the U.S. for an Indian production economics specialist and an agricultural production economist.

**Total Commitment to June 30, 1956:**  
U.S., \$79,400

#### **Pilot Project on Production, Processing and Marketing of Citrus Fruits**

U.S. Commitment: \$14,340.

The present project is intended to assist in the development of co-operative techniques in the production, processing and marketing of citrus products in India in the light of American experience.

Provision is made for the training of one Indian at post-graduate level in the improvement and standardisation of citrus culture, citrus research, and allied horticultural problems.

#### **Crop Production and Development**

U.S. Commitment—\$21,267.

Extensive experience in the United States, Mexico and Italy with hybrid seed, accompanied by increased fertilisation and better cultural practices, has shown that increases in maize yields of up to 100 per cent are possible in India.

Although testing of hybrids has been undertaken in India at several places under the auspices of the Indian Council of Agricultural Research, the limited quantity of hybrid seed available has hindered research and developmental efforts.

This Indo-American project, initiated in 1955, is designed to support the compilation of comparative data on both grain and fodder yields, the study of the adaptability of varieties, and the determination of the best dates of planting and the best methods of culture and fertilisation. Dollar aid will be used to acquire moisture testers, corn planters, two-row cultivators, foundation stock seed and double cross seed from outside India.

Under the 1956 programme, hybrid corn and crop seeds will be supplied free of charge to selected flood-stricken areas for a mass demonstration of the potential hybrid corn production in the Punjab and for demonstrating improvement of grass-lands in the hills of the Punjab and other areas. In addition, a sugarcane clone collection will be established at Coimbatore, and equipment and books supplied to the Central Rice Research Institute.

**Calcutta Milk Supply Scheme**

U.S. Commitment—\$340,000.

Under the Indo-American programme financial assistance will be provided towards the cost of establishing a milk pasteurising and processing plant in Calcutta having a capacity of 500,000 lbs. Also, technical assistance will be provided to assist in the training of Indian technicians in the operation of the processing plant.

**Dairy Development**

U.S. Commitment to June 30, 1956—\$300,000.

Under this project the U.S. will assist India in its effort to increase and improve the quality and supply of milk and milk products, improve diet, afford additional income to the farmers, help stabilise prices by providing milk processing plants for the availability of dried milk, and extend the market area.

The U.S. will provide technicians to advise Indian Government officials and train personnel on the practical aspects of dairy herd management, dairy processing plant operation, and the marketing of dairy products.

Pilot demonstration and training equipment for one milk processing plant and associated rural collection centres, three rural creameries and several co-operative milk union plants will also be provided.

**INDUSTRY AND MINING**

American aid is directed to those aspects of industrial and mineral development in India where technical and commodity assistance could best serve India's need. During the 1952-56 period, approximately 29 per cent of all United States assistance to India—\$94.7 million—was spent to assist to the maximum extent possible India's own efforts in the field of industrial and mineral development. Project agreements in this field are:

**Iron and Steel for Agricultural Purposes**

U.S. Commitment to June 30, 1956—\$19,855,337.

It is the intent of this project to further production of improved farm machinery and implements in India. There are at present a number of factories which produce the latest types of farm machinery, but only a portion of their total capacity is being utilized because of the acute shortage of iron and steel.

In order to partly meet these deficiencies, this project will acquire from sources outside India a total of 135,000 long tons of iron and steel. Iron and steel imported under this agreement will become part of the steel pool of India for distribution to blacksmiths and farmers as well as to farm implement factories.

**Forest Research:** The forest research project under the Indo-American programme is supplying various types of testing and laboratory equipment, of latest design, for use at the Forest Research Institute in Dehra Dun. Machinery and consulting services are also being supplied for completion of a pulp and paper mill.

Total Commitment to June 30, 1956:

U.S., \$424,500

**Building Materials Development**

U.S. Commitment to June 30, 1956—\$291,500.

This project supports the work being carried on at the Central Building Institute at Roorkee, Uttar Pradesh, with the addition of laboratory and pilot plant equipment. This is for experimentation with indigenous materials, with a view to the ultimate establishment of a pre-mixed plaster industry in India.

This project will consist of a Soil Engineering Laboratory, the Concrete Engineering Laboratory and a Structural Engineering Laboratory, as well as a pilot plant for preparing light-weight aggregates and cement asbestos sheets.

**River Valley Development**

U.S. Commitment to June 30, 1956—\$9,050,944.

This project is designed to provide technical assistance and heavy equipment required for the river valley development programme. In addition, two training centres for operators and mechanics have been established to help cope with the problem of efficient utilization and maintenance of construction equipment.

Heavy equipment under this project started arriving in May 1953. At Hirakud Dam, power shovels, crawler type tractors, air compressors, dump trucks, road scrapers and other equipment are in operation. Similar equipment has been supplied for the Kakrapar, Mahi and Gangapur projects in Bombay State, Ghatprabha and Tunga Anicut in Mysore, Jawai project in Rajasthan, Chambal in Rajasthan and Madhya Pradesh, Patnri power-station in U.P., and for several projects in Saurashtra.

American engineers and river development specialists, requested by the Government of India, work with Indian counterparts of the Central Water and Power Commission. An American engineering concern working on the Damodar Valley development is also under a contract provided for under the Indo-American programme.

In the 1956 programme the United States will make available two large dragline excavators for the Chambal project, together with a factory trained erector to supervise their assembly, and two operators and one mechanic to train Indian personnel in dragline operation and maintenance.

**Rihand Valley Development:** Development of the Rihand River Valley in eastern Uttar Pradesh will make possible the irrigation of possibly two million acres of land in U.P. and Bihar through power for tubewells and by direct use of canal waters.

Total cost of Rihand development is some \$95 million, with 47 per cent of this in foreign exchange costs. The Indo-American programme is assisting in the first phase of the project which includes construction of the dam, the initial power plant and switchyard installation, and a major portion of the transmission system. The U.S. contribution includes both economic and technical assistance funds.

Total Commitment to June 30, 1956:

U.S., \$6,420,533

**Exploratory Lignite Excavation and Development:** The State of Madras requires about three million tons of coal a year, but for the past several years it has been able to bring in less than two million tons. Yet the South Arcot district has a one-hundred square mile deposit of lignite or "brown coal". Estimated reserves run to 2,000 million tons.

Various exploration efforts have been under way since 1945, and from October 1951, to June 1955 Paul R. Eylich, lignite engineer from the U.S. Bureau of Mines, worked in company with Indian mining engineers and geologists assembling data. Investigations in 1953 reached the stage where the Indo-American programme set up an exploratory excavation project, to determine the costs of mining and the most practical manner of utilising the lignite deposits. The experimental excavation has been under way for several months, with power shovels and other equipment supplied by the Indo-American programme.

Under the 1955 supplement, a pilot processing plant, a power plant, laboratory equipment, technical reference books, and other supplies and equipment were provided for as well as funds for additional technical services.

Total Commitment to June 30, 1956:

U.S., \$748,500

**Augmenting Steel Supply**

U.S. Commitment to June 30, 1956:

\$44,140,885.

The shortage of steel is a major obstacle to the attainment of India's economic development objectives. Whereas the normal annual production is approximately 1.1 million tons, the estimated annual demand is 2.3 million tons. The United States has recognized that if economic development is to succeed in India the capacity for steel output must be increased. In the interim period U.S. assistance has provided for the import of 135,000 long tons of steel for agricultural purposes.

Under this agreement approximately 330,345 additional long tons of steel will be made available to India for use by Indian Railways, by steel processing industries such as ship-building, for the manufacture of hospital equipment, oil drums and containers, pipes and tubes and industrial machinery, and for requirements of river development and some additional agricultural purposes.

**Heavy Equipment Training:** For its river development projects India acquired a great deal of heavy equipment—tractors, dump trucks, shovels, graders, crushers, scrapers and the like. Both American and Indian technicians have recognised that more thorough training of operators and maintenance crews is necessary, and two heavy equipment training centres are being established—one at Hirakud Dam, in Orissa, the other at Kotah in Rajasthan, near the Chambal project, each to train at least 40 operators and mechanics a year.

Dollar aid under the programme is for heavy equipment to be used in training as well as for technical specialists.

Total Commitment to June 30, 1956:

U.S., \$550,000.

**Improvement of Rajasthan Power Facilities:** The programme aims at meeting a particular shortage. Equipment will be obtained to renovate and augment 19 thermal stations in the State of Rajasthan and to extend transmission and distribution lines. A total of 20,000 kilowatts of generating capacity is to be installed.

Total Commitment to June 30, 1956:

U.S., \$1,065,000.

**Industrial Research and Technical Services Organisations:** To strengthen research organisations and technical service departments under the Ministry of Scientific Research, a programme for supplying technical assistance and essential items of equipment was drawn up in April 1954.

The National Physical Laboratory at New Delhi will receive electronic and other precision testing instruments; the National Chemical Laboratory at Poona will receive library and laboratory equipment and microfilm equipment. Pilot plant and other equipment is to be provided for the Fuel Research Institute at Jaigarh. Special equipment and training of engineers are provided for the Central Electronic Engineering Research Institute at Pilani.

The Geological Survey of India is to be assisted with geophysical, petrological and mineralogical equipment for its laboratories; the Survey of India with photogrammetric equipment for making maps, and the Bureau of Mines with equipment for handling low-grade manganese ore and chrome ore.

The 1955 supplement to this programme provided for additional technical assistance, equipment and supplies to the following research organisations: Leather Research Institute, Central Glass and Ceramics Research Institute, Central Food Technological Research Institute, Central Drug Research Institute, National Chemical Laboratory, and Physical Research Laboratory.

Total Commitment to June 30, 1956:

U.S., \$2,537,500.

**Flood Control**

U.S. Commitment to June 30, 1956—\$302,000.

This project provides assistance in the design and construction of major and minor flood control works in India. Financial support from the United States is used to cover technical assistance, and to meet offshore costs of equipment, including fully equipped motor launches for measuring speed of current and depth of flood waters, and helicopter services for observation and supply purposes.

**Electrical Distribution Systems Maintenance Training Centres:** Under this project it is proposed to establish centres in India for the training of workmen in "hot line" maintenance of electric lines in order to reduce the number of interruptions to service. Equipment to be provided at each centre under the project includes basic "hot" line tools, service vehicles and other instruction and demonstration equipment. Instruction will first be provided in the fundamentals of routine line maintenance and thereafter in "hot line" maintenance. These centres will also provide training in advanced techniques and demonstrate new tools for routine line maintenance. U.S. aid will provide specialists in "hot line" maintenance and routine line maintenance to provide instruction and advice at the training centres.

Total Commitment to June 30, 1956:

U.S., \$240,000.

**Industrial Technical Services**

U.S. Commitment to June 30, 1956—\$2,447,900.

Technical assistance has been provided to India's industrial progress by making available under the Indo-American programme productivity teams and individual experts who will assist in production technology, quality of production and industrial management. They will function among such industries as the textile, steel, cement, blocksmelting, well-drilling tools and equipment, and foundry industries.

The United States assistance also includes provision of supporting equipment, supplies and technical literature. Other assistance includes provision of training opportunities abroad and the establishment of a technical and visual aids library and a technical information unit in the Ministry of Commerce and Industry.

The 1956 programme makes provision for additional specialists to aid in overcoming insufficient management and productivity skills, as well as providing mobile blacksmith and machine shop vans for demonstration purposes.

**Rural Electrification**

U.S. Commitment to June 30, 1956—\$3,000,000.

The objective of this programme is to assist in the development of rural electrification in India by providing foreign exchange funds for purchase of materials not now available within the country. Approximately eleven million rural people will receive electric service under this project.

**Tubewell Casting**

U.S. Commitment to June 30, 1956—\$2,000,000.

The Indo-American programme of 1952 and 1953 included financial and technical assistance to the Central and State Governments for the construction and powering of 3,000 tubewells.

Subsequently, 3,600 wells were allotted by the Central Government under the Second Five Year Plan. In 1956 Indo-American aid consisted of supplying water well casing pipe for an estimated 2,000 wells at a cost of \$2 million, bringing the total aid amount for a five-year period to \$21,530,000. The pipe has been allocated for the construction of wells in Uttar Pradesh, Bombay, Punjab and Bihar.

2,000 wells will provide supplementary irrigation to approximately 600,000 acres of land and are estimated to increase food-grain production by about 150,000 tons annually.

**Steel Casting Foundry**

U.S. Commitment to June 30, 1956—\$289,500.

The establishment of a foundry for the manufacture of large steel castings in India was essential if Indian locomotive production was to be expanded to meet the railway targets of the Second Five-Year Plan.

Accordingly, the Government of India is to establish a steel foundry at Chittaranjan, West Bengal, as an ancillary project to the Chittaranjan Locomotive Works for the manufacture of steel castings: mainly locomotive underframes, twin steam cylinders, and manganese steel railway crossings and points. Heavy steel castings, all of which are now imported to India, are the main current bottleneck in locomotive production.

An American firm has been engaged to supervise all aspects of the design and erection of the steel foundry. Project assistance will also include provision for the training of Indian technical personnel in the United States.

**Irrigation Research Institute**

U.S. Commitment to June 30, 1956—\$81,200.

Under this agreement, the U.S. will provide technical equipment and advice and information for the installation and operation of a modern construction material research laboratory and materials testing laboratory, and for the expansion of the present hydraulics laboratory at Roorkee for the Uttar Pradesh Irrigation Department. American assistance will cover, apart from the equipment, the services of a technical expert for at least one year to advise and assist in the installation of the laboratory equipment and to instruct Indian personnel in its use.

**Small Industries Development**

U.S. Commitment to June 30, 1956—\$808,400.

Under this project the United States will contribute various items of basic machinery and equipment not available in India for the training and demonstrational units of the Delhi Industrial Estate. The United States will further make available, under contract, the services of six technical men who will advise on the planning, layout and equipment required for the pilot production and development centre; they will also advise and assist in the development of plans, programmes and construction specifications necessary for the establishment and initial operation of the component units of the Delhi Industrial Estate.

Training facilities are also provided for an Indian technician to study vocational and industrial training techniques in the United States.

**Water Resources and Power Development**

U.S. Commitment to June 30, 1956—\$150,000.

This project is intended to assist the Central Water and Power Commission in keeping abreast of the latest technical developments in this field.

TCM will provide funds for procurement in the United States of technical publications, documents and reports for the use of the Commission. In addition, the services of eleven engineers from abroad will be made available to the Commission. Provision is also made for the training in the U.S. of Indian personnel in engineering fields. Under another project, \$100,000 is provided for technical and engineering advisory services to the Central Water and Power Commission.

**Telecommunication Development**

U.S. Commitment to June 30, 1956—\$106,500.

The Posts and Telegraphs Department of the Government of India, Ministry of Communications is now establishing a Telecommunication Research Laboratory to carry out design and other development research work. This project will provide assistance in the form of a nucleus of modern laboratory-type precision testing and measuring equipment for line communication systems, technical books and publications for

reference purposes, and a telecommunication engineer to assist in the organization of this unit, setting up the laboratory and training research personnel.

**Industrial Design**

U.S. Commitment to June 30, 1956—\$162,800.

The Regional Small Industry Institutes provide an extension type of advisory services to small industry in India. Industrialists in this field can obtain technical advice on such problems as production, materials, marketing and engineering.

Under this project, one industrial design specialist will be assigned to each of the initial four Regional Institutes of Delhi, Bombay, Calcutta and Madras. The specialist will evaluate local production and develop new product designs in the light of production plans, and recommend materials and distribution methods for both small industries producing mainly for internal consumption, and handicrafts producing mainly for export.

**TRANSPORTATION**

The urgency of helping India to resolve her transportation problems has influenced the support given by the United States for this purpose. Approximately 19 per cent of total U.S. aid given to India in the years 1952-56 was for the modernisation and expansion of her surface transport facilities. Of the \$65.6 million made available for improvement of railway and aviation facilities \$63 million has been apportioned for the import of new equipment to replace uneconomic, outmoded equipment; for the import of semi-finished steel products necessary to augment India's present allocation of steel for railroad purposes; and for the services under contract of a Railway Survey Team which will supplement the efforts of India's own Railway Board. Project agreements in the transportation field are:

**Railway Rehabilitation and Expansion**

U.S. Commitment to June 30, 1956—\$63,062,200.

The railway rehabilitation project under the 1954 Indo-American programme provided for the purchase by India of 100 new locomotives, 2,500 broad gauge freight cars and 2,500 meter gauge freight cars. An additional \$7,975,000 was made available by the United States Government to offset the excess cost of railway equipment procured in the U.S. under 1954 funds, but not formally covered by a project agreement.

Under the 1955 programme the U.S. provided approximately another 3,700 freight cars. Altogether the Indo-American programme will have added 8,730 freight cars and 100 locomotives to the Indian railway system.

Additional technical assistance is making possible an extensive survey of the Indian railways to suggest immediate as well as long-term recommendations necessary to meet the increasing pressure on the present inadequate system.

A study has also been made of how to achieve optimum capacity as well, by increasing certain basic capital expenditures over a five to ten-year period.

A second survey has been undertaken into the economic feasibility of utilizing combined rail-sea shipment of bulk commodities, thereby relieving pressure placed on the railway system caused largely by increasing coal traffic.

In addition to supplying locomotives and freight cars, United States assistance in 1956 provides from outside sources 255,000 tons of steel and 4,000 tons of rails for the expansion and rehabilitation of Indian railroads.

**Expansion of Aviation Ground Facilities**

U.S. Commitment to June 30, 1956—\$2,636,500.

Radio teletype facilities established under the Indo-American programme have permitted the decommisioning of the much slower, manually-operated radio corresponding telegraph circuits.

The project has provided additional assistance for modernization and expansion of telecommunication, navigational and meteorological aids. This includes installation of 10 duplex radio teletype network terminals, one ground-controlled approach radar (GCA) facility for handling traffic in bad weather at Bombay, and at least 10 very high frequency semi-directional range (VOR) facilities for use as short-range navigational aids. A storm warning radar system has been provided at Calcutta for use by the Indian Meteorological Department.

Subsequently, it was proposed to provide modern electronics equipment for the Civil Aviation Training Centre at Allahabad in order to ensure that personnel receive training in the same type of equipment they will later have to maintain. It is expected that 200 Indian technicians will receive training at this Centre. Training opportunities in the United States will also be made available for five Indian personnel in flight inspection, electronics engineering and air traffic control.

#### Civil Air Transport

U.S. Commitment to June 30, 1956—\$33,500.

Under this project, designed to improve Air India International, an executive of broad experience in the general management and operations of an airline is to be furnished for a four-month period and a specialist in stores and inventory management for a six-month period to examine the management, organization and operations of Air India International and make recommendations for improvement.

As a result of the recommendations to be made by the specialists, the United States may, on request, furnish additional technical assistance during a one to three-year period in order to ensure that the development of operations is on high standard, long-range basis and that adequate co-ordination is established between the various AII departments. A programme for development and training of management and supervisory personnel will also be considered; as well as the studying and improving of aircraft maintenance and utilization leading to improvement of operations in the stores department.

#### LABOUR

The Labour Division of the U.S. Technical Co-operation Mission is co-operating with the Government of India in the labour field by providing the services of American experts to work with officials of the Union Ministry of Labour, by sending Indian experts to the U.S. for study, and by supplying necessary commodities and equipment for use in India.

Specific projects have included assistance to the Central Labour Institute, programmes designed to improve the vocational training system and to train foremen for industry; studies in the field of industrial health, and union leadership training schemes.

#### Central Labour Institute

U.S. Commitment to June 30, 1956—\$100,000.

This project is assisting the Central Labour Institute in Bombay, to promote industrial efficiency and increased productivity by encouraging improvement in the safety, health and welfare of industrial workers.

The Institute has a centre of visual demonstration, an industrial hygiene laboratory, a library and information bureau, and provides facilities for training. It also can serve as a meeting ground for government, management and labour groups, and provide a hostel for 25 students.

U.S. funds are being used for exhibits, equipment and apparatus for the laboratory, technical books and other supplies and equipment.

**Trades Training:** The Central Government and States of India have established over 570 training centres which are training annually 35,000 workers.

It is planned under the Indo-American programme to assist in co-ordinating, re-equipping and improving the standards of performance of existing centres for the training of skilled workers in the basic industrial and construction trades.

Nine key instructors went to the United States for a year's training which included a course at Cornell University, followed by training at industrial plants in the United States. These key instructors will train other instructors for India's training centres. The United States will provide a trades training expert and also other technical assistance as required under this project.

The Indo-American programme also provided among others, the following types of equipment for instruction purposes: electrical apparatus, construction equipment, lathes, drills, presses and other machine tools, metal working machinery, automotive repair and maintenance equipment, and such scientific and professional equipment as planimeters and small electric oven furnaces.

In addition, the 1956 programme provides for the contract services of a trades training adviser and for the initial funding of a contract by which 10 expert craftsmen are to be made available for setting up the second instructors' training institute.

Total Commitment to June 30, 1956:

U.S. \$ 910,590.

#### Thermal Environment

U.S. Commitment to June 30, 1956—\$15,750.

Indo-American studies in industrial hygiene were first undertaken in 1951-53. In continuation of these studies, the 1955 project provided for investigations, demonstrations and training in the measurement and regulation of the thermal environmental conditions of workers, with special reference to the textile industry.

Special laboratory equipment was installed at Ahmedabad to assist in detailed investigation of thermal environmental conditions in basic industries in various parts of India. These investigations sought to draw a relationship between thermal environment and physiological and other effects on workers and on their productivity, with a view to determining standards of industrial hygiene and efficiency ranges. Reduced labour turnover and increased production are among the other results expected. Dollar aid is used for special equipment and supplies to be used for testing purposes.

The 1956 programme provides for additional special equipment and the services of an industrial hygienist and thermal environment consultant.

#### HEALTH AND SANITATION

Malaria control offers the best example of the results of Indo-U.S. teamwork in this field. The National Malaria Institute has announced that in 1955 there were more than half a million deaths and over 50 million cases of malaria prevented by the control programme.

In the fields of water supply and sanitation, medical education, nursing education, malaria control and health education, co-operative programmes are well under way, and although the results cannot be so clearly measured as in the malaria programme, they are all contributing heavily to building a strong, healthy people that will be the basis for a prosperous, stable nation. Projects under this category include:

#### Malaria Control

U.S. Commitment to June 30, 1956—\$21,492,107.

The National Malaria Campaign involves the organisation of control units. In the first three years of the Indo-American programme 125 units were organised, each extending protection to one million persons. The 1955 addition to the programme raised the number to 136 control units.

The 1956 programme contemplates the establishment of 64 more units to cover a population of 200 million people. It is proposed to acquire from outside India 10,000 long tons of DDT powder, 200 tons of dieldrin powder, 240 trucks and 64 jeeps to meet the needs of the 64 new units as well as meeting the continuing insecticide requirements for the control units now in operation.

**National Water Supply and Sanitation:** After malaria, the outstanding health problem in India is the group of diseases which are water-borne or filth-borne. These include cholera, dysentery, typhoid fever and others. At present only six per cent of the total population of the country is served by adequate piped water.

For more than two years, American and Indian health authorities have been working out the details of a national programme. Plans were developed to improve water supplies and sanitation in some 10,000 villages and 25 municipalities during the first Five-Year Plan, with the expectation that a much more comprehensive effort can be undertaken by the Government of India and the States in the Second Five-Year Plan.

Dollar aid has been used to buy pumps, well drilling rigs, trucks, jeeps, air compressors, well casing, galvanised iron pipe and cast-iron water pipe. The 1955 programme provided for additional equipment, training facilities and technical services with stress on the demonstration phase of the programme.

The 1956 programme provides for continuing aid in purchasing over 8,000 tons of cast-iron pipe.

Total Commitment to June 30, 1956:

U.S. \$6,424,697.

**Medical Colleges and Allied Institutions:** Under this project such equipment as spectrophotometers, centrifuges, incubators, blood cell calculators, ultimate analysis apparatus, vacuum ovens, extraction apparatus, sterilizers, microscopes, X-ray and other laboratory, hospital and research equipment is obtained to assist in teaching and research on diseases constituting basic health problems affecting economic development.

Classes of institutions to be aided include medical colleges, research institutes, schools of nursing, and institutions which have courses in public health engineering.

Under the 1956 supplement to the agreement, additional technical assistance, training opportunities, equipment, and supplies were provided for colleges and allied institutions.

Total Commitment to June 30, 1956:

U.S. \$680,000.

**Health Instruction Training Centres:** The importance of training in basic public health, and of health education for instructors at village worker training centres, as well as for others dealing with health programmes in Community Projects, is recognised in a programme for setting up three health instruction training centres.

The programme was developed by the Ministry of Health of the Government of India, with the Ford Foundation and the Technical Co-operation Mission. Three health instruction training centres, are being established at Poonamallee in Madras State, Singur in West Bengal, and Najafgarh, Delhi State.

Under separate agreement, Ford Foundation made available \$353,105 for construction of hostels and residential accommodations for the staff and for full operating expenses for two years, one-half of such expenses during the third year and one-third during the fourth year.

Funds available under the Indo-American programme will supplement this effort with necessary equipment and supplies for the health instruction centres, such as personnel carriers, audio-visual aids, teaching materials and other equipment.

Total Commitment to June 30, 1956:

U.S. \$37,000.

**Control of Filariasis:** Under this project assistance is provided for the development of a nucleus for a nation-wide filaria control programme to be implemented under India's Second Five-Year Plan. Objectives are reducing substantially the incidence of filariasis by providing treatment to infected persons, protecting people in endemic areas, and finally stopping the spread of the disease to new areas. It is estimated that the initial programme will provide protection to approximately four million people living in hyper-endemic filariotic areas.

The U.S. has already assisted in expanding the facilities of the National Malaria Institute to enable it to provide training facilities, consultation services, research facilities and overall direction of the programme, as well as setting up 13 control and 22 survey units in 12 States. The initial survey stage has now been extended and the number of control units will be increased by 35 to 48.

The U.S. will make available additional insecticides for the 13 existing units, and insecticides, drugs and equipment (including station wagons, jeeps and microscopes) for 13 of the 35 new control units to be established. The services of a public health engineer and an entomologist will also be made available under this project. Added training facilities for Indian technicians in parasitology and entomology will aid further in the fight against filariasis in India.

U.S. Commitment—\$1,412,700.

## EDUCATION

The TCM is actively assisting India in the gigantic programme of reorienting, strengthening, and expanding education in India, focussing emphasis upon leadership education through demonstration, teaching and guidance, developing research programmes and extension services. Projects in this field are:

**Technical Education Institutions:** Technical assistance and essential items of equipment will be provided for the Indian Institute of Technology, Kharagpur, to facilitate the training of increased numbers of engineers and technologists, at post-graduate level, needed for India's industrial development.

The Indo-American programme already is financing the exchange of faculty personnel between the Indian Institute of Technology and the University of Illinois in the United States.

Inter-institutional arrangements have also been in effect between the University of Wisconsin and the Bengal Engineering College, Indian Institute of Science, Roorkee University, Indian School of Mines and Applied Geology, Birla Engineering College, and the Bihar Institute of Technology.

A 1955 supplement to this project provided for extension and expansion of the inter-institutional arrangement between the University of Illinois and the Indian Institute of Technology. It will further strengthen and activate instruction and research in the field of engineering at Roorkee University through an arrangement with the University of Illinois.

The services of specialists totalling 22-man years, and training in the U.S. for twenty Indian staff members have also been provided for.

Total Commitment to June 30, 1956:

U.S., \$2,016,100.

## Home Science Education and Research

U.S. Commitment—\$683,000.

This project is assisting selected Indian institutions by providing home science specialists, interchanges of staff personnel and advanced students between home science institutions in the United States and India, as well as special equipment and supplies for classroom and laboratory purposes.

## Secondary School Teachers

U.S. Commitment—\$1,206,900.

A contract will be entered into with the University of Texas to provide technical experts in teacher education who will assist in establishing and carrying forward a strong programme of teacher training. In addition, U.S. funds will be used for books, teaching aids and audio-visual equipment, as well as supplying each of 54 participating institutions with a vehicle.

## Educational Administration

U.S. Commitment—\$50,000.

U.S. aid consists of the services of a highly qualified specialist in educational administration who will work directly in the Central Institute of Education in the Ministry of Education, as well as working with the State Departments of Public Instruction.

Commodity assistance will consist of professional publications in the field of educational administration, books, bulletins, periodicals and other related library material.

This project serves both as a projection of and a complement to the secondary education project, mentioned above.

## Foundry Training

U.S. Commitment—\$175,700.

This agreement provides for U.S. financial assistance for the purchase of essential foundry equipment and supplies not now available in India and to extend the services of a U.S. foundry technologist to the Foundry Training Centre at Kharagpur.

## COMMUNITY DEVELOPMENT, SOCIAL WELFARE AND HOUSING

The Community Development Programme has been largely an Indian programme, but the American contribution in its most basic terms—the ideas of extension, the American techniques to teach the idea of extension and the jeeps to carry its benefits to the people—has played a vital catalytic role. Projects in this category are:

### Community Projects

U.S. Commitment—\$12,892,960.

As of September 1956, there were 557 Community Development blocks and 602 National Extension Service Blocks in India, covering 126,857 villages with a population of 82,200,000.

TCM aid which had arrived and been distributed to the States for community project use totalled \$7,884,348 and the equipment included 1,994 jeeps; 236 station wagons, pickups and other trucks; 30 health vans; 34 motor graders; 163 tractors—some of them fitted with bulldozers; 38 road rollers; 350 trailers, and 1,000 film projectors.

### Improved Methods of Low-Cost Housing

U.S. Commitment—\$56,000.

This project aims at supply technical advice and demonstrating materials and techniques. It is also intended to train Indian labour in the new methods and techniques. Such materials as roofing, doors, windows and chemicals for treating wood to resist damage by termites, are purchased from abroad in limited quantities with a view to their being manufactured in India if found suitable.

### Social Welfare Education

U.S. Commitment—\$340,280.

Initially the Indo-American programme provided the services of a child-welfare worker for the Delhi School of Social Work and short-term consultants to the Indian Conference of Social Work. The 1955 programme provided for additional specialists from outside India in social research, group and field work, medical social work, child welfare and community organisation. The specialists were assigned to various institutions in India, including schools of social work,

at Delhi, Baroda, Lucknow, Bihar and Madras to assist in curriculum development, research programmes and social welfare projects. Each specialist was provided with visual aid, testing and other equipment, and pertinent technical publications. The project received continued support under the 1956 programme.

## PUBLIC ADMINISTRATION

Public administration has not occupied any important place in the Indo-American programme for the reason that there have been other fields where U.S. assistance could be more meaningful. However, there have been special areas in which relatively small projects have been taken up, and more of these are likely to develop in the future. In addition to the specific projects listed below, a number of experts in administration have come to India to make suggestions for improving operational methods, and Indian administrative personnel have gone to the United States for special training. Projects in this field are:

### Improved Statistics and Reports

U.S. Commitment—\$13,630.

A new Statistics and Reporting Section was recently established within the Department of Economic Affairs, Ministry of Finance, for the purpose of processing operating statistics for the Foreign Aid, Economics and Budget Division of the Department, and other statistical reports required by the Government of India. This project will equip the new section with basic modern office machines to enable it to perform as efficiently as possible in tabulating, presenting and reproducing data required for projects aided by the Technical Co-operation Mission and the Government of India economic programme.

The installation serves as a demonstration unit for other departments of the Government of India, with a view to improving operating statistics and reporting, and aiding in the improvement of public administration generally.

### Assistance to Indian Statistical Institute

U.S. Commitment—\$2,800.

Under the present agreement a statistical quality control expert will be provided to the Indian Statistical Institute for up to one year. In addition, an electronics equipment specialist is to be provided for a short period to examine the Institute's needs.

Under another agreement the United States will provide a set of approximately 400 management books and periodicals for the particular use of the industry and management research unit of the Institute.

## FOUNDATION AID

As mentioned above, major institutional aid includes programmes by the Ford and Rockefeller Foundations.

In August 1951, at the invitation of the Indian Prime Minister, Paul Hoffman, then President and Director of the Ford Foundation visited India to discuss the possibilities of financial assistance. Activities supported by the Ford Foundation in India include: rural development, development of small industry, education, public administration, research and training, and cultural interchange. As of December 1956, Ford Foundation aid to various programmes in India totalled about \$15 million.

Specific project allocations include: pilot extension projects, \$1,200,000; training of village extension workers, \$1,873,485; training of social education organisers, \$375,363; training of rural public health workers, \$358,105; training of women extension workers, \$618,000; training of village blacksmiths and artisans, \$407,575; aid to agriculture colleges, \$1,360,000; training of project executive officers, \$204,000; aid to regional conferences for project executives, \$37,985; international planning team on small industry, \$107,000; training and provision of

senior technicians, \$180,000; secondary education study team on teacher training and curricula, \$102,500; seminars for headmasters, \$58,500; study tour of rural educators, \$28,000; study and planning team on rural higher education, \$22,525; workshops on writing for new literates, \$12,630; Institute of Public Administration, \$350,000; and a Gandhi Memorial Community Centre in Delhi, \$85,000.

In 1955, an omnibus education grant by the Ford Foundation totalling approximately \$2,000,000 was used to support an Institute for teachers and a national clearing house of information on education; to aid four technical institutes to help small scale industries; to sponsor a training programme for public health workers; and to help finance a project designed to make good books available at low cost.

**Rockefeller Foundation Aid:** The Rockefeller Foundation has also extended aid to India in the field of public health, especially training of health personnel. This programme has been in existence for more than two decades. The Foundation has had one or more representatives in India since 1920, helping the Government of India and State Governments, at their request, to develop public health programmes.

It supplied funds for the construction and equipment of the All-India Institute of Hygiene and Public Health in Calcutta in 1932, and also aided in the setting up of seven rural demonstration health units. As of December 1, 1956, Rockefeller aid to India was estimated to total \$6,000,000.

The Watumull Foundation also has a sizable programme for India in the fields of education and population control.

#### PRIVATE AID

Impressive though the above figures may be, it is the private voluntary aid—both from individuals and voluntary welfare agencies—that reveals the extent of good will that ordinary Americans bear towards India.

Relief supplies of all kinds valued at about \$41 million (Rs. 20 crores) have been donated by individual Americans in all walks of life during the five years from July 1951 to June 1956 for distribution to needy persons throughout India, according to the Council of Voluntary Agencies.

All supplies are expressly intended for free distribution among the poor and needy, regardless of religion, caste or creed. These gifts of late have consisted chiefly of milk powder, ghee, cheese and multipurpose food. In times of emergency grains have also been imported. Having reserve stock on hand, these voluntary agencies have been able to move the relief supplies to emergency areas without any loss of time.

In addition, there have been several lakhs worth of hospital supplies and equipment, including ambulances and health vans, steel ploughs for farmers, kits to midwives, textbooks, clothing and blankets.

The following quantities of relief and self-help goods have been distributed in India during the last five years:

Year (July-June)	Value in dollars	Value in rupees
1951-52 .. ..	765,365	3,670,000
1952-53 .. ..	957,712	4,590,000
1953-54 .. ..	1,096,192	9,505,000
1954-55 .. ..	17,508,279	83,165,000
1955-56 (estimated)	19,705,263	93,600,000
	40,932,811	194,530,000

Five years ago, on July 9, 1951, an agreement was signed between the Governments of India and the U.S. "to facilitate the flow of and to effect the efficient entry and distribution of donated goods and supplies for relief and rehabilitation." The purpose of the agreement was to assist a people-to-people movement which had spontaneously gone on for years.

Under this agreement, in regard to gifts sent from the U.S., the Government of the United States pays ocean freight, while the Government of India allows duty-free entry and provides for inland transportation charges.

The distribution of relief supplies under the Agreement is carried on under the aegis of certain U.S. voluntary agencies approved by the Government of India and the U.S. Government. These are: American Friends Service Committee, American National Red Cross, CARE\* (Co-operative for American Remittances to Everywhere), Catholic Relief Services—National Catholic Welfare Conference, Church World Service, Lutheran World Relief, and Mennonite Central Committee.

The representatives in India of these seven American voluntary agencies formed a Council of Voluntary Agencies in December 1951 to share ideas and to co-ordinate their programmes. To see that supplies are directed to areas of greatest need and are otherwise efficiently distributed, the Council has the benefit of the counsel and assistance of a National Advisory Committee composed of a number of prominent Indians.

To help co-ordinate the programme at the State level, State Advisory Committees have been established, of which there are nine functioning at present. The Council also has under consideration a proposal to set up district advisory committees.

Some 19,000 Indian committees, distribution centres and agencies are co-operating in this programme. The success in distributing these foods is therefore due to the selfless service of thousands of Americans and Indians, known and unknown. In every case the State Government and the district officers are informed of the receipt of the supplies and the plan of distribution to ensure the Governments of India and the U.S. that the terms and conditions as laid down in the agreement are fulfilled.

In the normal programme, the supplies are handled chiefly through Indian medical institutions including sanatoria and leprosy homes, welfare centres and schools.

The work of these U.S. voluntary agencies in India forms part of the world-wide effort of the American people to serve the needy. Since 1939, the American people have contributed nearly \$2,000 million for relief abroad through scores of voluntary agencies. These agencies have increasingly been instrumental in meeting emergencies arising from natural disasters, epidemics or famines.

#### Exchange of Persons

A closely-related programme to foster closer understanding between India and the United States is the so-called Exchange of Persons Programme.

Early in 1950, the India-U.S. Fulbright Agreement was signed, as sequel to the Fulbright Act of the U.S. Congress, which provides for the use of U.S. receipts from sales of World War II surplus property abroad for travel grants to students.

The agreement provides for the utilisation of the rupee equivalent of up to \$400,000 a year towards travelling expenses of Indian students to and from the U.S. and all expenses of Americans coming to India for study, research or instruction.

More than a hundred Indian students are awarded Fulbright travel grants every year, while nearly one-fourth of that number of Americans come to India annually under the programme.

Another U.S. exchange programme under the Smith-Mundt Act enables leaders of public opinion, both American and Indian in various fields to visit each other's countries. Under this programme several prominent Indians visit the United States on study-observance-lecture tours every year, and Americans come to India on similar tours.

\* Has a two-crore programme for 1957 for free distribution of food grains, medicines, agricultural machinery and implements for cottage industries.

† From Aug. 15, 1945 to Dec. 1, 1956 the Red Cross has contributed 80,000 dollars.

## COLOMBO PLAN

THE Colombo Plan was conceived at a meeting of the Foreign Ministers of the Commonwealth countries at Colombo in January 1950.

A consultative committee was set up to consider ways and means of carrying out the desired co-operative economic development. This committee met at Sydney in May 1950, where it was agreed that Commonwealth countries in the area should draw up development programmes covering a six-year period from 1st July 1951, and that the other countries in the area should be invited to take similar action. Agreement was also reached at the meeting on the establishment of the Technical Co-operation Scheme.

The original members were Australia, Canada, Ceylon, India, New Zealand, Pakistan and the United Kingdom, together with Malaya and British Borneo. These were Commonwealth countries, but it was contemplated from the beginning that all countries in the area should be invited to participate in the Plan on equal terms.

Subsequent meetings of the Consultative Committee were held in London (September 1950), Colombo (February 1951), Karachi (March 1952), New Delhi (October 1953), Ottawa (Oct. 1954) and Singapore (October 1955). At the London meeting the six-year development programmes prepared by the Commonwealth countries in the area were considered and incorporated in a report (The Colombo Plan for Co-operative Economic Development in South and South-East Asia). At the Colombo meeting the progress since the London report was reviewed and agreement was reached about future meetings of the Committee and about the publication of an annual report. In addition the Commonwealth countries announced the financial contributions they would

make towards the cost of carrying out the programmes. The four annual reports were prepared at the Karachi, New Delhi, Ottawa and Singapore meetings respectively, in which attention was concentrated on the developments of the previous year and on the progress expected in the coming year.

At the London meeting of the Consultative Committee in September 1950, Burma, Cambodia, Indonesia, Laos, Thailand and Viet Nam were represented by observers. Laos, Viet Nam and Cambodia became full members in 1951.

Burma and Nepal first attended the Karachi meeting as full members; while Indonesia attended the Delhi meeting in 1953 as a full member.

The United States of America, which in 1950 had assistance programme in operation in the area, associated itself with the other members of the Committee and attended as a full member the Colombo meeting of February 1951.

Thailand sent observers to London and following meetings while the Philippines had observers at the Colombo, Karachi and Delhi meetings. At the Ottawa meeting Thailand and the Philippines attended for the first time as full members of the plan, and Japan was also admitted as full member of the Plan.

The Technical Co-operation Scheme provides a framework for the exchange of technical assistance between participating countries. Co-ordination is provided by a Council at Colombo, on which participating Governments are represented, and by the Bureau for Technical Co-operation, located in Colombo, which reports to the Council. Representatives of the United Nations Technical Assistance Board and the United States attend as liaison officers the meetings of the Council.

The International Bank for Reconstruction and Development has maintained close liaison with the Committee in its work and has been represented at the Colombo and later meetings.

The studies and activities of the ECAFE are related to development problems of the area and it has sent observers to the Karachi and subsequent meetings.

An Information Unit in conjunction with the Bureau of Technical Co-operation at Colombo, assists member countries in promoting in their territories knowledge of the Colombo Plan. The Unit collects information material from member Government, collates it and distributes it in a suitable form through member Governments. It also maintains a central pool of information on the Colombo Plan.

It was agreed at the Singapore meeting that the Colombo Plan be extended from July 1957 to June 1961.

### SALIENT FEATURES

#### PLAN PERIOD

Original: 1951-57.

As extended: 1951-61.

The original estimate of allotment of £1,868 million was for the Commonwealth countries of Ceylon, India, Pakistan, Malaya and British Borneo alone, and even this has had to undergo revision.

The following table, though subject to many qualifications (e.g., the Indonesian figures cover only the Central Government's development expenditure, not that of other public authorities while figures for Nepal do not include expenditure met from external assistance) gives the cost of development in the public sector in selected countries.

Cost of Development in the Public Sector (In £ million, at a constant rate of exchange\*)

	1953-54 Actual or Revised Estimates	1954-55 Revised Estimates.	1955-56 Budget Estimates.
Burma .. .. .	51.4	62.7	41.2
Ceylon .. .. .	18.3	30.1	31.8
India .. .. .	237.2	406.6	533.1
Indonesia .. .. .	68.0	76.3	40.7
Federation of Malaya .. .. .	17.4	16.7	21.5
Nepal .. .. .	0.7	0.4	0.4
Pakistan .. .. .	64.4	88.0	120.2
Singapore .. .. .	11.4	15.7	15.4
Thailand .. .. .	23.1	23.1	22.7
Viet Nam .. .. .	—	31.6	37.2
Total (excluding Viet Nam) .. .. .	541.9	724.6	827.0

\* Official rate for Indonesia, selling rate at the end of 1954 for Thailand and par value for others.

The table below summarises the course of total development expenditure in 8 countries and territories of the area (Burma, Ceylon, India, Indonesia, Federation of Malaya, Pakistan, Singapore and Thailand) in the major sectors of economic activity. This table like the previous one is also subject to limitations.

Course of Development Expenditure in the Public Sector.

(£ million)

	1953	1954	1955
Agriculture, Community Development and Resettlement .. .. .	71	89	107
Irrigation, Multi-purpose Projects and Power .. .. .	137	192	233
Transport and Communications .. .. .	131	188	214
Industry and Mining .. .. .	43	60	62
Social Welfare and all other* .. .. .	125	159	189

\* In Burma, Ceylon, India, Indonesia, Federation of Malaya, Pakistan, Singapore and Thailand.

Greater food production and agricultural produce is a major target of development effort. The production of foodgrains in 1954-55 was 3 per cent lower, owing to bad weather conditions, than the record output of 1953-54. This was mainly due to the reduction in the output of rice, particularly in India, Thailand, Pakistan, Laos and Viet Nam. Rice production was 6 per cent lower and was partly compensated by increases in wheat and other cereals. Production of foodgrains as a whole is still the second highest on record for the post-war period and reflects to some extent the success of efforts to increase yield and expand the area under cultivation. Indonesia has almost achieved its aim of self-sufficiency at current consumption levels and imports in 1954 were only for augmenting domestic stocks.

The expansion of electric power capacity, frequently as an integral part of multi-purpose schemes, has been another major development goal. Much progress has been made in the rehabilitation of the railway system in many countries of the area and in expanding port facilities. Expenditure on health, education, housing and other social services has continued to rise, notwithstanding financial stringency in a few countries, because of the paramount need to raise the low standards of living. The increase in production in certain selected commodities in the countries of the area is as follows:

## Rise in Production

(Thousand metric tons)

	1953	1954	Percentage Increase in 1954 over 1953.
Tea .. .. .	494	528	7%
Natural Rubber .. .. .	1,505	1,561	4%
Coal .. .. .	39,036	40,032	2%
Petroleum Crude .. .. .	15,552	16,080	3%
Steel .. .. .	1,542	1,730	12%
Tin in concentrates .. .. .	103	109	6%
Cement .. .. .	5,435	6,337	17%
Sugar .. .. .	3,047	3,200	5%
Cotton Yarn .. .. .	737	797	8%
Cotton Fabrics (Mn. metres) .. .. .	4,699	4,910	5%
Jute Manufactures .. .. .	934	997	6%
Electricity (Mn. KWH) .. .. .	9,336	10,560	13%

(Source:—Economic Bulletin for Asia and the Far East (ECAFE), August 1955).

The development expenditure is met in each country largely from internal resources and by valuable assistance received from external sources.

The external sources are: grants, loans and commodity assistance from friendly foreign Governments, sterling balances, private foreign investment, loans floated by private investors in London and other financial centres, loans from the International Bank for Reconstruction and Development.

The countries which have assisted in the development of the area are: Australia, Canada, Japan, New Zealand, United Kingdom and the United States of America. Mutual aid within the region has also developed. Among such donors are Ceylon, India, Indonesia, Pakistan, Malaya and Singapore.

Assistance is also provided under the Colombo Plan Technical Co-operation Scheme.

**FINANCE**  
Capital aid offered by various countries (spent or committed) is as follows: Australia (by the end of 1954-55): £(A) 28.6 million; Canada (by the end of 1955-57): \$16 million; India Rs. 85 million; New Zealand (up to June 1955): £3.42 million; United Kingdom £90 million excluding private investment and drawings by India, Pakistan and Ceylon on their sterling balances at the rate of £42 million a year; United States (1950-55): \$841 million under appropriation of the Congress excluding private investment and assistance by private organisations, such as the Ford and Rockefeller Foundations.

**TRAINING**  
Australia, Canada, Ceylon, India, New Zealand, Pakistan and United Kingdom are contributing £8 million to finance the Colombo Plan Technical Co-operation Scheme. Japan is also providing technical assistance under this Scheme and has appropriated Yen 53 million for the purpose since joining the Colombo Plan in October 1954.

Technical assistance consisting of provision of facilities for training, supply of experts and provision of equipment for training and research institutions, is also offered under various programmes of the United States and the United Nations and its Specialised Agencies.

Under all these schemes 10,160 places have been found for men and women of the area to receive training outside their own countries. Not all the training is arranged outside South and South-East Asia, some Asian countries are helping others in training facilities.

Approximately 4,969 experts have placed their skills at the service of the area. A number of countries have established technical schools and polytechnics in special fields such as textile and nursing education. Many countries are using the services of consultants in preparing general development plans and specifications for particular projects. Ideas are also being canvassed for the establishment of workshops, for small scale industries and also of new regional training centres, or the expansion of existing facilities, so that more than one country may benefit from institutions available for the study of common problems.

The future holds out great opportunities for technical training so essential to economic development. The United Kingdom has announced a contribution of £7 million towards the provision of technical assistance. The Canadian Government has provided a NRX atomic reactor to India; this type of reactor is a high-powered research and experimental unit. In accepting the offer the Indian Government has indicated its willingness to allow accredited foreign scientists, including those from other Colombo Plan countries in South and South-East Asia, to work with this reactor. The United States has also offered to locate an atomic research centre in South and South-East Asia.

## Colombo Plan Technical Assistance

Under the Technical Co-operation Scheme of the Colombo Plan, 572 experts and 4,227 training places have been provided to the countries of South-East Asia till June 1956. Their distribution is as follows:

	Training Awards	Experts
Australia .. .. .	1,610	175
Canada .. .. .	504	101
Ceylon .. .. .	23	2
India .. .. .	462	20
Japan .. .. .	17	23
New Zealand .. .. .	307	53
Pakistan .. .. .	30	—
United Kingdom .. .. .	1,274	198
<b>Total .. .. .</b>	<b>4,227</b>	<b>572</b>

The following table gives the accounts of expenditure by co-operating Governments as on June 30, 1956 under the Colombo Plan Technical Co-operation Scheme: (Contributions towards the cost of the Bureau and the Information Unit are excluded).

(Pound Sterling)

Country	Actual				Firm Forward Commitments				Actual plus Commitments

#### ASSISTANCE BY INDIA

India has offered both economic and technical assistance to the countries of the region. Economic assistance has been given primarily to Nepal, the commitment during the First Five-Year Plan being of the order of Rs. 90 million. This assistance was for development of roads and communications, construction of an air-field, mapping and air survey work, construction of Trisuli Project and minor irrigation works. Till 1955-56 a sum of Rs. 45 million was estimated to have been spent under this aid programme.

In the technical field, India has provided 462 scholarships and fellowships to students of South-East Asia in various technical subjects at the Indian Universities, Scientific and Research Institutes and in other projects up to 30th June 1956. Of this number 273 were to Nepal; the rest were for Ceylon (99), Philippines (33), Pakistan (27), Burma (9), Indonesia (8), Thailand

(8), and Malaya (5). The largest number of places were provided in the field of engineering (97), second came statistics (89) followed by education (70).

The training in statistics (89 places) have been provided by the International Statistical Education Centre, Calcutta, which is jointly sponsored by the International Statistical Institute and the Indian Statistical Institute in collaboration with UNESCO.

In addition, India has offered facilities for practical training in Civil, Mechanical and Electrical works at Hirakud Project, maintenance and operation of heavy earth moving equipment, and engineering at Bhakra-Nangal Project.

Training facilities available in the various research laboratories of India such as National

Chemical Laboratory, Poona; Central Drug Research Institute, Lucknow; Fuel Research Institute, Digwadih; National Physical Laboratory, Delhi; National Metallurgical Laboratory, Jamshedpur; Central Glass and Ceramic Institute, Mysore; and Central Leather Research Institute, Madras, have been offered for junior scientists from the countries of South and South-East Asia.

Training facilities in dredging river survey, port traffic operations and management, harbour engineering works, etc. have been offered on the major ports of Bombay, Calcutta, Madras, Cochin, and Kandla and also pre-sea training in the Mercantile Marine Training Institutes in India.

Offers of training facilities in Civil Aviation and in Agriculture and Industrial fields have also been made.

## INDIA'S FOREIGN LIABILITIES AND ASSETS

**T**HE Reserve Bank conducted a Census of India's Foreign Liabilities and Assets as on 30th June 1948 and published the results of the inquiry early in 1951. Information of this type becomes out of date in a surprisingly short time. The aim of the second Survey was to bring the previous results up-to-date upto 31st December 1953. The Report makes an assessment of the country's overall debtor-creditor position at the end of 1953, and of the flow of foreign business investments into the country between June 1948 and December 1953.

A summary of the main conclusions is given below.

At the end of 1953, the country's long-term foreign liabilities (obligations maturing beyond a year) amounted to Rs. 1,036 crores, while its long-term foreign assets aggregated Rs. 1,175 crores.

The official sector owed Rs. 533 crores and the private sector Rs. 453 crores.

The liabilities of the official sector comprised mainly (1) the securities of the Centre, States and the local authorities owned abroad (Rs. 254 crores), (2) the capitalised value of the Government's pensionary liability to retired British nationals (Rs. 181 crores) and (3) official loans payable abroad (Rs. 138 crores).

A major portion of the foreign owned securities was non-interest bearing and had been issued in favour of the International Monetary Fund and International Bank for Reconstruction and Development, partly as subscription to the respective organisations and partly as the rupee counterpart of the dollars borrowed from the International Monetary Fund.

Of the total official loans outstanding, Rs. 90 crores represented the Food Loan granted by the U.S. Government in 1951 and Rs. 22 crores the loans extended by the I.B.R.D. for financing the Bokaro-Konar Project, the Agricultural Machinery Project and the Railway Project.

Most of the liabilities of the private sector (Rs. 419 crores) took the shape of foreign business investments. Of these, over 80 per cent (Rs. 349 crores) belonged to the 'direct' investment category; they consisted of Rs. 232 crores of funds invested in the branches of foreign firms and companies (including banks and insurance companies) and Rs. 117 crores of foreign ownership (accompanied by control) of ordinary shares in Indian joint stock companies.

The bulk of the 'portfolio' investment (foreign ownership without any accompanying control) was in the shape of equity capital (Rs. 58 crores).

The distribution of the business investments among the different business sectors was as follows: manufacturing Rs. 136 crores, trading Rs. 95 crores, plantations Rs. 72 crores, utilities Rs. 37 crores, financial Rs. 31 crores, transport Rs. 13 crores, mining Rs. 8 crores and miscellaneous Rs. 27 crores.

Two individual lines of business activity in which there was substantial foreign capital were tea plantations and trading in petroleum products, with a 'net' foreign investment of Rs. 71 crores and Rs. 67 crores respectively.

Business investments from the United Kingdom (Rs. 347 crores) constituted over 80 per cent of the total foreign business investments in the country. With a total investment of Rs. 31 crores, the U.S.A. was the next important country with investments in India on any appreciable scale. A substantial portion of the investment from both the U.K. and the U.S.A. was of the 'direct' category.

India's foreign long-term assets were primarily held by the official sector, with total holdings of Rs. 1,112 crores. The share of the private sector at Rs. 63 crores appears relatively insignificant.

The main constituents of the foreign assets in the order of magnitude were (1) Foreign (Government securities (Rs. 373 crores), (2) debts due from Pakistan and Burma (Rs. 348 crores) and (3) subscription to and quota in the I.M.F. and I.B.R.D. (Rs. 229 crores) and (4) deposits (Rs. 186 crores). The deposits represented mostly the outstanding value of the annuity purchased by the Indian Government for payment of pensions to retired British nationals. The magnitude of business investment owned abroad was insignificant.

The total long-term liabilities and assets owed to and owned in the U.K. and the International Institutions more or less matched each other: the liabilities amounted respectively to Rs. 569 crores and Rs. 234 crores and the assets respectively to Rs. 558 crores and Rs. 229 crores.

The liabilities to the U.S.A. stood at Rs. 125 crores while the assets held in that country amounted only to Rs. 3 crores.

On the other hand, total assets in Pakistan and Burma which amounted to Rs. 320 crores and Rs. 52 crores largely exceeded the liabilities which stood only at Rs. 41 crores and Rs. 4 crores.

### OVER-ALL POSITION

At the end of 1953, the over-all position of the country, taking both long-term and short-term obligations into account, showed a 'net' excess of assets over liabilities of Rs. 500 crores. The surplus on short-term account was Rs. 346 crores and that on long-term account, Rs. 154 crores (excluding the net position of banks incorporated abroad which has been included under the short-term account).

While the official sector had 'net' assets abroad to the extent of Rs. 900 crores, the private sector had 'net' liabilities to the tune of Rs. 399 crores. The 'net' assets position of the official sector was attributable to the ownership of Government securities, deposits and 'residual' items in foreign countries.

On the other hand, the private sector was a 'net' debtor because of a large volume of foreign business investments. India had a 'net' creditor position with the U.K., Pakistan and Burma amounting respectively to Rs. 378 crores, Rs. 266 crores and Rs. 47 crores and a 'net' debtor position with the U.S.A. and the I.M.F. and I.B.R.D. amounting to Rs. 80 crores and Rs. 54 crores. India had an excess of assets over liabilities in the U.K. because of substantial holdings of U.K. securities. On the other hand, the 'net' creditor position with Pakistan and Burma was due to inter-Governmental debt payable by these countries to India. The 'net' liabilities to the U.S.A. were accounted for mainly by the loan extended by the U.S. Government to India.

Compared to 30th June 1948, the country's total foreign liabilities showed an increase of Rs. 261 crores, and the total foreign assets a fall of Rs. 542 crores: there was, over this period, an aggregate change in the value of financial obligations—increased in foreign liabilities and reduction in foreign assets—to the extent of Rs. 803 crores mainly on short-term account.

The official sector was responsible for Rs. 651 crores and the non-official sector for Rs. 152 crores of this change.

The net position with the U.K., and the U.S.A. showed a worsening of Rs. 698 crores and Rs. 75 crores respectively, while there was a small improvement with Ceylon (Rs. 24 crores) and Pakistan (Rs. 10 crores). The net liability to the I.M.F. and I.B.R.D. increased by Rs. 64 crores.

The main items which accounted for this change in the country's debtor-creditor position were transfers to Pakistan under partition arrangements (Rs. 200 crores), foreign official

loans (Rs. 138 crores), private foreign investments in the country (Rs. 185 crores), payment of pensions and repayment of railway annuities (Rs. 57 crores), currency settlements (Rs. 52 crores) and net reduction in short-term assets attributable to current external transactions (Rs. 234 crores).

These changes, however, should not be taken as indicating a deterioration in the country's external financial position but should be viewed in the context of the purposes for which the obligations were utilised and against the background of the general economic situation prevailing in the country in 1948 and the subsequent developments. The transfers to Pakistan were the inevitable consequence of the partition. The transfers for currency settlements and for the payment of pensions and the repayment of railway annuities were also of a special category.

The partition of the country had made it largely dependent on foreign sources for a part of its food and raw material requirements. The inflationary situation, a legacy of the war, had also been accentuated, towards the end of 1947, by the removal of controls. These factors, coupled with the serious food shortage which had developed in the country prior to 1952 and the developmental needs of the economy, had rendered necessary the import of foodgrains, raw materials and capital equipment on a large scale.

During the five years and a half ending 1953 the total import surplus amounted to about Rs. 600 crores, which acted as a stabilising factor and prevented the prices from rising.

The net reduction in foreign exchange reserves attributable to current transactions during this period was of the order of Rs. 234 crores and would have been much higher but for the significant receipts of foreign official loans and the inflow of private foreign investment. The Food Loan extended by the U.S. Government, apart from helping to meet an emergency, also proved an important disinflationary factor through a more or less equivalent withdrawal from monetary circulation. The increased private foreign investment also helped to replace and expand industrial and commercial activity in the country. In fact, it was during this period that agricultural and industrial output recorded a marked increase, the money supply was reduced and the price level stabilised at more or less the pre-Korean levels. The country's economic situation showed appreciable improvement, reflected in a lesser dependence on foreign sources of supply and in the gradual replacement of its external deficit by a surplus. Thus, the reduction in the country's 'net' creditor position could be broadly explained in terms of the adjustment of the economy to the structural changes arising from the partition of the country, the elimination of inflationary pressures and the preparation of the ground-work for a more rapid development of the economy.

### FOREIGN INVESTMENTS

The total 'net' increase in foreign business investments since 30th June 1948 was of the order of Rs. 132 crores, of which 85 per cent (Rs. 112 crores) belonged to the 'direct' investment category. The branches of foreign firms and companies accounted for Rs. 70 crores of the increase and 'controlled' joint-stock companies for Rs. 42 crores.

Investment from the U.K. and the U.S.A. increased by Rs. 137 crores and Rs. 13 crores respectively, while investment from Pakistan and Ceylon declined by about Rs. 7 crores and Rs. 2 crores respectively.

The increase in investments classified according to trades showed that the manufacturing sector accounted for Rs. 64 crores, trading Rs. 30 crores, plantations Rs. 20 crores, utilities Rs. 19 crores and miscellaneous Rs. 9 crores.

Fresh investment from both the U.K. and the U.S.A. was predominantly of the 'controlled' category, the percentage of 'controlled' investment to the total increase being 85 for the U.K. and 91 for the U.S.A.

While the flow of new capital from the U.S.A. was confined largely to the trading sector, investment from the U.K. went to different sectors such as manufacturing (Rs. 56 crores), plantations (Rs. 21 crores), trading (Rs. 20 crores), utilities (Rs. 19 crores) and financial (Rs. 14 crores).

The total capital invested from abroad in companies registered after 30th June 1948—excluding investment in oil refineries most of which has been reflected in the increased investment in branches—amounted to Rs. 11 crores, of which Rs. 7 crores was controlled from abroad. The amount of capital received from the U.K. was placed at Rs. 9 crores and that from the U.S.A. at Rs. 1 crore.

The conclusion that there was a large 'net' increase in foreign business investments would seem to contradict the published balance of payments statistics according to which during the period there was a 'net' disinvestment of foreign capital from the country, total payments on account of long-term capital being placed at Rs. 140 crores and total receipts at Rs. 90 crores.

The published figures relating to outward capital remittances, however, included a number of other items like sale proceeds of Government securities, transfers of bank balances, provident funds and other savings by foreign nationals, emigrants' remittances, remittances for investment abroad by nationals, etc., in addition to repatriation of business investments.

After a deduction was made for the other items, it was estimated that the total repatriation of business investments might have amounted only to Rs. 60-65 crores. Further, this reduced figure itself would have included the proceeds of shares and debentures sold by foreign nationals who were earlier 'resident' in India but had since left the country. The repatriation of capital by the erstwhile resident foreign nationals was in the nature of migrants' transfers. Allowing for the reduction of this estimated amount, the repatriation of business investments by non-residents was not likely to have exceeded Rs. 50 crores. If this repatriation was added to the 'net' business investment revealed by the Survey, the gross inward movement of foreign capital during the period would be of the order of Rs. 180 crores.

Fresh foreign investments came partly in a form leading directly to an accrual of foreign exchange to the country, partly through retained

earnings of foreign enterprises and partly in the shape of imports of goods and equipment which did not require a draft on foreign exchange reserves.

The total recorded and estimated cash receipts of capital were placed at Rs. 90 crores. Of this, it was estimated that Rs. 45 crores was probably on account of repatriation of Indian capital from nearby countries like Malaya, Burma, Ceylon, etc., and another Rs. 10-15 crores on account of disinvestment of foreign securities and shares owned by persons 'resident' in India. The remaining Rs. 30-35 crores probably represented the amount of fresh capital received in cash for the purposes of investment.

It was estimated that reinvestment out of retained profits was of the order of Rs. 60-70 crores. The figures of retained profits were arrived at in the case of 'subsidiaries' on the basis of the increase in their reserves and balance in the profit and loss account between 1948 and 1953 as shown in their balance sheets and in the case of branches after taking into account the profits accruing to them and the level of their profit remittances as recorded by the E.C.D. The balance of Rs. 75-85 crores was presumably received in the form of goods and machinery, not involving an immediate official release of foreign exchange.

## GOVERNMENT INDUSTRIAL UNDERTAKINGS

**I**N the following pages we give short notes on Government industrial undertakings.

The following are under the Ministry of Commerce and Industry: Hindustan Insecticides, Bharat Electronics Ltd., Hindustan Machine Tools Ltd., Nahan Foundry Ltd., National Instruments Factory, Hindustan Antibiotics, Sindri Fertilizers and Chemicals Ltd., Hindustan Cables Ltd.

The following factory is under the Ministry of Defence: Hindustan Aircraft Ltd.

The following factory is under the Ministry of Communications: Indian Telephone Industries.

The following factories are under the Ministry of Atomic Energy: Indian Rare Earths Ltd.; Thorium Plant.

The following factories are under the Ministry of Railways: Chittaranjan Locomotive Works; Integral Coach Factory.

The following factory is under the Ministry of Steel, Mines and Fuel: Hindustan Steel Ltd.

The following factory is under the Ministry of Finance (Dept. of Economic Affairs), Govt. of India: India Government Silver Refinery Project.

### ATOMIC REACTOR

(Trombay, Bombay 38)

The Indian Atomic Reactor went into operation on 4th August 1956 at the Atomic Energy Establishment at Trombay, though the formal inauguration by the Prime Minister took place on 20th January 1957.

The Reactor is of the swimming pool type and derives its name from the fact that the core of the Reactor—a number of fuel elements on an aluminium grid plate—is suspended in a large pool of ordinary water.

There are 30 fuel elements and they are closely positioned on an aluminium grid plate about six inches thick. These fuel elements are made of an alloy of enriched uranium and aluminium sandwiched between two aluminium sheets. The size of the core is about 18" x 18" x 24" and requires nearly 3.5 kgs. of uranium 235 to start operation, or to use more technical language to reach criticality.

There are cadmium rods in the reactor which can be moved in and out so that the power of the reactor can be maintained at any desirable level.

The water in the pool acts as a moderator to slow down neutrons to thermal energies and as a coolant to remove heat of fission. It also serves as a shield against radiation. The pool is 10 feet wide, 28 feet long and 28 feet deep. The core of the reactor can be moved to any position in the tank by means of a trolley from which the core is suspended.

The sides of the tank are made of 8½ feet thick concrete walls which act as protection against radiation to personnel working around the reactor.

The reactor is designed to operate at a maximum power level of 1,000 kW.

Channels of cast iron with diameters of 4" by 6" are provided through the concrete through which neutron beams can be obtained for experiments in neutron physics.

At another end of the pool there is what is known as a shielding corner. Here the concrete wall is replaced by a one inch thick aluminium panel. This is for testing the shielding property of any material. The testing is done by putting the material on one side of the panel and the core of the reactor on the other.

Besides the swimming pool reactor, there are other research reactors under construction in the Atomic Energy Establishment.

One of these is the Canada-India Reactor, a gift of the Canadian Government under the Colombo Plan. This will go into operation early in 1958. This is designed to operate at a maximum power level of 40,000 kW and gives high neutron intensities for research purposes. It is housed in 130 feet diameter steel pressure shell rising about 140 feet above the ground. This is a heavy water moderated natural uranium reactor.

It will produce significant amounts of radio isotopes and small amounts of plutonium 239 and uranium 233.

The reactor will also make possible the study of various reactor systems for use in power reactors.

A third reactor named Zerlina is in the design stage. Here buckling of new reactor assemblies using various materials can be studied. It is a zero energy reactor and will be used in the first instance for reactor systems containing mixed lattices of uranium and thorium in heavy water.

All these research reactors can be used for training personnel and for a wide range of experiments in physics, engineering and biology—such as nuclear reactions, neutron scattering, absorption cross-sections effect of radiation at high intensities, crystallography, determination of 'danger coefficient'.

The choice of reactor-types of power production is largely dependent on the availability of material. For the production of enriched uranium, for example, expensive plant is necessary. In India this will have to be imported. But normally power production would be based on reactors using natural uranium as large uranium bearing ores are available. This means that only three moderators are possible namely graphite, heavy water and beryllium oxide, more especially in India the first or the third. With beryllium oxides the size of the reactor is minimum. Design studies for a prototype power reactor based on beryllium oxide and natural uranium to generate 5,000 kW of power are expected to be taken up.

It is planned to set up large power stations in the country during the Second Five-Year Plan. These would probably be obtained from abroad, though substantial parts including graphite moderator and uranium would be produced in the country. Investigations are under way about the choice of suitable sites.

The Reactor is under the control of the Atomic Energy Department of the Government of India.

### BHARAT ELECTRONICS (PRIVATE) LTD.

(Jalahalli P O, Bangalore)

The establishment of a factory to produce electronic equipment was envisaged in April 1948 in the Industrial Policy Resolution of the Government of India. In pursuance of this policy leading radio manufacturers throughout the world were invited to prepare project reports for the establishment of a factory in India; and after these reports had been examined by Indian experts, the French firm Compagnie Generale de Telegraphie Sans Fil de Paris was selected as technical advisers to the Government of India.

Bharat Electronics was registered as a private limited Company in April 1954 with its headquarters at Jalahalli, Bangalore. The authorised capital of the Company is Rs. 10 crores of which Rs. 5 crores has been subscribed. The entire capital is held by the Government of India.

The factory began production in the latter half of December 1955; and during the first year it was expected to produce a number of transmitters and receivers and some miscellaneous equipment, all for Central Government departments. The first year's production is expected to be worth about Rs. 50 lakhs. Production will gradually increase, until in about four years, the annual turnover is expected to be approximately Rs. 5 crores.

The present strength of the employees is approximately seven hundred. When the factory is in full production, the staff will total about five thousand.

The Company is run by a Board of nine Directors.

Chairman, Board of Directors, M. K. Vellodi, I.C.S. (Defence Secretary, Government of India).

Board of Management: A. K. Ghosh, I.C.S. (General Manager and Managing Director); K. N. Nair (Controller of Finance); C. B. Cariapa (Deputy General Manager).

### CHITTARANJAN LOCOMOTIVE WORKS

(Chittaranjan, Burdwan Dt., West Bengal;

Branch Office: Hindustan Buildings, 4, Chittaranjan Avenue, Calcutta 13)

The works are under the Ministry of Railways. Construction started on April 1, 1948 and was completed on September 30, 1952.

Production started on January 26, 1950. The first locomotive rolled out on November 1, 1950.

The total estimated cost is Rs. 14.93 crores.

The total number of workers (under Factory Act), 4,230; apprentices, 375; total, 4,605 (corrected up to August 1956).

A monthly out-turn of 14 W. G. locomotives has been reached since August 1956 equivalent to 17.5 average-sized locos.

The revised target for the Works is 300 locomotives per year.

Given the necessary raw or basic materials, Chittaranjan today can manufacture 100 per cent of the components it was designed to manufacture.

The production schedule has been as follows:

Year	No. of locomotives
1951 .. .. .	16
1952 .. .. .	30
1953 .. .. .	54
1954 .. .. .	80
1955 .. .. .	123
1956 (upto end of August)	98

General Manager, K. Ramachandran.

### HEAVY ELECTRICALS (PRIVATE) LTD.

A factory for the manufacture of heavy electrical equipment in the country is being set up at Bhopal in Madhya Pradesh by the Government of India with the technical collaboration of Messrs Associated Electrical Industries Ltd., of U.K.

The Heavy Electrical Equipment Factory is scheduled to go into production by 1960 and develop its full capacity by about 1968.

It is proposed to manufacture initially hydraulic turbines, generators, transformers, static capacitors, circuit breakers, switch boards, industrial motors, traction equipment, insulating materials, etc. in the State Factory. The factory will take up other items of electrical equipment for manufacture later.

A Private Limited Company, known as Heavy Electricals (Private) Limited, with an authorized capital of Rs. 30 crores was incorporated on 29th August 1956 to control and manage this project.

The total cost of putting up the factory might be about Rs. 45 crores.

The Secretary, Ministry of Commerce and Industry, is the Chairman of the Board of Directors of the Company.

The factory would employ about 10,000 persons (technical and non-technical) when in full production and it is estimated that there would be a saving to the extent of Rs. 5 crores per annum in foreign exchange.

The capacity production would be between Rs. 16 and 18 crores.

**HEAVY PLANT AND MACHINERY**

(Ministry of Commerce and Industry)

Though the work is still very much in the exploratory stage, there have been two reports on the proposed heavy machine building project—one British and one Russian.

The British heavy engineering mission has recommended the establishment of four independent and self-contained units to meet the country's demand for heavy plant and machinery.

It envisages heavy structural fabricating works, heavy plate and vessel works, heavy machine shop and heavy machine tool works.

Each of these units, costing less than Rs 5 crores, can be located in any part of the country after a survey of the requisite raw materials and the likely centres of consumption.

The mission's estimates are, however, exclusive of the working capital, the cost of the site and construction outside the perimeter of the factory such as housing for labour.

The units suggested by the mission would supplement the capacity for heavy castings and forgings which has been already planned by the National Industrial Development Corporation.

While the Soviet team of experts, which recently reported on the subject, recommended the construction of a giant Rs. 94 crores heavy machine building plant at Ranchi on the lines of a similar venture in the Urals, the British mission evidently prefers dispersion of capacity into a number of separate units.

Both the reports are under study in the Ministry.

The British mission has proposed that the heavy machine shop and the heavy machine tool works should be attached to a steel plant.

The mission has indicated that by setting up one machine tool works, two plate works, two machine shops and two structural bays, capacity would be created to provide for example, the bulk of the machinery needed for six fertiliser plants of the size of Sindri and four steel works with of capacity of one million tons each in the Third Five Year Plan period.

The mission has also recommended the setting up of a specialised factory for making mining machinery at an estimated cost of Rs. 3 crores.

The report contains recommendations regarding technical training of the staff required to run the factories and points out that the proportion of skilled workers is inevitably high for heavy engineering.

The mission was constituted under the aegis of the United Kingdom Government as part of its contribution under the Colombo Plan, and the Federation of British Industries.

**HINDUSTAN AIRCRAFT (PRIVATE) LTD.**

(Hindustan Aircraft P.O., Bangalore District, Mysore)

Tel. &amp; Cable address : Aircraft, Bangalore)

The company is managed by a Board of Directors under the Ministry of Defence.

It was started in 1940.

**Aviation Activities :** Production of Percival Prentice, D. H. Vampire & H.T-2 Trainer; Repair and Overhaul of Tiger Moth, Chipmunk and Dove aircraft; Repair and Overhaul of P & W, De Havilland and Bristol Engines and accessories; CAA approved repair station. Manufacture of Gnat Aircraft and Orpheus Aero Engines undertaken.

**Other activities :** Manufacture of all-metal Rallcoaches and Bus Bodies.

**Board of Directors :**

**Chairman,** M. K. Vellodi, I.C.S., Secretary, Ministry of Defence.

**Directors,** J. B. D. Tata; Air Marshal S. Mukerjee (Chief of Air Staff, Indian Air Force); S. Ratnam (Financial Adviser, Ministry of Finance (Defence), Government of India); K. Narayanaswamy, I.A.S. (Director of Industries and Commerce, Mysore); J. M. Shrinagesh, C.I.E., I.G.S. (General Manager and Managing Director).

**Board of Management :**

**Chairman,** J. M. Shrinagesh, C.I.E., I.C.S. (General Manager and Managing Director).

**Members,** V. G. Kamath (Finance Manager); Dr. V. M. Ghatage (Chief Designer); A. Zampolino (Factory Manager); J. J. M. Dzielonaki (Production Adviser).

**HINDUSTAN ANTIBIOTICS (PRIVATE) LIMITED**

(Pimpri, Poona District)

The Government of India Penicillin Plant now known as Hindustan Antibiotics (Private) Ltd. is located at Pimpri, nine miles from Poona. It is a private limited company of the Government of India with all the shares held by the President of India and his nominees. It is being managed by a Board of Directors with Col. J. R. Dogra as the Managing Director.

Starting in March 1952, the factory is now complete. It went into full production in August 1955. On 12th September 1955 the first batch of Indian penicillin manufactured at the Pimpri Plant and bottled at its Bottling Plant in Bombay was put on sale. On 11th December 1955, Rajkumari Amrit Kaur, the Union Minister for Health formally inaugurated the first bulk sales when 148,000 mega units of Pimpri manufactured penicillin were sold to leading pharmaceutical houses in India.

The factory is located in a 200-acre site in Pimpri, about nine miles from Poona on the Poona-Bombay Road. It was constructed on the basis of a tripartite agreement between the Government of India, the World Health Organisation (since transferred to United Nations Technical Assistance Administration) and the United Nations Children's Emergency Fund. The Indian Government provided the land, the buildings, equipment procurable locally, the electric sub-station, water supply system, sewage disposal unit and quarters, at an estimated overall cost of Rs. 1.5 crores.

The UNICEF supplied equipment to the value of \$850,000. The WHO provided technical 'know-how' and training facilities abroad to Indian scientists involving an expenditure \$350,000.

The designed capacity of the plant is 9 million mega (9,000 billion) units per year : but the plant is now producing 16-18 million mega units per year as a result of the improvements in penicillin technology. A Pilot Plant, a workshop and all essential services have been arranged for. The Clinical Products Section at Pimpri is now complete and large-scale bottling operations at Pimpri commenced in March 1956. In addition, the former Indian Penicillin Committee's Bottling Plant at Bombay has been taken over and continues to bottle Pimpri made penicillin. There is also provision in the plant for further expansion by about 60 per cent in the Second Five Year Plan. In addition to penicillin, it will manufacture Bicillin and Streptomycin.

Equipped with the latest scientific equipment, a model Research Laboratory built at an approximate cost of Rs. 15 lakhs has been put alongside the factory. There are plans to develop this Research Laboratory into a sizable Research Centre on antibiotics offering large-scale research opportunities to Indians and qualified scientific men from all over the world.

**Mg. Director,** Col. J. R. Dogra, M.D., I.M.S.

**HINDUSTAN CABLES (PRIVATE) LIMITED**

(P. O. Hindustan Cables,

Rupnarainpur, Burdwan Dt., West Bengal)

With a view to manufacturing telephone cables in this country, the Government of India have set up the Hindustan Cables Factory at a capital cost of Rs. 125 lakhs, under the technical assistance of Messrs. Standard Telephones & Cables Ltd., London. The Company is entirely owned and financed by the Government of India and is under the over-all control of the Ministry of Commerce and Industry.

The factory started regular production on Sept. 1, 1954 and manufactured 112 miles of underground telephone cables upto the end of March 1955. It was further scheduled to manu-

facture over 500 miles of cables during the year 1955-56, the sale value of which would be Rs. one crore approximately.

The proposal to double the capacity of the factory is already in hand and when this expansion is completed, it will be possible to manufacture 1,000 miles of cables annually when the country's total requirement for telephone cables would be met as well as partial export of this commodity will be possible.

Keeping pace with the demand of the Indian Posts & Telegraphs Department embodied in the Second Five-Year Plan, the expansion of the factory for manufacture of co-axial cables has already been taken in hand and orders have been placed for purchase of machineries required for the manufacture of co-axial cables.

**Chairman, Board of Directors,** K. Ramachandran, General Manager, Chittaranjan Locomotive Works, Chittaranjan.

**Members,** M. P. Birla; D. C. Driver; G. D. Ambekar; V. Nilakantan, Mg. Director, Sindri Fertilisers and Chemicals Ltd., Sindri; C. A. Cornelius, Addl. Chief Engineer, Posts and Telegraphs; B. V. Radhakrishnan; A. Zaman, I.C.S.; S. K. Kanjilal, Managing Director, Hindustan Cables (Private) Ltd.

**HINDUSTAN HOUSING FACTORY (PRIVATE) LIMITED**

(Jangpura, New Delhi)

The Hindustan Housing Factory Private Ltd. was taken over completely by the Government of India with effect from 16th August 1955.

The present Directors of the Company are :—

**Chairman,** S. Ranganathan, I.C.S.; **Directors,** K. P. K. Menon, I.A.S.; A. P. V. Krishnan.

**General Manager,** R. P. Mhatre, C.E.S.I.

Since taking over, for the period ending 31st July 1956, the Factory has been run as an interim measure and the production worth Rs. 32 lakhs approximately has been carried out in the various departments.

Orders worth Rs. 30 lakhs are in hand and further orders to the extent of Rs. 20 lakhs are expected in the near future. These orders mainly consist of wooden doors and windows, furniture, prestressed concrete heavy industrial beams and joists for prefab roofing, precast reinforced cement concrete elements for roofing, high transmission poles, street light poles, prestressed concrete purlins, vibrated cement concrete pipes, fencing posts and lightweight concrete insulation blocks and partition blocks.

**HINDUSTAN INSECTICIDES (PRIVATE) LIMITED**

Industrial Area, New Delhi 15.

A site adjacent to D.C.M. Chemical Works was chosen for the factory.

The factory is managed by Government through a private limited company with a Board of Directors under the Ministry of Commerce and Industry.

The factory went into production on March 25, 1955.

The plans are based on an agreement concluded between the Government of India, WHO and UNICEF on the 19th July 1952.

Under this, the UNICEF was to supply all imported equipment involving an expenditure of about \$250,000, WHO to arrange and provide all technical assistance for the factory involving an expenditure of about \$100,000 and the Government of India to arrange for the provision of land, buildings, steam, water, electricity, etc., at an expenditure of Rs. 22.45,000.

Since the commencement of operations in March 1955, the production has been slowly stepped up and the present output is about 1.6 tons of Technical D.D.T. per day. The output of the factory till the end of September 1956 was 550 tons of Technical D.D.T. and 700 tons of 50 per cent wettable D.D.T. powder. The formulated D.D.T. is distributed to various State Governments through the Director, Malaria Institute of India for Anti-Malaria campaign. The factory employs 140 men.

**Expansion:** The designs for doubling the capacity of the plant drawn up by the factory staff in consultation with U.N.T.A. advisers have been completed and installation work was scheduled to commence early in January 1957.

Preliminary work on a second D.D.T. Factory at Alwaye, Kerala State, included in the second Five Year Plan, has already been taken up. The necessary land has been acquired in Alwaye both for the factory and the residential colony. The investment in this factory is estimated to be Rs. 79 lakhs and the production is scheduled to commence by the middle of 1958.

The annual capacity will be 1,400 tons Technical D.D.T.

Tenders for the plant were invited by the Government on global basis, and the offer of Messrs. Slingmaster & Breyer and Messrs. Technical Enterprises Inc. of U.S.A. has been accepted.

A joint contract on a turnkey basis has been awarded to them for the complete job of setting up and commissioning of a plant with an installed capacity of 1,400 tons of technical D.D.T. per annum at a cost of about Rs. 36.50 lakhs on a guarantee to ensure full production in a period of 18 to 23 months from the 1st August, 1956.

The entire cost of the factory will be met by the Government of India.

When at full production the factory expects to employ about 250 men in all.

Between them these two factories will produce all the D.D.T. required by the Government for its Malaria Control Programme.

*Managing Director, S. S. Jaggi.*

#### HINDUSTAN MACHINE TOOLS (PRIVATE) LIMITED

(Jalahalli, Bangalore)

This is a private limited company under the Ministry of Commerce and Industry registered in Mysore on February 7, 1953.

The Registered Office of the Company and the factory are located at Jalahalli, Bangalore.

The authorised share capital of the Company is Rs. 12 crores.

The plans are based on an agreement between the Government of India and Messrs. Oerlikon Machine Tool Works, Buehrle & Co., Zurich, Switzerland, originally concluded in April 1949 and later revised by a new agreement signed in March 1957. The Swiss Company does not now hold any shares in the Hindustan Machine Tools Ltd. The shares worth Rs. 30 lakhs originally held by the Swiss Company were transferred to the Government of India.

The Company is manufacturing high speed lathes and has programmed to manufacture during the Second Five Year Plan period, Milling Machines, Radial Drilling Machines and Grinding Machines, the total annual output estimated to reach 1,000 machines by 1960-61.

The Company employs 1,500 skilled and semi-skilled workers and is expected to employ 3,000 by 1960-61. A grey iron foundry estimated to cost Rs. 60 lakhs is to be installed during the second Five Year Plan. At full production the output will be of the value of Rs. 5 crores per annum earning a corresponding amount in foreign exchange for the country.

Upto February 1957, the Company produced 100 lathes against the original target of 57 for 1956-57.

*Chairman, Board of Directors: Sir Raghavan Pillai.*

*Managing Director: M. K. Mathulla.*

*Members: A. Zaman, N. N. Wanchoo, B. V. Radhakrishnan, T. Mariappa, K. Narayanawamy.*

#### HINDUSTAN SHIPYARD (PRIVATE) LIMITED

(Vishakapatnam, Andhra Pradesh)

This is located at Vishakapatnam in Andhra Pradesh. It was originally designed by the firm of Sir Alexander Gibb and Partners.

The original design envisaged the provision of eight berths but the shipyard now has four building berths to build ships ranging from 320 to 650 ft. in length, and from about 5,000 tons to about 15,000 tons deadweight capacity.

A fifth berth suitable for building small crafts has also been constructed.

It has also a fitting-out wharf 1,200 ft. long which permits fitting out of 6 large ships and 3 medium-sized ships in one year.

There are about 4,000 technicians, workers and staff.

There is a housing colony for employees on a site of 145 acres of land, provided with electricity, water supply, playgrounds, parks, school and hospital buildings, where about 1,500 families of the staff, workers and officers are accommodated.

The yard is being managed by Hindustan Shipyards (Private) Limited since the 1st of March 1952, a company in which the Government of India have a controlling interest.

The Board of Directors consists of ten Government nominees including the Chairman.

The following table gives details about the ships built at the shipyard:

Name of ship	Date of laying keel	Date of launching	Date of completion and sailing	To whom sold
1. "Jalansha" (8,000 DWT) ..	22- 6-46	14- 3-48	15-10-48	Scindia S. N. Co. Ltd.
2. "Jalaprabha" ..	22- 8-46	20-11-48	31- 3-49	"
3. "Kutubtari" (245 DWT) ..	23- 5-47	18-12-48	19- 5-49	"
4. "Jalaprabha" (8,000 DWT) ..	27- 5-48	8- 8-49	14-12-49	"
5. "Jalapankul" ..	7- 1-49	6-12-49	31- 3-50	"
*6. "Jalapadma" ..	26- 1-50	14- 9-50	14- 1-51	"
*7. "Jalapalaka" ..	28- 1-50	27-12-50	29- 3-51	"
*8. "Jalputra" ..	28- 9-50	20- 3-51	28- 6-51	Bharat Line Ltd. Great Eastern Shipping Co. Ltd. Scindia S. N. Co. Ltd.
*9. "Jagrati" ..	9- 6-51	15-12-51	4- 6-51	"
*10. "Jalapratap" ..	9- 5-51	27- 2-52	31- 7-52	"
*11. "Jalapushpa" ..	26-12-51	9- 7-52	30- 9-52	"
*12. "Bharatratna" ..	22- 7-52	26- 8-53	21- 6-54	Bharat Line Ltd. Scindia S. N. Co. Ltd.
*13. "Jalaputra" ..	22- 7-52	9-11-53	12- 8-54	"
14. "Jalavihar" (7,000 DWT) ..	1- 8-53	16- 8-54	14- 6-55	"
15. "Jalavijaya" ..	30- 9-53	26- 3-55	17-12-55	"
16. "Jalavishnu" ..	2- 9-54	2-11-55	16- 5-56	"

The "State of Orissa," a diesel 8,000 ton ship was launched on February 16, 1957. This was for the Eastern Shipping Corporation.

• These eight ships were ordered by Government.

The company is managed by a Board of Directors as already mentioned under the Ministry of Transport. *Chairman, N. R. Pillai, I.C.S. Managing Director, R. L. Gupta, I.C.S. Members, Philippe Gultart (Technical Director); S. Jagannathan, I.C.S.; Tulidas Kilchand; Michael John; Lalchand Hirachand, M.P.; Shantikumar N. Morarjee; P. C. Bhattacharya; C. S. Menon; Capt. Daya Shankar; P. M. Subramanian; Dr. M. V. Krishnarao.*

#### HINDUSTAN STEEL (PRIVATE) LIMITED

Rourkela, Orissa

Hindustan Steel (Private) Limited was incorporated on 19th January 1954 as a private limited company with the object of establishing a Steel Plant. The Company has a Board of Directors of which the Secretary, Ministry of Steel, Mines and Fuel is the Chairman. Messrs. Indlengemeinschaft Krupp Demag G.m.b.H. are the Consultants.

The authorised capital of Hindustan Steel (Private) Limited is Rs. 100 crores. The factory will be located at Rourkela in Orissa State.

The annual output expected is approximately one million tons of steel ingots capable of being turned into approximately 720,000 tons of finished plates, sheets, strips, and tinplate. The Plant is expected to go into production early in 1959.

A new process of making steel by blowing oxygen known as the L-P process will be adopted for three-quarters of the steel output; the remaining will be produced in open hearths. A Semi-Continuous Strip Mill, the first of its kind in India will be put into commission in the Works. The strength of the personnel is expected to be about 8,000.

The over all cost of the steel works was estimated at Rs. 165 crores in December 1956.

In 1957-58 the Government of India is likely to spend Rs. 60 crores. In 1956-57 the investment was about Rs. 20 crores.

Meanwhile, contracts for all sections of the steel plant have been placed with German suppliers. The deliveries of plant and construction schedules have been co-ordinated that the first blast furnace would go into production in 1958 and the steel plant will be in operation by the end of 1959.

Contracts have been placed for the civil engineering work for the blast furnace and steel melting shop. The site for the steel melting shop and the ingot yard is being prepared.

A number of suppliers of plant and equipment have opened their offices at Rourkela.

Nearly 750 houses have been completed in the township. Electricity and water supply is available in the township. Another 1,000 houses are under construction.

A 300-room hostel has also been completed. This is actually meant for the apprentices who will be trained in the steel works in future. In the meantime, the hostel will accommodate German personnel.

*Managing Director: P. G. Bhagat; Technical Adviser: Dr. H. Kilner.*

## OTHER STEEL PROJECTS

**Bhilai Steel Project\***: An agreement was entered into between the Governments of India and the U.S.S.R. on 2nd February 1955, providing for technical and economic assistance in the erection of an integrated Steel Plant at Bhilai in Madhya Pradesh. The Plant is designed to produce about 750,000 tons of heavy and medium structural steel and 300,000 tons of foundry pig iron. The Plant is expected to go into production by the end of 1959.

A Project Division of the Ministry of Steel, Mines and Fuel, Government of India, under the charge of a General Manager, is looking after the construction of this Project.

The estimated cost is about Rs. 115 crores exclusive of the cost of township, ore mines, fees to consultants and technical experts.

In 1957-58 it is proposed to spend about Rs. 63.33 crores as against an estimated expenditure of Rs. 13 crores in 1956-57.

**Durgapur Steel Project\***: The Steel Plant which is proposed to be set up at Durgapur in West Bengal will be the third one in the public sector (besides Bhilai and Rourkela). This will produce about 750,000 tons of light and medium sections and bars, in addition to about 350,000 tons of pig iron. Negotiations are being carried on with a Consortium of British steel interests for the designing and erection of this Plant which is expected to be completed by December 1960.

The estimated cost is about Rs. 138 crores.

In 1957-58 it is proposed to spend about Rs. 33.5 crores as against an estimated expenditure of Rs. 13.6 crores in 1956-57.

This Project also is being managed by a Chief Project Officer under the direct control of the Ministry of Steel, Mines and Fuel, Government of India.

Each of the Plants, when completed, will employ about 5,000 skilled technicians below the Foreman category and about 700 supervisory staff of Foreman upwards. Except for a few at the very top level, most of the technicians will be Indians.

The total cost of all the three Steel Plants in the public sector is estimated at over Rs. 400 crores.

## Washeries

Government has decided to set up two coal washeries to supply 4.6 million tons of washed coal per year to steel plants. These will be in addition to the one under construction at Kargali. There are also washeries in the private sector. It is estimated that the steel industry in the country needs about 10 million tons of washed coal.

The total cost of the washeries is estimated at Rs. 5 crores. In 1957-58 a sum of Rs. one crore would be spent.

## INDIA GOVERNMENT SILVER REFINERY PROJECT

47, Strand Road, Calcutta 7.

This project is under the Ministry of Finance (Department of Economic Affairs), Government of India. It is under construction. Erection and installation of specialised plant and machinery have been undertaken. Commencement of operation of the project is expected by October/November 1957.

A sum of Rs. 88 lakhs was initially estimated to cover capital expenditure.

The number of persons employed at present is about 125. The project is expected to operate in three shifts round the clock with officers and staff numbering about 600.

The project is intended for the extraction and refining of silver from the Q.A. cut and defaced coins and recovery of copper as by-product.

Production has not yet started.

The process of refining is a new patented process, the joint authors of which are Shri G. C. Mitter, Master, Assay Deptt. and Silver Refinery Project and Messrs. Demag Elektrometallurgie G m b H, W. Germany.

Master, Assay Deptt. and Silver Refinery Project, Ganes Chandra Mitter.

## INDIAN RARE EARTHS (PRIVATE) LIMITED

Udyogamandal P.O.

(Alwaye, Kerala)

This factory is owned jointly by the Government of India and the Government of Kerala.

The subscribed capital is Rs. 80 lakhs, of which the Government of India's share is 55 per cent and of the Kerala Government 45 per cent.

The factory started production in July 1952. The Plant has a rated capacity to process 1,500 tons of Monasite per annum. The main product is Rare Earths Chloride. Rare Earths Carbonate could also be produced in the factory. Trisodium Phosphate is obtained as a by-product.

The chlorides and carbonates which are exported are used in the manufacture of aerial camera lenses, cinema projector carbon arcs, special optical glasses and so on.

The phosphates which are a substitute for soda ash will be used in textile mills, soap factories, and for general cleaning purposes in mills and factories.

Chief Administrative Officer, G. Rajagopal Menon.

Works Manager, H. N. Sethna.

Deputy Chief Administrative Officer, K. V. N. Nayar.

Chief Engineer, C. M. Mani.

## INDIAN TELEPHONE INDUSTRIES (PRIVATE) LIMITED

(Duravani Nagar P.O., Bangalore Dt., Mysore State)

Railway Station: Krishnarajapuram

(Southern Railway)

City Office: No. 5, Kensington Road, Bangalore.

Tel. Address: "Phonindustry."

Telephone: 5111 (4 lines).

Branches: National Insurance Bldg., 1st floor, 27, Bastion Road, Bombay 1; 22, Chittaranjan Avenue, United India Life Assurance Bldg., Calcutta 13; 3-A, Mehta Bldgs., D.A.G. Scheme, Asaf Ali Road, Delhi; No. 2, Arminian Street, Catholic Centre, 1st floor, Madras 1; C/o The High Commission of India in U.K., India House, Aldwych, London W.C. 2.

## Total Investment:

Authorised Capital... .. Rs. 4 Crores.

Subscribed and Paid-up

Capital... .. 4 Crores.

Bankers: State Bank of India; Central Bank of India.

## Board of Directors:

B. N. Jha, I.C.S. (Chairman); B. R. Batra; Sir V. N. Chandavarkar; J. J. Eades; A. J. Mantle (Alternate Director); R. Narayanaswami; S. M. Ramakrishna Rao; K. Narayanaswami; Jagdeesh Prasad (Managing Director).

## Administration:

General Manager, N. K. Sen Gupta.

Manager, K. D. Valdia.

Secretary, D. V. M. Rao.

The I.T.I. (Private) Ltd., the first industrial concern in the Public Sector after achieving independence, was originally started as a Government department in 1948 under the Ministry of Communications. On February 1, 1950 it was converted into a private limited company with the Government of India as the major share-holder.

The Company has acquired about 372 acres of land and has got its own railway siding. It is the sole agent for its associate—the Automatic Telephone & Electric Co., Ltd., Liverpool, England.

## Facts and Figures

Present Production: 50,000 telephones per annum; 35,000 exchange lines per annum; 30 single channel systems; 12 3-channel systems; 3 12-channel systems.

The annual sales turnover is approximately Rs. 3 crores.

Production target (1960-61): 80,000 telephones per annum; 60,000 exchange lines per annum; 30 single channel systems; 24 3-channel systems; 5 12-channel systems; 4 4-channel systems; 12 group modulators.

Number of persons employed (as on 30th September 1956):

Officers—84; Supervisory—494; Skilled, semi-skilled and unskilled—2,064; Clerical and others—1,274; Total—3,927 which includes about 250 women.

The factory normally works a single shift, 8-45 a.m. to 5-15 p.m. with a recess of half an hour. Some sections are however at present working two or three shifts.

## Amenities:

Three fully equipped Canteens and two Lunch Sheds are provided for the benefit of the workers and staff. Two of the canteens are run by the Employees' Co-operative Society. The Society also runs a provision shop for the benefit of the residents of the Township.

Other amenities include a well-equipped dispensary and a separate first-aid centre, a well-organised sports club, a joint library and reading room, a Fine Arts Society, publication of the I.T.I. Magazine, a primary school, separate rest room for female employees, supply of free milk to employees doing hazardous work, supply of overalls to factory workers at 50 per cent of the cost, free film shows at frequent intervals, etc.

The employees themselves have organised a voluntary fund for giving financial aid to needy employees in emergencies.

The construction of residential quarters for employees has progressed considerably. 124 'D' type and 144 'E' type quarters as well as 7 'B' type bungalows and six other bungalows for senior officers have so far been completed, most of which are already under occupation. More tenements and bungalows are under construction. The construction of buildings for a fully equipped general Hospital and a school is also going ahead at quick pace.

In co-operation with the Hindustan Aircraft (Private) Ltd., transport facilities have been provided for about 1,200 employees at subsidised rates.

## INTEGRAL COACH FACTORY

Perambur, Madras.

The Integral Coach Factory Project at Perambur, a suburb of Madras on the Madras-Bombay line, is Asia's largest Coach Building Unit and perhaps one of the largest of its kind in the world. It is an important endeavour of the Ministry of Railways included in the first Five Year Plan, and is a significant step forward in the attainment of self-sufficiency in rolling stock. The factory when in full production will produce coaches worth about Rs. 4 crores per annum and will thus result in a considerable saving in foreign exchange.

The factory structures, which cover an area of 850,000 sq. ft. and concrete roadways totalling 3.5 mile in length are very modern and have been designed and constructed by Indian engineers with an eye to provide the worker ideal working conditions.

Construction started in the latter half of 1952. During the construction stage of the project covering about three years, employment was provided for 3,000 men. The factory, when in full production, will have a labour strength of over 4,000 men in the various categories. The first coach was turned out in October 1955.

The factory has been equipped with the latest machine tools, and at the end of the fourth year of production i.e. by October 1958, it is expected to reach the full production target of 350 coaches per year on single shift working.

The factory is designed to produce coach shells only. Fitting up of the interior with seats, racks, amenities, etc., will be done in the Furnishing Factory to be located near the main factory. For the present, the coach shells produced will be fitted with interior fittings, some in the coach factory itself and others in the various railway workshops.

\* Is now under the Hindustan Steel Ltd.

The type of coach to be manufactured in the factory called the "integral coach" is of a modern design developed by a Swiss firm, Messrs. Swiss Car and Elevator Manufacturing Corporation Ltd., Schlieren, Zurich. As compared to the conventional coach consisting of a wooden body secured to a steel frame, in the integral coach the all-steel body and frame form one piece, one being welded to the other, becoming a rigid body of tubular design. This type of construction results in the forces sustained by the coach being taken by the entire body, including the skin. The ends of coaches are specially designed to prevent telescoping, a potential source of loss of life, in train accidents. Particular care has been given to ensure smooth running and affording of greater comfort to the travelling public. These coaches are also lighter in weight compared to conventional coaches and this enables a larger number of coaches being attached to a train leading to the easing of congestion.

A Technical Aid Agreement has been entered into with the above firm for successfully establishing production of this new type of coach and imparting the "know-how" to the Indian personnel. A team of Swiss engineers and technicians are already in position. Every Swiss engineer has an Indian counterpart attached to him so that right from the beginning Indians are associated in the production methods.

The Government of Madras have given assistance to the Project in agreeing to provide the total electrical energy requirements of the Factory and in constructing a 11 K.V. line from their Electricity Grid.

**Technical training:** A Technical School to train all the skilled workmen of the factory was established at a very early stage of the Project in March 1954. It is planned to train 250 skilled artisans in different grades every six months. The School is also provided with a hostel capable of accommodating 250 apprentices.

40 men have received their training in Switzerland in the latest technique in the works of technical collaboration and have returned to India and taken up their respective positions in the production organisation.

**Amenities:** A staff colony of 400 flats, self-contained with water supply, drainage, playgrounds, children's park, club house, etc. has been constructed to house the essential staff of the factory. A scheme for bringing water for the factory from a distance of 11 miles through a pumping main is nearing completion. Attached to the factory is a large canteen to serve light refreshment and mid-day meals to the workers during the lunch interval.

Total investment on the Project: Rs. 7.3 crores.

In the first year of production 43 coach shells were manufactured and turned out.

Total number of men working as on 1st October 1956 is 1,286.

**Chief Administrative Officer:** K. Sadagopan; **Deputy Chief Mechanical Engineer:** K. Swarup; **Deputy Controller of Stores:** C. D. Elliott; **Deputy Financial Adviser and Chief Accounts Officer:** B. Bhattacharya; **Deputy Chief Mechanical Engineer (on Special Duty):** R. Rajagopalan.

### LIGNITE PROJECT

(Ministry of Steel, Mines and Fuel, Government of India).

In view of the importance of developing an economic source of fuel and power for south India which is at present handicapped by an acute shortage, a high degree of priority has been given in the Second Five Year Plan to the mining, utilisation and processing of the extensive lignite deposits which occur at Neyveli in the South Arcot District of Madras.

Preliminary investigations of these deposits were undertaken first by the Madras Government and then by the Central Government from the 1st January, 1955, in consultation with Messrs.

Powell Duffryn Technical Services Limited, a U.K. firm of technical consultants, whose services were made available to the Government of India under the Colombo Plan.

These preliminary investigations, including large-scale pumping tests, having proved the feasibility of economic mining and utilisation of the Neyveli lignite. Government have accepted, in principle, the execution of the Integrated Lignite Project at an estimated cost of Rs. 68.8 crores and have sanctioned the mining part of the Project at a cost of about Rs. 17 crores.

The Integrated Project envisages the mining of 3.5 million tons of lignite per annum to be utilised for:

- (a) production of 200,000 kW of power in a thermal power station using lignite as fuel;
- (b) production of fertilizers with a nitrogen content of 70,000 tons per annum, in the form of urea and (or) double salt;
- (c) manufacture of 714,000 tons of raw lignite briquettes per annum to be processed in a low temperature carbonising plant to yield 380,000 tons of carbonised briquettes per annum for use as domestic and industrial fuel.

A detailed mine plan involving an estimated expenditure of Rs. 17 crores for the development and production phases of the mine has been submitted by the technical consultants; and orders for Rs. 5.5 crores worth of conventional and specialised machinery required for removing the overburden and developing the mine for full production have been placed.

Some of the conventional equipment has already begun to arrive (March, 1957). The estimated cost of production of lignite has been worked out at Rs. 6.8 to Rs. 7 per ton which compares favourably with the price at which coal is available in south India. In accordance with the time schedule for the mining project, the mine will be in full production by the 31st December, 1960.

The mining engineer of the Project has gone for training to the U.S.A., under the T.C.M.'s Point Four Programme.

The Central Water and Power Commission, who have undertaken the planning of the component power project involving an estimated expenditure of about Rs. 20 crores, have set up a special cell at Madras for this purpose; and the planning and drawing up of specifications for the power unit are now in progress.

The projected power house will have an installed capacity of 200,000 kW.

International firms of repute were addressed as to the terms and conditions under which they would be prepared to technically collaborate with the Government in the fertilizer project. The selection of consultants from among the respondents to the invitation is now under consideration (March 1957).

The total capital cost of the fertilizer plant for Neyveli has been estimated at Rs. 21 crores. The chemical engineer of the project, who will be closely connected with the execution of the fertilizer project, has returned after a study tour in the U.S.A., Germany and Italy.

Tests conducted on bulk samples of Neyveli lignite in West German laboratories have established that the lignite is of a high quality, capable of yielding satisfactory briquettes, both raw and carbonised on a commercial scale.

Further tests on a pilot plant scale are to be conducted at Neyveli with the help of pilot plant equipment, promised under T.C.M. aid, for determining the optimum conditions under which the lignite should be briquetted and carbonised. Thereafter the question of the type of press to be used and the choice of consultants will be considered.

This component of the project is estimated to cost Rs. 10 crores and will be commissioned in accordance with the time-schedule by the 31st December, 1961.

Construction of residential quarters for the project staff is now in progress. A town planner and an architect have been appointed to draw up the blue prints for the permanent township at the site of the project and the design for the buildings.

During the mining stage, the labour force of the project will go up. A full time labour welfare officer has been appointed to look after the interests of the workers.

The population at Neyveli is expected to increase considerably during the implementation stage of the project and schemes for the establishment of six elementary schools and one Secondary and High School have been formulated and are under the consideration of the Government. Apart from these, other proposals under examination are regarding the establishment, at an early date, of an Industrial School and a Polytechnic. There is a dispensary at Neyveli with facilities for maternity cases. When the township is constructed, there will be a fully equipped hospital.

The management of the Neyveli lignite project has been entrusted to a Government of India-owned private limited company, Neyveli Lignite Corporation (Private) Ltd., which started functioning on 6th December 1956.

**Chairman, Board of Directors,** S. S. Khara, I.C.S.

**Managing Director,** T. M. S. Mani, I.C.S.

### NAHAN FOUNDRY LTD.

(Nahan, Sirmoor District, Himachal Pradesh).

This was started in 1875 and has been continuously expanded.

The total investment is about Rs. one crore and the number of persons employed is 500 in the works and 300 in the agencies.

Production consists of an improved type of cane crushers, bullock and power driven; centrifugal pumps in different sizes; paddy-threshers; ploughs; corn-sheller machines (a new patented machine for separating maize corn from their cobs); chaff-cutters of different types; boiling pans; cast iron sheets; flour mills, power and bullock driven; and miscellaneous items.

The company has a network of 150 agencies in north India with mobile workshops which cater to the needs of the cultivator in the villages in respect of machines, and also undertake repairs at site.

It is managed as a private limited company (which took over on Jan. 1, 1953) with the President holding all the shares. The affairs are looked after by the Ministry of Commerce and Industry. It is a pioneer industry in northern India for the manufacture of cane crushers and "Sultan" is a speciality all over India and abroad.

**General Manager,** Ramchand.

### NANGAL FERTILIZER—HEAVY WATER PROJECT

(Ministry of Commerce and Industry, Government of India).

The factory at Nangal (Punjab) will be an integrated unit for the production of ammonium nitrate fertilizer and heavy water for the use of the Department of Atomic Energy.

The capacity of the fertilizer plant will be 70,000 tons per annum in terms of nitrogen.

The heavy water production will be 14 to 16 tons a year.

The factory which is estimated to cost about Rs. 25 crores is expected to go into production by the middle of 1960.

A private limited company under the Indian Companies Act, with the name and style of Nangal Fertilizers & Chemicals Private Ltd. has been formed to execute and administer the project. The company is wholly owned by the Government of India.

The factory will be located at Nangal on the right bank of the river Sutlej.

During the construction stage approximately 20 foreign essential technical and non-technical staff of various ranks will be employed from time to time, in accordance with the needs and progress of work in the project. It is estimated that on implementation of the project, it will employ 2,600 persons including managerial and technical staff.

Messrs. Vitro Engineering Division of New York have recently been engaged as technical consultants for the project.

#### NATIONAL INSTRUMENTS FACTORY (15, Wood Street, Calcutta 16)

Total investment Rs. 57,15,000. Value of production and repair for 1955-56 Rs. 14.25 lakhs. Number of persons employed 1,004.

This is under the Ministry of Commerce and Industry.

It is one of the oldest if not the oldest factory in India engaged in the manufacture and repair of scientific and mathematical instruments in India.

It manufactures prismatic compasses, theodolites, levels and other survey instruments, prismatic binoculars, telescopes, thermometers and hydrometers of various types, excise apparatus, barometer and other meteorological instruments, profile projectors, students' microscopes, demonstration eyepieces, sextant, drafting machine and other drawing office equipment and repairs all types of scientific and aircraft instruments.

The Planning Commission has provided Rs. 180 lakhs for the first plan period to reorganize the factory, the first phase of reorganisation being already in progress.

Under the Second Five-Year Plan, the manufacture of the following has been included: Special microscopes, medical diagnostic instruments, clinical thermometers, pressure & vacuum gauges, and spectacle lenses.

The setting up of an Optical Glass Project at a cost of Rs. 21.81 lakhs and with an initial capacity of 10-50 tons per annum in collaboration with foreign manufacturers has also been included in the second Five-Year Plan period. Project Reports are being obtained from different foreign manufacturers.

General Manager, P. C. De, B.Sc. (Eng), C.P.E. (Glasgow).

Works Manager, P. C. Mahajan, M.Sc. (Lond.), Tech. Opt. M.Sc. (Pun.).

#### OPTICAL AND OPHTHALMIC GLASS FACTORY

(Ministry of Commerce and Industry).

The setting up of an optical and ophthalmic glass factory in India at a cost of Rs. 2.3 crores and capable of manufacturing 50 tons of optical and 250 tons of ophthalmic glass annually has been recommended by a Soviet team of experts.

The type of further assistance the Soviet Union will offer to India in the setting up of the factory now found feasible by the experts will be discussed by the Government of India with the Soviet Embassy here after it had examined the report.

In their report, the Soviet experts have stated that the rich deposit of minerals necessary for the manufacture of optical glass as well as the existence in the country of a research institute for glass and glass technology departments in some India universities were sufficient prerequisites for the establishment of such a factory in India.

The experts feel that an output of 50 tons of optical and 250 tons of ophthalmic glass annually will be sufficient to meet the demand for such glass in India for the next five or ten years.

They have recommended Asansol area, in Bihar, as the most suitable site for the factory as the best quartz for manufacturing this type of glass is quarried in Jagadishpur area, in Bihar. They have suggested that the Indian Glass and Ceramic Research Institute should conduct experiments to find out whether Indian clays are suitable for optical glass melting.

As regards the requisite Indian personnel for the factory, the experts have recommended that 18 to 23 engineers would have to be trained abroad for a period of 12 to 18 months in technology, organisation and production. Another 35 to 40 persons would also have to be trained abroad in melting and processing of optical glass.

#### SINDRI FERTILIZERS AND CHEMICALS (PRIVATE) LIMITED

(Sindri, Bihar)

This is a State-owned and State-managed private limited company, in which all shares except nine (allotted one each to the chairman and eight directors) are held by the President of India. The Company was registered on December 18, 1951.

The Secretary to Government in the Ministry of Commerce and Industry is the Chairman of the Board of Directors.

Authorized share capital—Rs. 30 crores; paid up—Rs. 17 crores. A further sum of Rs. 7.5 crores was invested by the Government as a loan at 4½ per cent interest.

Higher profits, increased production and larger despatches of fertilizer and a well-planned expansion, designed to increase the factory's rated capacity by over 60 per cent, are some of the outstanding features of Sindri's progress as revealed in the fourth annual report of the Directors of Sindri Fertilizers & Chemicals (Private) Limited for 1955-56. This was mainly due to larger production and also due to larger despatches of fertilizer during the year.

The profits for the year before providing for depreciation and interest on loans from the Government of India amounted to Rs. 3,75,17,778. The Directors have, out of this amount, provided Rs. 1,88,01,500 for depreciation and utilised Rs. 23,52,936 in paying interest on loans to the Government of India, leaving a balance of Rs. 1,63,63,342. After adding Rs. 6,17,325 brought forward from last year's account, this amounts to Rs. 1,69,80,667. After making further provision of Rs. 28,74,619 for repairs and renewals, Rs. 30,00,000 for allocation to deferred taxation reserve, Rs. 25,00,000 for allocation to general reserve and Rs. 68,00,000 as dividend to shareholders at 4 per cent per annum, it leaves a balance of Rs. 18,06,048.

Sindri has, during the year, repaid the loan from the Government of India to the extent of Rs. 2 crores.

Started production—31st October 1951; the first bags of ammonium sulphate went out on February 7, 1952.

Target—320,000 tons a year. This was exceeded in the financial year 1955-56, the production being 328,062 tons. Till 6-12-1956, Sindri produced 1,352,548 tons of ammonium sulphate equivalent to a saving of over Rs. 45 crores in foreign exchange.

Optimum daily output: 960 tons. Average daily production for the year 1955: 880 tons; Highest production for any single month was in Oct. 1956: 32,397 tons—an average of 10-45 tons per day.

Price—The selling price to the Central Fertilizer Pool is Rs. 270 per ton.

The factory consists of coke oven, gas, ammonia, sulphate plants; power from 80,000 kW Power House; water (some 12 million gallons a day under full production condition). Adequate arrangements have been made to ensure this large supply of water from the Damodar river for the factory and connected activities.

A barrage has also been thrown over the Gowal, a tributary of the Damodar, impounding about 1,000 million gallons of water as a stand-by.

Then there are a bagging plant, marshalling yards and 12-mile railway track.

The factory was 100 per cent complete at the end of 1951; it started production 31st October 1951; gas plant started 13th April 1951; production of anhydrous ammonia started 28th August 1951; marshalling yards completed 30th August 1951; bagging plant commissioned 4th February 1952; bags of ammonium sulphate went out of the factory 7th February 1952.

The Coke Oven Plant built at a cost of Rs. 2.81 crores and designed to produce 600 tons of coke per day and other important by-products of industrial importance, went into production on September 1, 1954.

The cement factory built by the A.C.C. with an installed capacity of 600 tons of cement a day for the utilisation of Sindri's by-product—chalk sludge—went into production on September 1, 1955.

The township designed for 5,000 employees families or 25,000 persons is about 1,700 acres; has 5 groups of composite and self-sufficient colonies, all modern amenities (electricity, water supply, sanitary services, roads), 4,410 residential houses in existence; under the construction programme in hand, a further 390 houses are to be constructed by the end of 1956-57.

There are also a 100-bed modern hospital, four branch dispensaries, one first-aid post, two high schools for boys and girls, one middle school, three primary schools and one Kindergarten school, three post offices, three recreation centres and several shopping centres.

Good progress has been made with Sindri's 110-million-rupies expansion scheme. Under the expansion scheme, Sindri will produce two new types of nitrogenous fertilizers, 70 tons of urea and 400 tons of ammonium sulphate-nitrate per day. This will increase Sindri's existing production by over 60 per cent. The expansion scheme will be completed in 1958.

Sindri has developed into an important training centre for young engineers and technicians. Sindri has already provided several trained technicians and engineers for other industries recently set up by the Government. Training facilities are being expanded with a view to training more technical personnel to man supervisory posts as a result of Sindri's expansion and the setting up of new fertilizer factories during the Second Five-Year Plan period.

Imports 1954—100,000 tons. Central loans: 1953, Rs. 8 crores; 1954, Rs. 10 crores.

Imports of manures 1955: 103,341 tons.

#### Board of Directors:

Chairman, S. S. Khara, I.C.S.

Members, J. J. Ghandy; Sri Ram; S. R. Vasavada; B. C. Mukherji, I.C.S.; Dr. A. Nagaraja Rao; T. C. Furl, I.C.S.

Mg. Director, V. Nilakantan.

#### THORIUM PLANT

(Trombay, Bombay 38)

The plant went into production in Aug. 1955.

It is expected to produce a few hundred tons of thorium and a few tons of uranium a year which is equivalent in fuel value to roughly 1,000 million tons of coal. This is about thirty times the present annual production of coal in India.

**GOVERNMENT CEMENT FACTORY**

Churk, Mirzapur, U.P.

The Government Cement Factory was established at Churk in Mirzapur District with an investment of Rs. 4.5 crores. The factory went into production in September 1954. Its installed capacity is 700 tons per day. The factory employs over 2,000 persons.

It is proposed to enhance the production capacity of the factory to 1,400 tons per day.

During the first eleven months of the year 1955, 1.66 lakh tons of cement was produced.

**GOVERNMENT PRECISION INSTRUMENTS FACTORY**

Lucknow, U.P.

The factory was established in 1950 at Lucknow, for the manufacture of water meters, microscopes and other precision instruments and went into production in 1952. The present production of water meters is 1,600 per month, including  $\frac{1}{2}$ " inferential dry dial water meters of horizontal and vertical types and  $\frac{1}{2}$ " and  $1\frac{1}{2}$ " dry dial water meters of horizontal type. Until December 1955, in all 29,775 water meters had been produced of which 27,177 were sold to water works all over the country and Defence Department of the Government of India. The factory holds exclusive rate contract of the Directorate General of Supplies and Disposals, Government of India for  $\frac{1}{2}$ ",  $\frac{3}{4}$ " and  $1\frac{1}{2}$ " water meters.

The demand for water meters has by far outstripped the present production capacity. To meet this situation it is proposed to shift the factory to bigger premises and expand it to almost four times its present capacity during the Second Five-Year Plan period.

The factory is now a self-supporting economic unit. It earned nearly six per cent interest on capital outlay in 1954-55. It employs over 250 persons. The factory will also shortly start manufacturing surgical instruments.

**KOLAR GOLD MINES**

Kolar Gold Fields, Mysore State.

Total Investment: Rs. 162,50,000 (approximate).

No. of Mines and their location: 3, all located in K.G.F.

Total annual output and average value: (approximate)

Gold, 194,000 fine ozs.—Rs. 488 lakhs.

Silver, 14,380 fine ozs.—Rs. 54,000.

No. of workmen: About 25,000.

Compensation paid: The total compensation fixed by the Mysore Government is Rs. 164 lakhs, a major portion of which has already been paid to Messrs. John Taylor and Son, the former company.

Names of companies taken over: (1) The Mysore Gold Mining Co.; (2) The Champion Reef Gold Mines of India; (3) The Nandydroog Mines.

Board of Management appointed by the Government of Mysore: The Chief Minister (*Chairman*); S. Muninanjappa (*Vice-Chairman*); G. Mathias, Finance Secretary; T. P. Krishnachar, Director of Geology and Mines; a representative of Messrs. John Taylor & Son who are being appointed Consultant Engineers.

**THE ANDHRA PAPER MILLS**

(Itajahmundry).

The capital investment is Rs. 20 lakhs and production 10 tons a day. The Government proposes to invest Rs. 20 lakhs more and the production will increase to 35 tons a day. The Second Plan calls for the manufacture of better quality of paper.

**CERAMIC FACTORY**

(Gudur, Nellore Dist.).

The main items of production are the Hindustan type of water closets and crockery sets. The Government proposes to manufacture

**STATE-OWNED OR STATE-AIDED****THE MYSORE IRON AND STEEL WORKS**  
(Bhadravathi, Shimoga Dist., Mysore State).

This Mysore State Government project for the establishment of the industry was worked out during the years 1914-18, and the basic industrial enterprise started operations in 1923.

The present total investment is about Rs. six crores.

The works produce pig iron, cast iron pipes, plate sleepers, general foundry castings, merchant steel sections, steel castings, portland cement, ferro-alloys. The turn-over amounts to over Rs. four crores per annum.

The manufacture by electric process is a noteworthy feature.

The annual production of pig iron is about 85,000 tons; of cement about 78,000 tons; of ferro-silicon about 4,500 tons; of steel about 30,000 tons.

The production in the General Foundry is about 2,500 tons of general castings; 600 tons of grinding bodies and 4,500 tons of plate sleepers a year.

The annual output of the Rolling Mill is about 30,000 tons of mild steel sections.

The Rod and Strip Mills produce 40 to 45 tons of rods or 30 to 35 tons of strips per day.

The Electric Steel Furnace produces annually about 4,500 tons of ingots and 600 tons of rough castings of which 200 tons are machined castings.

The output of the Structural Shop is about 100 tons a month.

In the expansion scheme of the works, a Cast Iron Spun Pipe Plant for manufacture of pipes upto 12" diameter is under installation and will come into production by middle of 1957.

Production of ferro-manganese in 2 Fuelled Furnaces with a capacity of 1,500 tons per year has commenced during 1956-57.

The works have their plans for the Second Five-Year Plan period, to increase the steel ingot capacity from 30,000 tons to 1,00,000 tons and also installation of stainless steel and tool and Alloys Steel Plant.

The labour employed: monthly rated about 1,800 and daily rated about 6,500.

Director and Vice-Chairman, T. Shamanna, I.A.S. General Manager, T. Krishnappa, M.Sc. (Met.). Addl. General Manager, B. Seshadri Sharma, B.E.

**THE NATIONAL NEWSPRINT AND PAPER MILLS LIMITED**

(Nepanagar, Nimar Dist., Madhya Pradesh).

The mills are situated on the main line Bombay-Bharatpur, about 27 miles from Khandwa and 17 miles from Burhanpur.

The construction of the mill started in 1948, and the installation of the Paper Machine and Ground Wood Mill was completed by January 1955. The mill had a trial run on 11th January 1955 for the first time manufacturing newsprint from indigenous groundwood pulp and the imported chemical pulp.

The Chemical Plant was put into commission and newsprint manufactured from cent per cent indigenous raw materials on 20th December 1955.

The rated capacity of the plant is 100 tons per day. Present production is 60 tons a day. The target production of 100 tons per day is likely to be reached by the end of 1957.

**ANDHRA PRADESH**

electrical insulators through an additional investment of Rs. 3 lakhs.

**HYDERABAD TANNERIES LTD.**

(Hyderabad).

The investment is Rs. 13 lakhs. It employs only 30 workers and the present production is negligible. But there are plans for expansion and reorganization which are at present tentative. If implemented, the number of workers will rise to 800.

**PRAGA TOOLS CORPORATION**

(Hyderabad).

The authorised capital is Rs. one crore. The Union Government has recently agreed to invest

The Project has cost about six crores of rupees.

800 workers are working on permanent monthly wages, and 100 workers on daily wages.

The Company is a limited concern with about 22,000 shareholders. The major portion of the investment, however, has been raised by way of loans from the Government of M.P. and the Central Government through the M.P. State Government.

At the head is a Board of Directors who are elected at the annual general meeting of the Company by the shareholders. The Managing Director and the Secretary are Government officials on loan from the Government of M.P.

Chairman, Board of Directors, Sir A. Ramaswami Mudaliar.

Managing Director, Ragho Raj Slugh.

Works Manager, S. R. Krishna-swami.

Secretary, B. V. Deo.

The First-Five Year Plan had an allotment of Rs. 200 lakhs for the Mills.

The total revenue from sales during 1955-56 was over 25 lakhs of rupees.

**SIRPUR PAPER MILLS LTD.**

(Sirpur-Kaghaznagar, Central Railway, Andhra Pradesh).

The managing agents are Messrs. Birla Brothers Ltd., 8, India Exchange Place, Calcutta; and the registered office is at Ah Villa, Somajiguda, Hyderabad.

Production started in 1942. The total capacity of the mill is 18,000 tons per year and actual production in 1955-56 was 14,200 tons. The mill employs about 2,100 workers. The authorized capital of the company is Rs. 10 crores, issued capital Rs. 2.91 crores and the paid-up capital Rs. 2.56 crores.

For the year ended 30th June 1956, the profit was Rs. 18.20 lakhs.

The Company has on hand plans to raise production capacity to 100 tons a day by the end of 1957.

Chairman, Board of Directors, G. P. Birla.

Secretary-General, P. R. Biyani, Secretary, P. L. Bhandari, Accountant-General, G. N. Kalia, Factory Manager, N. N. Agarwal, Technical Adviser, H. Zuckerman.

**THE SIRSILK LTD.**

(Sirpur-Kaghaznagar, Central Railway, Andhra Pradesh).

The managing agents are Messrs. Birla Brothers (Private) Limited, 8, India Exchange Place, Calcutta; and the registered office is at Ah Villa, F-2-655, Somajiguda, Hyderabad.

The authorized capital is H.S. Rs. 15 crores, issued and subscribed capital H.S. Rs. 3,898 crores, and called and paid-up capital H.S. Rs. 3,428 crores.

The profit and loss account for the year ended September 30, 1955 shows a loss of Rs. 7.62 lakhs. The working of the year 1956 has shown an improvement.

The capacity is five tons of yarn at present (February 1956) and the company has obtained a licence to raise the capacity to ten tons. Out of the 480 looms received, 230 were installed and were working on triple shift (February 1956).

Chairman, Board of Directors, G. P. Birla.

another Rs. 75 lakhs to Rs. one crore for expanding the production facilities and manufacture of tools specially needed by the coal mining industry. The details are being worked out.

**THE SRI VENKATESWARA STRAWBOARD AND PAPER MILLS**

(Tirupati).

This was originally a private company which the Government has purchased. It is not in operation at present and the question of installation of additional equipment and running it under State auspices is under consideration.

**THANGA MILL**

(Spun Silk Mill).  
Jagi Road, P.O. Jagi Road,  
Nowgong Dist., Assam.

The mill has not been started. Arrangements are in progress. The total investment proposed is Rs. 51.7 lakhs. The number of persons employed is 500.

Production has not started. The Second Five Year Plan target is 225,000 lbs. of spun yarn and 117,000 lbs. of Noli.

**ASSAM CO-OPERATIVE SUGAR MILL LTD.**

(P.O. Baruaabamungaon, Golaghat)

The mill is expected to go into production during the crushing season 1957-58.

**ASSAM**

The total investment is Rs. 90 lakhs.

When the mill is in full production about 600 persons will be employed.

The Second Five Year Plan target for the mill is 13,000 tons of white refined sugar.

**ASSAM SPUN SILK MILL**

(Jagi Road, Nowgong Dist.).

The mill is expected to start functioning by the end of 1957.

The total estimated cost of the project is Rs. 54.7 lakhs.

It is estimated that about 400 skilled workers and 600 unskilled workers will be employed when the mill is in full production.

**TEXTILE MILL**

(Pandu)

The mill is expected to start functioning in 1958-59.

It is estimated that about Rs. 1.17 crores would be invested in the mill.

About 2,000 unskilled and 100 skilled and supervisory staff will be employed when the mill is in full production.

**BIHAR STATE SUPERPHOSPHATE FACTORY**

(Sindri).

The factory is still under erection and is expected to go into production by about the middle of 1957. Some details relating to the factory are given below:

Capacity of production: Single superphosphate—15,000 tons per annum.

**BIHAR**

Installed capacity of plants: (i) 240 tons superphosphate per day; (ii) 25 tons sulphuric acid 98 per cent per day.

Total investment: Rs. 60 lakhs.

No. of workers expected to be employed: About 100.

At present State-owned, but may be made a private limited company.

*Works Manager*, B. A. Sundara Moorthy, B.E., A.M.I.E. (Ind.); *Senior Works Chemist*, R. Jagannathan, M.A., A.R.I.C., A.M.I.Chem.E.

The factory is capable of producing 240 tons of superphosphate per day or about 70,000 tons per annum of 300 working days, provided an additional 50-ton per day capacity sulphuric acid utilizing iron pyrites is installed for which a provision has been made in the Second Five Year Plan. The production of the factory is expected to be mostly marketed within the State of Bihar.

The First Five Year Plan had an allotment of Rs. 41.1 lakhs for the factory.

**JAMMU & KASHMIR****GOVERNMENT DRUG RESEARCH LABORATORY**

(Canal Bank, Jammu).

The Laboratory was started in 1943. Total investment is Rs. 13.5 lakhs. The number of persons employed is 180. The present production is valued at Rs. 7 lakhs and the Second Five Year Plan target is Rs. 25 lakhs.

**GOVERNMENT DRUG RESEARCH LABORATORY**

(Raj Bagh, Srinagar).

The Laboratory was started in 1956. Total investment is Rs. 3.9 lakhs and the number of

persons employed is 60. The present production is valued at Rs. 2 lakhs and the Second Five Year Plan target is Rs. 15 lakhs.

**GOVERNMENT SILK WEAVING FACTORY**

(Raj Bagh, Srinagar).

The factory was started in 1938-39 with 33 looms and 1,872 spindles. It is now equipped with 124 looms and an upto date Throwing Plant of 5,616 spindles.

Total investment: Rs. 12.34 lakhs odd. The factory employs 553 persons (479 labour and 74 establishment).

The present production is four lakh yards per annum. The target for the Second Five Year Plan is six to seven lakh yards.

**GOVERNMENT WOOLLEN MILLS**

(Srinagar, Kashmir).

The mill was started on 7th December 1950. The total investment is Rs. 17,43,534-5-4. The number of persons employed is 570. Average production is 18,660 yards or 29,047½ lbs. per month. The Second Five Year Plan target is 1,425,000 yards.

**KERALA****GOVERNMENT CERAMIC CONCERNS**

(Kundara, Quilon Taluk)

The factory was started in 1940.

Total investments: Present factory—Rs. 13,80,329 (at the end of 1955-56); New factory—Rs. 32,43,865 (at the end of 1955-56).

Total number of employees: Pensionable staff 30; Non-pensionable staff 23; Contingency 7; Workers about 400.

The factory produces porcelain, crockery goods, refractories, etc.

Second Five Year Plan target: Construction of slip tank, drying yard, etc. and purchase of machinery during 1956-57 and 1957-58 so as to commence production of additional quantity of 1,000 tons of china clay annually so as to raise the yearly production to 3,500 tons in 1958-59. Some items of machinery have been received and orders have been placed for some other items. Quotations have been invited for the remaining items except Bulldozer the supply of which is being considered by the Government.

**SAND LIME BRICKS FACTORY**

(Kottayam District, Kerala).

*Management*: Cherian & Co. (Private) Ltd., Chingavaniam P.O., Kottayam, Kerala.

*Capital*: Rs. 11 lakhs (Rs. 5 lakhs to be subscribed by Kerala Government).

*Labour*: About 350 workers.

*Probable date of commencement of production*: end of 1957.

*Initial target*: 20,000 bricks per shift of 8 hours in one unit. Only one unit is proposed to be started now.

**TRAVANCORE MINERALS CONCERNS**

Head Office: Chavara, Kerala State.

Branch Office:

Manavalapurichi, Kerala.

Dates when started: 1. June 15, 1949; 2. January 1, 1952; 3. October 11, 1951.

Total investments: Rs. 44,36,250-8-11.

Present production: Daily average subject to climatic conditions: Ilmenite—600 tons; Monazite—production temporarily suspended; Rutile—1½ tons.

Second Five Year Plan target: No scheme for the expansion of the production schedules of ilmenite and monazite is included in the Second Five Year Plan. A scheme for the production of rutile with the latest type machinery is however included in the Plan with a physical target of 7,000 tons at an estimated expenditure of Rs. 12.86 lakhs. A sum of Rs. 1,70,000 has been provided in the current year's budget and a High Tension Electro Static Separator from Florida, U.S.A., has arrived. Employment of the required staff is being considered.

**TRAVANCORE RUBBER WORKS**

(Chackal, Trivandrum 7).

The factory was started on 17th August 1935 as Travancore Govt. Rubber Factory (later leased to the Travancore Cables & Rubbers Ltd. from January 1937 to March 1938). Subsequently the factory was working on partnership basis between the Travancore Government and Sir Chinubhai Ranchodlal Madhwalal from 10-2-1940 to 8-10-1949. The concern was finally taken over by the Govt. of Travancore-Cochin on 9-10-1949.

The capital investment as per balance sheet on 31-3-1956 is Rs. 4,54,379-2-7.

The factory employs 242 persons: Staff 38 including five officers; Watchmen 8; Workers 196 (27 on monthly wages and 169 on daily wages).

The factory produces cycle tyres and tubes, sheeting-pure, single and double insertion and mottled, hoses—armoured, suction, plain, radiator bent, etc. of different specifications, tubings, valve tubes, rings, bushes, ebouite rods, tubes, blocks, etc., latex tubing, sponge and latex foam cushions.

There are two schemes in the Second Five Year Plan in respect of Travancore Rubber Works, viz., a) manufacture of cycle rims, and b) modernisation of the present equipment and expansion of production programme of cycle tyres, tubes, sheetings, hoses, latex goods, moulded goods, etc.

## MYSORE

**THE GOVERNMENT CENTRAL INDUSTRIAL WORKSHOP**

(Post Office Road, Bangalore).

Established : 1897.

Capital invested : Rs. 4,06,641.

No. of persons employed : 102.

Annual outturn : Rs. 4,12,344.

The process of shifting the factory to new premises and amalgamating the mechanical department of the Government Electric Factory with it is under way. The scheme is estimated to cost Rs. 10.5 lakhs.

**GOVERNMENT ELECTRIC FACTORY**

(Mysore Road, Bangalore).

Established : 1934.

Capital invested Rs. 72,13,889.

No. of persons employed : 1,018.

Annual outturn . Rs. 45,77,396.

A scheme is under way to expand the factory during the Second Five Year Plan and a sum of Rs. 125 lakhs has been granted by the Centre under the Central Aid Scheme. Negotiation for collaboration of the factory with a famous engineering firm, Messrs. A. E. G., Germany, is nearing completion. The expansion scheme

envisages (1) production of transformers of capacities up to 10,000 KVA and of voltage rating up to 60,000 volts, recording an annual output of 200,000 KVA, (2) restarting the manufacture of electric motors with a capacity up to 250 hp and the ultimate annual output of 80,000 hp and (3) manufacture of switch-gear like the iron clad switches, a variety of fuse cartridges, group operated isolators, oil circuit breakers, etc. up to a rupturing capacity of 250,000 KVA and voltage rating up to 33 KV.

**GOVERNMENT PORCELAIN FACTORY**

(Malleswaram, Bangalore).

Established : 1932.

Capital invested : Rs. 70,70,600.

No. of persons employed : 415.

Annual outturn : Electro-porcelain : 300 tons; Crockery : 24 tons.

The Government Porcelain Factory is the only State-owned industry of the type in India. In order to meet the growing demand for insulators, bushings, etc., an expansion scheme estimated to cost about Rs. 84 lakhs is under way in technical collaboration of Messrs. Nippon Gaiishi Kaisha Ltd, Nagoya, Japan. This scheme envisages an output of 2,500 tons of production per annum. Since this scheme could not be completed within the end of the First Five-Year

Plan, it had to be included in the Second Five-Year Plan. The implementation of the scheme is nearing completion and the production is expected to be started during January 1957.

**GOVERNMENT SOAP FACTORY**

(Rajajinagar, Bangalore).

Established 1918.

Capital invested : Rs. 7,85,000.

No. of persons employed : 220.

Annual outturn : Rs. 30 lakhs.

The factory shifted to its new premises at Rajajinagar, Bangalore's industrial suburb, in March 1957. It is expected to produce 1,500 tons of soap per year which can be further increased to 3,000 tons. A glycerine recovery plant is also erected in the new premises. This will have an output of 75 tons of chemically pure glycerine a year.

**MYSORE IMPLEMENTS FACTORY**

(Hassan).

Established : 1939.

Capital invested : Rs. 10,00,793.

No. of persons employed : 256.

Annual outturn : Production Rs. 5,56,042.

A scheme for mechanisation and development of the factory with a capital cost of Rs. 10 lakhs has been sanctioned by the Government.

## RESEARCH

**R**ESearch in pure science is carried out mainly in the universities and in some research institutes. The Council of Scientific & Industrial Research (C.S.I.R.) and the Department of Atomic Energy provide facilities for fundamental or basic research in their laboratories and institutes, and also sponsor such research in universities and research institutions all over the country.

Research in applied science and for industrial development is done mainly under the auspices of the C.S.I.R., the Co-operative Research Associations, and the laboratories attached to a few industrial concerns.

Research in engineering subjects is undertaken in the Indian Institute of Science, Bangalore, Central and State Hydraulic Engineering Research Stations, Indian Institute of Technology, Kharagpur, and in a few engineering colleges, such as the College of Engineering and Technology, Jadavpur.

The Council of Scientific & Industrial Research, sponsors engineering research in various institutions through its research committees.

Medical research is mainly in the charge of the Indian Council of Medical Research.

Agricultural research is looked after by the Indian Council of Agricultural Research and the various Central Committees for agricultural commodities like the Indian Central Cotton Committee, Indian Central Jute Committee, etc. and the research institutes functioning under the Ministry of Food and Agriculture.

Research for defence purposes is undertaken in the Defence Science Laboratory at New Delhi. Some amount of work is carried out also in ordnance laboratories at Kanpur and elsewhere.

Research in the humanities—literature, language, the arts, etc.—is done at individual institutions scattered throughout the country.

It may be mentioned here that the Central Government has a Scientific Liaison Officer in the U.K. He keeps in touch with scientific

developments in Europe, arranges for the training of Indians at research centres in Europe, and helps to promote personal contacts between Indian and foreign scientists.

Allotment for C.S.I.R. alone for research and development under the Second Five-Year Plan is Rs. 33-36 crores.

**SCIENTIFIC SOCIETIES**

The National Institute of Sciences, New Delhi, is the premier scientific society recognized by the Government of India. It enjoys the same status as the Royal Society of London in U.K. or the National Academy of Washington in U.S.A.

Two all-embracing science societies are : The Indian Science Congress Association, Calcutta, under whose auspices Indian and foreign scientists meet every year to exchange ideas; and the Indian Association for the Cultivation of Science, Calcutta.

Two all-India academies are : The Indian Academy of Sciences, Bangalore and the National Academy of Sciences (India), Allahabad.

Other scientific societies are : Agricultural and Horticultural Society of India, Calcutta; Agri-Horticultural Society, Madras; Anthropological Society, Bombay; Banaras Mathematical Society (Bharat Ganita Parishad), Lucknow; Bombay Sanitary Association, Bombay; British Medical Association, Bombay Branch, Bombay; Entomological Society of India, New Delhi; Horticultural Society of India, Calcutta; Indian Botanical Society, Calcutta; Indian Ceramic Society, Banaras; Indian Chemical Society, Calcutta; Indian Dairy Association, Bangalore; Indian Mathematical Society, Madras; Indian Physical Society, Calcutta; Indian Physiological Society, Calcutta; Indian Roads and Transport Development Association, Bombay; Indian Society of Genetics and Plant Breeding, New Delhi; Mining and Geological Institute of India, Calcutta; National Horse-breeding and Show Society of India, New Delhi; Psychoanalytical Society, Calcutta; Institute of Engineers,

Calcutta; Indian Society of Soil Science, Calcutta; Society of Biological Chemists, Bangalore; Indian Science News Association, Calcutta; Indian Institute of Chemical Engineers, Calcutta; Indian Institute of Metals, Calcutta; Indian Society for Quality Control, Calcutta; Indian Society for Agricultural Statistics, New Delhi.

**GOVERNMENT RESEARCH**

The major part of applied research in India is now carried on under the auspices of the Council of Scientific and Industrial Research (Ministry of Scientific Research). The Council of Scientific & Industrial Research was established in 1942 by the Government of India as an autonomous body registered under the *Registration of Societies Act XXI of 1860*. The functions of the Council include : the promotion, guidance and co-ordination of scientific and industrial research in India, the establishment, maintenance and management of laboratories and institutes to further scientific research, the collection and dissemination of scientific information. Research work under the Council is carried on in its own laboratories and extra-murally in universities and other institutions under a grants-in-aid scheme.

The Council is administered by a Governing Body with the Prime Minister as President, the Minister for Scientific Research as Vice-President and representatives of science, industry and certain Government departments as members. The Governing Body is assisted by the principal advisory body of the Council the Board of Scientific & Industrial Research—on general technical matters. The Board advises the Governing Body on research and development proposals and also as to the lines on which scientific and industrial research ought to be conducted and the channels into which it should be guided ensuring co-ordinated development of science and industry in the country. The Board initiates, guides and supervises research projects and examines and co-ordinates schemes of research.

The Board consists of representatives of science, engineering, industry and appropriate departments of the State Governments and of the Government of India. It functions in two working parties (i) scientific and technical subjects; and (ii) engineering subjects. The Board is advised by a number of Research Committees, which keep watch on the progress of research schemes falling within their scope and formulate long-range research projects on specific subjects and recommend to the Board necessary grants-in-aid and block grants for research work in universities and other institutions scattered in the country. The number of Research Committees at present is 25 as follows:

Aeronautics; Applied Mechanics; Atmospheric; Biochemical; Biological; Biophysics; Building; Cellulose; Chemical; Geological & Mineralogical; Electrical & Wind Power (including Wind Power Sub-Committee); Essential Oils; Metals; Mining; Pharmaceuticals & Drugs (with Medicinal Plants Sub-Committee); Physical; Plastics; Public Health Engineering; Radio; Internal Combustion Engines & Gas Turbines; Road; Science Instruments; Soil Mechanics & Foundation Engineering; Vanaspathi, Vegetable Oils.

### NATIONAL LABORATORIES

There are 16 national laboratories functioning under the Council. The National Physical Laboratory in New Delhi and the National Chemical Laboratory at Poona stand on a special footing. The former is equipped for the maintenance of and research in fundamental and derived standards. It also undertakes research in industrial standards of performance and practice. The National Chemical Laboratory is concerned with investigations embracing all the chief applications of chemistry. In the areas not covered by the activities of other institutions this Laboratory has a special responsibility.

The National Metallurgical Laboratory, Jamshedpur; the Central Fuel Research Institute, Jealgora; the Central Glass & Ceramic Research Institute, Calcutta; the Central Food Technological Research Institute, Mysore; the Central Drug Research Institute, Lucknow; the Central Leather Research Institute, Madras; the Central Building Research Institute, Roorkee; the Road Research Institute, New Delhi; the Central Salt Research Institute, Bhavnagar; the National Botanic Gardens, Lucknow; the Electronics Engineering Research Institute, Pilani; the Central Institute for Biochemistry & Experimental Medicine, Calcutta; the Central Mining Research Station, Dhanbad; the Central Electro-Chemical Research Institute at Karaikudi—these institutes are concerned with problems of specific industries which are rapidly developing in the country.

The Council has decided to set up laboratories devoted to the problems of particular regions. It has taken over the Hyderabad Central Laboratories and converted it into a Regional Research Laboratory. The Council is planning to set up similar laboratories in other parts of the country.

The following laboratories are in the process of establishment:

Central Mechanical Engineering Research Institute at Calcutta; Research Station for the utilization of Sambhar bitterns.

The Council of Scientific and Industrial Research encourages the formation of co-operative research associations for the purpose of conducting research for industry by industry. Where recognition is given Government may make a money grant. Examples of industries which have set up such associations are:

Ahmedabad textiles (Ahmedabad Textile Industry's Research Association), the silk and art silk mills of Bombay, the jute mills of Calcutta, the Shri Ram Institute for Industrial Research, and the Coimbatore textiles (The Southern India Textile Research Association).

The Department of Atomic Energy was constituted by the Government of India in 1954 with Bombay as its headquarters.

Research on atomic energy for peaceful purposes is conducted in the laboratories of the Department of Atomic Energy, the Tata Institute of Fundamental Research, Indian Cancer Research Centre, Bombay, and also at the universities.

The Department of Atomic Energy also looks after the Indian Rare Earths Ltd., located at Alwaye in Kerala State for processing monozite. A factory is also due to start working in Bombay for extracting uranium and thorium from the waste thrown up by the Alwaye works\*. Some of the rare earth salts produced by this plant will be used by the gas mantle industry. The first atomic reactor designed and built by Indian scientists and engineers has been in operation since Aug. 4, 1956. This reactor combines both experimental facilities for pure research as well as shielding studies for power resources.

The Department of Atomic Energy finances cosmic ray research at various universities, and especially at the following institutions: Institute of Nuclear Physics, Calcutta; Bose Institute, Calcutta; Physical Research Laboratory, Ahmedabad.

### MEDICAL RESEARCH

Medical Research is conducted chiefly under the auspices of the Indian Council of Medical Research, New Delhi. The Council also grants research fellowships. There is a Scientific Advisory Board which deals with technical questions and publishes reports of research carried on at the centres under its charge.

The Council spent about Rs. 30 lakhs on research in 1956-57. In 1957-58 it is due to spend Rs. 78 lakhs.

Some of the more important institutions where medical research is conducted are:

Malaria Institute of India, Delhi; Central Research Institute, Kasauli, Punjab; All India Institute of Hygiene and Public Health, Calcutta; King Institute, Guindy, Madras; School of Tropical Medicine, Calcutta; Haffkine Institute, Bombay (plague, snake venom); Nutrition Research Laboratories, Coonoor; Seth G. S. Medical College, Bombay; Central Malaria Laboratory, Public Health Department, Madras (for D.D.T.); Indian Veterinary Research Institute, Mukteswar-Kumaun, U.P.; University College of Science and Technology, Calcutta; National Chemical Laboratory, Poona (for dietary protein); Presidency College, Calcutta (for nicotinic acid); Department of Chemical Technology, University of Bombay, Bombay (for B vitamins); Indian Dairy Research Institute, Bangalore; University Biochemical Laboratory, University of Madras, Madras; Medical College, Baroda (for physiological reactions to Indian foods); Presidency College, Calcutta (for vitamin A); Safdarjung Hospital, New Delhi (for effects of malnutrition); M. G. M. Medical College, Indore (for riboflavin and thiamine); Institute of Science, Bombay; Assam Medical College, Dibrugarh (for caloric needs of persons of different occupations); College of Nursing, New Delhi (nutrition of mothers and

infants); M. S. University, Baroda; Tata Memorial Hospital, Bombay (leprosy); Christian Medical College, Vellore (leprosy); Aoworth Leprosy Home, Bombay; Victoria Leprosy Hospital, Dighpal; Government Silver Jubilee Children's Clinic, Saldapet, Madras (for leprosy); Central Drug Research Institute, Lucknow (pituitary gland); S. N. Medical College, Agra (pulmonary diseases, skin diseases and liver); Medical College, Amritsar (diabetes); King George's Medical College, Lucknow (lymphoid tissue); S. O. B. Medical College, Cuttack (allergy); Lady Hardinge Medical College, New Delhi; Sawal Man Singh Medical College, Jaipur; Office of Director of Public Health, Madras (infant mortality); Chittaranjan Cancer Hospital, Calcutta; N. R. Sarkar Medical College, Calcutta (anaemias of pregnancy); Topiwala National Medical College, Bombay (abortions); Stanley Medical College, Madras (toxemia of pregnancy); Grant Medical College, Bombay (polio); Pasteur Institute, Coonoor (influenza and rabies); Drug Research Laboratory, Jammu (indigenous drugs); Virus Research Centre, Poona; Indian Cancer Research Centre, Bombay.

The Chest Institute of Delhi University may also be mentioned here.

The Laboratories are: B.C.G. Vaccine Laboratory (Guindy, Madras); Central Drugs Laboratory (Calcutta); Serologist Laboratory (Calcutta); Central Research Institute (Kasauli).

### RESEARCH IN HUMANITIES

Anjuman-I-Islam Urdu Research Institute, Hornby Road, Bombay 1; Bangiya Sahitya Parishad, 243-1 Upper Circular Road, Calcutta; Bhandarkar Oriental Research Institute, Poona; Bharatiya Itihasa Samshodhaka Mandal, Sadashiv Peth, Poona; Bharatiya Vidya Bhawan, Chowpatty, Bombay; B. J. Institute of Learning and Research, Bhadra, Ahmedabad; B. M. Institute of Child Development, Pharmacy College, Navrangpura, Ahmedabad; Bureau of Psychology, Allahabad; D. A. Memorial Institute, c/o. Bharatiya Itihasa Samshodhaka Mandal, Poona; Deccan College of Post-Graduate and Research Institute, Poona; Department of Anthropology, Indian Museum, 27 Chowringhee Road, Calcutta; Department of Archaeology, Ministry of Education, New Delhi; Department of Historical and Antiquarian Studies, Gauhati; Ganganath Jha Research Institute, Allahabad; Gokhale Institute of Politics and Economics, Poona; Hindi Vidya Pith, Deoghar, Bihar; Indian Institute of Education, 11 Horniman Circle, Bombay; Indian Institute of Philosophy, Amalner, East Khandesh, Bombay; Kannada Research Institute, Dharwar; K. P. Jayaswal Research Institute, Patna; K. B. Cama Oriental Institute, 136 Apollo Street, Bombay; Kuppaswami Sastri Research Institute, Mysore; Mandir Vidya Pith, Bhawalpur, Bihar; Marathi Samshodhan Mandal, Mumbai Marathi Granth-sangrahalaya, Thakurdwar, Bombay; Mithila Institute of Post-Graduate Studies and Research in Sanskrit Learning, Darbhanga, Bihar; Nalanda Pali Institute, P.O. Nalanda, Patna; National Archives of India, Ministry of Education, New Delhi; Oriental Research Institute, Mysore; Rajasthan Vidyha Vidya Peeth, Udaipur; Rajwade Samshodhan Mandal, Dhulla, Bombay; Scindia Research Institute, Ujjain; Shri G. K. Institute of Rural Education, Gargoti, Kolhapur Dt., Bombay; The Asiatic Society, 1 Park Street, Calcutta; Vachana Mantapa (Kannada Research Institute), Belgaum; Venkateswara Research Institute, Tirupati; Vaidika Samshodhana Mandal, Tilak Memorial, Poona; Vaisali Prakrit Institute, Muzaffarpur; Vishveshvaranand Research Institute, Hoshiarpur, Punjab.

\* The plant has now been set up.

## CIVIL AVIATION

**ALLOTMENT** under the Second Five-Year Plan, Rs. 43 crores.

Compensation to former air companies Rs. 6-16 crores.

Part of the compensation has been paid in cash, and the balance has been paid in the form of bonds redeemable at the end of five years.

The budget estimates for 1956-57 for the Civil Aviation Department were: Revenue Expenditure: Rs. 3.78 crores; Capital Expenditure: Rs. 3.25 crores; Revenue from landing, etc. at civil aerodromes: Rs. 67 lakhs.

India's air transport services were nationalized by an Act of Parliament called the Air Corporations Act, 1953 which received the President's assent on May 28, 1953. The Act came into force on August 1, 1953.

The internal air services and services to neighbouring countries are now managed by a corporation called Indian Airlines Corporation, and the external services by Air-India International Corporation. According to the Act the number of members of a Corporation cannot be less than five and not more than nine. Each of the Corporations has a general manager. In the case of Indian Airlines Corporation the Chairman exercises the functions of the General Manager also.

The Central Government has authority to give the Corporations directions about opening a new transport service, closing an existing service, or other changes in schedule. At the end of a financial year the Corporations must present a report to the Central Government which will be laid before Parliament.

Private agencies can use aircraft for purposes of instruction, rescue or relief, air survey, fire fighting, crop dusting, locust control or for providing joy rides.

An Air Transport Council has been established for discussing certain points of common interest to different departments.

An Advisory Committee for each Corporation may also be appointed.

A Labour Relations Committee for each Corporation consisting of representatives of the Corporation and of employees, was formed early in 1956. The Committee has been formed in such a way that the representatives of employees are not less than the representatives of the Corporation. This Committee will give advice to the Corporation on matters of labour.

On August 1, 1953 when the Indian Airlines Corporation started functioning, it took over all the services operated by the internal airlines in the country on that date.

The names of the then existing air companies taken over by the Indian Airlines Corporation as mentioned in the Act are:

The Air India Ltd.; The Air Services of India Ltd.; The Airways (India) Ltd.; The Bharat Airways Ltd.; The Deccan Airways Ltd.; The Himalayan Aviation Ltd.; The Indian National Airways Ltd.; The Kalunga Airlines.

The Air-India International Corporation took over the Air-India International Ltd.

### INDIAN AIR LINES CORPORATION

Operating a total mileage of 23,600 miles the Corporation's services extend to the entire Indian Sub-Continent including Afghanistan, West Pakistan, Nepal, East Pakistan, Burma and Ceylon.

Most of the important cities, centres of trade and industry are now linked by air, and expansion now means intensification of traffic on the existing routes.

The members of the Indian Airlines Corporation (Thapar House, New Delhi) are:

Shankar Prasad, I.C.S. (Chairman), J. R. D. Tata, M. L. Khaitan, Michael John, B. N. Jha, I.C.S. (Secy., Min. for Communications), S. D. Nalgolwala, I.C.S., L. C. Jain, I.C.S. (Dir.-Genl., Civil Aviation), Air Marshal S. Mukerji, Commandant General M. J. B. Maneckji.

The operations of the Corporation have been divided into three Areas, namely Delhi, Bombay and Calcutta. Each Area is under the charge of an Area Manager who is responsible to the Chairman for the proper administration and co-ordination between different departments in the Area. The Headquarters Office of the Corporation has, besides the Chairman, Departmental Heads.

Indian Airlines Corporation had to tackle the problem of the integration of the personnel, workshop facilities etc. They also purchased 8 Heron Aircraft for developing feeder services.

The Corporation had taken over 3 Skymaster Aircraft from the ex-airlines Companies.

In order to promote greater safety and to increase the capacity on the night air mail services, the Corporation acquired 3 more Skymasters. The Corporation have also placed an order for 10 Vickers Viscount Aircraft. Five of these were due to be delivered in the middle of 1957 and the other 5 early in 1958.

Indian Airlines Corporation introduced a scheduled service between Srinagar and Leh on a frequency of once a week with effect from 16th April, 1956. This service was however, suspended from 4th December, 1956 because of bad weather during the winter season.

An additional non-stop service between Delhi and Srinagar was also introduced on a frequency of two times a week from 10th May to 31st July, 1956 to meet the tourist traffic demand.

The frequency of Delhi-Amritsar-Kabul service was increased from once to twice weekly.

The present total fleet consists of 92 aircraft composed of the following: D.C.-4 Skymaster 6; Vickers Viking 12; De Havilland Herons 8; Douglas DC-3: 66. In addition 10 Viscounts are on order, the delivery of which is expected to start from the middle of 1957.

The Viscounts are to operate trunk routes. The provision in the budget estimates for 1956-57 for the purchase of these aircraft is Rs. 178.91 lakhs. Cost of each: Rs. 40 lakhs.

The crew strength of the Indian Airlines Corporation is 1.7 Commanders and 76 Co-pilots.

The loss incurred by I.A.C. in 1955-56 was Rs. 119.40 lakhs as against Rs. 90.15 lakhs in 1954-55.

The following is the list of officers working at the Headquarters and areas of the Indian Airlines Corporation —

### Headquarters

Chairman, Shankar Prasad, I.C.S.  
Financial Comptroller, J. S. Parakh.  
Secretary, Y. N. Varma

Chief Operations and Training Master, Capt. J. A. Chittambar

Chief Traffic Manager, J. M. Gupta.  
Engineering Manager, T. D. Kumar.

Chief Public Relations Officer, Sumeshwar Dayal.  
Controller of Purchases, Stores and Supplies, C. L. Kejriwal.

### Delhi Area

Area Manager, Jagdish Prasad.  
Operations Manager, Capt. Hulligol.  
Traffic Manager, H. E. Daruwala.  
Chief Engineer, R. S. Bahadur.  
Chief Accounts Officer, M. V. Row.

### Bombay Area

Area Manager, Capt. G. O. Arya.  
Operations Manager, Capt. Balbir Singh.  
Traffic Manager, C. L. Bajaj.  
Chief Engineer, H. M. Wadia.  
Chief Accounts Officer, N. V. Chalam.

### Calcutta Area

Area Manager, Capt. J. M. Engineer.  
Operations Manager, R. G. Patwardhan.  
Traffic Manager, L. R. Nair.  
Chief Engineer, H. J. Mull.  
Chief Accounts Officer, S. C. Roy.

### AIR-INDIA INTERNATIONAL

Air-India International Corporation took over from the predecessor Company 4 Constellation Aircraft. One of these was lost in the South China Seas in April 1955.

The Corporation, since nationalisation, have acquired 6 Super-Constellation Aircraft and two such aircraft are on order. These were expected to be delivered by the end of 1956 or early in 1957.

The Corporation have stepped up the frequency of their services to U.K. to 7 times a week (daily) and to Nairobi twice a week.

The frequency of the service to Prague has been stepped up to two a week.

They have also started new services on (i) Bombay-Calcutta-Bangkok-Hongkong-Tokyo and (ii) Bombay-Madras-Singapore routes. The latter service was later extended to Sydney, Australia.

The members of the Air-India International Corporation (New India Assurance Bldg., Bombay 1) are:

J. R. D. Tata (Chairman), Shankar Prasad, I.C.S., K. C. Mohindra, Michael John, B. N. Jha, I.C.S., L. C. Jain, I.C.S., Air Marshal S. Mukerji, B. R. Patel, I.C.S. (Vice-Chairman and General Manager), R. N. Gundli, Secretary

### Principal Executives:

Chairman J. R. D. Tata.  
Vice-Chairman & General Manager B. R. Patel, I.C.S.  
Traffic Manager S. K. Kooka  
Technical Director A. C. Gaudar  
Controller of Accounts N. J. Pavri  
Controller of Stores & Purchases A. M. Kolkar.  
Secretary R. N. Gundli  
Executive Asst. to General Manager P. N. Patwardhan.  
Personnel Officer A. S. Banawalikar.

No. of Personnel: 3,590

Unduplicated route mileage: 19,007.

Fleet Three 740 Constellations.  
Two 1049-G Super Constellations.  
Three 1049-E Super Constellations.  
One 1049-G Super Constellation.  
One DC-3C Freighter  
Two 1049-G Super Constellations under order.

Traffic Headquarters: 4th Floor, Bank of India Building, Mahatma Gandhi Road, Fort, Bombay-1. Cable: AIRINDIA

Not profit for the year ending March 31, 1956: Rs. 3.78 lakhs.

### FACTS AND FIGURES (1956)

Some basic facts of the Indian Airlines Corporation for 1956 are as follows:

Service	Route Miles	Hours Flown	Miles Flown	Passengers Carried	Freight Carried lbs	Mail Carried lbs
Scheduled Services	—	136,700	23,418,000	538,000	97,554,000	12,141,000*
Night Air Mail Services	—	—	—	54,300	2,950,500	4,011,000
Non-Scheduled Services	—	30,100	5,012,000	107,800	72,018,000	—

## AIRCRAFT

There were 545 aircraft of different types registered in India on the 1st July 1956 of which 216 held current Certificates of Airworthiness.

As already mentioned, of the 545 aircraft 12 were owned by Air-India International and 92 by Indian Airlines Corporation.

## AERODROMES

There were 82 aerodromes maintained and operated by the Civil Aviation Department at the end of 1956.

The following aerodromes (8) are classed as International Aerodromes:

Bombay Airport (Santa Cruz); Calcutta Airport (Dum Dum); Delhi Airport (Palam).

The following aerodromes (8) are classed as Major Aerodromes:

Agartala (Tripura); Ahmedabad; Begumpet (Hyderabad); Delhi (Safdarjung); Gauhati; Madras (St. Thomas Mt.); Nagpur; Tiruchirappalli.

The following aerodromes (83) are classed as Intermediate Aerodromes:

Allahabad; Amritsar; Aurangabad (Bombay); Bagdogra (West Bengal); Balurghat (West Bengal); Banaras; Baroda; Belgaum; Bhavnagar; Bhopal; Bhubi (Kutch); Bombay (Juhu)\*; Chandigarh; Coimbatore; Cooch-Behar; Cuttack (Bhubaneswar)\*; Gaya; Indore; Jaipur; Junagadh (Keshod)\*; Kumbhirgram; Lucknow (Amausi)\*; Madurai; Mangalore (Bajpe)\*; Mohanbari (Assam); Patna; Porbandar (Bombay); Rajkot; Rupsi; Tezpur (Assam); Trivandrum; Vijayawada; Vishakhapatnam.

The following aerodromes (38) are classed as Minor Aerodromes:

Akola; Asansol; Bareilly; Belonia (Assam); Bilsapur; Chakulia (Bihar); Cuddappah (Andhra); Donakonda (Madras); Gorakhpur (Kusmti)\*; Jhansi; Jharsuguda (Orissa); Jubbulpore; Kailashahar (Assam); Kamalpur (Assam); Kanpur (Civil) (Uttar Pradesh); Khandwa; Khawal (Assam); Kolhapur; Kotah (Rajasthan); Lalitpur (U.P.); Manipur Road (Assam); Mysore; North Lakhimpur (Assam); Palanpur (Deesa) (Bombay); Pasighat (Assam); Panagarh; Raipur; Rajahmundry; Ramnadi; Ranchi; Saharanpur (U.P.); Sheila (Assam); Sholapur; Tanjore; Udaipur; Vellore; Warangal; Muzaffarpur (Kewahat)\*.

The new aerodromes at Kandla and Udaipur (Dabok) are nearing completion. The work in connection with the construction of new aerodromes at Raxaul, Jogbani (Bihar), Haldwani (U.P.), Tullhal (Manipur), Malda (West Bengal), and Hubli (Mysore) was in various stages of progress at the end of 1956.

Eight new aerodromes are to be constructed during the Second Plan; at Calcutta, Hubli Shillong, Nowgong, Ratnagiri, Bhagalpur, Behalia, Kozhikode.

## AIR TRAINING

There were 12 flying clubs centrally subsidized at the end of 1955—Delhi, Bombay, Madras, Barrackpore, Patna, Bhubaneswar, Nagpur, Jullundur, Jaipur, Lucknow, Bangalore, Indore.

These flying clubs trained 134 'A' and 25 'B' pilots in 1955. On 31st Dec. 1955 there were 278 trainees for 'A' Licence and 9 for 'B' undergoing training.

The number of aircraft on charge on July 1, 1956 was 117; 32 belonged to the Government and 85 to the clubs.

The number of pilots employed was 33, aircraft maintenance engineers 33, mechanics 135.

The aircraft flew 1,263 hours and 55 minutes in June 1956.

There were two gliding clubs in 1955—the Delhi Gliding Club and the Government Gliding Centre, Poona. The Poona Centre trained 76 Gliding pilots in 1955.

Two Government Gliding Clubs, one at Allahabad and the other at Bangalore started functioning in 1956.

The number of gliders on charge on July 1, 1956 was 21, all of which belonged to the Government of India.

The total subsidy granted to flying and gliding clubs in 1955-56 was Rs. 18,72,205. Under the free flying scholarship scheme 50 scholarships were awarded to trainees at flying Clubs during 1955-56. Training was imparted upto 50 hours free of cost to the trainees. Another 50 scholarships were awarded during 1956-57.

The Civil Aviation Training Centre at Allahabad opened in 1948 trains commercial II class navigators' pilots, aircraft maintenance engineers, aerodrome control officers and operators, radio operators and technicians.

Facilities for training in flying, aircraft engineering, communications and air traffic control available at the Civil Aviation Training Centre, Allahabad comprise the following four wings, viz:—

(1) Flying School; (2) Aerodrome Training School; (3) Engineering School; (4) Communications School.

In addition a Repair and Overhaul Organisation is also attached to the Centre for carrying out repairs and overhaul of the Centre's aircraft.

At the end of 1955, 107 trainees were under training at the Centre.

The Centre has acquired the reputation of being the best of its kind in the East.

The aeronautical telecommunications service of the Civil Aviation Department came into existence in 1948. At the end of 1956 there were 76 stations.

The aeronautical communication stations provide facilities for air/ground communication, radio aid to navigation, point to point communications and Met broadcasts for the benefit of aviators.

The facilities include up-to-date radio navigational aids and communication facilities, electronic aids, such as very high frequency automatic visual direction finding equipment, standard instrument landing system, airfield control radar, radar responder equipment of the Eureka Mark VII type, long range high frequency radiotelephone air ground channels and radio-tele-typewriter fixed telecommunication circuits.

For purposes of organization, India has been divided into four regions (Bombay, Calcutta, Delhi, Madras), each under the charge of a Controller of Communication, who is responsible for the maintenance and operation of the communication stations in his region.

The communication organisation has the following ancillary units:—

The Radio Construction Unit; The Radio Development Unit; The Radio Stores Depot. A Research and Development organization was created in April 1946.

In 1949, a research and test laboratory forming an essential part of this organization and known as "Technical Centre" was established in New Delhi. All research and development activities are centred in this establishment, which is staffed and equipped for the purpose.

The need for aircraft manufacturing was keenly felt immediately on the outbreak of the war and the Hindustan Aircraft Company was established in the year 1940. Aircraft, aero-materials, accessories and parts are now being manufactured in the country.

India is a member of the International Civil Aviation Organization and has been elected to its Council.

## AIR AGREEMENTS

India has entered into bilateral air agreements with the following 14 countries on the dates shown against each:—

France .. .. .	16-7-1947
Sweden .. .. .	21-5-1948
Pakistan .. .. .	23-6-1948
Ceylon .. .. .	21-12-1948
Switzerland .. .. .	24-6-1949
Australia .. .. .	11-7-1949
The Philippines .. .. .	20-10-1949
Netherlands .. .. .	24-5-1951
U.K. .. .. .	1-12-1951
Afghanistan .. .. .	26-1-1952
Egypt .. .. .	14-6-1952
Japan .. .. .	26-11-1955
U.S.A. .. .. .	3-2-1956
Thailand .. .. .	12-6-1956

The Agreement with Sweden is not operative at present.

Arrangements under temporary authorizations for the operation of scheduled air services exist with Italy, Burma, Norway, Denmark, Iran, Iraq, Sweden, Nepal, Indonesia and West Germany.

An air agreement with China was under negotiation at the end of 1956.

## NATIONALIZATION

Authorized capital of the companies taken over .. ..	Rs. 21,40,71,429
Paid-up Capital .. .. .	Rs. 6,97,33,549
Total staff .. .. .	9,500
Govt. loan to Air India International at 4½ per cent interest .. .. .	Rs. 25 lakhs
Govt. loan to Deccan Airways at 4½ per cent interest .. ..	Rs. 10.5 ..
